SECOND EDITION

Effective March 1, 2024 – August 18, 2024

© Fairfax University of America

4401 Village Drive Fairfax, VA 22030 (703) 591-7042

<https://www.fxua.edu/>

Administrative Notice

The purpose of this Academic Catalog (or “Catalog”) is to present academic programs and services, and those policies, procedures, and regulations of the university that are likely to apply to our learning community. The Catalog is reviewed monthly and published annually. The university may publish other manuals or handbooks that define further policies or resources related to their specific units. In the event of any discrepancies between these various handbooks relating to issues of student and academic services, the policies and procedures stipulated in the most recent edition of the Catalog (including any associated addenda) shall supersede the statements mentioned in others.

All students, staff, and faculty are required to read, understand, and follow the requirements as outlined in the Catalog. This includes institutional policies, programmatic requirements, and provisions outlined herein.

Limitations on Catalog Provisions

This Academic Catalog is current as of the time of printing. From time to time, it may be necessary or desirable for FXUA to make changes to the Academic Catalog due to the requirements and standards of the university's accrediting body, state licensing agencies, the US Department of Education, and market conditions, among other reasons. The University publishes an online version of the Academic Catalog, which is the most up to date version and supersedes any printed version as it includes all subsequent addenda. As changes to the Catalog are warranted between editions, the online version is updated throughout the academic year. The online version of the catalog (current and former) can be found here: <https://www.fxua.edu/academics/registrars-office/academic-catalog/>.

University officials reserve the right to make changes to any provision of the Academic Catalog, including the amount of tuition and fees, academic programs and courses, university policies and procedures, faculty and administrative staff, the Academic Calendar and other dates and provisions. University officials reserve the right to make changes in equipment, instructional materials, modify curricula, and when size and curriculum permit, to combine classes.

Publication Information

The Academic Catalog is published at least annually, with the first edition of the new catalog published to correspond with the new Academic Year starting in the Fall semester. The Office of Institutional Effectiveness maintains the catalog and is responsible for its contents at the university. The Office of Institutional Effectiveness should be contacted for information concerning any such changes. If any error, mistake, or clear discrepancy with state and federal laws is found, contact the Office of Institutional Effectiveness, which welcomes any suggestions regarding how to improve institutional policies and procedures to conform to recognized educational standards. Any department or university body may request changes to occur to the Academic Catalog by emailing oie@fxua.edu including the original content with new language underlined, and deleted language struck out. Changes will be added as an addendum to the Catalog, which serves as a public notice, and will be published on the university website.

Fairfax University of America reserves all rights over the content of the catalog, and no part of this catalog and/or its materials may be reproduced in any form by any means without prior written consent.

Mission Statement

Fairfax University of America's mission is to provoke principled and transformative leadership based on peace and security, global communities, character, stewardship, and development.

1. GENERAL INFORMATION

1.1 Introduction & History

The university was founded in 1998 as a non-profit 501(c)(3) university in the Washington, DC area to provide quality, affordable education that prepares students for relevant and meaningful careers. Today students from all over the world choose to pursue their education at the university in a variety of different degree and non-degree programs at the undergraduate and graduate levels. The location of the university, outside of Washington, DC, makes it a prime location for students interested in studying in these fields, providing many opportunities for experiences outside of the classroom to enrich their learning experience.

The University's Timeline

Below are some historical milestones achieved by Fairfax University of America:

University Founding 1998-2006

The university was first certified to operate in Virginia by the State Council of Higher Education of Virginia (SCHEV) in 1998. At its founding, the first programs offered by the university included the Master of Business Administration (MBA) Program, as well as its English as a Second Language program. In 1999, the university was incorporated as a non-profit corporation and obtained tax exemption as a 501(c)(3) non-profit organization by the US Internal Revenue Service (IRS). The university received authorization to offer diploma and certificate programs in business and computer science by SCHEV in 1999. In 2000, the university was granted permission to issue I-20s for F-1 and M Visa applicants from the Immigration and Naturalization Service. Also in 2000, the university opened two undergraduate degree programs: the Bachelor of Science in Business Administration and the Bachelor of Science in Computer Science. In 2003, the university was authorized by SCHEV to offer its second master's program: the Master of Science in Information Systems. The university held its first commencement on May 4th, 2006 with 20 graduates in attendance.

Coming Into Focus 2008-2014

In 2008, the university was granted accreditation from the Accrediting Council for Independent Colleges & Schools (ACICS). In 2008, a third master's degree program was added: the Master of Science in Computer Science. On April 23rd, 2008 the Virginia General Assembly House Joint Resolution Committee presented the university with a letter commending the university "on the occasion of its accreditation and 10th anniversary." In 2011, the university successfully received ACICS re-certification in December. In 2014, four new programs were opened including the MS in Accounting, the MS in Project Management, and a graduate certificate in Project Management.

In 2015, the university opened its new campus at 4401 Village Drive, Fairfax. In May 2016, the university successfully received renewal of ACICS accreditation.

Moving Forward 2019-Present

Fairfax University of America experienced positive transformation and maturation in 2019. From 2019, the university emerged into a new and exciting phase in its history. The Board of Trustees decided that on January 1, 2020, the university's name would formally change to Fairfax University of America (FXUA). The name change was representative of the institution's history in the Fairfax, Virginia area, where the campus has been rooted since its founding. As a university, FXUA was poised to move forward and create its new future representing its maturity, accessibility, and excellence reflected in its mission. The next chapter in the university's history is yet to be written.

1.1.1 Symbols and Iconography

1.1.1.1 University Iconography

The university's shield has five stars representing the five values of Peace, Community, Stewardship, Character, and Human Development. The entire learning community, including its alumni, serve as positive changemakers who foster and defend these values in their studies and professional careers.

These values provide the basis for all that we do at the university:

- **Character:** The expectation that all leaders should make brave decisions in good faith and in a principled way.
- **Community:** A sense of belonging to something bigger than ourselves - be it global, national, or local.
- **Development:** The process by which we reach our potential, as human beings and societies.

- **Stewardship:** A sense of responsibility and care towards all people and things that depend on us.
- **Peace:** The foundations on which we build collective prosperity, healthy communities and human fulfillment.

At the graduation ceremony, the Book of Knowledge represents the learning that takes place at FXUA in students' studies, but it also represents the continued learning that is expected of well-rounded individuals throughout their lives.

The Globe represents the university's focus on empowering its learning community and educating future leaders who will be positive changemakers across the globe. Whether making local impacts that improve the lives within a single community, or having a wider impact, our graduates serve inspiration for innovation aimed at improving lives.

The university's official mascot is the Tiger. The tiger can be seen at nearly all official university events.

1.1.1.2 University Colors

The university colors are blue and red.

- Blue symbolizes the university's long tradition of welcoming students from far and wide who cross the oceans to study at FXUA. Whether coming from just around the block or from countries across the globe, our student body represents an internationally minded community that is both diverse and welcoming.
- Red symbolizes the power and strength that education can provide to empower leaders of positive change. The diversity on campus and in the curricular offerings provide graduates with varied experiences and professional connections that last them throughout graduates' professional careers.

1.1.1.3 Alma Mater

*At Fairfax University of America,
We come from across the seven seas,
At Fairfax University of America,
For friendship and opportunities.*

*We must always be true
Dear alma mater
Our school with your heart
And your mission.*

*For wherever we go,
The world will know,
We come from your
Bountiful tradition.*

*At Fairfax University of America,
Forever we hold you in our hearts.
Yes, Fairfax University of America,
To your honor we'll always be true.*

1.2 Mission Statement and Philosophy

Mission Statement

Fairfax University of America’s mission is to provoke principled and transformative leadership based on peace and security, global communities, character, stewardship, and development.

Vision Statement

FXUA envisions a world that fulfills its potential and in which people and nations can thrive.

Our vision is inspired by a holistic view of the world, one that recognizes human interconnectedness and aims to achieve harmony and balance. We see a universal connection among people based on core principles regardless of race, color, origin, ethnicity or anything else.

1.3 University Learning Outcomes

Upon graduation from Fairfax University of America, students will be able to:

- Employ critical thinking and evidence-based reasoning to design creative, strategic solutions to complex real-world issues.
- Communicate effectively with diverse audiences and collaborate productively with multiple stakeholders to lead teams toward the realization of shared goals.
- Demonstrate leadership skills and competencies to sustainably lead organizational change for social impact.
- Contribute to the betterment of human society as global citizens and agents of change and empowerment, exemplifying the values of character, community, development, stewardship, and peace.

Fairfax University of America pledges to:

- Create high quality, in-demand, affordable distance education programs that support the mission and afford to achieve institutional outcomes.

1.4 A Commitment to Diversity and Inclusion

Our learning community has a longstanding commitment to diversity and inclusion. We strive to promote an environment that is understanding and accepting of different viewpoints, abilities, and backgrounds. As a community made up of many “multi-”statements (multilingual, multicultural, multinational, etc.), we believe that our diversity brings us to a better understanding of the world around us in a way that mirrors the wider global community and experiences around the world. Therefore, we are a learning community dedicated to fostering and leveraging the diversity of our members, and all individuals are expected to uphold this commitment.

1.5 Certification and Membership

1. FXUA is certified to operate in Virginia by the State Council of Higher Education for Virginia (SCHEV).

101 North 14th St.
James Monroe Building
Richmond, VA 23219
www.schev.edu

2. FXUA is authorized by the United States Immigration and Customs Enforcement (ICE) to enroll non-immigrant students.

500 12th St., SW
Washington, D.C. 20536
www.ice.gov

3. FXUA is a member of the International Association of Universities.

1 rue Miollis – F.75732
Paris cedex 15

1.6 Schools and Programs Offered

All of the programs listed within this catalog are included within the university’s certificate to operate from the State Council of Higher Education for Virginia (SCHEV). The university’s academic units are organized into schools of study.

School of Business (SB)

Master of Business Administration (MBA) with specializations in:

- Business Analytics
- Social Innovation and Sustainable Business
- Organizational Development
- Human Resource Management
- Business Optimization

MS in Project Management (MSPM)

BS in Business Administration (BSBA) with specializations in:

- Business Analytics
- Social Innovation and Sustainable Business
- Organizational Development and Human Resources
- Business Optimization

School of Computer Information Systems (SCIS)

MS in Artificial Intelligence and Machine Learning (MSAIML)

MS in Data Analytics (MSDA)

MS in Networking and Cybersecurity (MSNCS)

BS in Computer Science (BCS) with specializations in:

- Artificial Intelligence and Machine Learning
- Networking and Cybersecurity
- Data Science

1.7 Governance

Fairfax University of America is a private non-profit 501(c)(3) university governed by its Board of Trustees. The main function of the Board of Trustees, as mandated in the by-laws, is two-fold: to develop policies for the advancement of the university and to support the president of the university in the implementation of those policies. In addition, the Board of Trustees provides guidance, monitoring, and assistance to the President of the university in fundraising, public affairs, and building key alliances to assist in and support the growth of the university.

The current Board of Trustees includes:

Hisham Y. Altalib, Ph.D..... Chairman
 Ahmed Alwani, Ph.D. President
 Anas S. Al-Shaikh-Ali, Ph.D..... Trustee
 Mohammed Bedi Ould Ahmed, Ph.D. Trustee
 Sherif A. Nasr, M.D. Trustee

Article II, Section 1, of the university bylaws provides general powers to the Board of Trustees. It states, “*All Corporate Powers shall be exercised by or under the authority of, and the business and affairs of the corporation shall be managed under the direction of, its Board of Trustees, in accordance with the purposes and subject to any limitations set forth in the articles of incorporation.*”

1.8 Senior Administrators

Staff Name	Title
Ahmed Alwani, Ph.D.	President
NS Hasan, J.D.	Executive Dean of Academic Programs and Administration

1.9 Full-Time Faculty

Name	Degrees Earned	Specialty
Dr. Mayyada Al Hammoshi	Ph.D. in Computer Science, Mosul University, Mosul, Iraq M.S in Computer Science, Mosul University, Mosul, Iraq M.B.A, American College of Commerce & Technology, Falls Church, VA B.S in Computer Science, Mosul University	Computer Science

Dr. Halil Atabay	Ph.D. in Microbiology, University of Bristol, UK	Microbiology
Dr. Zelalem Chala	Ph.D. in Economics, Virginia Polytechnic and State University, Blacksburg, VA M.S. in Agricultural Economics, Oklahoma State University, Stillwater, OK M.S. Data Analytics, Southern New Hampshire University, Manchester, NH	Economics and Business Analytics

1.10 Program Chair Directory

Program of Study	Advisor	Email
General Education	Halil Atabay, Ph.D.	hatabay@fxua.edu
BS in Business Administration	Zelalem Chala, Ph.D.	zchala@fxua.edu
BS in Computer Science	Mayyada Al Hammoshi, Ph.D.	mhammoshi@fxua.edu
Master of Business Administration	Zelalem Chala, Ph.D.	zchala@fxua.edu
MS in Artificial Intelligence and Machine Learning	Mayyada Al Hammoshi, Ph.D.	mhammoshi@fxua.edu
MS in Data Analytics	Mayyada Al Hammoshi, Ph.D.	mhammoshi@fxua.edu
MS in Networking and Cybersecurity	Mayyada Al Hammoshi, Ph.D.	mhammoshi@fxua.edu
MS in Project Management	Zelalem Chala, Ph.D.	zchala@fxua.edu

1.11 Adjunct Faculty

Name	Degrees Earned	Specialty
Dr. Theresa Poussaint	DM, University of Maryland, Management MBA, University of Maryland, Business Administration BS, University of Maryland, Communication Studies	Business Management
Dr. Rhonda Thomas	Ph.D., Capella University, Management and Leadership MS, University of Maryland, Information Technology BS, University of Maryland, Information Systems Management	Business Management
Dr. Fouad Moumen	Ph.D. Florida State University, Statistics MS, University of Waterloo, Mathematics MS, University of Cairo, Applied Statistics BS, University of Cairo, Statistics	Mathematics/Statistics
Dr. Victoria Ashiru	DM, University of Maryland, International Operations Management MS, University of Maryland, HR Management BS, University of Maryland, Information Systems Management	HR and Operational Management
Dr. Hammad Elbedour	Ph.D., University of Phoenix, Organizational Management MS, University of Minnesota, Computer Science	Computer Science
Amir Tofighi	MS, Heriot -Watt University, Information Systems GC, George Mason University, Cybersecurity	Computer Science
Dr. Mohamed Morsy	DS, George Washington University, Electrical Engineering MS, Assiut University, Electrical Engineering	Computer Science
Dr. Quamar Munawer	Ph.D., George Mason University, Information Technology MS, George Mason University, Computer Science	Computer Science
Dr. Marietta Bradinova	Ph.D., Indiana University of Pennsylvania, English MA, George Mason University, Linguistics/TESOL Certificate	English

Dr. Terry Camden	Ed.D., George Washington University, Organizational/Human Studies MSA, George Washington University, Accounting MBA, George Washington University, Finance	Accounting/Finance
Dr. Ademola Asaya	DM, Colorado Technical University, Organizational Development MBA, University of Phoenix, Technology Management BS, University of the District of Columbia, Applied Information Systems BS, University of Liberia, Zoology/Chemistry	Project Management
Dr. Faleh Alshameri	Ph.D., George Mason University, Information Technology MS, American University, Information Systems BS, Kuwait University, Computer Science	Computer Science
Dr. Mohamed Kariburyo	Ph.D., West Virginia University, Agricultural and Resource Economics MA, Western Michigan University, Applied Economics BS, Saint Cloud State University, Business Economics	Economics
Rick Gallaway	Doctor of Management, Organization Leadership; MBA International Business; MBA Management Information System.	Organization Leadership and HR Management.
Verhonda Sercey	Master's Degree- Global Hospitality Management; BSBA Finance and Economics	Marketing and Promotion
Dr. Addisu Mengesha	Ph.D. Management (Org Leadership), MS Computer Science, BA Economics.	Project Management/ Org. Leadership
Dr. Tefera Beyene	PhD in Applied Management and Decision Science – Concentration in Accounting; MBA Accounting and Finance; BA, Accounting	Finance and Accounting

1.12 Advisory Boards

Name	Title and Organization	School
Dr. Zelalem Chala	Business Program Chair, FXUA	School of Business
Tefera Beyene	Professor, St. Thomas University	School of Business
Yalemzewd Nigussie	Professor, Strayer University	School of Business
Alemayehu Hailu	Founder, Bosoka and Associate Consulting Company	School of Business
Olaotan Fade	Administrator, Paul's Valley Care Center	School of Business
Dr. NS Hasan	Executive Dean, FXUA	School of Business
George Rado	Accreditation and Regulatory Compliance Coordinator, FXUA	School of Business
Dr. Amy Buras	Learning Resource Manager, FXUA	School of Business
Dr. Halil Atabay	General Education Chair, FXUA	School of Business
Dr. Wasim Alhamdani	Computer Program Chair, FXUA	School of Computer Information Systems
Ahmed Banafa	Author, Researcher, San Jose State University	School of Computer Information Systems
Dr. Osama Morad	Founder, Morad Learning, Inc.	School of Computer Information Systems
Eric Buras	Senior Consultant, General Dynamics Information Technology	School of Computer Information Systems
Dr. Kirk Borne	Consultant, Data Prime	School of Computer Information Systems
Dr. Chakib Chrairi	Chief Data Scientist, U.S. Department of Commerce	School of Computer Information Systems

Dr. Amy Buras	Learning Resource Manager, FXUA	School of Computer Information Systems
Dr. Halil Atabay	General Education Chair, FXUA	School of Computer Information Systems

1.13 Academic Calendar Fall 2023 – Summer 2024

The academic calendar follows a fall, spring, and summer model.

Degree programs: Fall and Spring semesters are 15 weeks in length, and the two terms comprising the Summer semester are each 8 weeks in length. Fall and Spring semesters are considered “required” terms for attendance purposes and students must maintain continuous attendance to remain enrolled. The Summer semester is considered optional for most students.

The tables below outline the major time periods and events in the academic year.

Fall 2023	Degree
	August 28- December 17
	(15 Weeks: 15 Class Sessions)
Registration Opens	7/20/2023
New Student Orientation	8/23/2023
First Day of Classes	8/28/2023
Last day to add/drop course(s) – Closed at 5 p.m.	9/5/2023
Labor Day, FXUA is closed	9/4/2023
Last Day to Apply for Program Exit	10/12/2023
Mid-term progress reporting due by faculty	10/23/2023
Last day to withdraw with a grade of “W”	10/6/2023
Make-up Classes for Labor Day	11/20/2023
No classes (reserved for make up sessions)	11/21/2023 to 11/22/2023
Thanksgiving break, FXUA is closed	11/23/2023 to 11/24/2023
Last Day of Class (including the final exams)	12/17/2023
Grades due by faculty	12/19/2023
Grades available on Student Portal	12/24/2023
Winter Break	12/23/2023 to 01/01/2024
Changes to incomplete grades are due to Registrar	3/4/2024

Spring 2024	Degree
	January 8-April 21
	(15 Weeks: 15 Class Sessions)
Registration Opens	10/20/2023
New Student Orientation	1/4/2024
First Day of Classes	1/8/2024
Martin Luther King Day, FXUA is closed	1/15/2024
Last day to add/drop course(s) – Closed at 5 p.m.	1/16/2024
Last Day to Apply for Program Exit	2/22/2024
Mid-term progress reporting due by faculty	3/4/2024
Last day to withdraw with a grade of “W”	3/18/2024
Make-up Classes for Martin Luther King Day	4/21/2024

NOTE: The Academic Calendar is subject to change without prior notice. The latest version of the calendar is available on the university's website.

1.14 Holidays

For the 2023-2024 Academic Year, Fairfax University of America will observe the following holidays, on which there will be no classes and our administrative offices will be closed:

- Labor Day: September 4, 2023
- Thanksgiving: November 23-24, 2024
- Winter Break: December 23-January 1, 2024
- Martin Luther King Jr. Day: January 15, 2024
- Memorial Day: May 27, 2024
- Juneteenth: June , 19 2024
- Independence Day: July 4, 2024

Religious Holiday Policy

FXUA seeks to extend hospitality to all persons regardless of race, ethnicity, sexual orientation, and economic or social background. Diversity is valued, and the university is committed to assuring that all persons who enter this community are welcomed and respected. FXUA, a non-religiously affiliated institution of higher education, stands at the same distance to all world religions and does not observe religious holidays of any type other than what the state and federal governments observe officially in the United States. Therefore, all scheduled educational activities and university-sponsored events will take place as scheduled and publicized by our Academic Calendar

1.15 Course Cancellations or Delays for Emergency Situations

On occasion, course cancellations or delays occur because of inclement weather or other emergency situations. In these instances, the following is observed. The following outline procedures used for cancellations or delays as a result of inclement weather, but they also apply to other emergency situations.

Day and Evening Classes: In case of inclement weather, all classes will be held remotely for the safety of our students and faculty. Announcements will be made on the university's website. An email will also be sent to all students, staff, and faculty via the university email accounts. SMS alerts are also issued in the event of a cancellation.

Midday Closing: A decision to close the university during the day will be made when conditions include a forecast, which could make travel to and from campus unreasonably dangerous. Classes underway at the time a closing announcement is made will be dismissed. If students are engaged in important test-taking or other time-sensitive activities, a class may continue until its scheduled end, per the judgment of the instructor.

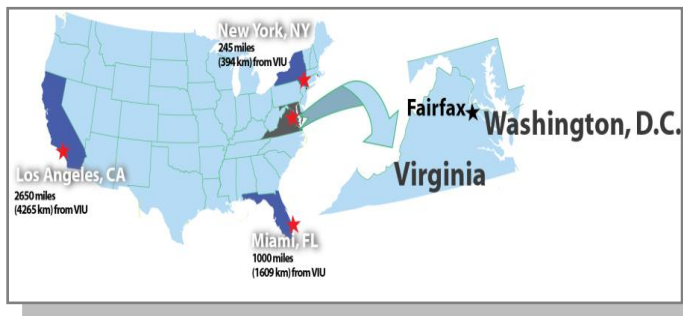

In all cases of course cancellation or delay, missed class time will be made up. Instructors are required to schedule makeup classes with their students before the end of the current semester.

SMS Alert System: An SMS Alert System is used to enable our entire learning community to receive emergency alerts and weather-related closings or delays via an SMS Text Message to mobile devices. To enroll in the SMS Alert System text "JOIN FXUA" to 30890.

For other policies or procedures related to emergency situations, please refer to the Emergency Preparedness Plan on the website: <https://www.fxua.edu/our-university/about-fxua/institutional-effectiveness/safety-planning/emergency-preparedness-plan/>

1.16 Campus Location and Facilities

Fairfax University of America is located in Fairfax, Virginia, in the heart of Fairfax County in Northern Virginia, only 18 miles away from the United States capital, Washington, DC.

1.16.1 Campus Facility

The **Village Drive Building (4401 Village Drive, Fairfax, VA 22030)** houses all administrative, academic, student support departments within the university as well as classrooms, conference centers, and university library.

1.16.2 Classroom Facilities

All of the university classrooms are equipped with computers, projection, and sound systems. The computers have high-speed internet connections and can accommodate USB/USBS, CDs, DVDs. The university also provides a large, theater style room, and four computer labs for student use. These labs are equipped with up-to-date hardware and software. Combined, the university has 16 classrooms that will seat 362 students at any given time. The student to faculty ratio is 9:1, and the average class size is seven students. The classrooms and corresponding seat number capacities are listed below.

Classroom	Capacity
VD 201	10
VD-202	18
VD-203	18
VD-204	24
VD-205	24
VD-206	18
VD 207	18
VD 208**	12

Classroom	Capacity
VD-209*	18
VD-210	18
VD 211	18
VD-212	18
VD-213*	36
VD-214*	36
VD-215	24
VD-216	52

* Computer Lab

** SCIS Research Lab

1.16.3 Transportation

The campus is conveniently located near two international airports: Dulles International Airport (IAD) in Virginia and Baltimore-Washington International Airport (BWI) in Maryland. Domestic air travel, which includes connecting flights from other international airports in the United States, is also available through the Reagan National Airport (DCA). All three airports have major road and rail links with Fairfax, Virginia.

From IAD (Dulles International) Airport: By car, Take exit 9A toward VA-28 south/Sully Rd. Next, merge onto US-29 north toward Fairfax. Drive for about 4.6 miles, and then turn right onto Village Drive.

By metro/bus: Refer to the Vienna/Fairfax-GMU Metro Station instructions and visit www.wmata.com.

From BWI (Baltimore-Washington International) Airport: By car, Take ramp onto I-195 west. Next, take exit 4B for I-95 south toward Washington. Take exit 27 to merge onto I-495 west toward Silver Spring. After 22.1 miles, take exit 49 for I-66 west toward Manassas/Front Royal. Take exit 57A to merge onto US-50 east toward Fairfax. Turn right onto VA-665. In 0.5mi, turn right onto US-29 south. Finally, turn left onto Village Drive.

By metro/bus: Refer to the Vienna/Fairfax-GMU Metro Station instructions and visit www.wmata.com.

From DCA (Ronald Reagan National) Airport: By car, Get on George Washington Memorial Pkwy. Exit left onto N Spout Run Pkwy toward I-66 west/US-29 west/Arlington/Washington. Turn right onto US-29 south, and then turn left to merge onto I-66 west. Take exit 57A to merge onto US-50 east toward Fairfax. Turn right onto VA-665. In 0.5mi, turn right onto US-29 south. Finally, turn left onto Village Drive.

By metro/bus: Refer to the Vienna/Fairfax-GMU Metro Station instructions and visit www.wmata.com.

The campus is also accessible via public transportation.

From Vienna/Fairfax-GMU Metro Station:

FXUA is located less than 10 miles away from the Vienna/Fairfax-GMU Metro Rail Station at the end of the Orange line. Walk to Vienna Station & Bus Bay T; Take 1A metro bus towards Ballston; Get off at the intersection of ARLINGTON BV & COVINGTON ST. Take 1C towards West Ox Road & Alliance Drive; Get off at the intersection of GOVERNMENT PKWY & LOWER PARK. Walk to Monument Drive & Cross VA29-Lee Hwy. Monument Drive becomes Village Drive. The building is on the corner.

For additional bus/metro information: Refer to the Vienna/Fairfax-GMU Metro Station instructions and visit www.wmata.com.

1.16.4 Parking

FXUA currently has ample parking for students, faculty and staff at all university locations. Presently, there is no fee to park on campus, though this is subject to change.

1.17 Business and Instruction Hours

Day	Business Hours (EST)	Instruction Hours (EST)
Monday	8:30 am – 6 pm	8:45 am – 9:10 pm
Tuesday	8:30 am – 6 pm	8:45 am – 9:10 pm
Wednesday	8:30 am – 6 pm	8:45 am – 9:10 pm
Thursday	8:30 am – 6 pm	8:45 am – 9:10 pm
Friday	8:30 am – 6 pm	8:45 am – 9:10 pm
Saturday	Closed	8:45 am – 3:10 pm
Sunday	Closed	8:45 am – 3:10 pm

Office staff are available during business hours. Faculty are available during scheduled office hours.

2. ADMISSION INFORMATION

2.1 Admission Policies & Procedures

For new applicants for 2023-2024 to a program of study must provide the necessary documentation, as described in detail below. An application will not be considered complete, and thus, will not be reviewed, until all application documents and any fees have been received. Once the completed application and any fees are received, the application is carefully reviewed for admission. Applicants meeting the admission criteria are evaluated with respect to other qualified applicants and are selected accordingly. The following sections outline the admissions requirements.

2.2 General Admission Requirements for Undergraduate Programs

The following materials are required for admission to undergraduate programs at FXUA. All materials must be submitted in English or accompanied by an official third-party translation by a credentialed translator recognized by the American Translators Association, unless otherwise noted. By submitting materials for consideration, applicants are attesting to the validity of these materials.

Undergraduate Admission Materials	General Admission Requirements
	First Year Students
Admission Application	
<i>Completion of Admission Application</i>	√
Minimum Education Requirements	
<i>Equivalent of High School Completion</i>	Proof of completion of high school or equivalent
Path to Success Program (PSP) Requirements	
PSP Assessments	Next-Generation Reading Test, Next-Generation Writing Test, ESL Tests, WritePlacer Essay, Next-Generation Quantitative Reasoning, Algebra and Statistics Test, Learning and Study Strategies Inventory Assessment, Life101 Assessment, FXUA Transformative Learning and Leadership in Practice (TLLP) Assessment, Workplace Readiness Skills Assessment
Completion of PSP	Certificate of Completion
Proof of Identity and Eligibility	
<i>Documentation of Legal Identification</i>	√
<i>Minimum Age Attestation Requirement</i>	√
Enrollment Agreement	
<i>Enrollment Agreement</i>	√

2.2.1 First Year Undergraduate Admission Requirements

A student may be admitted into an undergraduate program (degree or certificate) of study offered by the university upon satisfying all of the requirements applicable to that program of study, as follows:

1. **Application Form:** All applicants must submit a fully completed online application form. Incomplete applications will not be considered for admission until all necessary information has been received by the Admissions Office; and
2. **Demonstration of Required Education Level:** All applicants must provide evidence of:
 - a. (1) proof of high school completion (excluding special diplomas, special education diplomas, modified diplomas, applied studies diplomas, adjusted diplomas, alternative diplomas, certificates of completion/attendance/participation, etc.) via the official transcript showing the date of graduation; or (2) a recognized equivalent of a high school diploma (e.g., a certification that the student has demonstrated high-school level academic skills or an official document from a state authority [to the satisfaction of the school] recognizing that the student has successfully completed secondary school through home schooling as defined by state law). FXUA follows the Commonwealth of Virginia specifications for certifying using an Attestation Form that students have achieved a High School Diploma; or (3) a copy of the certification evidencing the student's receipt of a recognized equivalent of a high school diploma (GED and scores including a copy of the certification evidencing including any scores or reports of the student's receipt of an equivalent of a high school diploma (GED) approved by a State Department of Education; or (4),

an official document from a state authority (to the satisfaction of the university) recognizing that the student successfully completed secondary school through home schooling (as defined by state law) and a home school attestation; or (5) an earned associate's degree or higher from an institution accredited by an organization recognized by the U.S. Department of Education via an official transcript. All materials must be sent directly to the Office of the Registrar for evaluation for admittance; and if applicable.

- b. For foreign credentials, applicants must submit document of graduation from high school or its equivalent from an institution accredited by an agency recognized by the U.S. Department of Education, or deemed to be equivalent in the case of a foreign transcript. Note that GED Tests cannot be taken online and can only be taken at an official testing center. Applicants submitting international education credentials must provide an official general evaluation from a member of Association of International Credential Evaluators (AICE), or a member of the National Association of Credential Evaluation Services (NACES) to validate equivalency with graduation from the high school and eligibility to enter university in the United States. Applicants must provide documentation of evidence of high school graduation, passing GED scores, or equivalent prior to starting a program.
3. **Path to Success Program:** FXUA has created the Path to Success Program (PSP), it's a NEW and FREE undergraduate admission process, that caters to the needs of non-traditional modern learners. The online PSP is available to all interested high school graduates or senior students (in their last year of high school) regardless of past academic performance. The PSP gives students an opportunity to learn from past experiences and build the capacities to excel at the next stage of their academic journey. The PSP provides learners with a tailored path to higher education where they can develop the skills to thrive in the 21st century and succeed in college. FXUA designed this program for learners who can embody FXUA's core values of Peace, Development, Community, Character and Stewardship and to bridge the gap between where students are and our rigorous academic programs. The PSP is designed to embrace the FXUA philosophy to "foster an empowering learning community that elevates personal and professional growth to inspire students to be transformative leaders in today's multi-dimensional, global society." Upon successful completion of assigned PSP categories, students will earn admission to the FXUA undergraduate degree program of their choice. In addition, students will earn micro-credentials for each category they complete and an FXUA certificate of completion. Whether they commit to enrolling at FXUA or not, they will have developed college readiness and study skills, life and social skills, learning and leadership skills, and workplace readiness skills.
- Program Structure:** The PSP follows a rigorous structure that guides prospective students through clear steps starting from application submission to program completion.
- a. **Application:** All FXUA prospective students will start by submitting an application form on the institutional portal to enter the program.
 - b. **Assessment:** Student applicants will complete brief online assessments that will guide FXUA's efforts to identify prospective students' learning gaps across the program categories and place them in a personalized program path.
 - c. **Placement:** Students will be placed in a tailored program path depending on their assessment scores. Our staff will meet with students individually to explain their program path.
 - d. **Path:** The PSP will provide self-paced online courses allowing students a great sense of ownership to develop within seven categories. Pre-acceptance: English Language (Preparatory English or ESL), Academic Writing & Research, and Math. Post-acceptance: College Readiness & Study Skills, Life & Social Skills, Transformative Learning & Leadership in Practice Skills, and Workplace Readiness Skills. With our student-centered approach, we offer highly interactive course materials and activities that focus on self-reflection and real-life application.
 - e. **Completion:** Upon successful completion of assigned PSP English Language, Math, and Academic Writing and Research categories, students will earn admission to the FXUA undergraduate degree program of their choice. Students must complete the Life and Social Skills, College Readiness and Study Skills, Transformative Learning and Leadership in Practice Skills, and Workplace Readiness Skills assessments and all assigned courses/extracurricular workshops within the first academic year. In addition, students will earn micro-credentials for each category they complete as well as an FXUA certificate of completion and will have developed college readiness and study skills, life and social skills, learning and leadership skills, and workplace readiness skills.
 - f. **PSP Transfer Waiver:** Applicants transferring from another college or university to FXUA may waive the PSP requirements by meeting the following criteria: Pre-Acceptance:
 - Minimum of 2.5 cumulative GPA

- Credit for AP/IB English or minimum of “C” grade in college-level Academic Writing or Equivalent* (This will also eliminate the need for the student to take ENGL 120 as part of their general education requirements.)
 - Credit for AP/IB Precalculus/Calculus or minimum of “C” grade in college-level Precalculus/Calculus or Equivalent* (This will also eliminate the need for the student to take MATH 160 or MATH 165 as part of their general education requirements.)
- *Equivalency determined by PCs and/or appropriate faculty (i.e., subject matter experts).

Post-Acceptance:

- Completion of the 13 Workplace Readiness Skills extracurricular workshops will still be required post-admission to FXUA in their first academic year (which aligns with our mission of helping prepare students for summer internships/future job opportunities) NOTE: Completion of the CTECS WRS assessment will not be required.
- Completion of the 10 TLLP courses will still be required within and in addition to the program requirements. Below is the current schedule of course completion per the 4-year course sequence:

Semester		Course
Year 1	Fall 2023	HUMN 105: Principles of Learning
	Fall 2023	HUMN 125: Foundations of Adult Development
	Spring 2024	HUMN 150: Practices of Learning
Year 2	Fall 2024	HUMN 200: Discovering a Life of Self-Fulfillment
	Fall 2024	TLLP 250: Designing Your Life & Career*
	Spring 2025	TLLP 275: Practices of Social Impact*
Year 3	Fall 2025	INCS 300: Principles of Global Citizenship
	Fall 2025	INCS 325: Practices of Global Citizenship
Year 4	Fall 2026	TLLP 400: Models of Thinking
	Fall 2026	TLLP 425: Practices of Career Planning and Leadership*

* NOTE: TLLP 250, TLLP 275, and TLLP 425 are already included in the fundamental courses section of the program requirements

4. **Proof of Identity and Eligibility:** All applicants must meet minimum eligibility criteria and must demonstrate legally recognized forms of identification.
 - a. **Minimum Age Requirement:** Any applicant who will be 18 years of age or older by the time of the start of the semester in which they intend to begin their studies can apply (please note that PSP admission process does not require age eligibility criteria). Candidates who may be below the age of 18 by the first day of the semester should see the “Minimum Age Requirements for Admission” for more detail/requirements.
 - b. **Identification:** Applicants must submit a scan or photocopy of an official government-issued form of identification (for example, a passport or state issued license or identification). Upon admittance and before the first day of class, students must present a copy of an official legal document to their admissions officer to verify the student’s identity.
5. **Enrollment Agreement:** Upon successful completion of assigned PSP categories, and prior to final acceptance, applicants must complete the Enrollment Agreement in the application portal. Applicants must read, understand, and agree to the terms of the Enrollment Agreement.

All materials submitted to FXUA as part of the admission process must be true and original documents (including diplomas, transcripts, legal identification, etc.). FXUA may reevaluate applications/submitted materials, and if found to be inaccurate, misleading, or otherwise dishonest, may move to revoke a candidate’s admission and/or cancellation of registration or enrollment any time after admittance.

NOTE: Applicants studying on or expecting to be on a student visa must refer to the section on Materials for International Applicants for additional requirements to be issued the required documents for an I-20.

2.3 General Admission Requirements for Graduate Programs

The following materials are required for admission to graduate programs at FXUA. All materials must be submitted in English or accompanied by an official third-party translation by a credentialed translator recognized by the American Translators Association, unless otherwise noted. By submitting materials for consideration, applicants are attesting to the validity of these materials.

FXUA uses a holistic evaluation model and understands that every applicant has their own unique qualities and abilities that they would contribute to our learning community. Our goal is to recruit a diverse student body that reflects diversity of thought, mind, and worldview, but that also have a goal of making a positive impact on the world around them. To this end, we look for candidates who wish to be positive changemakers and have a drive and passion to help uplift others within their communities. Accepted candidates will clearly understand our mission and values.

<i>Enrollment Agreement</i>	√

2.3.1 Graduate Admission Requirements

A student may be admitted into a graduate program (degree or certificate) of study offered by the university upon satisfying all of the requirements applicable to that program of study, as follows:

1. **Application Form:** All applicants must submit a fully completed online application form. Incomplete applications will not be considered for admission until all necessary information has been received by the Admissions Office; and
2. **Minimum Education Requirements:** All applicants must provide evidence of a baccalaureate degree or higher awarded by an educational institution located in the U.S. that is accredited by an accrediting agency recognized by the U.S. Department of Education, or an educational institution located outside the U.S. that is accredited or similarly acknowledged by an agency deemed acceptable at the discretion of the university; Unofficial transcripts may be submitted in the application process, but official transcripts must be received in order to be fully admitted to the program. There is no formal cutoff for a GPA; rather, a candidate's transcript will be viewed in a holistic manner as one part of the overall application; and
 - a. Applicants submitting international education credentials must provide an official course-by-course evaluation from a member of Association of International Credential Evaluators (AICE), or a member of the National Association of Credential Evaluation Services (NACES) to validate equivalency with graduation from an undergraduate or graduate program and eligibility to be admitted in graduate program in university in the United States. If transcripts from the institution are issued in a foreign language as well as in English, applicants will only be required to submit the English version.

3. **Minimum Program Eligibility:** Applicants must demonstrate initial college readiness as evidenced by the following:
 - a. Demonstration of English proficiency (see English Proficiency Requirements).
 - b. (If applicable) Some programs require foundational knowledge in the content area called "Program Pre-Requisites." In instances in which some content-area background knowledge would be required, the faculty designate special "program prerequisite" courses aimed at providing this foundational knowledge. Program prerequisite courses are courses that the faculty within a discipline have deemed necessary for entry into a program of study. These may be required in instances in which, including but not limited to, a student wishing to pursue a graduate degree in a content area other than that of their undergraduate degree, and/or in instances in which certain fundamental coursework may not have been taken at the undergraduate level or a prior advanced degree. In the admission process, faculty from the program will review any prior degrees and/or coursework (if the prior degree[s] were not in the specific content area), and may designate required Program Pre-Requisites, which would be additional required coursework that the student must complete. Refer to the relevant sections of the catalog for the program of interest regarding in required program pre-requisites, as well as FXUA's Program Pre-Requisite policy.
4. **Character and Experiential Readiness:** FXUA is looking for committed students who wish to be changemakers and innovators who make a positive impact on the world around them. In order to understand an applicant's potential, the following must be provided:
 - a. **Statement of Purpose:** Each applicant is expected to write a statement of purpose, which includes two parts. While there is no specific word limit, we recommend that the statement be around 500-1,000 words, double-spaced. Avoid vague responses, as this may not provide a full picture to the committee reviewing your materials. Also remember that your statement of purpose and any other written documents represent you on paper, so you should proofread your work. Make sure your name is included in the statement.

In the first part, describe your professional work experience and your professional trajectory. Explain your motivations for entering the program and how you hope to leverage your education from FXUA to be a positive changemaker upon completion. Focus on concrete examples of how you have made an impact on others, affected positive change in the workplace, and/or plans for the future to do so.

In the second part, explain more about yourself, your academic interests, extracurricular interests, unique talents, how you will enhance the FXUA learning community. Write about any social justice efforts, community service, or other representations of you as a positive social change agent in your community. Reflect on the university's values below and how you represent them now in your own personal or professional life and how you hope to apply these values to make a positive impact once you complete your degree.

Our values:

- **Peace:** The foundations on which we build collective prosperity, healthy communities and human fulfillment.
 - **Character:** The expectation that all leaders should make brave decisions in good faith and in a principled way.
 - **Development:** The process by which we reach our potential, as human beings and societies.
 - **Stewardship:** A sense of responsibility and care towards all people and things that depend on us.
 - **Community:** A sense of belonging to something bigger than ourselves - be it global, national or local.
- b. **Resume/CV:** Applicants must submit a current version of their resume or CV in any format that might be used for a traditional job search. We recognize that there are a variety of global templates for CVs, as well as levels of experience with creating one. While customary in some settings, please do not include your photo, date of birth, gender, marital status, or other similarly protected statuses, as these are not used as a basis for admission. Minimally provide your prior work experience, education level, and any relevant skills.
 - c. **Letters of Recommendation:** Provide two letters of recommendation from individuals who can speak to your unique qualities and ability to be a changemaker. This can be a teacher, faith leader, volunteer coordinator, supervisor, or anyone who may be able to speak to your abilities.

While we would accept letters of recommendation in any form, those that speak to your manifestation of, or ability to represent FXUA's values will have most impact.

5. **Proof of Identity and Eligibility:** All applicants must meet minimum eligibility criteria, and must demonstrate legally recognized forms of identification.
 - a. **Minimum Age Requirement:** All applicants must be 18 years of age or older by the time of the start of the semester in which they intend to begin their studies.
 - b. **Identification:** A scan or photocopy of a government issued form of identification official government-issued photo identification (for example, a passport or state issued license or identification). Upon admittance and before the first day of class, students must present a copy of an official legal document to their admissions officer to verify the student's identity.
6. **Enrollment Agreement:** Applicants must complete the following:
 - a. **Enrollment Agreement:** Applicants must read, understand, and agree to the terms of the enrollment agreement.
7. **OPTIONALLY,** applicants who wish to supply more information about their application, including any of the following, can do so to supplement their materials:
 - a. Applicants may request an interview to address any other items that may not already be evident from the documents submitted.
 - b. If you faced difficulties or circumstances that might help the admissions committee to understand your transcript(s) or grades from your prior education, please submit a statement explaining these circumstances.
 - c. Submit a portfolio of work that you have done that might enhance our understanding of your professional abilities. This could include materials created as part of your work experience, special projects that you worked on as part of your employment, or other similar items.
 - d. Submit a portfolio of academic work that you have done that might enhance our understanding of your academic abilities. This could include materials created as part of your high school experience including any special projects that you may have participated in.

NOTE: Applicants studying on or expecting to be on a student visa must refer to the section on Materials for International Applicants for additional requirements to be issued the required documents for an I-20.

2.4 Non-Degree Status Admission Requirements

Applicants for non-degree status must meet the minimum admission requirements at the level of the degree, course, or program specified above. Enrollment as a non-degree student does not guarantee acceptance into the degree or program.

Registration is permitted on a space-available basis. Students must understand that they cannot graduate from any program or receive any degree in non-degree status. Non-degree students must follow and meet the same academic standards as degree-seeking students. Courses in which non-degree students enroll are subject to all regular tuition and fees. The university does not issue I-20s for non-degree study.

If a non-degree-seeking student wishes to change their status to degree seeking, the student must apply to the university through the regular admission process with the Admissions Office.

A maximum of 12 credits from non-degree study can be transferred to a graduate level program at the university; a maximum of 18 credits from non-degree study can be transferred to an undergraduate level program at the university.

2.5 Withdrawn Student Re-admission Requirement

Students who have withdrawn from the university and:

- withdrew more than 180 days before the intended re-admit semester begins will need to apply to the university as a new student by the regular admission process. These students must meet all admission requirements at the time of their reapplication and would be bound by the program requirements at the time of their readmission under the Academic Catalog at the time of re-entry.
- withdrew less than 180 days before the intended re-admit semester begins can be re-admitted to the same program from which they withdrew through the re-admission process. These students would be re-admitted under their original catalog. If a student wishes to be re-admitted to the new academic catalog, they can do so by applying as a new student through the regular admission process.

2.5.1 Re-admission Process

To be re-admitted, the student would need to complete a new enrollment agreement and submit a clearly defined Completion Plan. This statement must explain the circumstances behind the initial withdrawal, any mitigating circumstances that have occurred since the withdrawal, how the student intends to overcome any previous obstacles to complete the degree in a timely manner, and a clearly defined anticipated plan for degree completion with timelines and goals.

Students who were on an academic warning, or academic probation at the time of their withdrawal, will be placed back on those statuses and the same requirements will apply, upon successful re-admission. Students who were on academic probation will be conditionally accepted with the understanding that the student will submit a revised academic plan, approved by their academic advisor, to the Registrar's Office to complete enrollment.

2.6 Submission of Admission Documents

Documents submitted as part of the application process are done electronically via the admission portal and/or physically in the case of certain documents that may not be transmissible in electronic format (for example, some official transcripts, letters of recommendation, etc.).

All materials submitted to FXUA as part of the admission process must be true and original documents (in submission of documents including transcripts, credentials; legal identification, any submitted test results, letters of recommendation, etc.), of the candidate's own work (in submission of documents intended to be created by the candidate including the statement or purpose, required essays, resume/CV, or other supplemental materials), and that all otherwise submitted/transmitted to FXUA be truthful and accurate. All submitted materials become educational records, regardless of acceptance status, and are maintained by the university following its record retention policy. FXUA may reevaluate applications/admitting materials, and if found to be inaccurate, misleading, or otherwise dishonest, may move to revoke a candidate's admission and/or cancellation of registration or enrollment any time after admittance.

2.7 Changes in Admission Criteria

On rare occasion, admission requirements could change after a student is accepted by prior to the semester in which they enroll. While the university wishes to honor its acceptance, the admission criteria must be met for the semester in which an applicant would begin their program. Should a change in the admissions requirements occur after the time of acceptance but prior to the start of the semester, the applicant must meet the new admissions requirements. Admission officers will work with the applicant to help with collecting their admission materials.

2.8 English Proficiency Requirements for Graduate Programs

2.8.1 Evidence of Sufficient English Language Proficiency

English is the language of instruction at Fairfax University of America, and therefore international applicants must provide evidence of English language proficiency to ensure that their communication skills are sufficient for effective class participation and completion of course assignments. Fairfax University of America English language proficiency requirements may be demonstrated through any of the following options:

Option 1: Submit a valid test score from an acceptable standardized test. Official language proficiency scores more than two years old will not be accepted as proof of language proficiency. Applicants can submit TOEFL, IELTS, and PTE scores directly to FXUA. In order to send scores to FXUA, use the following methods:

- **TOEFL:** When scheduling/completing the TOEFL, applicants can enter FXUA's institutional code: 7137. The scores will be sent directly to FXUA.
- **IELTS:** When scheduling an IELTS exam, applicants can elect to send the scores directly to FXUA. Applicants can search for "Fairfax University of America" or they can directly enter in the information for the university: Fairfax University of America, Office of Admissions, 4401 Village Drive, Fairfax Virginia, 22030. If an applicant has already taken the exam, they can contact the testing center to have the record released directly to FXUA.
- **PTE:** Through Pearson's PTE portal, applicants can search for "Fairfax University of America" or they can directly enter in the information for the university: Fairfax University of America, Office of Admissions, 4401 Village Drive, Fairfax Virginia, 22030.

NOTE: FXUA offers the Accuplacer English Proficiency/Placement Test. For tests scheduled by FXUA, scores are obtained by FXUA from the ACCUPLACER portal and submitted to the admissions officer directly.

Graduate Level English Proficiency Requirements:

Test	Minimum Score
Test of English as a Foreign Language (TOEFL)	Internet-based (iBT): 80 (or equivalent); sub-scores must be 20 or higher
International English Language Testing System (IELTS)	Academic overall band score: 6.5, with no less than 6.0 on all subtasks
Pearson Test of English (PTE)	59 or higher
FXUA English Proficiency/Placement Test	Degree Track: 90%

Option 2: Proof of prior study in English. Provide an official transcript indicating completion of a minimum of 18 credit hours (graduate level) or 24 credit hours (undergraduate level) from an accredited United States post-secondary institution at which the language of instruction was English, including at least one course in English composition, academic writing, or a similar subject. The GPA for those credits, must not be lower than C-level.

Option 3: Completion of a High School Curriculum. Completion of four years of study in a United States accredited high school, or International Baccalaureate, a Caribbean Examinations Council Secondary Education Certificate, or a United Kingdom high school. The entire curriculum must be offered exclusively in English (not in ESL). Official proof of high school completion must be provided.

Option 4: Provide evidence that the applicant attended high school or college in selected English-speaking countries or educational systems of the following countries. If you earned your bachelor's, master's, or doctorate degree in its entirety in one of the following countries, and can provide an official transcript, you meet the English Proficiency requirements. FXUA reserves the right to require a student to take the English Placement Test when there are reasonable doubts as to the authenticity of either submitted standardized test scores or the degree of the English proficiency evidenced by other documentation. Specific countries include: the United States, Puerto Rico, the U.S. Virgin Islands, Guam, Northern Mariana Islands, and American Samoa, anglophone Canada (except Quebec), Australia, Ireland, Ghana, Kenya, Liberia, New Zealand, South Africa, the United Kingdom, and following Caribbean countries: Anguilla, Antigua & Barbuda, Bahamas, Barbados, Belize, Bermuda, British Virgin Islands, Cayman Islands, Dominica, Grenada, Guyana, Jamaica, Montserrat, Saint Helena, Saint Kitts & Nevis, Saint Lucia, Saint Vincent & Grenadines, Trinidad & Tobago, and Turks & Caicos Islands..

Please note:

- International applicants must meet the English proficiency requirements prior to acceptance.

2.8.2 FXUA's English Proficiency Exam

The English proficiency exam, ACCUPLACER, is used to determine if a student has sufficient English proficiency for their degree. The required percentage that a student would need to meet in order to demonstrate English proficiency is 90% for graduate applicants. All undergraduate applicants must take the Path to Success Program (PSP) English Assessment. The ACCUPLACER test result is valid for 12 months.

The ACCUPLACER test for English proficiency includes standard multiple-choice questions that are randomized so that a student is unlikely to receive the same question if they were to take it more than once. The exam includes four parts:

- Grammar (multiple choice)
- Reading (multiple choice)
- Vocabulary (multiple choice)
- Writing (written portion)

The multiple-choice portions of the exam are scored by the ACCUPLACER system automatically. The written portion requires an individual to evaluate the written work. This is done by an ACCUPLACER grader. FXUA receives the results from the ACCUPLACER system.

2.9 Materials for International Applicants

According to the US Department of Education, an international student is defined as an "individual who is enrolled for credit at an accredited higher education institution in the U.S. on a temporary visa, and who is not an immigrant (permanent resident with an I-51 or Green Card), or an undocumented immigrant, or a refugee."

2.9.1 Proof of Official Identification Requirements for International Applicants

Each international applicant is required to submit a legible copy of an official, government-issued passport from their country of origin.

2.9.2 Required Financial Support Documents for International Applicants

For F-1 visa applicants, evidence of Financial Ability and sponsorship documents are required to issue an I-20 or DS-2019. The University is required by law to verify that a student has the funds to cover the cost of their academic program.

Note: The Estimated Annual Educational Costs can be found on the University Statement of Financial Support Sheet.

Supporting Documents for Self-Sponsored Students

The student should submit an original signed letter from a bank (issued within 3 months) or a bank statement (within 3 months) that indicates the currently available balance in the student's personal savings or checking bank accounts. Accounts other than personal savings or checking are not accepted.

Self-Sponsored Students: needs to complete, sign and submit the University of Statement of Financial Support.

Supporting Documents for Sponsored Students

The sponsor needs to submit the FXUA Statement of Financial Support (for an overseas and self- sponsor) or I-134/Affidavit of Support (for US Sponsor):

- Sponsor(s) who ARE NOT U.S. citizens or permanent residents: needs to complete, sign, and submit the University of Statement of Financial Support.
- Self-Sponsored Students: needs to complete, sign and submit the University of Statement of Financial Support.
- Sponsor(s) who ARE U.S. citizens or permanent residents: needs to complete and sign the USCIS form I-134 "Affidavit of Financial Support". The form is available at: <https://www.uscis.gov/sites/default/files/document/forms/i-134.pdf>

The Sponsor needs to submit an original signed letter from a bank (issued within 3 months) or a bank statement (issued within 3 months) that indicates the current available balance in the personal savings or checking bank accounts. Accounts other than personal savings or checking are not accepted.

Application Fee

There are no application fees.

2.10 Recognition of Foreign Degrees

In recognition that education systems around the world differ, FXUA wishes to ensure that students having received degrees or diplomas from non-US universities are treated in a way that is considerate of how these systems vary, while also ensuring the quality of students entering programs offered by the university. In doing so, FXUA recognizes degrees or coursework from non-US universities as outlined below.

Bachelor's degrees from foreign universities must come from institutions that are accredited by the host country's government or proper higher education authority, and must be equivalent to the completion of a four-year program of study at a US college or university with a minimum of 120 semester credits. Those who have obtained a bachelor's degree from abroad with less than 120 semester credits will be considered for conditional acceptance into a graduate program and will be required to make up the credit difference.

2.10.1 Foreign Degree/Transcript Evaluation

All applicants seeking admission to a program of study at the university with a degree from a non-U.S. institution must comply with the following requirements:

- **GRADUATE DEGREE:** Applicants being admitted to a program leading to a graduate degree, certificate, or diploma shall include graduation from bachelor's degree program, its equivalent, or a higher degree (i.e., master's degree) from an institution accredited by an agency recognized by the U.S. Department of Education. Applicants submitting international education credentials must provide an official course-by-course evaluation from a member of Association of International Credential Evaluators (AICE), or a member of the National Association of Credential Evaluation Services (NACES) to validate equivalency with graduation from an undergraduate or graduate program and eligibility to admit in graduate program in university in the United States. If transcripts from

the institution are issued in a foreign language as well as in English, applicants will only be required to submit the English version.

- When submitting an evaluation based upon an official transcript from one of the aforementioned organizations, the university will recognize the evaluation as proof of the official transcript. In this instance, the selected vendor would indicate whether the evaluation was done based upon original/verified/authenticated/validated and secure documents received directly from or verified by the issuing institution, or otherwise viewed as an “official” transcript”.
- When submitting an evaluation based upon an unauthenticated/unverified copy of transcript from one of the aforementioned organizations, the student will be required to submit an official transcript to the university registrar’s office before the end of add/drop period. Applicants who are unable to provide verified documents will be dismissed from the university on the last day of add/drop.
 - i. The university will recognize transcripts as official if they are provided physically to the Office of the Registrar in a sealed envelope directly from the issuing institutions; or if they are provided electronically to the Office of the Registrar (registrar@fxua.edu) from a secure site or email address formally linked to the issuing institution or trusted sender. The official transcript will be reviewed against the evaluated version. If the two documents match, the Office of Registrar will include the transcripts with the evaluation and consider them to be verified documents.
 - ii. In the event that a student is unable to provide an official, sealed transcript (following i above), the student may provide an opened, original transcript for review to the Office of the Registrar.
 1. The opened, original transcript must be printed on authentic, secure transcript paper issued by the applicant’s prior educational institution.
 2. The opened, original transcript will be reviewed against the evaluated version. If the two documents match, the Office of Registrar will use the opened/original version of transcript as verified documents.
 3. The student will also be required to submit a notarized attestation of the originality of the documents. The registrar will keep an electronic copy of the transcript, evaluation, and a copy of the attestation in the university student system (for example, transcript, diploma, etc.).

NOTE: The university is unable to accept electronic transcripts that are not from an issuing institution’s official secure site, email address, or another trusted sender (known and approved electronic credential services). Email strings that include an attachment of a transcript, even if they appear to have originated at the issuing institution, cannot be accepted for security reasons.

- **UNDERGRADUATE DEGREE:** Applicants being admitted to a program leading to an undergraduate degree, certificate, or diploma shall include graduation from high school or its equivalent from an institution accredited by an agency recognized by the U.S. Department of Education. Applicants submitting international education credentials must provide an official general evaluation from a member of Association of International Credential Evaluators (AICE), or a member of the National Association of Credential Evaluation Services (NACES) to validate equivalency with graduation from the high school and eligibility to enter university in the United States
 - When submitting a general evaluation based upon official academic credentials (transcript, diploma, or other evidences of completion of a secondary education that would be recognized by their home country’s Ministry of Education or its recognition body) from one of the aforementioned organizations, the university will recognize the evaluation as proof of the official transcript. In this instance, the selected vendor would indicate whether the evaluation was done based upon original and secure documents received directly from the issuing institution, or otherwise viewed as an “official” transcript”.
 - When submitting a general evaluation based upon a copy of academic credentials (transcript, diploma, or other evidences of completion of a secondary education that would be recognized by their home country’s Ministry of Education or its recognition body) from one of the aforementioned organizations or if an evaluation report does not state whether the evaluation was done using an official document, the applicant will be required to submit an official academic credentials to the university registrar’s office before the end of add/drop period. Applicants who are unable to provide verified documents will be dismissed from the university on the last day of add/drop.
 - i. The university will recognize transcripts as official if they are provided physically to the Office of the Registrar in a sealed envelope directly from the issuing institutions; or if they are provided electronically to the Office of the Registrar (registrar@fxua.edu) from a secure site or email address formally linked to the issuing institution or trusted sender. The official transcript will be reviewed against the evaluated version. If the two documents match, the Office of Registrar will include the transcripts with the evaluation and consider them to be verified documents.
 - ii. In the event that a student is unable to provide an official academic credentials (following i above), the applicant may provide an original academic credentials for review to the Office of the Registrar.

1. The original academic credential must be printed on authentic, secure transcript paper issued by the applicant's prior educational institution; or an otherwise officially issued document from the prior educational institution
2. The original document will be reviewed against the evaluated version. If the two documents match, the Office of Registrar will use original version of academic credentials as verified documents.
3. The student will also be required to submit a notarized attestation of the originality of the documents. The registrar will keep an electronic copy of the original academic credentials and a copy of the attestation in the university student system (for example, transcript, diploma, etc.).

NOTE: The university is unable to accept electronic transcripts that are not from an issuing institution's official secure site, email address, or another trusted sender (known and approved electronic credential services). Email strings that include an attachment of a transcript, even if they appear to have originated at the issuing institution, cannot be accepted for security reasons.

For a transfer student, who was once admitted to a degree program by an accredited degree-granting institution in the U.S.A., FXUA does not require foreign credential evaluation as a part of the admission process. An original transcript from the U.S institution is needed to prove that the student was admitted to a degree program and as well as to process transfer credit towards FXUA.

2.11 Minimum Age Requirements for Admission

Any student who is not at least 18 years of age and has not yet received a high school diploma (or its equivalent) from a recognized institution on or before the first day of the semester will not be permitted to enroll in a degree program with Fairfax University of America.

Any student who is not at least 18 years of age, but who is a minimum of 16 and has received a high school diploma or its equivalent from a recognized institution must meet the following requirements before enrolling in a program. As well as the student meeting all of the requirements for the program in which they are applying for, a parent or the legal guardian of the student must meet all of the following criteria:

- Must complete, and submit the Parent/Guardian Minor Consent Form (available in a student's application portal)
- Lives within commuting distance of the campus (not to exceed 50 miles)
- Agrees to financially sponsor the student
- Will provide housing for the student while they are under the age of 18

2.12 Changing Expected Start Date for Admission

Accepted candidates who need to change/defer their anticipated start date for admission may do so for the immediate next semester (for example, changing their anticipated start date from Fall to Spring) within the same academic year; however, in the event that admissions criteria change from one semester to another, and if the expected start date for an application is changed, applicants would be required to meet the minimum standards for the new semester in which they attend to start. In the event that these admission standards or the format of the application has changed, a new application may be required. The applicant would be contacted if a new application or additional materials are required for admission.

To request a change to the anticipated start date, applicants must contact the Admissions Office.

2.13 Denial of Admission

Admission decisions are made using a variety of factors including the merits of an applicant's dossier, completeness of the application, space and availability in the program, etc. Automatic denials of admission may occur if an applicant knowingly falsifies, alters, or plagiarizes elements of their application dossier.

In the event that an applicant is denied admission to a program of study, the Admissions Office will communicate the denial to the student promptly. In most cases (except for those related to an applicant falsifying, altering, or plagiarizing elements of their previous application), applicants are welcome to reapply if they have been denied previously. If a previously denied applicant reapplies to the university, they are encouraged to take care in addressing any potential deficiencies in their original application.

2.14 Readmission

A student whose studies are interrupted for any reason for a period of more than 180 days, and who has been placed in a withdrawn status from the university, must reapply for admission to the university. Students who are readmitted to the university are subject to the academic requirements and regulations in effect at the time of their readmission. See the Withdrawn Student Re-admission Requirement for more details.

2.15 U.S. Service Members or Veterans

Although FXUA currently does not participate in the Department of Veterans Affairs education benefit programs, U.S. Service Members or Veterans who apply to become students must meet the same Admissions criteria that applies to all applicants. Transfer credit is not currently awarded at FXUA for any applicant.

2.16 Special Circumstances Policy

For students who may not be able to present required official transcript(s) and/or diploma(s) for credential evaluation due to political refugee or asylum status, fear of persecution in requesting documentation, or political (or otherwise) situations that result in closure of previous institution(s). As such, it may be necessary to employ an alternative method of educational verification. Please contact the Office of Admissions for additional information.

2.17 Non-Discrimination Statement and Policy

Fairfax University of America does not discriminate on the basis of race, color, creed or religion, language identity or mother tongues, national or ethnic origin, ancestry, sex, sexual orientation, gender identity, gender expression, marital or other familial status, age, genetic information, physical or mental disability, status as a protected veteran, or any other non-merit factor in the admission to, participation in, or employment in the programs and activities which the University operates.

2.18 Presidential Scholarship

The Fairfax University of America Presidential Scholarship is a full-tuition scholarship program awarded to qualified degree-seeking students driven to become next-generation changemakers in the global community. The scholarship covers all tuition costs, excluding prerequisites, textbooks and all other applicable fees, leading to an FXUA Bachelor's degree or Master's degree as defined by the current Academic Catalog.

Awardees must remain in compliance with all scholarship program policies as well as all policies outlined in the current FXUA Academic Catalog – including the Code of Academic Excellence as defined in the Academic Integrity Policy.

2.18.1 Undergraduate Students

In order to receive Presidential Scholarship program consideration, undergraduate students:

- MUST be successfully admitted into an FXUA degree program for Fall 2023 or Spring 2024 semesters and complete all pre-enrollment requirements specified in the current FXUA Academic Catalog. Specifically, undergraduate awardees must successfully complete the Path to Success Program (PSP).
- MUST, upon receiving an award letter, sign the Presidential Scholarship Policy Agreement Form, which details the policy, requirements, and other relevant information.

Awardees must maintain a minimum of 2.75 CGPA for the duration of enrollment. Awardees with a CGPA less than 2.75 at the end of any semester will have one probationary semester to meet the requirement. Awardees who do not meet the requirement after the probationary semester will have the scholarship withdrawn for future semesters. A student whose scholarship is withdrawn due to ineligibility is subject to current FXUA tuition costs at the time of withdrawal and all other applicable fees for future semesters. Former awardees are not eligible to re-apply.

Along with exceptional academic performance, awardees will also be required to enroll in specific number of workshops that have a positive impact. In the final semester of study, awardees will present a portfolio of annually accumulated personal and professional growth experiences to the Office of Student Experience and Personal Development.

Awardees will complete an annual electronic Scholarship Renewal Form and upload supporting documents to show that the requirements were met. The Presidential Scholarship Committee determines annual renewal decisions and approvals.

2.18.2 Graduate Students

In order to receive Presidential Scholarship program consideration, graduate students:

- MUST successfully complete the admissions process and be admitted into an FXUA degree program for Fall 2023 or Spring 2024 semesters.
- MUST, upon receiving an award letter, sign the Presidential Scholarship Policy Agreement Form, which details the policy, requirements, and other relevant information.

Awardees must maintain a minimum of 3.0 CGPA for the duration of enrollment. Awardees with a CGPA less than 3.0 at the end of any semester will have one probationary semester to meet the requirement.

Awardees who do not meet the requirement after the probationary semester will have the scholarship withdrawn for future semesters. A student whose scholarship is withdrawn due to ineligibility is subject to current FXUA tuition costs at the time of withdrawal and all other applicable fees for future semesters. Former awardees are not eligible to re-apply.

Along with exceptional academic performance, awardees will also be required to enroll in specific number of workshops that have a positive impact. In the final semester of study, awardees will present a portfolio of annually accumulated personal and professional growth experiences to the Office of Student Experience and Personal Development.

Awardees will complete an annual electronic Scholarship Renewal Form and upload supporting documents to show that the requirements were met. The Presidential Scholarship Committee determines annual renewal decisions and approvals.

2.19 Exceptions to Admissions Criteria

Fairfax University of America does not make an exception to its admissions criteria.

3 FINANCIAL INFORMATION

3.1 General Guidelines

By registering for classes, FXUA students accept responsibility for all semester charges that should be paid in full by the payment deadline each term to avoid financial penalties. Students are responsible for checking their billing information through their Student Portal and keeping their contact information up to date. Students can withdraw from the classes they do not intend to complete by contacting the Registrar's office. Please refer to the University's add/drop/withdrawal policies and refund dates in the Academic Calendar.

3.2 Tuition Rates

The following tuition and fee structure are effective for the 2023-2024 academic year. Tuition and fees are subject to change.

On-Ground Degree and Certificate Programs

Level/Program	Cost Per Credit	Cost Per 3-Credit Course
Graduate	\$726.00	\$2,178.00
Undergraduate	\$422.00	\$1,266.00

Online Degree and Certificate Programs

Level/Program	Cost Per Credit	Cost Per 3-Credit Course
Graduate	\$508.00	\$1,524.00
Undergraduate	\$392.00	\$1,176.00

Generally, courses are three-credits unless otherwise specified. Courses that may have credit structures that differ from the standard can be calculated by multiplying the number of credits by the cost per-credit for the degree level. The total Undergraduate Tuition per semester will not exceed \$6,330 up to 21 credits hours.

A full-time course load varies based upon the degree level.

The total number of credits for each degree level generally conform to the following unless otherwise specified in the program section of the academic catalog:

- Undergraduate Degrees are 120 semester credit hours
- Graduate Degrees are 36 semester credits
- Graduate Certificates are 18 semester credit hours

3.3 University Fees

3.3.1 Fees

All fees are non-refundable.

FEE	DESCRIPTION	APPLIES TO:	AMOUNT
English Proficiency Test Fee	This fee is charged if a student takes the English proficiency/placement exam. There is a charge for each time that a student takes the exam.	Remote Placement Test	\$55.00
PSP Administration Fee	This fee is charged when a student does not complete the required PSP academic remediation course for Prep English/ESL, Math or Academic Writing/Research prior to the last day of classes of the first semester.	All Undergraduate Students	\$170
Tuition Payment Plan Fee	Applies to students who wish to finance their tuition in installments. This fee is charged per installment.	All Students	\$30.00
Transcript Request Fee	This fee is charged to students who request an official FXUA transcript. This fee is charged per transcript. Processing refers to internal production of the transcript in preparation for mailing; mailing times vary based upon the student's chosen mailing speed. Factor in mailing time on the order.	Standard processing (5 business days)	\$10.00
		Expedited processing (2 business days)	\$25.00

Document Mailing Fee	This fee is charged when students request official documents to be sent via mail (for example, I-20 documents, transcripts, diplomas or certificates, etc.).	Regular USPS Mailing (domestic only)	No charge
		Domestic Courier Service	\$35.00
		International Courier Service	\$100.00
Program Exit Application Fee	This fee is charged when the student nears completion of their program and intend to complete or graduate. This fee is not associated with the commencement ceremony, and is charged regardless of the student's intention to participate in the commencement. The fee covers costs of diploma/certificate creation, processing, and mailing. Any diplomas or certificates returned to the school as undeliverable will incur an additional Document Mailing Fee if the university needs to send the diploma/certificate to the student.	All Graduates	\$150.00
Diploma Replacement Fee	This fee is charged if the student requests an additional or replacement diploma.	All Students	\$50.00
Change of Program or Specialization Fee	Required for change of program of study or a change of concentration for existing students.	All Students	\$20.00
FXUA ID Replacement Fee	This fee is charged per replacement card.	All Students	\$10.00
Late Payment Fee	This fee is charged for tuition payments paid after the payment deadline. This fee may not exceed \$500.00.	All Students	3% of outstanding balance due at the time of payment
Check Return Fee	Applies only if check received is unpaid by the bank.	All Students	\$45.00
Credit Card Charge-Back Fee	Applies if payment made by credit card is charged-back.	All Students	3% of the charged-back amount
Wire Transfer Refund Fee	Charged if a refund is requested to be paid via a wire transfer.	International Wire	\$45.00
		Domestic Wire	\$35.00

3.4 Living and Other Expenses

Tuition and fees vary depending on multiple factors including, but not limited to, the program and level of study, course enrollment, and other specific circumstances. Funds for living and other expenses (supplies, room, and board, etc.) are not included. Students should plan to cover these expenses based upon their individual projected needs. Below is rough estimation, intended only as a guidance. Actual expenses will vary depending on individual needs. Use the Net Price Calculator on the website to estimate your cost of attendance.

Expenses	Explanation	Estimated Amount
Living	The approximate cost for an individual student living in the Washington, D.C. metropolitan area.	\$12,680 per academic year (9 months)
Textbook	Textbook expenses are not included in the cost of tuition. Students must obtain their textbooks before the course add/drop period.	Students are encouraged to order their textbooks from their preferred vendor after price comparing new, used, and rental options. Textbook lists can be found on the FXUA Textbook List: https://www.fxua.edu/library/fxua-textbook-list/

3.5 Payment Information

3.5.1 Payment Procedures

Student tuition and fees are due in full by the first day of classes each semester. Students must pay the billed amount in full as scheduled to avoid financial penalties. It is the student's responsibility to review the Student Portal to verify class registration, balance due, and payment deadlines. A student may not proceed from one semester or session to the next without having fully paid all outstanding tuition, fees and other charges or payments owed to the university. Any exceptions must have prior approval of the administration.

Students are responsible for activating and checking their campus e-mail accounts to receive official university communications. Failure to receive an email reminder about pending charges does not waive the requirement for making payment by the payment deadline each semester.

Payments received are applied to the oldest outstanding balance first. Ample time should be allowed for payments to be processed.

3.5.2 Making a Payment

The Student Accounts Office strives to make bill payment as easy as possible for students. For convenience, students are able to make payments in the following ways:

Payment via the Student Portal

The most convenient way to make payments is through the Student Portal. Credit or debit card payments made through the Student Portal must be completed by 11:59 p.m. EST for the transaction to be considered processed on that day's transactions.

Payment in the Student Accounts Office

The Student Accounts Office takes payments in person Monday through Friday from 9:00 a.m. until 6:00 p.m. Payments can be made by credit or debit card, check, cash, or money order. Payments received by the Student Accounts Office by 6:00 p.m. EST will be considered received on that business day.

Payment via Mail

Students who submit their payments by sending checks or money orders via mail should send their payments at least 10 business days in advance of the due date to account for weekends, holidays, or delivery delays. The postmarks will not be considered a receipt of payment. **Please DO NOT send cash payments via mail.**

Payments should be mailed to the following address:

*Fairfax University of America
ATTN: Student Accounts Office
4401 Village Drive,
Fairfax, VA 22030
United States*

3.5.3 Payment Methods

Payments can be made using the following methods:

Credit and/or Debit Cards: Credit and/or debit card payments are accepted at the Student Accounts Office and online through the Student Portal. The accounting office accepts Master Card, Visa, Discover, and American Express.

NOTE: *Online payments can be made by using multiple cards. Please note that the same card cannot be used more than once in the same 24-hour period.*

Checks: All checks should be made payable to Fairfax University of America, with the student's FXUA ID number and name written on the memo line. Checks that are already endorsed are not accepted. Checks must be payable in U.S. dollars with an intermediary bank in the U.S.

Cash: Cash is only received in person at the Student Accounts Office located at the Village Drive campus. Cash payments should not be sent through the mail. The university is not responsible for cash payments that are lost or stolen prior to arriving in the Student Accounts Office.

Traditional Wire Transfers: To make a traditional wire transfer to the university, please contact the Student Accounts Office at for further instructions. When sending a wire transfer, be sure to include the student's full name and student ID number.

Money Orders: Money orders should be made payable to Fairfax University of America. Money orders must be payable in U.S. dollars. Please be sure to include the student's full name and student ID number with the money order.

Demand Drafts: The university will accept demand drafts (DDs) only if the funds are drawn on a US bank and in US currency. Drafts should only total the amount of tuition and fees for the semester for which the student is paying. All demand drafts received which exceed the amount of total tuition and fees for that semester will be refunded only after the Demand Draft is processed and settled.

NOTE: *The Student Accounts Office does not accept payments over the phone.*

3.6 Tuition Payment Plans

FXUA offers tuition payment plans to eligible students who wish to finance their tuition in multiple installment payments. There is a non-refundable fee of \$30.00 **per installment**. Non-degree enrollments do not qualify for payment plans. Failure to pay any outstanding installment payment or balance by the payment deadline(s) will result in a financial hold placed on the student's account, accrual of late fees, and the potential ineligibility to apply for a payment plan in future semesters.

Applying for a Tuition Payment Plan

You are eligible to apply for a payment plan if:

1. There is no financial hold on your account;
2. You are enrolled in a graduate or undergraduate degree or certificate program;
3. You have registered for courses in the current term and your total bill is more than \$1,000;
4. You are not on the waiting list for any courses; and
5. The installment application deadline has not passed.

Applications for installment payment plans can be made through the Student Portal and must be received by the installment application deadline for the applicable semester. After you have received confirmation of approval of your Tuition Payment Plan Application, you can make your first installment payment online through your Student Portal or at the Student Accounts Office.

3.7 Delinquent Accounts

3.7.1 Financial Holds

If a student fails to pay the full amount as scheduled, FXUA is authorized to take the following actions until the outstanding balance is paid in full:

- a) Apply financial penalties including late fees.
- b) Place a financial hold on the student's account and limit the access to Student Portal and Canvas.
- c) Withhold the release of the student's academic records or any information based upon or included in the records.
- d) Withhold the issue of the student's transcripts and/or diploma/certificate.
- e) If the student's account remains delinquent, FXUA reserves the right to terminate enrollment.

The university may require payments toward a delinquent account to be in the form of certified funds such as cash, certified check, or money order, or wire transfer to the university's bank account.

3.8 Cancellation and Refund Policy

3.8.1 Student's Right to Cancel

An applicant who provides written notice of cancellation within three (3) business day, excluding weekends and holidays, of executing the enrollment agreement is entitled to a refund of all monies paid less any non-refundable fee not to exceed \$100 required as part of the application process. If no admission fee is required at the time of admittance, then any/all funds would be refundable.

An application requesting cancellation more than three (3) days after executing the enrollment agreement may elect to cancel the Enrollment Agreement with no financial penalty at any point prior to the start of the semester or the end of the add/drop period. FXUA will refund all tuition paid. Any cancellation that takes place after the add/drop period will follow the university's stated Cancellation and Refund Policy.

3.8.2 Refund Policy for Undergraduate and Graduate Programs

If a student elects to drop one or more courses or withdraw from the university, the following refund schedule will be used to determine any outstanding financial obligation for which the student may be responsible:

Last Day of Attendance Notice	Tuition Refund Amount*
Up to the last day of add/drop period	100% of the tuition
After the add/drop & through 25% of the session	75% of the tuition
Through 50% of the session	50% of the tuition
Through 75% of the session	25% of the tuition
After 75% of the session	No refund will be issued

*Excludes any fees

The Student Accounts Office shall review student accounts periodically and contact students with an overpayment. Students may decide to keep the overpayment balance to their account or request a refund by a credit/debit card or a wire transfer by submitting a Refund Request Form. Any bank transaction fees will be deducted from the total. Students may download the form on the university website or obtain a hard copy from the Student Accounts Office. Students, who do not submit the Refund Request Form to the Student Accounts Office upon the overpayment notification, will receive the tuition deposit credit in the same manner as it was paid to FXUA (credit card payment, bank wire transaction, or check). If the Student Accounts Office is unable to process the payment, FXUA will mail a refund check to the student's attention at the most recent address listed in the Student Portal. Please note that the university will only issue tuition refunds to the organization or person who made the original payment.

All tuition refunds will be made within a period of 45 calendar days following the official withdrawal date. Student fees (application fee, postage fee, student service fee, etc.) and service charges rendered during the refund process are not refundable.

The official withdrawal date, for the purpose of a refund calculation, will be the last date on which the student was recorded present in attendance for a class. If no payment was made, or if the student was participating in a payment plan and the payments are insufficient to cover the student's obligations according to the schedule above, the university will send the student a bill for the difference.

If a student fails to pay the full amount as scheduled, FXUA is authorized to take the following actions until the outstanding balance is paid in full:

- a) Apply financial penalties including late fees.
- b) Place a financial hold on the student's account and limit the access to Student Portal and Canvas.
- c) Withhold the release of the student's academic records or any information based upon or included in the records.
- d) Withhold the issue of the student's transcripts.

To initiate the institutional withdrawal process, the student may submit an *Institutional Withdrawal Form* to Fairfax University of America. Students may download the form from our website or obtain a hard copy from the Registrar's Office or the Office of International Student Services.

If a student does not resume attendance at the university on/or before the end of approved LOA, the student will be considered withdrawn from the institution. The date that the LOA was approved should be considered the last date of attendance for refund purpose.

Non-Credit Programs

For non-credit programs or courses, students who wish to request a refund or defer their courses should visit the Student Accounts Office, or call (703) 591-7042 during regular business hours or email.

Due to the short-term nature of non-credit programs, students should submit a Refund Request form to initiate the refund process. Students may download the form from our website or obtain a hard copy from the Student Accounts Office.

3.9 Financial Aid

The Financial Aid Office provides a variety of services to help students pay for their education; including, financial aid advising, exploring funding resources, and financial assistance. Financial Aid counseling service is available Monday through Friday by phone, email, or personal appointment.

3.9.1 Federal Student Financial Aid

Fairfax University of America currently does not participate in the Federal Student Financial Aid Program.

3.10 Financial Aid Office Contact Information

Financial Aid Office
4401 Village Drive
Fairfax, VA 22030
Phone: 703.591.7042
Email: financialaid@fxua.edu

3.11 1098-T Tuition Statement

The 1098-T tax form is a Tuition Statement provided by higher education institutions to all eligible students who pay enrollment fees (including non-resident tuition) during the calendar year. This form may be used by students or parents to claim the American opportunity tax credit (formerly "Hope credit") or Lifetime Learning Credit on their federal income tax returns.

Related expenses do not include charges for room, board, insurance, health fees, transportation, or similar expenses.

Not all students are eligible to receive a 1098-T. Forms will **not** be issued under the following circumstances:

- Non-resident alien students, who are international students and paid enrollment fees and non-resident tuition last year. If requested, the Student Accounts Office can provide student account statement. The request must be sent to the Student Accounts Office no later than January 31.
- Students whose qualified tuition and related expenses are entirely waived or paid entirely with scholarship.
- The amount billed for qualified tuition and related expenses in the calendar year is paid in full by a third-party organization.
- No qualified tuition or related expenses were billed in the calendar year. For example, a student who graduated in May 2020 in most cases would not receive a 1098-T for 2020 because all tuition for the 2020-21 academic year was billed in the calendar year of 2019.
- Per IRS regulations, educational institutions cannot produce this form for students who are not eligible to receive one.

University staff cannot determine if someone qualifies for a tax credit or respond to tax questions. Those with questions about whether they qualify should contact the IRS for more information at www.irs.gov or at 1-800-829-1040 or consult a tax preparer.

The form is generally made available around late January for the previous calendar year.

3.12 Student Employment

On campus employment includes work done as a teaching assistant as well as jobs performed on-site including, administrative positions in various departments.

3.12.1 Employment of F-1 Students

F-1 students are eligible to work on-campus while attending classes. The work does not need to be related to the field of study, and students must maintain legal F-1 status while engaging in on-campus employment. All students working on campus must complete the On-Campus Work Authorization Form to obtain written approval from the International Student Services office.

3.12.2 Schedule

Most work schedules are usually flexible in order to accommodate student schedules. However, some positions may have coverage requirements at specified hours of the day. Students in these positions may need to have flexibility with their hours in order to work in these positions.

F-1 students are limited to working a maximum of 20 hours per week while classes are in session.

U.S. citizens or permanent residents are limited to working a maximum of 29 hours per week.

3.12.3 Requirements

To be eligible to work on campus, students must:

- maintain a minimum of a 3.0 cumulative GPA (the cGPA is not factored in for students in their first semester of study);
- be up-to-date with all tuition payments and have no outstanding financial obligations;

- be enrolled in a degree or certificate program at FXUA;
- submit a résumé and cover letter for consideration; and
- maintain professional behavior at all times.

3.12.4 How to Apply

Students can apply online via the Human Resources page.

4 STUDENT LIFE AND SERVICES

The Student Experience Department offers various types of student activities and developmental programs. The Student Experience department offers many opportunities and services aimed at enhancing the student experience. From student activities, to clubs and honor societies, to ancillary academic services, FXUA offers a variety of systems and supports for its learning community.

4.1 New Student Orientation

FXUA seeks to integrate students into the university community and to support and complement student learning inside and outside of the classroom. To support the needs of our new students, a **mandatory** New Student Orientation program is held prior to the beginning of classes each semester. During this program, students are introduced to university policies and procedures, including academic advising, course loads, and standards of satisfactory academic progress (SAP). The program and staff encourage students' self-growth, learning, and understanding of their own relationship to the intellectual, social, and cultural climate of the university. During this orientation, new students have an opportunity to meet fellow students, tour the campus, and meet with admissions officers and their academic departments. For more information, students may contact or call (703) 591-7042 or studentexperience@fxua.edu.

4.2 Student ID Cards

New students are eligible to receive their student ID card once the add/drop period has ended for the semester, free of charge.

US Citizens and Permanent Residents need to bring with them the following documents:

- One form of government-issued identification
- Tuition payment receipt

International students need to come to the Student Experience office with the following documents:

- Current I-20
- Passport
- Tuition payment receipt

Students are required to have an FXUA ID card in order to make photocopies, and to receive any available student discount for which they may qualify. Temporary ID cards can be provided to the student at the Student Experience office until new student ID cards are provided. If a student's ID card is lost or stolen, students must pay a \$10.00 replacement fee to the accounting office before a new Student ID can be provided to the student.

4.3 Student Activities

Student activities are designed to give students a chance to broaden their interests, share new experiences, and meet new people. Students are encouraged to participate in these social, recreational, educational, and cultural activities as a means to gain a well-rounded education. Activities for students include those offered both on and off campus. On campus, activities include seminars that feature local and national business leaders, embassy officials and local community businesses. Seminars also include discussions about safety (personal and internet), communication, finances and many additional relevant topics. In addition, student-centered events such as culture shows, the Diversity Luncheon Series, and the Annual President's BBQ may be offered throughout each semester. Off-campus student activities may include day trips to popular site-seeing or educational destinations in Washington, DC and other surrounding areas. In addition to all of these events, students are encouraged to join and participate in a variety of student clubs hosted at the university. Student Experience seeks to supplement the classroom learning experience and encourage a well-rounded educational experience at the university. The list of current activities and events available for students are posted on FXUA's website. For information regarding our student activities, students are encouraged to contact call (703) 591-7042 or studentexperience@fxua.edu.

4.3.1 Off-site Activities

From time-to-time, students may engage in off-site activities that may either be related to their courses or for official sanctioned events and activities. For any off-site, officially sanctioned activity, an Indemnification and Hold Harmless Form

The University shall not be liable or responsible for, and shall be saved, indemnified and held harmless from and against any and all claims and damages of every kind, for injury due to death of any person or persons and for damage to or loss of property, arising out of or attributed, directly or indirectly, from Students use of this premises.

4.4 Student Success Initiative

The Student Success Initiative is designed to provide extra assistance to students who either (a) request assistance for themselves or (b) who have been referred by staff or instructors. Our goal is to enhance learning and development for improving academic performance.

Available programs include but are not limited to: goal setting (academic and professional), organizational skills, learning theories and learning styles, time management and scheduling, note-taking strategies, reading strategies, memory strategies, exam preparation, test-taking strategies, dealing with test anxiety, motivation and concentration, dealing with and overcoming procrastination, stress management skills, managing finances, multicultural awareness, etc.

4.5 Student Clubs

FXUA offers a variety of student clubs. The student clubs are open to all students irrespective of their program of study, nationality, or beliefs. Getting involved in student clubs helps students build their leadership, personal, and professional skills. Being involved in student clubs also gives students an opportunity to meet new people, share ideas, and to learn from a group of individuals. Visit the Student Experience portion of the FXUA website for more details.

4.6 Student Union

The Student Union (SU) is comprised of responsible and motivated members of the student body who are dedicated to ensuring student rights and student involvement in university activities. The SU serves to uphold the voice and opinions of students and to initiate and implement policies governing their activities. In addition, the SU seeks to foster and support the ideas and wishes of the student body; provide a communication network within the student body; engender cooperation among all student groups, clubs, and organizations; act as a liaison between the student body and administration, faculty, and staff; and nurture an atmosphere of community within the university.

4.7 Airport Pick-up Assistance for New Students

FXUA also recommends that students arriving in the United States use the Washington Metropolitan Area Transit Authority, local taxi services, or trusted ride-sharing applications for transportation around the Washington, DC and Fairfax, VA areas. Students are responsible for all fees charged by the service providers.

4.8 Housing Accommodation Assistance

The Student Experience Department provides students with resources and useful information to make the process of finding accommodations easier. We do not offer housing, we assist students with locating reasonable and affordable home stays, apartments, shared housing, and hotels in the surrounding communities. Students requiring assistance in finding housing should visit the housing page on the FXUA website (<https://www.fxua.edu/student-life/services/housing/>) or e-mail studentexperience@fxua.edu.

4.9 Student Health Insurance

Health insurance is not mandatory for students. However, it is **strongly** encouraged for students to obtain health insurance. Visiting a doctor and/or emergency room in the United States can be very expensive. It is even more expensive when you do not have insurance. All students are encouraged to ensure they obtain coverage for themselves and their family members.

FXUA has created a list of insurance companies that are offering affordable health care to students. Please visit: to learn more about the different insurance options, benefits and prices. We encourage students to call several of the insurance companies to find out what insurance policy is best for their situation. Students are not limited to the insurance companies that are listed on this page. Students are able to find their own insurance. Students with questions may contact or call (703) 591-7042 or studentexperience@fxua.edu.

4.10 Vaccination and Immunization Policies

In light of the COVID-19 pandemic, FXUA is requiring proof of vaccination for all students, staff, and faculty. All students, staff, and faculty are required to provide proof of a WHO-approved vaccination.

FXUA strongly encourages current or prospective students to understand the importance of immunization against common diseases for which vaccines are widely available. This includes diseases such as, but not limited to, Meningococcal disease, Hepatitis B, Measles, Mumps, Rubella, Varicella (Chickenpox), Tetanus, Diphtheria, and Pertussis. Because of the close proximity that students may find themselves in with respect to other individuals in classes or events on or off campus, and/or their living situations, vaccinations are encouraged but not required for these additional vaccines. Vaccinations aid in reducing the chances of serious illness, injury, or death associated with vaccine-preventable diseases.

Questions about vaccination requirements can be directed to vaccine@fxua.edu.

4.11 Counseling Services

The university can assist with connecting students to counseling services in the area upon request. If you are struggling with feeling homesick, depressed, anxious, stressed, need advice, or just someone to listen, please come by during the open counseling hours or make an appointment. All information shared during the session is kept confidential. If you would like to make an appointment e-mail studentexperience@fxua.edu.

4.12 Study Rooms

There are two study rooms available in the Library for student use. Please visit the circulation desk at the entrance of the Library to make a reservation. Students can also reserve a study room on the Library's website at <https://www.fxua.edu/library/reserve-a-study-room/>. In addition, there are several computer workstations and powered tables available for student use inside the Library. In addition to the library facilities as study space, students are permitted and encouraged to use all available classrooms as study rooms when classroom space is available. You do not need to make a reservation to use unoccupied classrooms as study rooms. The Registrar's Office updates and posts the schedule of classes outside each room and you can use this schedule to find out if a room is available.

4.13 University Library

The purpose of the Library is to provide students with access to the wide range of information, reference, and research materials they will need to supplement classroom instruction and assigned textbooks, complete homework, and to undertake research projects. The Library maintains a sizable in-house collection of books, periodicals, and audio-visual materials. Additionally, Library staff can assist students in accessing a variety of electronic, full-text journals and books, including seven databases, four online journals, and over 200,000 eBooks.

4.13.1 Hours of Operation

The Library is open and staffed by the Learning Resource Manager and/or trained library assistants, on days and times posted outside of the library. Extended hours maybe available during exam periods.

4.13.2 Library Website and Catalog

The library maintains a website, which includes a catalog of library materials, as well as to a variety of other online resources that can be used by students for study, reference, and research. Students can access the library both on and off campus. Using the library's electronic catalog, Koha, students can search for books and other materials as well as place a hold and renew online. Visit the Library's website to learn more: <https://www.fxua.edu/library/>

4.13.3 Collection

The Library currently has approximately 8,000 volumes, the majority of which are relevant to the University's areas of study: business, computer and information science, project management, public administration, and international relations The Library maintains a reference collection with a variety of standard and specialized reference works and a reserve collection consisting of supplementary material for current courses. In addition, students can request resources through Interlibrary Loan from several partner academic and public libraries.

4.13.4 Online Resources

FXUA subscribes to 10 online research databases, journals, and eBooks: Academic Search Ultimate, Business Source Ultimate, Credo Reference, Comparative Politics, EBSCO's eBook – Academic Collection, IBISWorld, JSTOR, The Economist, MIT Sloan Management Review, and Regional Business News. The online library contains a vast collection of full-text journals and over 200,000 eBooks. In addition, the Library's website has links to over 200 web resources in the areas of business, computer and information science, general reference, biology, comparative religion, English language and literature, history, mathematics, philosophy, psychology, and sociology. The links provide valuable resources for student study and research. Please visit FXUA library's webpage at <https://www.fxua.edu/library/> for descriptions.

4.13.5 Circulation Policy

All circulating books in the collection may be checked out for four (4) weeks at a time. Reference materials and periodicals must be used inside the library. Books in the course reserve collection must also remain in the library so that they are available to all students during the reserve period. The Student ID card that is issued during the New Student Orientation serves as your Library card. When checking out materials, requesting reference assistance, or other library services, students will be asked to show their Student ID card. Borrowed material may be renewed in-person, online, or by phone, if there is no request for the material from other students or faculty. Library materials should be returned to the Library circulation desk.

4.13.6 Reference Services

Members of the Library staff are available to assist students with research needs. Additionally, they are available to help students on how to use our online resources. Library staff can be contacted for assistance at the Library reference desk, by e-mail, or by live chat at any time during library hours.

4.14 Writing, Research, and Media Center

The Writing, Research, and Media Center (WRMC) serves to support our learning community in a way that allows for enhanced growth and ability to communicate in writing for FXUA's various fields of study. By providing resources to our learning community related to writing, researching, and use of media, the WRMC aims to support and develop knowledge and awareness of resources and tools for self-development and long-term personal coaching. Students are provided one-on-one or group sessions to target specific needs in order to allow for the development of skills for long-term success. Faculty also benefit from the WRMC through consultations about instructional questions or issues related to students and their work.

The WRMC hosts a website (<https://www.fxua.edu/wrmc/>) with resources and tools for success for students and faculty.

4.15 Research Services

Research is an integral part of understanding the world around us and in making a positive impact on the community, both locally and globally. FXUA faculty come from a diverse array of backgrounds and have contributed to a growing body of knowledge through book publications, research publications, professional workshops, conference presentations, and many other endeavors. As such, Fairfax University of America shares the commitment of providing opportunities to faculty and graduate program students to engage in scholarly research for personal, professional, and university growth.

The institutional review board (or IRB) consists of at least seven members who have a variety of areas of expertise and extensive experience with research. Several of those members are affiliated with FXUA, while some are external to the university. The purpose of the IRB is to ensure the protection of human participants involved in research studies, thus ensuring human participants' rights and welfare. The IRB meets and reviews applications for research involving human participants with the sole purpose of making sure research studies meet strict guidelines for the protection of human participants.

If your research involves human participants, you are required to receive approval from the IRB prior to beginning your research study. Research involving surveys, interviews, archival data, and observations all involve human participants and require IRB approval. It is the responsibility of each principal investigator to seek approval from the IRB.

View requirements and seek further up-to-date information here: <https://www.fxua.edu/academics/research-at-fxua/>

4.16 Career Services

The Career Services Department provides individual counseling and professional development resources to help students and eligible alumni learn the skills needed to obtain volunteer, internship and employment opportunities. The department's goal is to help students to secure post-graduation employment that is compatible with their field of interest, preparation, and expectations. Staff conduct sessions for groups and individuals concerning employment opportunities, résumé writing, dressing for success, and interviewing techniques. Career services are provided to all eligible graduates and while this assistance is readily available, the university does not guarantee or promise employment to any graduate.

While Career Services provides access to and information on finding jobs, the responsibility of applying for and securing interviews is up to the graduate. These career-finding skills are an important part of every graduate's success, and the Career Services Department is available to assist in the further development of these skills. Of course, graduates' independence and self-motivation are essential to their long-term success. Staff will follow up with graduates about their employment and the benefits of their education and are available as partners post-graduation to further assist.

All students are encouraged to visit the Career Services in their very first semester and throughout their studies to familiarize themselves with the services offered. Students are encouraged to work on developing their career finding skills throughout their program, so that they can more easily transition to the next stage of their career post-graduation.

Career Services also assists students in identifying and applying for academic internship opportunities.

Below is an overview of the services offered by the Career Services Department:

- **Cover Letter and Résumé Reviews:** All students will need a North American-style cover letter and résumé to apply for on- and off-campus jobs and internships. Students should schedule an appointment in their first semester with the Career Services Department.
- **On-campus Employment Counseling:** The Career Services assists students with on-campus employment searches and applications through the Career Services Management (CSM), FXUA's on- and off-campus job search tool. To access CSM:
- **Off-campus Employment Counseling (Academic Internship and OPT):** The Career Services offers resources to help students in their job or academic internship search process. Several resources include employer database, the CSM, employer binders that contain information about companies hiring, and job boards. Positions are also posted in weekly e-mails that are sent out from the Career Services and posted on Facebook. To access Facebook:
- **Internship Counseling:** After one year in a full-time degree program, most students are eligible to complete an academic internship. The Career Services assists students with the academic internship search and application processes. Students have access to past internship employers and other job search resources through the Career Services.
- **Professional Development Opportunities:** Throughout the year, FXUA provides a number of workshops and information sessions on those skills required to find employment. Past sessions have included cover letter and résumé writing, introductions, networking, job fair preparation, interviewing, LinkedIn, American business culture, business communication, employment benefits, and work visas.

4.17 Information Technology Department and Services

The Information Technology (IT) Department is the primary provider of computing and information technology resources, services, and support to the FXUA community. The IT Department exists to ensure that all students, faculty, and staff have the IT tools, services, infrastructure, and support needed to carry out the university's mission. Working in conjunction with the entire university community, the IT department provides the direction, planning, and deployment of IT and communication services and networks that are reliable, capable, and scalable.

The IT Department supports FXUA's pursuit to achieve its objectives by providing the technology infrastructure and services that advance teaching and learning, enable research, enrich the student experience, and effectively manage institutional information.

4.17.1 Contacting IT

For non-urgent requests, students and faculty may email it@fxua.edu. For urgent requests, IT can be contacted via telephone at (703) 591-7042.

On-campus, students and faculty may dial 333 from a service phone for immediate assistance. There are service phones available at the front desk on the first floor and on the second floor waiting area.

4.17.2 IT Policies

The purpose of these policies is to outline the acceptable and unacceptable use of university technology resources and to provide guidelines for appropriate use by students, faculty, and staff as well as to educate users regarding their responsibilities.

This is not a comprehensive list of policies covering all aspects of technology use. These policies are intended to be viewed as principles to help guide members of the learning community. Any specific policy statements are meant to serve as reference points. Policies will continue to be modified as new questions and situations arise; changes may occur at any time without prior notice.

While the proliferation of computers and information technologies does not alter basic codes of behavior in academic life, it does place some issues in new contexts. Using these technologies enables people to do varied things, both ethical and

unethical, more easily. These technologies are an enormously rich resource for innovation and the furtherance of the university's mission. However, in spite of many positive aspects, these technologies also increase the risks of actions, deliberate or not, that are harmful in various ways, including: (a) interference with the rights of others; (b) violation of the law; (c) interference with the mission of the university; and/or (d) endangering the integrity of the university's computer and information network.

In light of the risks addressed above, some of these guidelines call for respectful and responsible use of the computer networks to protect the rights of individuals; other guidelines warn against actions that may violate the law. Users must understand the perils of illegal use, exchange, or display of copyrighted, deceptive, defamatory, or obscene materials on a web page or through other electronic communication channels.

Finally, these guidelines seek to protect the integrity of the university's information systems themselves. Computing or networking resources need to be accessible and secure for appropriate uses consistent with the mission of the university. The usurpation of these resources for personal gain, commercial gain, or without authorization is unacceptable. Moreover, even the individual right to privacy may, when personal files may need to be accessed for troubleshooting purposes, be overridden by authorized personnel to protect the integrity of the university's computer systems.

4.17.2.1 Acceptable Use of Technology

The computer network is the property of FXUA and is to be used for legitimate purposes only. University resources, including technology resources available to staff, faculty, and students, are not to be used for anything other than their intended purpose. Resources should always be used in ways consistent with furthering the university's mission of promoting education and research. All users have a responsibility to use FXUA's technology resources and the Internet in a professional, lawful, and ethical manner. Abuse of the computer network or the Internet may result in internal disciplinary action within the university or civil and/or criminal liability.

Computer Use

- Today's information technology is a shared resource. Users should respect the needs of others when using computer and network resources. Users should not tamper with facilities and should avoid any actions that interfere with the normal operations of computers, networks, and facilities.
- Users should avoid excessive use of computer resources. They are finite and others deserve their share.
- Making university computing resources available to individuals not affiliated with FXUA without approval of an authorized university official is strictly prohibited.
- Intentional waste of human or electronic resources is strictly prohibited.
- Intentionally disturbing use of electronic networks or information systems is strictly prohibited.
- No food, drink, gum, or tobacco is permitted in the computer labs. Any food or drink must be left outside the lab in designated areas or concealed in a backpack or other bag while in the lab. Food or drink that is concealed may not be consumed while inside the lab facilities. Any individual found consuming food or drink in the lab may be asked by a faculty, staff, or IT Department staff or student staff to discard the item(s) immediately. Refusing to comply or arguing with university staff will result in suspension of the individual's lab privileges. Lab users in violation of this policy for the first time will be given verbal and electronic (university email) warnings. If the same person continues to violate the policy, they will receive a second warning and will be charged \$25. For the third and future violations, the person will be charged \$30.
- It is strictly prohibited to deface IT facilities and/or to misuse the computing equipment. All individuals are prohibited from taking any action that may cause damage to such property including, but not limited to, moving equipment, unplugging equipment, or breakage by any means. The IT hardware and computer labs are private property of FXUA and any damage to IT property as a result of violation of this policy will carry financial penalty equal to the cost of repair or replacement of such property as a consequence for all offenders.

Internet Use

- The university does not monitor the content of outside web pages and is not responsible for the views expressed by individual users.
- Web pages that are accessed to an excessive degree can be a drain on computer resources.

Email Use

- The university does not monitor the content of electronic mail or other online communications and is not responsible for the views expressed by individual users.
- "Spamming" and similar inappropriate uses of university resources are not acceptable.
- Sending of electronic chain mail and the inappropriate sending of "broadcast" messages to large numbers of individuals or hosts is also strictly prohibited.
- The interception or attempted interception of communications by parties not explicitly intended to retrieve them without approval of an authorized university official is strictly prohibited.

Personal Electronic Device Use

- Employees are not permitted to bring personal computers or data storage devices (such as external hard drives, flash drives*, or other data storage media) to the workplace or to connect them with the university's electronic property or network unless expressly given written permission to do so by the university.
- ** Faculty members are permitted to use this device for instructional purposes in the classroom.*
- Personal cellular devices are permitted in the workplace, but must be kept stored away from the working area/desk during office hours and should only be used in emergency situations.

Software Use

Software piracy is the installation, use, or distribution of unauthorized copies of software, which is protected property under intellectual property laws. Purchased commercial software packages include license agreements that indicate how the software should be used. Pirating software or failure to comply with restrictions in license agreements is illegal and may result in substantial fines for the university. The university has adopted the following computer software policies on the use of computer software.

- FXUA, in purchasing computer software, commits to specific licensing agreements. Misuse or unauthorized uses, including duplication of licensed software for backup or archival purposes or duplication of related documentation may be a violation of United States copyright laws.
- FXUA employees shall use computer software only in accordance with the terms of the licensing agreement. FXUA does not condone or support the use of any unauthorized copies of software. All software used by employees to perform their university responsibilities shall be purchased through appropriate procedures.
- Any employee who makes, acquires, or illegally reproduces software may be subject to civil and criminal penalties, including fines and imprisonment. Further, employees who violate this policy will be subject to appropriate disciplinary actions.

Consequences of Misuse

- An individual's computer use privileges may be suspended immediately upon the discovery of a possible violation of any of the above policies. Such suspected violations will be confidentially reported to the appropriate member of management at the university. The appropriate member of management will judge an offense as either major or minor. A first minor offense will normally be dealt with by the IT Department or management after consultation with the user. Additional offenses will be regarded as major offenses and dealt with accordingly. Violations of the policies will be dealt with in the same manner as violations of other university policies and may result in disciplinary review. In such a review, the full range of disciplinary sanctions is available, including the loss of computer use privileges, dismissal from the university, and/or legal action.
- Systems managers or other individuals within an academic or administrative unit may be empowered to suspend some or all privileges associated with computer use in cases of misuse or threat to the integrity of all or part of the university's information management resources.
- Before any permanent action is taken against a user, the user will be advised of the basis for the proposed action and will be given an opportunity to respond. Concerns about such actions may be raised through the usual administrative or academic channels associated with the dean, school, facility, or resource in question.
- Where a violation of university policies or applicable law appear to warrant action beyond a suspension or elimination of computer privileges, the matter may be referred to a supervisor, administrator, or university disciplinary body with appropriate authority or to law enforcement authorities.
- Complaints or concerns about another's use of computer resources should be directed to the administrator responsible for the facility or resource in question.

4.17.2.2 IT Security

Guidelines for Passwords

Users are responsible for all activity involving their user accounts. User accounts should be kept secure and private. Users should not use identifying data or common words as passwords. Passwords should be difficult to crack or otherwise guess by individuals or by sophisticated computer programs. It is recommended that users change passwords for all user accounts every 120 days in order to secure access to accounts. Users are strictly prohibited from revealing passwords or otherwise permitting the use by others (by intent or negligence) of personal accounts for computer and network access.

Levels of Access to the Network

Users are provided access to the computer network and related tools to assist them in the performance of their jobs or studies. The university is the custodian of a wide array of personal and financial data concerning its students, staff, and faculty, as well as the university itself. Users should respect the university's obligations of confidentiality as well as their own

confidentiality. Only users with authorization may access, communicate, or use confidential information. The university has the right to expect that computer users will properly identify themselves. Computer accounts are assigned and identified to individuals. Privileges and responsibilities granted to users vary between groups. Some have additional and sometimes more restrictive guidelines applicable to the user. The use of restricted-access university computer resources or electronic information without or beyond one's level of authorization is strictly prohibited.

Virus Protection

Interference with or disruption of the computer or network accounts, services, or equipment of others through the propagation of computer worms and viruses is strictly prohibited. Unauthorized scanning of networks for security vulnerabilities is strictly prohibited.

Confidentiality

Although respect for privacy is fundamental to the university's policies, almost any information is able to be read or copied and some user information is maintained in system logs as part of a responsible computer system maintenance plan. The university reserves the right to examine computer files, and, in rare circumstances, the university may be compelled by law or policy to examine even personal and confidential information maintained on university computing facilities.

Usage of Data

Unauthorized copying and/or use of licensed computer software is strictly prohibited. Unauthorized access, possession, or distribution – by electronic or other means – of electronic information or data that is confidential under the university's policies regarding privacy or the confidentiality of student, administrative, personnel, archival, or other records is strictly prohibited. Intentionally compromising the privacy or security of electronic information is strictly prohibited. Intentionally infringing upon the intellectual property right of others in computer programs or electronic information (including plagiarism and unauthorized use or reproduction) is strictly prohibited. Altering or attempting to alter files or systems without authorization is strictly prohibited. Intentionally damaging or destroying the integrity of electronic information is strictly prohibited.

4.17.2.3 Hardware Protection Policy

Rationale

University computer lab facilities are considered to be study areas. All activities which disrupt, attempt to disrupt, or support the disruption of a study environment will not be tolerated and corrective action will be taken. Eating and drinking are not permitted in computer labs because such actions can result in personal injury and/or can pose a threat to the computing equipment or damage IT property. This policy applies to all staff, faculty, students, and University guests entering the campus and using its lab facilities.

Hardware and IT equipment issued to staff, faculty, or students by the university is also subject to this policy. This includes laptops, printers, copy machines, overhead projectors, tablets, desktop computers, and all other pieces of IT equipment that is considered property of FXUA.

General Rules

No food, drink, gum, or tobacco is permitted in the computer labs. Any food or drink must be left outside the lab in designated areas or concealed in a backpack or other bag while in the lab. Food or drink that is concealed may not be consumed while inside the lab facilities. Any individual found consuming food or drink in the lab may be asked by an IT Department staff or student staff to discard the item(s) immediately. Refusing to comply or arguing with university staff will result in suspension of the individual's lab privileges.

For the protection of personal life and computer lab facilities, the following rule of punishment is provided and must be followed:

- Lab users in violation of this policy for the first time will be given verbal and electronic (university email) warnings.
- If the same person continues to violate the policy, he/she will receive a second warning and will be charged \$25.
- For the third and all future violations, the person will be charged \$30.

These fees will be assessed on the student's account and can result in inability to register for classes or receive other services if the balance is not paid.

Staff and faculty violators' fines may be assessed on the violator's paycheck.

Damage to University Property

It is strictly prohibited to deface IT facilities and/or to misuse the computing equipment. All individuals are prohibited from taking any action that may cause damage to such property including, but not limited to, moving equipment, unplugging equipment, or breakage by any means. The IT hardware and computer labs are private property of Virginia International

University and any damage to IT property as a result of violation of this policy will carry financial penalty equal to the cost of repair or replacement of such property as a consequence for all offenders.

4.17.2.4 Technology Standards

Guidelines for Software, Hardware, and Systems

Requests from employees for software, hardware, or network privileges should be relative to their positions at the university and should reflect the scope of their responsibilities. Before granting any privileges to employees, the IT Department may request approval from the employee's supervisor and/or management. Most software, hardware, and systems must receive final approval from the executive committee of the university before they are purchased and implemented.

All torrent, password-generating, and otherwise malicious software is strictly prohibited.

Maintenance of Software, Hardware, and Systems

The IT Department maintains a current inventory of all software installed on computers/networks in the university. A yearly inventory is conducted and spot checks/audits are performed periodically to ensure that illegal software has not been inadvertently or deliberately installed on university-owned computers. Software will not be installed on a network unless specifically allowed in the licensing agreement. If a software package is licensed to be operated across a network, the IT Department will make sure that any usage limits are observed and copying is disabled unless explicitly allowed under the license. The IT Department will ensure that software is not copied for use on more than one computer and that software user manuals are not copied. The IT Department will also ensure that backup copies of software are not used to run the software on additional computers.

Software Upgrades

When software upgrades are purchased, previous version and associated user manuals should be destroyed if no longer needed. Some upgrades require that previous versions be installed before the upgrade is installed, so previous versions must be maintained.

4.17.2.5 IT Services Policy

FXUA computing facilities are used by departments, offices, and faculty members for a number of purposes. This creates a complex environment for providing a reliable, useful facility for all involved. Pieces of software added into the environment become part of an integrated system the IT Department must maintain. For this reason, there are a number of policies regarding software requests and installation.

Addressing Misuse by Users

Failure to comply with requests from appropriate university officials to discontinue activities that threaten the operation or integrity of computers, systems, or networks will result in disciplinary action. (Please refer the appropriate use policies for more details.)

Requests for Support

Most requests for support (troubleshooting, installation of tools, etc.) should be entered into FXUA's help desk ticketing system. Urgent requests (such as system failure or inability to connect to the network) may be directed to the IT Department via telephone or in person.

Software Support

Departments wanting updates to software they have purchased must make requests through the IT Department. The IT Department must be provided with the proof of purchase of any non-free updates before the update will be installed. Departments may request updates to IT Department-purchased software; such requests will be evaluated. Such requests must also be submitted via the help desk four weeks before the start of the semester.

Software Maintenance

The IT department will maintain the original installation of software for one academic year from its initial installation or until the license expires, whichever occurs first. Software packages must be retested after each semester as new software, hardware, or operating systems may be installed. The IT Department will notify the department of any new conflicts and make all efforts to resolve those conflicts. If unavoidable conflicts arise, the IT Department will work with the affected department to find the best solution. The IT Department will not provide students, faculty, or staff with technical support for software not purchased by the IT Department. This means that instructors intending to use department-requested software are expected to be proficient in said software; the IT Department will not provide training, support, or documentation for software not purchased by the IT Department.

4.17.3 Computer and Internet Access

The library has wireless Internet access, so students and faculty can access the Internet from the Library using their own wireless-enabled laptop. Desktop computers with Internet connection and a printer are also available for use in the Library.

4.17.4 University E-mail Accounts

All students and faculty are provided an @fxua.edu email. All university correspondence and notifications are sent via university email; therefore, it is required that all students and faculty use it. Everyone is expected to log into their university email regularly. No university communication (communications about classes or academic administrative matters should occur student-to-student, faculty-to-student, faculty-to-faculty, student-to-staff, etc.) should occur via personal email.

4.17.5 Campus Wifi

All students can access free wifi on campus. Either access the Student or Guest networks. Upon acceptance of the terms of service, the wifi is accessible across campus.

4.17.6 Student Portal

The Student Portal is a centralized location for accessing and managing students' personal information. In the portal students will be able to access university announcements, grades, class schedules, electronic bills, and much more. In addition, the portal is place for students to be able to update their personal details including any changes to their address or phone number.

While our learning management system includes a gradebook, the Canvas gradebook is an unofficial grade. Please refer to the Student Portal for your official grades for the course. Access the Student Portal here:

<https://portal.fxua.edu/student/login.asp>

4.18 Minimum Technology Requirements

In order to participate in the online class activities and run the LMS effectively, all users must use the following technical components. If you do not follow the suggested requirements, Canvas may still work, but some functionality may be lost. All users must have access to a high-speed internet, a personal computer that is up-to-date and maintained, as well as a microphone, speaker (or earphones), and a webcam. These items can be either built-in or external.

4.18.1 For PC Users

- A modem or other device capable of connecting to the Internet. A high-speed connection is strongly recommended.
- Processor: 2GHz processor (Dual Core processor **strongly recommended**)
- Operating System: Windows 8.1 or newer with current updates installed
- Memory: 4 Gigabytes RAM Memory or higher
- Hard drive: 500 Gigabytes or higher
- Speaker (built-in or external)
- Microphone (built-in or external)

4.18.2 For Mac Users

- A modem or other device capable of connecting to the Internet. A high-speed connection is strongly recommended.
- Processor: Intel I3/equivalent or better
- Operating System: MAC OS X 10.6 (Snow Leopard) or newer
- Memory: 4 Gigabytes RAM Memory or higher
- Hard drive: 500 Gigabytes or higher
- Speaker (built-in or external)
- Microphone (built-in or external)

4.18.3 Tablets and Smart Phones

Although Canvas works on most tablets and smart phones, some features may not work properly on these devices. We recommend using a PC or Mac as your primary means of access to Canvas. For recent updates, you should always check: <https://community.canvaslms.com/docs/DOC-14263-what-are-the-computer-specifications-for-canvas-studio>

4.18.4 Browser Requirements

The latest version of the following browsers can work with Canvas:

- **Chrome** 79 and 80
- **Firefox** 73 and 74 ([Extended Releases](#) are not supported*)
- **Edge** 79 and 80
- **Respondus Lockdown Browser** (supporting the latest [system requirements](#))
- **Safari** 12 and 13 (Macintosh only)

For recent updates, you should always check: <https://community.canvaslms.com/docs/DOC-10720-which-browsers-does-canvas-support>

For several reasons, Chrome and Firefox run Canvas optimally, but most of the functions should work on any of the browsers. If you encounter any problems accessing resources, consider use of Chrome or Firefox browsers. Other browsers may be used, but may not support all functionalities of the LMS. All browsers should have JavaScript, Cookies and Pop-ups enabled.

The following browser settings required for smooth operation of Canvas:

- Enable cookies
- Enable Javascript (Javascript and Java are not the same, Canvas does not require Java)

Please use the latest versions of above mentioned browsers, and keep the browser up to date.

4.18.5 Software Requirements

Given the multimodal nature of the learning environment, FXUA recommends the following applications and to maintain them within working conditions:

- Current virus detection software that must be installed and kept up to date
- To view and create resources for Canvas, the use of [Microsoft Office 365](#) and its applications are encouraged.
- [Java](#)
- [Adobe Acrobat Reader/Microsoft Edge](#) to open and save PDF files
- [Adobe Flash Player](#)
- [Screencast-O-Matic](#)
- [Windows Movie Maker](#) (for PC users)
- [VLC Media Player](#)
- [Quick Time Player](#) (for MAC users with 10.6 or higher)

4.18.6 Recommended Hardware Items

The following are examples of suggested products that will meet the hardware needs described above.

4.18.6.1 Cameras

- Logitech QuickCam Sphere AF
- Logitech QuickCam E3500
- Samsung Pleomax PWC-7100
- Genius Look320S
- Integrated Lenovo 3000 n100
- Skypemate WC-103M
- Logitech 720p Webcam C510

4.18.6.2 Headsets

- Logitech Clear Chat Style
- ClearChat PC Wireless
- Logitech H330 USB Microphone

4.19 International Students Services

The International Students Services (ISS) Office is responsible for assisting students with all immigration matters that affect international degree-seeking students, as well as English language study students on non-immigrant visas (F-1). The ISS Office is a centralized immigration advising office for all international students, and is responsible for maintaining the Student and Exchange Visitor Information System (SEVIS) compliance for Fairfax University of America.

In addition, the ISS also assists other university departments with efforts in providing welfare to all international students, and acts as a resource and support to these individuals in transition to the new culture and environmental surroundings. International student advisement includes, but is not limited to; assistance with procedures, expectations, and requirements of U.S. academic standards. It is a priority of the ISS to assist with cultivating opportunities to promote and encourage cross-cultural understanding.

4.19.1 Regulations for International Students (F-1 visa/status)

It is the student's responsibility to comply with all immigration regulations that apply to F-1 visa students. If a student fails to follow these procedures, then they will be considered "Out of Status" and until the student is able to obtain a new F-1 status, according to immigration guidelines, he/she may not:

1. Continue to stay and study in the USA;

2. Extend their period of study (if needed);
3. Be approved to travel outside of the USA, by a Designated School Official;
4. Pursue practical training; or
5. Participate in other F-1 visa related activities (if applicable).

4.19.2 International Students (F-1 visa) Responsibilities

1. Possess un-expired passport that is valid for at least six (6) months at all times during their stay in the U.S.
2. Attend the school that they are authorized to attend.
3. Make normal progress toward completing their program of study.
4. Report any change of local address, phone number, or email address to the ISS Office within 10 days of the change. Students should also update the aforementioned information via their Student Portals. If applicable, comply with Special Registration Procedures for certain foreign nationals. (For more details, please contact the International Student Services Office).
5. Maintain full-time enrollment at all times:
 - a. **If in an Academic Program:** The full-time course load for graduate degree and certificate programs is 9 credits per semester, and the full-time course load for undergraduate and certificate programs is 12 credits per semester. However, during the summer sessions the full-time course load is lower for graduate and undergraduate studies. The summer session full course load for graduate degree programs is 6 credits and for undergraduate programs is 6 credits. Any student starting during a summer session is required to maintain a full course load in that specific summer session. Keep in mind that if a student is required to take pre-requisites the course load may vary.
6. Obtain a new I-20 for a change of program/specialization or a program level of study. Abide by FXUA's attendance policy, which requires that all full-time students attend all classes.
7. Accept no employment of any kind, either on-campus or off-campus, without written permission from the ISS Office and, if necessary, by USCIS.
8. Request and be approved of a Reduced Course Load (if applicable)
9. Request a Program Extension of stay as needed. This must be done at least 1 month before the original program end date, according to the most current I-20. If a student requires more time to complete their program than that of which is authorized on the FXUA I-20, they must request a program extension through the ISS Webpage.
10. Complete a timely reinstatement application if the student has lost their status. The ISS office will make a decision on recommending the student for reinstatement based on the student's demonstration of intention to continue studying.

4.19.3 Vacation and Annual Break

Students who wish to take their annual break must complete an Annual Break Request Form via the International Student Services Office Portal at least one week prior to the beginning of the first session of the requested annual break. When the form is submitted electronically, the ISS Office will determine if the student is eligible for the annual break and will inform the student of the decision as well as the student's return to class date. The student will be informed via university email within three business days of submission of the Annual Break Request Form

If in a **Degree Program:** All degree-seeking F-1 visa students are permitted to take a break after studying at least one full semester, **and** only during the official school recesses, semester breaks, and summer sessions. However, if one of the summer sessions is their first semester, or in the United States, they must study during that specific summer session in accordance with the USCIS regulations.

4.19.4 Program Extension

F1 students are given a specific period of time to complete their academic program requirements. However, if students are unable to complete their program by the program end date printed on their current I-20 Form, it is the responsibility of the F1 student to submit a Program Extension Request to the ISS Office prior to their program end date. As per Federal Regulations concerning F-1 students, the ISS can extend the expected program completion date if the delay is "**caused by compelling academic reasons, such as change of major, or research topics, unexpected research problems, or medical reasons. Delays such as academic probation or suspension are not acceptable reasons for program extensions**" [8 CFR 214.2(f)(6)(iv)]. To request a Program Extension of their I-20 Form students must:

- a. Submit an electronic request for program extension by visiting the ISS webpage.
- b. Students requesting a program extension due to compelling academic reason must obtain a recommendation from their Academic Advisor or School Dean.
- c. Students requesting a program extension due to medical reasons must provide the necessary documentation issued by a licensed doctor.

- d. When the ISS Office receives the electronic request, a DSO will review the request and will notify the student via email of the final decision. When the request is approved, the student will receive a new updated I-20 form (with a new program end date).
- e. Student must submit a new Evidence of Financial Abilities (per the University Estimated Expenses) to cover the additional required time to complete the student's degree.

NOTE: Program extension requests may be submitted as early as 120 days prior to the student's current I-20 program end date as indicated on the I-20 Form and no less than 2 weeks prior to the program end date. Program Extension Requests cannot be made after the program end date/expiration date, doing so constitutes a violation of the F1 status.

4.19.5 School Transfers

If a current student studying on an F1 visa needs to make a school transfer, they are advised to do so in a timely fashion. It is required that students inform the ISS by completing an "F-1 Transfer Out Request" via the ISS' Portal. Failure to do so will result in the student's record being transferred to a Terminated status. However, Initial students are required to inform the International Student Services Office of their intention to transfer, via email, phone or in person before the program start date listed on their I-20. Failure to do so will result in the student's record being transferred to a Terminated status. Initial students will also need to begin courses at the new Institution no later than 30 days of their entry date into the U.S. We ask that any student, who informs the department via phone.

Transfer-out students must submit the following information:

- Acceptance Letter from New Academic Institution
- F-1 Transfer Verification Form (if applicable)
- Institutional Withdrawal Form (with the required signatures, if applicable for non-completers)
- Copy of their F-1 Visa
- Copy of their I-94 record

The aforementioned documents must be uploaded on ISS Office webpage when submitting the electronic request for transfer out.

4.19.6 F-1 Visa Grace Periods

Upon completion of the program requirements, and/or completion of optional practical training, F-1 visa students must leave the US within the 60-day grace period, change to another immigration status within the time allowed, or return to school, usually within the first 45 days of the grace period. A student who obtains permission from an International Student Advisor for early withdrawal, prior to withdrawing from the university will have 15 days to depart from the U.S. However, a student who withdraws without prior approval or terminates their course of study must depart from the U.S. immediately.

4.19.7 Financial Support

If there are any changes in a student's financial status and sponsorship information such as a change in sponsor or receipt of scholarship and/or other financial aid, the student must report this change to the International Student Services Office within 10 days.

4.19.8 Travel Authorization for F-1 Visa Students

It is the policy of the Student Service Office (ISS) that all F-1 students wishing to travel outside of the United States at any time during their program of study or while on OPT will need to request permission to do so at least 2 weeks in advance of their travel plans. All F-1 students must be aware of the university's travel policy and adhere to it accordingly.

1. F-1 students should only travel outside of the U.S. during official school breaks (such as for Summer Break) with the exception of extreme emergency cases. The ISS Office will review documents on a case-by-case basis, and a Leave of Absence request will be required.
2. To submit a Travel Authorization Request, students must visit the ISS webpage and creating a new application request by clicking on the link for Travel Authorization Request
3. All F-1 students should obtain a DSO signature on their I-20 before they depart from the U.S.
4. All F-1 students must fulfill their financial obligation to FXUA before travel authorization
5. All F-1 students must enroll for their next mandatory semester, if applicable
6. The ISS Office encourages F-1 students to travel with all of their I-20s, valid passport and F-1 visa, financial documents, and academic records (current transcript or status letter)

Anytime a student wishes to travel outside of the U.S., they should be able to submit the following for proof of travel:

1. An electronic request via the ISS Portal.
2. Travel Itinerary (flight ticket information). **NOTE:** submission of an itemized travel itinerary is highly encouraged by the ISS Office. Students who are unable to submit travel itineraries will have their dates of travel recorded directly on their I-20 when issued.
3. Your most current I-20

4. Other documentation (if applicable)

**F-2 dependents also require valid Travel Authorization signatures for re-entry to the U.S.*

Disclaimer: All F-1 students and their dependents should understand that they assume any and all risks associated with traveling outside of the U.S. The ISS Office will guide and advise students to the best of their ability, with the understanding that CBP has the right to question and detain any student they choose for any reason.

4.19.9 Practical Training Regulations for F-1 Students

The U.S. government allows F-1 visa students two possible opportunities to gain practical experience related to their field of study, as follows.

1- Curricular Practical Training (CPT):

- An F-1 student may be authorized by the DSO to participate in an internship program that is integral to an established curriculum, also known as Curricular Practical Training (CPT). The CPT is defined as alternative work/study, cooperative education, or any other type of internship or practicum that is offered by sponsoring employers through cooperative agreements with the school. The student must be enrolled in an academic course while on an internship and the internship component of any course is equal to only one (1) or three (3) credit hours. A CPT is an optional component of specific degree programs. Students who wish to pursue the CPT should consult with the school dean/director, and the Career Center for the required paperwork and permission.
- Graduate students can request CPT in their first semester of enrollment, as part of their degree program at FXUA. Undergraduate students must complete one academic year before being eligible to apply for CPT. This program will be implemented based on the FXUA's existing "Internship and Practicum Policy". Based on this policy, a student enrolling in CPT must take associated internship-qualified courses to complete the normal coursework and hours required for a traditional lecture course. These special courses allow students to apply what they are learning in class in the context of academically proper internship opportunities. The internship opportunities linked to these courses must be directly related to the content of the lecture courses.
- If an F1 student completes 12 months or more of full-time CPT, he or she will not be eligible for Optional Practical Training (OPT).
- It is the student's responsibility to keep track of the number of months they have participated in CPT.
- Any student applying for a 3-credit CPT will need to make sure that their application has been approved by the first day of classes for the current semester. At the discretion of the Dean, as well as the International Student Advisor, students applying for a 1-credit internship may be approved at any time during the current semester.
- F1 students' CPT request must be authorized, and the starting date of the training must be effective before the student can begin work.
- To be considered in "good standing" in this program, students must pass their courses with a minimum cGPA of 3.0 for graduate students and 2.0 for undergraduate students. Students also must provide at least a satisfactory site supervisor evaluation to be eligible for enrolling in another CPT course.
- F-1 Students must maintain a valid F1 status and maintain good attendance.
- F1 students need to enroll in a full course load of a minimum of nine (9) credit hours for master's degree students and a minimum of twelve (12) credit hours for undergraduate students per semester. Refer to the academic catalog for details.
- F1 Students who are working part-time on campus are eligible only for part-time CPT. The total hours of working in both sites must not exceed 40 hours per week.
- CPT can be full-time or part-time and paid or unpaid. 20 hours or more per week of Internship, is considered Full-time. CPT 20 hours or lesser per week of Internship, is considered Part-time CPT.
- A CPT offer letter must show a job title that is relevant to the program and course learning outcomes in which the student is enrolled.
- F1 students enrolled in Pathway or ESL Program are not eligible to apply for CPT.
- The Practicum agreement between the student, employer, and the University is mandatory. This must be signed by all parties and turned into the Program Chair, the Career Center, and DSO Office before the CPT I-20 can be issued.
- Any Changes of address or employment (Job description, nature of employment, work location, Supervisor) must be reported to the Program Chair, DSO Office, and Career services within 10 days of the change. Should a student choose to cancel his or her CPT, s/he must notify the Career Center and DSO Office within 10 days of the change.

- If a CPT must be renewed or extended, it is the responsibility of the student to notify the Program Chair, Career Center, and the DSO Office.
- **It is the student's responsibility to take ownership of the application process and to ensure that all parties have signed all documents related to the CPT process.**

CPT Application Process			
Step 1	Step 2	Step 3	Step 4*
CPT Application Part 1	DSO Approval of CPT Application	CPT Application Part 2	Internship Evaluation Form
Student Program Chair Career Services	DSO	Student Instructor Program Chair Career Services	Student Site Supervisor Instructor Career Services

* The student must complete this step for eligibility to apply for CPT Extension. For CPT Extension Application, please email career@fxua.edu.

CPT Extension Application Process	
Step 1	Step 2
CPT Extension Application	DSO Approval of CPT Extension
Student Program Chair Career Services	DSO

2- Optional Practical Training (OPT): The U.S. government permits graduated students in F-1 status to work for a limited amount of time in the United States so that they may reinforce what they have learned in university and/or college degrees programs. This benefit is called Optional Practical Training (OPT). OPT allows F-1 students to obtain employment in areas related to their academic program of study. OPT is available for periods up to twelve (12) months at each higher academic level, and may be extended under some circumstances in STEM program-related fields. A job offer is not necessary to apply for OPT, and if approved a student may work for one or more employers, change jobs, or look for work during the training period. Students who wish to pursue the OPT program should consult with the ISS Office for information on obtaining the required paperwork and permissions. It is the student's responsibility to apply for OPT in a timely manner.

* PLEASE NOTE: *These are only some of the rules and regulations associated with your F-1 visa, and/or status. Please contact the International Student Services Office for any questions or concerns regarding your visa, and/or status.*

5 ACADEMIC REGULATIONS

5.1 Student Enrollment Status

The Registrar's Office is responsible for the certification of students' enrollment status. Students are broadly classified as full-time or part-time. After the conclusion of the Add/Drop period each semester following the academic calendar, the Registrar's Office certifies the enrollment status of students.

Fall and Spring semesters are 15 weeks in length, and the two terms comprising the Summer semester are each 8 weeks in length. Fall and Spring semesters are considered "required" terms for attendance purposes and must maintain continuous attendance to remain enrolled. The Summer semester is considered optional for most students.

An overview of the enrollment statuses is below:

<i>Enrollment Status</i>	Graduate Students		Undergraduate Students	
	Credit Load Requirements by Semester			
	Fall & Spring	Summer I & II	Fall & Spring	Summer I & II
<i>Full-Time</i>	9 credits	6 credits	12-21 credits	12 credits
<i>¾ Time</i>	n/a	n/a	9 credits	9 credits
<i>Half-Time</i>	6 credits	3 credits	6 credits	6 credits
<i>Less Than Half Time</i>	3 credits	n/a	3 credits	3 credits

5.1.1 Full-Time Student Status

For fall and spring semesters, a full-time course load is nine (9) semester credit hours for graduate-level programs and between twelve (12) and twenty-one (21) (i.e., between 12 to 21) semester credit hours for undergraduate level program.

For the combined summer terms, a full-time course load is six (6) semester credits for graduate-level programs across all summer terms, and twelve (12) semester credits for undergraduate-level programs across all summer terms. For the summer session, eligible students can choose to take a combination of credits in Summer I and Summer II to equal the total full-time load, or can take all required credits in the same term to meet the credit requirement to be considered enrolled as full-time. If a student fails to take enough credits over the combined summer terms, they will be considered part-time.

Full-time enrollment is shown below:

<i>Enrollment Status</i>	Graduate Students		Undergraduate Students	
	Credit Load Requirements by Semester			
	Fall & Spring	Summer I & II	Fall & Spring	Summer I & II
<i>Full-Time</i>	9 credits	6 credits	12-21 credits	12 credits

5.1.2 Part-Time Student Status

All students who do not meet the criteria as a full-time student (e.g., students who enroll for less than the minimum number of credit hours per semester/term as prescribed above) are considered part-time students. Part-time students are classified as ¾ time, half-time, or less than half time as shown below:

<i>Enrollment Status</i>	Graduate Students		Undergraduate Students	
	Credit Load Requirements by Semester			
	Fall & Spring	Summer I & II	Fall & Spring	Summer I & II
<i>¾ Time</i>	n/a	n/a	9 credits	9 credits
<i>Half-Time</i>	6 credits	3 credits	6 credits	6 credits
<i>Less Than Half Time</i>	3 credits	n/a	3 credits	3 credits

5.1.3 Course Overload

Students who wish to register for more courses than the university defines as a full-time load, must complete a request for permission to take course overload. Students must complete a request for course overload if they take more than 9 graduate or 21 undergraduate credits in the Fall and Spring semesters or more than 6 graduate/undergraduate credits in the Summer I and Summer II semesters each.

Enrollment Status	Graduate Students			Undergraduate Students		
	Credit Load Requirements by Semester					
	Fall & Spring	Summer I	Summer II	Fall & Spring	Summer I	Summer II
Full-Time	9 credits	6 credits	6 credits	12-21 credits	6 credits	6 credits
Maximum Load	15	9	9	21	9	9

In order to be eligible to exceed the normal full-time load, a student must be in good academic standing entering into the following semester and for the most immediate prior enrolled semester. For graduate programs, a minimum cGPA of 3.5 and for undergraduate programs a minimum cGPA of 3.0 is required to be eligible. Students must have a minimum of a C- for all courses in their previous semester and no "in progress" or "incomplete" grades can be listed on their transcript for the prior semester.

In extraordinary circumstances, first time students may be approved for a course overload if evidence of previous postsecondary coursework is available for review, such as transcripts from previously attended post-secondary institution(s). In addition, with the approval of the Office of Institutional Effectiveness, the eligibility requirements may be modified in special cases.

Students must obtain an approval signature from their academic advisor as well as the dean of the appropriate school, and submit the form to the Registrar's Office before they can be registered for an overload schedule. The school dean has the authority to approve or deny the request.

5.1.4 Full Courseload with Mixed Degree Levels

Occasionally, a student may be required to take courses at both the graduate and the undergraduate level. This occurs mostly when someone is required to take program pre-requisites as part of any specific program requirements or in other similar circumstances. For these cases, the following would apply for considerations of full-time course registration:

Graduate+Undergraduate Level Courses	Undergraduate Level Courses
<ul style="list-style-type: none"> • 1 Undergraduate Program Pre-requisite + 2 Graduate Courses • 2 Undergraduate Program Pre-requisite + 2 Graduate Courses • 3 Undergraduate Program Pre-requisite + 1 Graduate Course 	<ul style="list-style-type: none"> • 4-7 Undergraduate Program Pre-requisite Courses

If a student were to take fewer courses than those above, they would be considered less than full-time.

Courseloads above those listed in the table would follow the Course Overload requirements.

For students who may have program pre-requisite requirements, refer to the pre-requisite policy for details on requirements and timeframes for completion.

5.1.5 Undergraduate Students Classification

Classification of undergraduate students is based on the number of undergraduate course credits earned as follows: freshman, 0–29 credits earned; sophomore, 30–59 credits earned; junior, 60–89 credits earned; and senior, 90 or more credits earned.

5.1.6 Continuous Enrollment

All students in degree-seeking programs (whether full-time or part-time) are required to maintain enrollment in consecutive semesters of consecutive academic years until completion of the academic program. Summer breaks and an authorized leave of absence are the only acceptable exceptions to this rule. If a student fails to enroll by the add/drop deadline of a given semester, their status as a student at Fairfax University of America will be terminated.

For the degree-seeking students, the fall and spring semesters are mandatory, and the summer terms are optional. Degree-seeking F-1 students are not required to take classes during the summer terms, and they are allowed to take a break or take less than full-course load during the summer terms, unless summer is the first term of enrollment.

5.1.7 Non-Degree Enrollment

Non-degree students are those students who take courses without being enrolled a degree or certificate program. Students studying non-degree enrollment must complete a new enrollment agreement each academic year if they intend to study for more than one semester or academic year.

Example of when a student might wish to enroll in a non-degree program can include, but are not limited to: individuals who are enrolled in a degree program at another institution and wish to take a course/courses while in the area, or when their program does not courses offered by FXUA; individuals who wish to take a course related to their profession as a means of enhancing their knowledge; individuals who may be interested in a certification in an area offered within the curriculum.

FXUA does not guarantee that its courses will be transferable to other institutions, nor that credits taken by the university will be recognized by employers or other outside entities. Prospective students should discuss their goals for transfer credit or recognition with the entity in which they wish to seek transferability or recognition.

Individuals may wish to formally enroll in a program within the institution in the future should discuss this with an academic advisor about options. If a non-degree-seeking student wishes to change their status to degree seeking, the student must reapply to the university through the regular admission process with the Admissions Office. A maximum of 12 credits from non-degree study can be transferred to a graduate level program at the university; a maximum of 18 credits from non-degree study can be transferred to an undergraduate level program at the university.

NOTE: Non-degree students must meet all programmatic and pre-requisite requirements. Refer to the admission requirements for non-degree enrollment and/or the programmatic or course pre-requisites.

Registration is permitted on a space-available basis. Students must understand that they cannot graduate from any program or receive any degree in non-degree status. Non-degree students must follow and meet the same academic standards as degree-seeking students. Courses in which non-degree students enroll are subject to all regular tuition and fees. The university does not issue I-20s for non-degree study.

5.2 Bio-Demographic Information Policy

The Registrar's Office maintains the academic records of students while in attendance at the university. This includes bio-demographic information submitted by the student beginning with the admissions process, and includes information like a student's legal name, date of birth, address, phone number, social security number, gender, prior education, etc. These records are included in the student information system and are based upon legally documentable information.

Some bio-demographic information is represented on official university documents like an official transcript or diploma. Students who wish to change some aspect of their bio-demographic information must request and submit documentation related to updates in their official academic record.

5.2.1 Legal Name and Name Change

For official academic records, the university uses a student's legal name. This would include all official university documents (transcripts and diplomas) and official university business in which a student's name may be required (financial aid, enrollment certification, billing statements, payroll, and where required by law) The legal name is defined as a verifiable, government issued form of identification including a civil-issued birth certificate, marriage license, divorce decree, social security card, passport, alien registration card, naturalization or citizenship certificate, state issued license or identification, or court order. Current students who wish to change their legal name after admission, they can do so by completing and submitting a Change of Bio-Demographic Information Form and notarized copies of one of the required supporting legal documents to the Registrar's Office. Such documents must reflect the new legal name exactly as it will be entered into the official records for the university.

Changes cannot be made retroactively once a student leaves or completes their program because academic records are sealed at graduation and no changes can be made to official records; therefore, an alumnus/a or a former student is not able to change their name after completion. The name on diplomas and transcripts will reflect the name at the time of degree completion or when they left the institution.

5.2.2 Preferred Name Policy

Occasionally, student wish to go by a preferred name that may differ from their legal name, and they can do so without documenting it with the university. Legal last names cannot be changed in any of the systems used by the university without a formal legal name change. However, inappropriate use of the preferred name policy that might be intended to avoid legal obligations, misrepresent one's identity, fraud, evasion, or other similar attempts at misrepresentation will not be tolerated and can result in disciplinary actions including, but not limited to suspension or expulsion. The university reserves the right

to deny or change any systems or documentation where a preferred name may be used if used inappropriately and/or if offensive language is used.

Preferred names are limited to the use of alphabetical characters (including accented and non-accented), hyphens, and spaces. No special characters, emojis/emoticons, or other similar characters or pictorial representations can be used.

Students should inform their instructors/school officials of their preferred name, with a clear understanding that the information in the student information system, learning management system, etc., will include their legal name. In addition, the legal name will be used for all official documentation including those related to transcripts, diplomas, identifications, class rosters, etc.

5.2.3 Name Changes and University Email

All students have a university email account given to them upon enrollment. This is the university's official communication tool for currently enrolled students. If a student legally changes their name and it has been fully processed and updated in the student information system by the Office of the Registrar, then they can request for their email address to be updated/changed to reflect their new legal name. This can be done by submission of the Change of Bio-Demographic Information Form.

5.2.4 Bio-Demographic Correction or Changes

Much of the students' information is either self-reported in the admissions process, and/or verified using official, legal documentation. Occasional errors occur, and corrections are required.

5.2.4.1 Date of Birth Correction

If a student's date of birth has been recording incorrectly, the student can submit a Change of Bio-Demographic Information Form with the correct information, as well as notarized copies of the student's birth certificate or other civil issued documentation of the date of birth.

5.2.4.2 Ethnicity Correction

If a student's reported ethnicity has been recording incorrectly, the student can submit a Change of Bio-Demographic Information Form with the correct information. Since ethnicity is self-reported, it does not require other documentation/proof.

5.2.4.3 Social Security Number Correction

If a student's social security number has been recording incorrectly, the student can submit a Change of Bio-Demographic Information Form with the correct information, as well as notarized copies of the social security card or other civil issued documentation including the social security number.

5.2.4.4 Citizenship Status Updates or Corrections

If a student's citizenship status changes while in attendance, the student can submit a Change of Bio-Demographic Information Form with the correct information, as well as notarized copies of the residency card, passport, or naturalization papers.

5.2.4.5 Address and Phone Number

Students are required to keep the university apprised of their addresses and any subsequent changes that may occur. The Registrar's Office, and the wider university, are not at fault for any returned mail or documentation if a student changes their address but does not update it with the university. Students can update their address via the Student portal, or by submitting a Change of Student Address/Communication Form.

5.3 Transcripts

Official transcripts serve as formal and official academic records of a student's courses taken at the graduate, undergraduate, and non-degree levels. Transcripts the name of student, the program or programs of study, semesters enrolled, enrollment status at the time of issuance, grades, and credit hours.

The university issues paper-based transcripts and does not deliver/remit transcripts in an electronic format. A scanned copy of the transcript would be considered unofficial, as would faxed, photocopied, or other similar forms of creating/replicating copies in a digital or paper manner.

For a transcript to be released, a student’s financial account must be free of financial holds including clearance of any and all fines, fees, tuition balances, and having met any requirements related to participation in federal financial aid (Title IV) programs.

Transcripts may also bear any academic honors awarded at the undergraduate level.

Other special notations may also be applied depending upon specific circumstances in which a specific violation of the university’s policies occurred. The notation would include the following type of statement, “[Suspended, Dismissed, or Withdrew while under investigation] for a violation of [insert name of institution’s code, rules, or set of standards].” Refer to the Non-Academic Misconduct section of the catalog for further information.

5.4 Semesters in the Academic Calendar

FXUA operates on a calendar in which the academic year is divided into two main semesters: fall and spring. Courses are also offered during the two shorter summer terms. The fall and spring semesters span over 15 weeks each. The summer term consists of two concentrated sessions consisting of 8 weeks each for academic courses.

5.5 Contact and Credit Hour System

Federal regulation (§600.2 of the Department of Education Federal Code) defines a credit hour as the amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutionally established equivalency that reasonably approximates not less than:

1. One hour of classroom or direct faculty instruction and a minimum of two hours of out-of-class student work each week for approximately fifteen weeks for one semester hour of credit, or the equivalent amount of work over a different amount of time; or
2. At least an equivalent amount of work as required in paragraph (1) of this definition for other academic activities as established by the institution including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.

For students to complete any program, they must complete a specified number of credit hours as required by their respective programs of study. One credit hour can be earned by successful completion of 15 contact hours of learning. One contact hour of learning is defined as a minimum of 50 minutes of supervised or directed instruction and appropriate break(s). For example, for three graduate credit hours, a student must receive 45 contact hours of classroom instruction or a combination of lab and class work. Two hours of lab is equal to one hour of classroom teaching. Additionally, three hours of internship or externship is equal to one hour of classroom teaching.

5.6 Grading System and Grade Point Average

5.6.1 Explanation of Grades

For graduate level courses, the grades of A, A-, B+, B, B-, C+, and C are passing grades, and C-, D+, D, D-, and F are failing grades. For undergraduate level courses, the grades of A, A-, B+, B, B-, C+, C, C-, D+, D, and D- are passing grades, and F is a failing grade. The grade of “I” (Incomplete) is given to a student whose work has been of passing quality but who has, for compelling reasons, been unable to complete all of his or her required coursework within 8 weeks of the beginning of next term. For the purpose of SAP evaluation, a grade of “I” is included in the calculation of the cGPA as a failing grade and counts as credit hours attempted for calculating the completion rate. The quality of performance in any academic course is reported by a letter grade. These grades denote the character of work and are assigned grade points as follows:

Percentage	Letter Grade	Grade Points	cGPA	Academic Standing
94.00-100.00	A	4.00	4.00	
90.00-93.99	A-	3.70		
87.00-89.99	B+	3.30		
83.00-86.99	B	3.00	3.00	<i>Satisfactory grade for graduate level programs</i>
80.00-82.99	B-	2.70		
77.00-79.99	C+	2.30		
73.00-76.99	C	2.00	2.00	<i>Lowest passing grade for graduate level course; satisfactory grade for undergraduate level programs</i>
70.00-72.99	C-	1.70		

67.00-69.99	D+	1.30		
63.00-66.99	D	1.00		
60.00-62.99	D-	0.70	0.70	<i>Lowest passing grade for undergraduate level programs</i>
0.00-59.99	F	0.00	0.00	<i>Failure</i>
75.00-100.00	S	--	--	<i>Satisfactory (non-credit)</i>
0.00-74.99	U	--	--	<i>Unsatisfactory (non-credit)</i>
--	AU	--	--	<i>Audit</i>
--	I	0.00	--	<i>Incomplete</i>
--	InP	--	--	<i>In Progress</i>
--	NR	--	--	<i>Not Reported</i>
--	P	--	--	<i>Passing (waived courses/prerequisites)</i>
--	PA	--	--	<i>Passing (credit awarded for thesis work)</i>
--	R	--	--	<i>Repeated Course</i>
--	SP	--	--	<i>Satisfactory Progress (credit awarded for thesis work)</i>
--	TC	--	--	<i>Transfer Credit</i>
--	UP	--	--	<i>Unsatisfactory Progress (no-credit awarded for thesis work)</i>
--	W	--	--	<i>Withdrawn</i>

5.6.1.1 Satisfactory (“S”)

Satisfactory (“S”): An “S” grade reflects satisfactory progress for a non-degree course. The “S” grade is not calculated in the cGPA; however, it is considered credit hours attempted.

5.6.1.2 Unsatisfactory (“U”)

Unsatisfactory Progress (“U”): Unsatisfactory Progress (“U”) reflects unsatisfactory progress for a non-degree course. The “U” grade is not calculated in the cGPA; however, it is considered credit hours attempted.

5.6.1.3 Course Auditing (“AU”)

Students electing to take a course for audit must receive approval from the Program Chair prior to the completion of the add/drop period. Students may not make changes to their audit status after the add/drop period. A variety of factors go into reviewing and approving a course audit, including space available in the course, a student’s current and previous academic standing, the total number of courses in a program, a student’s visa status, and the number of remaining courses left in the program. A grade of “AU” is awarded for a course audit. The faculty member and the student must agree to the terms of a course audit including expectations for attendance, participation, and coursework to be completed. Failure to adhere to these requirements will result in failure with a grade of “F” for the course. Classes taken for audit may be repeated for credit. Audited courses do not count as credits attempted for the purpose of determining satisfactory academic progress. Therefore, they have no effect on the student’s GPA computation. Course prerequisite policy will apply to all auditing courses. Audited courses are subject to all regular tuition and fees. Tuition and fees are subject to change without prior notice.

5.6.1.4 Incomplete Grade (“I”)

The grade of “I” (Incomplete) is given to a student whose work has been of passing quality but who has, for compelling reasons, been unable to complete all of their required coursework by the end of the semester. The situation should rise to the level of and meet the threshold of extraordinary circumstances that were beyond the student’s control.

The incomplete is a temporary assignment of an “I” grade to the student’s transcript while they are actively enrolled at the university. Students who withdraw from the university prior to the changing of an incomplete grade from an “I” to a letter grade will be assigned a failing (“F”) grade for the course upon withdrawal. An incomplete grade cannot be applied in a student’s final semester.

The instructor of the course completes an Incomplete Grade Request Form and submits this to the Program Chair. The Program Chair approves or denies the request and submits the form to the Registrar’s Office. Any amendments to parameters outlined in the form require resubmission. If the Program Chair also happens to be the course instructor, they can request approval from Executive Dean. A grade of “I” must be evaluated and changed within 50% of the immediate consecutive term (for an 8-week term, this equates to 4 weeks; for a 15-week term, this equates to 8 weeks). At this time, all work from the previous semester/session must be completed and submitted to the instructor. If a grade is not submitted within the allotted period of time, or if a student withdraws from the university while an incomplete grade is on their transcript, the grade will be changed from “I” to “F” with the assumption that the student has not fulfilled their requirements for the course.

The impact of an “I” grade on a student’s satisfactory academic progress is as follows:

- A grade of “I” is included in the calculation of the cGPA as a failing grade and counts as credit hours attempted for calculating the completion rate.
- Courses that remain as an “I” at the end of 8th week of the beginning of next term will automatically become an “F” grade.
- Incomplete and Withdrawal grades may have an adverse effect on the successful course completion percentage of a student if he/she has been charged tuition for any part of the course.
- The “I” grade is only issued for verifiable, unavoidable reasons. Since the “I” grade extends enrollment in the course, requirements for satisfactory completion will be established through student/faculty consultation and documented on the student’s transcript.

A Grade Change Request Form must be submitted to change the “I” to a letter grade. Upon receipt of the Grade Change Form, the Registrar enables the gradebook to allow a grade to be amended by the instructor. Then, the instructor will make changes to the gradebook on the faculty portal and re-submit the grade to the Registrar via the faculty portal.

5.6.1.5 In Progress (“InP”)

Indicates a course for which a student is current registered in an active term.

5.6.1.6 Not Reported (“NR”)

An “NR” grade means that a grade has not yet been reported by an instructor at the time of grade processing. If an instructor does not submit grades by the deadline of grade submission, the Registrar’s Office records a temporary grade of “NR” to the student records. An actual letter grade will replace the NR grade once final grade processing takes place.

“NR” grades are not calculated in the cGPA; however, they will be considered credit hours attempted for academic satisfaction progress calculation. At the time “NR” changes to the letter grade, the student’s SAP will be re-evaluated.

The “NR” grade is a temporary assignment designated on the student’s transcript while they are actively enrolled at the university. Students who withdraw from the university prior to the changing of an NR grade to a letter grade will be assigned a failing (“F”) grade for the course upon withdrawal. A temporarily assigned NR grade must be evaluated and changed within 50% of the immediate consecutive term (for an 8-week term, this equates to 4 weeks; for a 15-week term, this equates to 8 weeks). If a grade is not submitted within the allotted period of time, or if a student withdraws from the university while an NR grade is on their transcript, the grade will be changed from “NR” to “F” with the assumption that the student has not fulfilled their requirements for the course.

5.6.1.7 Repeat Courses (“R”)

Students are permitted to retake any course to attempt to achieve a higher grade. The higher grade is used to calculate in the student’s GPA, but the lower grade remains on the transcript. If a student needs to retake a course for a third time (or more), the student is required to seek permission from the Program Chair and the Executive Dean. Students are not permitted to attempt to repeat a failed course beyond the fourth attempt.

Credit can only be earned once for a course, unless the course specifically allows for a retake as defined in the course description, or in the case of a course that has varying topics from semester-to-semester (for example, a Special Topics course that would have a different topic). Such special topics courses require that the course name be altered to demonstrate the topic that was covered in the course.

If a student repeats a course and successfully completes the course, the following rules will apply in posting the student’s cumulative record:

- The original grade, credit hours, and subsequent repetitions must be calculated as credits attempted in the successful course completion percentage for the purpose of satisfactory academic progress. As a rule, all of the credit hours for which the university has collected any tuition, whether for a first time or repeated course, will be included in the computation of the successful course completion percentage.
- The cumulative GPA will be based only upon the higher grade for the repeated course attempted.
- The original grade for the course repeated under this rule will remain on the student’s academic record. The lower attempt will be excluded in the cumulative GPA calculation and the higher grade will be included in the cumulative GPA calculation.
- Course repetition does not extend the Maximum Time Frame for completing a program of study. (Maximum Time Frame is the time allowed for a student to complete a course of study. This requirement is discussed in more detail in other sections.) The student must complete the program within the original Maximum Time Frame allowed for their program.

5.6.1.8 Transfer Credit (“TC”)

Please see transfer credit policy on page 94.

5.6.1.9 Official Withdrawal (“W”)

A grade of “W” (indicating official withdrawal) will be recorded on the student’s transcript. “W” grades are not calculated in the cGPA; however, they will be considered credit hours attempted if the student has incurred a financial obligation for the course. “W” grades affect the required minimum completion rate.

5.6.1.10 Thesis Course Grades (“PA”, “SP”, and “UP”)

Given the unique nature of work required to complete the thesis, students will be awarded the grade of Passing (“PA”), Unsatisfactory Progress (“UP”), or Satisfactory Progress (“SP”), as determined by the mentor/committee chair.

- **Pass (“PA”):** A grade of “PA” requires final official approval of the thesis as determined by the committee chair and indicates successful completion of the course. The “PA” grade is not calculated in the cGPA; however, it is considered credit hours attempted.
- **Satisfactory (“SP”):** An “S” grade reflects satisfactory work towards a thesis course. Students who have made progress toward the completion of their thesis requirements, but still have work to complete at the end of the semester, may receive a Satisfactory grade (“S”) for the course, indicating that they have made satisfactory progress, but have not yet completed all requirements for the thesis. This would include but is not limited to: a substantial approved demonstration of having actively worked toward completion of the thesis (e.g., the collection of at least some data) or the completion of a defense with major revisions required. Students receiving an “S” grade do not receive credit for the course and must work to complete the thesis in the following semester. The “S” grade is not calculated in the cGPA; however, it is considered credit hours attempted.
- **Unsatisfactory Progress (“UP”):** Unsatisfactory Progress (“U”) may include but is not limited to: not following a schedule that was agreed upon with the chair or other committee members, neglect of progress toward or completion of the thesis, failure to address comments or concerns in a timely manner, late submission of work that does not allow enough time for committee members to review, etc. The “U” grade is not calculated in the cGPA; however, it is considered credit hours attempted.

5.6.2 Grade Point Average (GPA)

The GPA is determined by dividing the total number of grade points earned in courses by the total number of credits attempted. The GPA is carried out to three digits past the decimal point (example 1.000). No rounding up or down shall be done to arrive at the GPA. When a course is repeated, only the highest grade earned is counted in the computation of the GPA and the cGPA for graduation.

5.6.2.1 Cumulative GPA (cGPA)

cGPA is defined as the overall GPA attained so far in an ongoing education period.

5.6.2.2 Term GPA

A term GPA refers to the cGPA for a given term.

5.6.3 Receiving Grades

Students will receive their grades within one week of the submission of their grades to the Registrar’s Office.

Students can view their grades via the Student Portal.

5.6.4 Grade Change Policy

Faculty members are responsible for and have the authority to assign grades due to their position to evaluate the student’s academic work and performance in a course. It is the responsibility of the instructor to initiate any grade change if one is required. All grade change request require approval from the relevant Program Chair.

After final grades are submitted and finalized, an instructor must seek approval from the relevant Chair or designee, providing a rationale for the grade change request. This is done by completing the Grade Change Request Form and submitting it to the relevant Program Chair via email. The relevant form must also include a copy of the gradebook showing the student’s original grade for the course/assignment in question and the work that was used to justify the change in grade.

If approved, the Chair will submit the form and coursework used to justify the grade change to the Registrar’s Office. The Registrar will be requested to enable the gradebook to allow a grade to be amended by the instructor. Then, the instructor will make changes to the official gradebook and re-submit the grade. Faculty should maintain a copy of the form and coursework for their own records.

Once the grade change has been processed, the registrar will inform the faculty member, the Chair, and the student of the change.

5.6.4.1 Timelines for Grade Changes

Grade changes for:

- Incomplete grades must be submitted to the Registrar's Office within 8 weeks of the beginning of next term as stated in the Academic Calendar.
- Other allowable reasons as defined in the policy must be submitted to the Registrar's Office no later than the end of the following semester.

Any grade change submitted after the deadline will not be accepted by the Registrar's Office. Once a degree is conferred, the record is permanently closed for that degree; therefore, no grade changes can occur after conferral.

5.6.4.2 Grade Change

Grades are earned based upon the quality of and timeliness of work submitted for a course, and as such, grade change requests must be based upon the student's submitted work for the course based upon the course syllabus. Typically, this work is submitted during the semester in which the student has taken the course, but this work could be submitted upon reasonable approval of an Incomplete ("I") grade as allowable by the Incomplete Grade policy. Work should not be included that was not submitted on time, or that is meant to provide an unjustified boost in the student's grade that would give them unequal advantage over other similarly circumstanced students.

The following are examples of appropriate reasons for grade appeals:

- Arithmetical errors, typos, or incorrect calculations in the gradebook
- Coursework submitted was excluded in grade calculation
- Coursework has been submitted to remove an incomplete ("I") grade as permitted in the Incomplete Grade policy
- Grade appears to be based on impermissible factors such as discrimination, bias, or retaliation

The following are non-exhaustive examples of reasons for a grade change request to be denied. Grade changes intended to modify a grade so that a student:

- Can have a high enough grade graduate, or to materially improve a GPA/cGPA
- Could be awarded a scholarship, President's/Dean's List inclusion, or Latin honors
- Avoids receiving an academic warning, probation, or dismissal
- Can comply with internal and/or external requirements (for example receiving an award or scholarship from outside of the university)

Additionally, grade changes should not be considered for the following non-exhaustive examples:

- Personal issues that are not related to their academic coursework
- Demonstration of not having completed course requirements

Under no circumstances should a faculty member feel obligated to assign or change a grade from factors outside of the coursework submitted as part of the class. For example, faculty should never feel pressured to modify or a change a grade because of a request from an administrator. Such requests would violate the university's Code of Academic Excellence and Code of Ethics and should be reported to the Office of Institutional Effectiveness.

5.6.4.3 Grade Change Initiated by an Instructor

A grade can be changed by an instructor regardless of whether the change was a requested by the student. After final grades are submitted, an instructor must notify provide written justification to the Program Chair with a clear and justifiable reason for the change. The Program Chair will approve or deny the change accordingly.

If approved, the Registrar will enable the gradebook to allow a grade to be amended by the instructor. The faculty member will then I make the change(s) to the gradebook on the faculty portal and re-submit the grade to the Registrar via the faculty portal.

5.6.4.4 Grade Appeal Initiated by a Student

A student who wishes to question a grade must contact the instructor of the course in writing within the first two weeks of the next semester/session. This includes the summer sessions, even if the student decides not to take course(s) during the summer sessions. The request should include a clear indicator of what the student is requesting to be reviewed. The instructor will review the request and reply to the student regarding the decision. The Program Chair and Registrar may be copied on the written request and decision. If the Program Chair is also the course instructor, the Executive Dean can replace the Program Chair.

If the instructor does not respond within 2 weeks or the issue remains unresolved after receiving the instructor's determination, the student may appeal in writing to the Executive Dean within seven (7) days. The Executive Dean will initiate the formation of a grievance panel, which consists, at minimum, of the Program Chair (or designee), one disinterested

faculty member, and a representative from the Office of Institutional Effectiveness. The student and faculty member will be invited to provide written statements and supporting documentation to the grievance panel regarding the matter; otherwise, the existing information will be reviewed. The student's request must include a clear indicator of the reason for requesting that the grade be reviewed. The grievance panel will then determine an appropriate resolution; both the student and faculty member will be notified of the decision within seven (7) days. The decision made by the grievance panel is final and cannot be further appealed.

5.7 Credit Hours In-Residence

A minimum of 50% of credit hours must be taken in-residence at FXUA.

5.8 Second Degree Policy

5.8.1 Second Bachelor's Degree

Students are not eligible to earn a second bachelor's degree within the same discipline (field of study). Students seeking a second bachelor's degree must complete all courses required for each program to include any core/foundational course and professional courses where applicable with a minimum of 54 semester credits that are unique and different to each degree. Note that this is a minimum of 54 semester credits more than is required to complete the first bachelor's degree. No more than 6 semester credits may be substituted in the second major. Courses taken in the General Education area may apply to both programs and substitutions are not required.

5.8.2 Second Graduate Degree

The University will not award a graduate degree with the same major or discipline more than once regardless if the original degree was from FXUA or a non-related institution. This includes courses taken toward a different specialization within the degree for which a student was previously awarded. For graduate degrees, two degrees are understood to be the same if they are the same degree or contain a majority of the same core or required courses. An award from a previous non-related institution with the same degree name and major or discipline as the one being sought at FXUA is presumed to be the same degree. Students seeking a second master's degree at FXUA may not enroll in a program in the same discipline (field of study). No more than 6 semester credits (2 courses) may overlap between the two programs.

This policy does not apply to certificates programs. Students are not able to obtain two certificates due to duplication of required coursework in the programs.

Appeals for exceptions to this policy must demonstrate that the first degree differs significantly in the core or required curricula from the second degree being sought. Appeals can be submitted to the Registrar's Office.

5.9 Transferability of Credits, Courses, or Credentials to Other Institutions

Transfer of Fairfax University of America credits, courses, diplomas, certificates, or degrees earned to another institution is at the discretion of the receiving institution and no guarantee of transfer can be made by the university.

5.10 Course Add/Drop

After registration, a student may add a course at any time before the add/drop deadline specified in the Academic Calendar by completing an Add/Drop/Withdrawal Form. A student who wishes to change their schedule without financial penalty by adding or dropping a course may do so only during the add/drop period by submitting a Course Add/Drop/Withdrawal Form.

Permission to add a course after the last day of the add/drop period requires proof of extenuating circumstances and the written approval of the executive dean. Under no circumstances may a course be added after three (3) calendar days beyond the last day to add a course.

Students wishing to drop a course must do so before the last day of the add/drop period. A course that is dropped before the add/drop date will not appear in the student's academic record. Beyond the official add/drop period, a student may request to be removed from a class and this would be considered a course "withdrawal." Course withdrawals remain on the student's transcript.

5.11 Course Withdrawals After the Add/Drop Period

If a student requests to withdraw from a course after the add/drop period has ended may do so, but the course will be reflected on the student's transcript. To withdraw from a course, the student must complete the relevant section of the

Course Add/Drop/Withdrawal Form, obtain the program chair or academic advisor's signature, and submit the completed form to the Registrar's Office.

If the Course Add/Drop/Withdrawal Form is received after the add/drop period, but before the end of the last day to withdraw with a grade of "W," as defined on the Academic Calendar, a grade of "W" (indicating official withdrawal) will be recorded on the student's transcript.

If the Course Add/Drop/Withdrawal Form is received after the add/drop period and after the end of the last day to withdraw with a grade of "W," as defined on the Academic Calendar, a letter grade based on performance will be recorded on the student's transcript.

The date of submission of a completed form to the Office of the Registrar is used to determine how the withdrawal is processed (i.e., whether the grade is recorded as a "W" or a letter grade).

Course withdrawals are subject to financial penalties, see the cancellation/refund policy.

5.12 Institutional Withdrawals

FXUA distinguishes between official, student-initiated withdrawals from unofficial, administrative withdrawals.

5.12.1 Official Withdrawals

A student may withdraw from the university when circumstances beyond the student's control make it impossible for him or her to complete their coursework for the semester. A student wishing to withdraw from the university must complete the relevant section of the Institutional Withdrawal Form, obtain the school officials' signatures, and submit the completed form to the Registrar's Office. This is considered an official withdrawal from the university.

5.12.2 Administrative Withdrawals

If a student fails to attend for a period of 14 consecutive calendar days of classes for which they are registered in a given semester or term, the university will make a determination as to whether the student intends to return to classes or should be administratively withdrawn (unofficial withdrawal) from their program of study. The decision to maintain a student in an active status beyond the determination on the 14th day will be made on a case-by-case basis.

Students who do not attend class within the first 14 calendar days of the term will be administratively withdrawn from their course(s) and will not be permitted to re-register for that semester.

Students who fail to register by the end of add/drop period are automatically considered administratively withdrawn from the University.

5.12.3 Withdrawals and Course Grades

The student will receive a grade of "W" if they withdraw between the second and tenth week of the semester for 15-week courses, between the second and fourth week of the session for 7-week courses. A student who does not withdraw from the university before the deadline will receive a letter grade based upon their performance in the course. The institutional refund policy is applied to determine if the institution is required to provide a refund to the student.

5.13 Military Activation Policy

Fairfax University American considers individuals to be uniformed services if they are on active duty in the armed force and Reserves, and National Guard.

5.13.1 Uniformed Services Students and Call to Active Duty

FXUA provides several options for its uniformed services students who are required to withdraw or have prolonged absence from their studies. In the event that a student is under call or order to active duty once the semester begins can choose to withdraw from their courses, receive a grade of incomplete for all of their courses, or to earn a grade for their courses. The administrative and academic departments will do as much as possible to accommodate the needs of active-duty students while enrolled at the university.

A copy of a student's military orders must be provided to their program chair and the Office of the Registrar. Students should consult with and ensure that their program chair is apprised of their requirements for active duty and should keep them informed of any intended decisions throughout the entire process. Program chairs will work with students and provide them guidance on navigating their studies leading up to their active duty/deployment.

5.13.1.1 Course Withdrawal for Active Duty

After the add/drop period has ended, students can elect to withdraw from their courses as of the effective date of the call or order to report for active duty. Following the Academic Calendar, students are eligible to withdraw from a course/courses through the "W" (withdrawal) period and would receive a "W" grade for their courses.

Active-duty students who withdraw from their courses receive a full refund for any tuition and fees incurred for the semester in which they withdraw from their course/courses. If a student withdraws from some, but not all, of their courses, their tuition will be reassessed and credits for the tuition and fees for withdrawn courses will be refunded. Students receiving financial aid awards should consult the Financial Aid department regarding any loans or grants regarding any potential adjustments to their award following return to Title IV funds.

5.13.1.2 Incomplete Grades for Active duty

Students who may be far enough in the semester and wish to receive an incomplete grade may make arrangements with their course instructor and program chair regarding affordances for making up any missed work. A specific plan must be established in writing regarding such arrangements, and all provisions of the Incomplete Policy must be followed.

5.13.1.3 Earning a Grade for Active Duty

Some students may find themselves at a point in the semester where they are far enough along in the course that they can complete any outstanding items and accelerate their coursework in time to being Active Duty. If a student wishes to seek this option, they must work with their course instructor(s) and program chair to make a written plan for completing the course during the remainder of the semester and/or prior to beginning active duty. A specific plan must be established in writing regarding such arrangements. Failure to adhere to the plan would result in the grade for the course being assessed based solely upon the work provided up to the point of the end of the semester.

5.13.2 Leave for Military Duty

Following the Higher Education Opportunity Act (HEOA) of 2008, FXUA will reinstate a previously enrolled student to the same program of study if it is still available. If a program of study has significantly changed from the time period that the student was enrolled, the university will make every effort to maximize prior coursework taken in the program toward the newer version of the program. It is possible that not all courses will apply to the new program, but the university will make every effort to assist the student. In some cases, especially if the program of study is no longer offered or has significantly changed from the time the student was enrolled, the university will admit the student to the most similar program available unless the student requests or agrees to be admitted to a different program.

5.13.2.1 Notice of Call to Active Duty

Students who are called to active duty must provide a copy their military orders to their program chair and the Office of the Registrar. Failure to provide this written notice may impact their ability to return.

U.S. military veterans are eligible if they began a leave of from school to participate under an active-duty order/call on or after August 14, 2008 if they performed active duty for a period of more than 30 consecutive days, and received a discharge other than dishonorable or bad conduct. The cumulative absence shall not be more than five years, and notice to return to the university of no later than three years after completion of the period of service. If a student is recovering from service-related injuries, they must inform the university no later than two years after recovery.

These students will not need to reapply and would not be required to pay an application fee (if generally required by the university) upon readmittance. Students who wish to be reinstated should contact the University' School Certifying Official for Education Benefits regarding the process for reinstatement.

5.14 Program Prerequisite Completion Policy

In recognizing the potential for students to broaden their professional perspectives, and/or build interdisciplinary knowledge bridging two fields of study, when programs are created by content-area experts, they are requested to define minimum content knowledge required for success. In instances in which some content-area background knowledge would be required, the faculty designate special "program prerequisite" courses aimed at providing this foundational knowledge.

Program prerequisite courses are courses that the faculty within a discipline have deemed necessary for entry into a program of study. These may be required in instances in which (including but not limited to) a student wishing to pursue a graduate degree in a content area other than that of their undergraduate degree.

Prerequisite courses are intended to provide an educational foundation of skills and content that will help students to meet educational and institutional learning outcomes and be successful in their pursuit of a master's degree. In the interest of

ensuring that students are able to hone these skills in a meaningful manner, FXUA places regulations on the time-period in which our students must complete any program prerequisite courses.

This policy recognizes the importance of completing prerequisite courses as an integral part earning a graduate degree.

5.14.1 Importance of Prerequisites

In the interest of providing an enriched academic classroom experience for all students, FXUA has set forth the following regulations on the completion of the program prerequisite component of certain graduate programs offered. Program prerequisite courses are intended to fill in content-area knowledge that may be missing from an undergraduate experience, especially when that undergraduate degree is outside of the student's new intended degree area. In the interest of having enriched classroom discussions and laying the foundation for all other coursework as quickly as possible, FXUA requires that all students complete all program prerequisites within the first 12 months of study. Most students are able to complete all program prerequisites within one or two semesters of full-time study. Advisors and students will ensure that all undergraduate prerequisites are completed at the discretion of the Program Chair before students can take other graduate-level coursework with the only exception being in cases in which students need to be enrolled full time and they have fewer than three prerequisites remaining (see below).

Since the nature of program prerequisites was determined by faculty as being necessary for success in the program, any additional program prerequisites were instituted specifically to provide equal foundational knowledge to all students in these programs. The exact number and nature of these program prerequisites differs from program-to-program. Some programs require as many as five program prerequisites, others require up to two, and some do not require prerequisites at all. This policy specifically lays out the procedures for reviewing/approving program prerequisites for programs that currently require them.

The exact number of required prerequisites depends upon the individual situation of the student, including his or her previous degree(s) and/or professional coursework or certifications that they might have. As such, a content-area expert is required to advise and develop an individualized plan centered around identifying and filling in any potential gaps that the student might have. Because prerequisites are introductory in nature and would be required for the student to be successful, they must complete all of their prerequisites before enrolling in their degree-area courses unless the number of courses that the student needs might put them under full-time enrollment. In such cases, students may be concurrently registered in courses that do not require prerequisites prior to enrollment (see below). Generally, this would require taking a full or nearly full load only with program prerequisites.

A full-time student load is defined by FXUA as 3 graduate courses or 4-7 undergraduate courses; wherever possible, FXUA attempts to ensure that all students who wish to/need to be full time can do so. Although FXUA's full-time load policy is defined elsewhere in the catalog, students who are required to complete less than 3 program prerequisite courses, but need to be registered for full course load, are eligible to enroll for graduate level courses that do not require prerequisite. In this case, students must complete their program prerequisite courses during their first semester of study.

Students who must complete program prerequisite will not be allowed to register for classes by themselves. The academic advisor must create a Program Prerequisite Completion Plan for the student and ensure classes are offered for the established period. The Program Prerequisite Completion Plan will be outlined upon acceptance, and it will be put into place after a meeting between student and advisor.

5.14.2 Consequences for Non-Fulfillment of Program Prerequisites

If, for any reason, a student has not fulfilled all required program prerequisites after 12 months of study, they will be required to work with their academic advisor prior to the start of the next semester and to update their Program Prerequisite Completion Plan. The plan outlines the steps that the student will be required to take to complete the program prerequisites in a clear and expeditious manner. Upon approval by the student and academic advisor, the plan must be submitted to the Executive Dean for final approval. The Executive Dean will then submit the finalized form to the registrar before the end of the add/drop period in the semester following the completion of the first full year of study.

The plan will be monitored on a semester-basis until such time that the plan has been fulfilled all program prerequisite requirements have been met. If the plan is put into place and not followed by the student, further disciplinary action may be taken, including an academic warning.

5.14.3 Prerequisite Requirement Waiver

FXUA recognizes that there are a myriad of ways that potential students learn this foundational knowledge. One such way would be to fulfill the program's foundational knowledge as part of an undergraduate degree/certificate. If a student's degree is directly aligned with the program, then the program prerequisites have been satisfied. Alternatively, if a student can demonstrate through professional coursework or certifications from professional organizations recognized as industry standards in the field, these program prerequisites may be deemed satisfied by a qualified program chair/department chair who is a content-expert in the area in question.

To demonstrate that program prerequisites have been satisfied, the applicant needs to provide proof of official examinations and/or certifications pertaining to the prerequisite's subject. If a waiver is requested by an applicant, a Prerequisite Evaluation Request Form with all supporting documents (i.e., examination and certifications) must be submitted to the chair of the applicant's elected program for review and consideration. Upon evaluation of the student's supporting documentation, the program chair will decide if it suffices the prerequisite(s) criteria and approve or deny the request.

In order to be considered for having met the program pre-requisite requirement, coursework must be of a grade of "D" or better.

5.15 Course Prerequisite Completion Policy

Course prerequisites are designed to ensure that students registered for a course have the required minimum background for study of the course content. This background is obtained through courses equivalent to the listed prerequisites.

5.16 Academic Advising

Clear and direct advising is a crucial part of the out-of-class experience and provides vital resources and support for students throughout their academic journey and beyond. Program Chairs/Director have ultimate responsibility for registering their advisees (i.e., all students in their program[s]), and they serve as the academic advisors for students throughout their programs. These individuals are credentialed, and course qualified to serve as content experts who are able to advise students on their academic and professional progress. Students can contact their advisor by any method (in-person, phone, email, etc.), and advisors will response within a reasonable timeframe. Students who are unsure of the name and contact information for their advisor can find this information via the Student Portal, consulting the Program Chair Directory in the Academic Catalog, or by contacting the Office of the Registrar.

Academic advising includes, but is not limited to, assisting students in choosing a specialization, providing additional guidance and resources for student success, planning course selection and registration, assisting students with navigating the policies and procedures of the university, tracking academic progress, ensuring compliance with the outlined program requirements, developing an academic plan, advising the student on how to improve their GPA, and providing guidance on career planning or further academic studies. Students can contact their advisor via email, phone, or in-person, and can expect a follow-up from their advisor in a reasonable timeframe.

With their advisor's help, students design and maintain an academic program that will fulfill general and specific degree or certificate requirements. It is the student's responsibility to understand and satisfy all academic requirements. Students meet with their academic advisor each semester to discuss their course options, and the academic advisor then registers the student for courses for the upcoming term. In doing so, students and their advisors discuss options and program/university requirements. Students are responsible for ensuring that they fulfill requirements as outlined in the academic catalog.

Upon admission to an FXUA program of study, but before the beginning of classes, students are required to meet with their academic advisors. This initial advising session includes the following:

- A review of the requirements for the student's intended program of study;
- A review of the student's prior academic record (if any) and possibilities for any program or course pre-requisites or other areas of concern;
- A recommendation as to course selection for the upcoming semester/academic year;
- A discussion of the career and/or graduate study options open to the student; and
- Further evaluation of any areas in which the student might need additional support or resources.

Students returning re-enrolling at the university or returning from a Leave of Absence must schedule a meeting with their advisors to take place no later than one week before the start of classes.

Students with course-specific issues (for example, questions about a homework assignment) should contact their course instructor directly; however, if a student wants to discuss long-term plans, next classes, programmatic progress or requirements, the advisor would be the best contact.

5.16.1 Office Hours

All full-time and adjunct faculty members teaching courses for academic credit are expected to maintain scheduled office hours to accommodate students who want consultation. The office hours must be scheduled outside regular class hours. All faculty must schedule a minimum of 2 hours per week for office hours during normal working hours of the university (8 am – 9 pm). Office hours for online courses are held virtually while office hours for residential courses may be held virtually or in person. Office hours are posted in the course syllabus.

5.17 Course Registration

Students must discuss their program of study with their advisor prior to registering for courses each term. Student meet with their advisor each semester to ensure that they are on track for program completion, register for courses within their program of study, meet all required program and course pre-requisites, and to discuss their general academic progress.

Student must register for their courses for the next semester by the dates indicated on the academic calendar. Failure to do so may result in additional fees or ineligibility to register for the upcoming semester.

5.18 Courses Taken as Over/Under

Some undergraduate programs allow students to choose to take a course at the undergraduate or the graduate levels (“over/under”). If the course is taken as an “over”, or graduate-level course, students can earn graduate credit that can be applied to a future master’s degree at FXUA. If the course is taken as an “under”, or undergraduate-level course, the course would not apply to a future master’s degree at FXUA. If a student takes the undergraduate version of the course and later decides to apply for a master’s program at FXUA, the student would need to retake the course at the graduate level in order to receive credit for the course toward a graduate degree. Students taken the course as an *under* receive undergraduate credit for the course, and as an *over* receive graduate credit for the course. The over-version of the course can be applied to an undergraduate degree for degree completion.

When a course is taken at the graduate level, the workload for the undergraduate version of the course is different than when it is taken for graduate-level credit. A student cannot retroactively change from receiving undergraduate credit to graduate credit, as the workload is different.

5.19 Attendance Policies

5.19.1 General Attendance Policy

In recognizing the correlation between attendance and academic achievement as well as student retention, regular and punctual attendance is mandatory for students enrolled at the university.

The policy applies to all programs unless specified otherwise.

5.19.1.1 Absences

Students should strive to maintain satisfactory attendance and should miss class only when it is absolutely necessary. In instances in which personal circumstances sometimes keep students from attending all classes, it is the student’s responsibility to notify the course instructor prior to missing class. In cases where advance notification is not feasible (e.g., accident or emergency), the student must provide notification as soon as possible after the absence. This notification should include an explanation of why a notice could not be sent prior to the class.

5.19.1.2 Excused Absences

Some absences can be determined to be "Excused" absences and permit the student to make up missed coursework or receive an equivalent amount or type of work that would have been received in class. The following are only five acceptable reasons for an absence to be an “Excused” absence:

- 1) **Serious illness or serious medical emergencies on the part of the student or a dependent.** The student must submit a doctor’s note explaining the reason for the absence to the instructor(s).
- 2) **Family emergency.** The student must submit a note and supporting documents to their instructor explaining the reason for their absence. In case of a death in the family, a death certificate must be submitted as supporting documents.
- 3) **Legal.** The student must submit the official documentation to their instructor explaining the reason for their absence.

- 4) **Military duty.** Student must provide an official government, state, or civic document indicating conditions and length of required service.
- 5) Authorized and approved events that are of significant relation to course content as approved by the faculty member and/or dean.

5.19.1.2.1 Proof of Excused Absence(s)

Students must submit proof of the reason for an absence (outlined above) to be excused to their course instructor. The instructor can require additional documentation substantiating the excused absence from the student and have established timeframe for such submission.

5.19.1.2.2 Make-up Work

To make up the excused absence course work, the student must initiate communication with the instructor to determine the deadline and what will constitute the make-up of the course work. If an excused absence is warranted, the instructor will provide the student an opportunity to make up any in-class quizzes, exams, or other assignments or activities that contribute to the final grade or provide a reasonable alternative by a date agreed upon by the student and instructor. Given the nature of some in-class assignments or work, some assessments may not be made up in their original form, and alternate forms of assessment may be required that provide a similar or equivalent evaluation of knowledge or skills (for example, an alternate form of a test if a standardized test was used in class, a paper instead of an in-class group project, etc.).

The final decision on the content and deadline of the make-up must be communicated to the student in writing, by the instructor, via university email. If the student does not follow the make-up plan (e.g., does not appear at the prearranged time or misses the deadline for make-up work), they forfeit their rights for further make-up of that work. Timely communication between the student and instructor is important.

5.19.1.2.3 Appealing Denials of Excused Absences

If the student feels that they have been unfairly denied an excused absence, the student may appeal to program director/chair, who will consider the case and attempt to resolve the problem. If the case cannot be satisfactorily resolved at that level, a final appeal may be made to the grievance panel.

5.19.1.2.4 Unexcused Absences

Absences for unexcused reasons will result in not being able to make up in-class work, quizzes, exams or other assignments and may negatively affect the student's final course grade. The instructor is under no obligation to provide an opportunity for a student to make up work due to an unexcused absence.

5.19.1.2.5 Lateness

All students are expected to be in class on time. Late attendance is disruptive to both the instructor and students. If a student is late for class more frequently than what the instructor(s) considers acceptable, the instructor will report the issue to the program chair or designee for appropriate administrative action.

5.19.1.2.6 Left Early

All students are expected to be in class on time and remain for the duration of the class. As with late attendance, leaving early can be disruptive to both the instructor and students. Students who leave class early more frequently than what the instructor(s) considers acceptable, the instructor will report the issue to the program chair or designee for appropriate administrative action.

5.19.1.2.7 Appealing Attendance Designations

Attendance is documented for each class in every course in the student database by entering the number of minutes attended. When a student is absent, late, or leaves early, the missed class time is deducted from the total scheduled class time. A student who wishes to question his/her attendance marked in the database must contact the instructor of the course in writing before the course ends or within the first two weeks of the next semester/term. This includes the summer terms, even if the student decides not to take course(s) during the summer terms. The instructor will review the request and reply to the student regarding the facts of the student's attendance record. The school dean and Registrar may be copied on the written request and facts regarding the attendance record.

In the event that the instructor does not respond within 2 weeks or the issue remains unresolved after receiving the instructor's determination, the student may appeal or request an exception to the attendance policy in writing to the school dean 15 days after emailing their instructor. The Program Director/Chair will call a meeting with a grievance panel, which

consists, at minimum, of the dean and/or the Program Designee, one faculty member. The student and faculty member will be invited to present their perspectives of the issue to the grievance panel. The grievance panel will then determine an appropriate resolution; both the student and faculty member will be notified of the decision within seven (7) days. The decision made by the grievance panel is final and cannot be further appealed.

5.19.1.3 F-1 Students

Students who attend the university on a student visa must comply with the standards set forth to maintain their status.

5.19.2 Non-Attendance

Students are expected to attend class as scheduled. Students who do not attend risk being withdrawn for non-attendance.

If a student needs to take an extended period of time off from their studies, they should apply for a Leave of Absence. If a student fails to return from a schedule Leave of Absence (LOA,) they will be withdrawn for non-attendance at the conclusion of the add/drop period in which their LOA was scheduled to end.

Students who do not attend class within the first 14 calendar days of the term will be withdrawn from their course(s) and will not be permitted to re-register for that semester.

5.19.3 University's Official Census

Although the university tracks status changes and student numbers throughout the year the official Census date, for administrative purposes is October 15th. The number of students attending the university is used for a variety of reasons, including for federal reporting for the Integrated Postsecondary Education Data System (IPEDS) reporting requirement for the university.

5.19.4 Students on an F-1 Visa

In addition to the university's attendance policies, F-1 students have additional requirements that they must follow with respect to Federal regulation, which include maintaining satisfactory attendance each term/semester. Students who do not maintain regular attendance risk having their I-20s cancelled, leading to a loss of visa status; thus, failure to maintain attendance may result in loss of status. F-1 students who are having difficulty maintaining attendance are urged to meet with their advisor, the School head and/or the DSO of International Student Services as soon as possible to avoid loss of visa status.

5.19.5 Attending in-residence courses

In-residence courses are taught in person on campus. All students are expected to attend classes in accordance with their schedules.

5.19.6 Attending online courses

Students on an F-1 visa may attend one course remotely per semester; all other courses must be attended on campus and in-person in the assigned classroom regardless the delivery mode of the course. Students on an F-1 visa attending an on-campus designated class remotely will be marked absent for the class.

U.S. citizens, residents, and students on non-student visas may attend all online classes in-person or remotely.

5.20 Degree Conferral and Graduation Requirements

Degrees and certificates are conferred based upon the final semester in which the student completes all course, programmatic, and institutional requirements. All requirements must be completed, including all course grades, prior to the degree conferral date.

5.20.1 Graduation Requirements

Students are responsible for tracking their progress toward degree/program completion, and also for notifying the registrar's office that they intend to graduate via completion of the Program Exit Process. Students who do not notify the Office of the Registrar of their intent to graduate, but who meet all graduation requirements, will be changed to an "Alumni" status once the Office of the Registrar deems that the degree requirements have been met.

5.20.1.1 Degree Program Graduation Requirements

The following minimum requirements must be met in order to qualify for a degree:

Graduate Degree	Undergraduate Degree	Graduate Certificate
------------------------	-----------------------------	-----------------------------

Minimum Passing Grade Per Course	C	D-	C
cGPA	3.00	2.00	3.00
Total Required Credit Hours	36	120	18

For a variety of reasons, a student may wish to continue in their degree program beyond completion of the minimum requirements. In such instances, students must petition to remain in the program beyond meeting all minimum graduation requirements.

5.20.2 Program Exit and Process

All students must complete the Program Exit Process in their final semester of study. All students who are nearing program completion must complete the Program Exit Form via their Student Portal. Failure to do so could result in a delay in processing the conferral of the degree, which also has an impact upon when diplomas/certificates are created.

The fee for exiting the program is \$150 for all undergraduate and graduate students if paid by the deadline, or \$200 if paid after the deadline.

Non-degree students who complete their courses/program may receive proof of completion of their courses/program by paying a \$30 program completion fee. The cost covers any official letters, certificates, or diplomas for the courses/program. See the program information and/or the program chair for information. The fee is non-refundable.

Failure to complete the Program Exit Process will result in a delay in processing the creation of the diploma or certificate. No transcripts or other proof of program completion will be issued unless/until the Program Exit Process is completed.

5.20.3 Graduation Honors

Graduation honors are given to undergraduate degree recipients who have demonstrated significant distinguished academic achievement and representations of the highest standards of academic integrity. These honors are bestowed upon students in the form of Latin honors. Undergraduate degree recipients earn Latin honors based upon their cumulative Grade Point Average (cGPA) at the time of degree conferral. Because transfer credits would carry grades awarded by the university and therefore have no effect on GPA calculations, transfer courses are not considered for Latin honors. The notation will appear on the diploma as well as on the transcript.

Students who have any violations of Non-academic Misconduct or any Egregious Instances of Academic Integrity Violations during the time that they study in their undergraduate program, are ineligible to receive Latin honors. Additionally, given the intended nature of the learning experience related to academic acculturation around Academic Integrity and the Student Honor Code, students who receive more than one academic integrity remediation during their program also ineligible.

The requirements for graduation with honors are as follows:

Undergraduate Degree Program	Degree cGPA
Summa Cum Laude	3.900 or higher
Magna Cum Laude	3.700 – 3.899
Cum Laude	3.500-3.699

5.20.4 Degree Conferral versus Commencement

Degree conferral is the act of awarding credentials for successfully completing the programmatic requirements outlined in the Academic Catalog. This is distinct from the Commencement Ceremony, which is the formal celebration that the entire learning community participates in to honor those who have graduated.

The date that a degree is conferred and the date of graduation (program completion) is the final day of the semester or term in which the student is registered and completed all graduation requirements.

5.20.5 Student Records Upon Graduation

Records are sealed at graduation and no changes may be made to the academic record (transcript) after a degree has been awarded.

On rare and extreme occasion, the university may retroactively revoke the degree/credential if significant violations are deemed to have led to the awarding of the degree. This could occur, for example, if the university determines that the degree was unjustly granted in cases where the student plagiarized their thesis or final project and would have otherwise not been awarded credit for the artifact.

5.21 Academic Honors

5.21.1 President's and Dean's Lists

The President's and Dean's Lists are compiled at the end of the Fall and Spring semesters to recognize FXUA's high-achieving academic students in degree programs. The list consists of names of students who meet the criteria for that semester as outlined below.

President's List			
#	Requirements	Undergraduate Students	Graduate Students
1	Minimum GPA	4.00	4.00
2	Minimum credit hours attempted and earned	12	9
3	Minimum grade	A	A
4	Other requirements	<ul style="list-style-type: none">• No I, U or F• Only required grades for the intended program are considered	

Dean's List			
#	Requirements	Undergraduate Students	Graduate Students
1	Minimum GPA	3.75	3.90
2	Minimum credit hours attempted and earned	12	9
3	Minimum grade	C+	B+
4	Other requirements	<ul style="list-style-type: none">• No I, U or F• Only required grades for the intended program are considered	

A letter from either the Office of the President or the Dean's Offices is sent to students noting their accomplishments and placement on the list. The President's and Dean's list are published on FXUA's website twice a year.

5.22 Satisfactory Academic Progress (SAP) Policy

The Satisfactory Academic Progress (SAP) Policy monitors and measures whether the students are maintaining satisfactory academic progress in their educational programs. The standards and requirements of satisfactory academic progress apply to all enrolled students.

5.22.1 Satisfactory Academic Progress Standards

The satisfactory academic progress (SAP) standards are measured after the final grades are recorded at the end of Fall, Spring, Summer II, which are called "evaluation points". SAP is measured by the following three criteria.

1. Maximum Time Frame for Program Completion (MTF)
2. Qualitative Standard: a required minimum cumulative grade point average (cGPA)
3. Quantitative Standard: a required minimum completion rate (CR)

If SAP is met, a student will continue on in good academic standing with no additional indication in the student's record.

Students who fail to meet any of the above-mentioned criteria will be considered not meeting the SAP requirements and will be put on "probation." If SAP is not met, a letter will be sent to the student's official university email of record and a copy will be placed in the student record based on the category.

At the time of SAP review, students will fall into one of the following categories:

- **GOOD STANDING:** Student has met all required SAP standards and is eligible for aid for the following semester or academic year provided that all other requirements are met, no administrative action is taken if SAP is deemed "met".
- **ACADEMIC WARNING:** Student has not made progress standards for the first time; the student will remain eligible for financial aid for one semester. The student must make improvements on all SAP standards in order to be removed from Academic Warning.
- **ACADEMIC DISMISSAL:** Student fails to meet the required SAP standards at the end of an academic warning period or fails to comply with the Academic Plan during or at the end of an Academic Probation period, or who again does not meet SAP standards; the student is no longer eligible for Financial Aid. Please see re-establishing eligibility below.
- **ACADEMIC PROBATION:** Students who face an Academic Dismissal (having been on Academic Warning in the prior semester/term) who, for compelling reasons, are able to justify to the SAP Appeal Committee that they are able to make significant changes in future terms to overcome any potential areas of academic concern. If the SAP Committee agrees with the student's justification and potential plan for improvement, the student can continue on Academic Probation and

will remain eligible for financial aid for one semester or length of Academic Plan. At the next evaluation point, if the student continues not to meet SAP, then the student will not be eligible for financial aid.

- **FINAL ACADEMIC DISMISSAL:** Student received an Academic Warning and then an Academic Dismissal in a subsequent, consecutive term. The student appealed to continue in the program and was placed on Academic Probation to make improvements, following an Academic Plan. The student failed meet the terms of the Academic Plan and receives a Final Academic Dismissal. This Final Dismissal can be appealed, but the reasons for the appeal must be materially and significantly different than the original appeal. If a student does not appeal, or if their appeal is denied, the student is required to withdraw for a period no less than 365 calendar days.

SAP is calculated by Registrar’s Office at each “evaluation point” and the actual calculation is maintained by the Registrar.

5.22.2 Maximum Time Frame (MTF)

Students must complete their program of study within 1.5 times the Normal Program Length (NPL) as measured in semester credit hours attempted. This is called the Maximum Time Frame (MTF) and is formulized as $MTF = 1.5 \times NPL$. For example, the MTF for an undergraduate degree program is $180 \text{ credits MTF} = 1.5 \times NPL = 1.5 \times 120 \text{ credits} = 180 \text{ credits}$.

Credit hours attempted are defined as any clock or credit hour for which a student has incurred a financial obligation. All registered hours at the end of the add/drop period will be counted in the MTF determination. In addition, any transfer credit hours accepted from other institutions will be counted in the MTF.

Program of Study	NPL in credits	MTF credits
Graduate Certificate Programs	18	27
Undergraduate Degree Programs	120	180
All Other Graduate Degree Programs	36*	54*

* Beyond the program prerequisites.

If a student is unable to complete the program within one of the aforementioned MTF allowed in credits, the individual will be dismissed from the program, no academic warning or probation is allowed at this point, and the student will not be eligible to receive the original credential (e.g., bachelor’s degree).

5.22.3 Qualitative Standard: Cumulative Grade Point Average (cGPA)

Students must meet the qualitative standard of a minimum cumulative grade point average (cGPA) requirement at each SAP evaluation point, as shown in the “SAP Requirement Charts” by program level below.

Undergraduate degree program students must have a minimum cumulative grade point average (cGPA) of 2.00 and graduate degree program students must have a minimum cGPA of 3.00 at the end of the second academic year and at the end of each semester thereafter.

A student who fails to meet SAP standards for the first time will be placed on “Academic Warning” status. A student who fails to meet SAP standards at the end of the “Academic Warning” period will be dismissed (Academic Dismissal) from the program and the university, with the option to appeal if mitigating circumstance(s) resulted in the dismissal. If the appeal is approved, the student will be placed on “Academic Probation” with an approved Academic Plan and expected to improve academic standing within the given timeframe in the Academic Plan.

There are only certain mitigating circumstance(s) that can be considered for an appeal. Please refer to Procedure to Appeal Academic Dismissal for the exhaustive list.

5.22.4 Quantitative Standards: Completion Rate (CR)

Students must meet the quantitative standard of a minimum completion rate (CR) requirement at each SAP evaluation point, as shown in the “SAP Requirement Charts” below, by program level.

A student who fails to meet SAP standards for the first time will be placed on “Academic Warning.” A student who fails to meet SAP standards at the end of the “Academic Warning” period will be dismissed from the program and the university, with the option to appeal if mitigating circumstance(s) resulted in the dismissal. If the appeal is approved, the student will be placed on “Academic Probation” with an approved Academic Plan and expected to improve academic standing within the given timeframe in the Academic Plan.

There are only certain mitigating circumstance(s) that can be considered for an appeal. Please refer to Procedure to Appeal Academic Dismissal for the exhaustive list.

5.22.5 SAP Requirement Charts

Undergraduate Degree Programs			
Credits Attempted	Required Minimum cGPA	Required Minimum CR	Result if SAP Not Met
1–24 credits	1.60	50.00%	<ul style="list-style-type: none"> • Academic Warning if 1st time • Academic Dismissal if on Academic Warning in the previous semester.
25-47 credits	1.80	60.00%	
48-MTF credits	2.00	66.67%	

NOTE: If MTF is reached, Academic Warning is not allowed.

Graduate Degree Programs			
Credits Attempted	Required Minimum cGPA	Required Minimum CR	Result if SAP Not Met
1-9 credits	2.50	50.00%	<ul style="list-style-type: none"> • Academic Warning if first time • Academic Dismissal if on Academic Warning in the previous semester
10-18 credits	2.60	55.50%	
19-27 credits	2.80	60.00%	
28 - MTF credits	3.00	66.67%	

NOTE: If MTF is reached, Academic Warning is not allowed.

Graduate Certificate Programs			
Credits Attempted	Required Minimum cGPA	Required Minimum CR	Result if SAP Not Met
1-9 credits	2.60	60.00%	<ul style="list-style-type: none"> • Academic Warning if 1st time • Academic Dismissal if on Academic Warning in the previous semester
10-MTF credits	3.00	66.67%	

NOTE: If MTF is reached, Academic Warning is not allowed.

5.22.6 Probation Statuses and Procedures

5.22.6.1 Academic Warning

Failure to achieve the required SAP standards rate at the required evaluation point(s) will result on Academic Warning (See the “SAP Requirement Charts”). The academic warning period is one semester (or term). A notification to students on Academic Warning will be sent to the student’s official university email. While notification is sent to students, each student is responsible for monitoring their own academic progress. Failure to receive the notification does not negate the student’s SAP result and its implications.

Students on Academic Warning are required to meet with their academic advisor prior to registering for the upcoming semester and must work toward improving their SAP standing by the end of next semester to be in good academic standing.

If a student fails to meet the SAP requirements at the end of the Academic Warning period, the student will be dismissed from the program and the university.

5.22.6.2 Academic Dismissal

There are four (4) reasons that a student can be on Academic Dismissal due to the SAP requirements:

1. Failure to meet the required SAP standards at the end of an Academic Warning period
2. Failure to meet the required SAP standards at the end of an Academic Probation period
3. Failure to comply with Academic Plan during or at the end of an Academic Probation period
4. If the review of a student’s SAP evaluated at any time indicates that it is mathematically impossible for the student to meet the minimum requirements of the Standards of SAP policy at the next mandatory evaluation point the result will be an Academic Dismissal from the program and the university.

Students will be notified of Academic Dismissal by the Registrar’s Office via their university email within five business days after the final grades being posted. However, all students are responsible for monitoring their own academic progress. Failure to receive the notification does not negate the student’s SAP result and its implications.

Any student who is dismissed may appeal to the Office of Academic Affairs within 10 business days of the notification by writing if a mitigating circumstance resulted in the dismissal. Refer to Procedure for Appealing Academic Dismissal for more detail on this process. F-1 students dismissed from the program and the university and/or students who have lost their appeal will have their F1 visa status terminated.

5.22.6.2.1 Procedure for Appealing an Initial Academic Dismissal

A student being dismissed for not meeting SAP requirements can appeal the Academic Dismissal if they have mitigating circumstances that contributed to the dismissal. The following is a list of conditions that may be considered as mitigating circumstances, which have negatively impacted academic progress:

- Student illness or injury that led to hospitalization or a documented serious illness or injury of the student (including mental health issues)
- Death of an immediate family member (a parent, spouse, sibling or child)
- Illness of an immediate family member where the student is the primary caretaker or the family member is the primary financial support
- Work-related major changes during the period (e.g., Military deployment)
- Natural disaster
- Other circumstances that resulted in undue hardship to the student

The appeal must be submitted to the school dean within 10 business days from the notification, in writing, and must include the following documents:

1. Letter of appeal, explaining the mitigating circumstances that resulted in the academic dismissal, and an explanation on how the circumstance have been remedied or changed to ensure that they will be able to meet SAP requirements
2. Supporting documentation of the mitigating circumstances, and its remediation or change.
3. An academic plan approved by academic advisor: Academic Probation for further information on academic plans.

5.22.6.3 Academic Probation

A student whose academic dismissal appeal is approved by the SAP Appeals Committee will be placed on academic probation and can continue their study under the condition of an approved academic plan. The statement “Academic Probation” will be entered into the student’s permanent record.

Academic probation is one semester (Summer I and Summer II semesters combined are considered one semester) with the exception of an additional semester if it is approved in the academic plan. The “academic plan” is defined as a written agreement between a student and an academic advisor in order for the student to improve their academic progress. The academic plan includes a course schedule plan during the academic plan period to ensure that the student has a realistic achievable academic plan. It may include the courses that need to be repeated during the probationary period. The plan also includes the required minimum cGPA and minimum completion rate that the student must achieve at the end of academic plan period.

If the student on academic probation attains the minimum SAP requirement at the end of or during the probationary period, the academic probation status will be lifted and the student will be considered in a good academic standing. If a student fails to meet the SAP requirement at the end of the probationary period, or fail to follow and meet the academic plan goals, the student will be dismissed from the program and the university. “Academic Dismissal” will be entered into the student’s permanent record.

5.22.6.4 Final Academic Dismissal

If a student is dismissed for the second time (following an initial Academic Warning designation, an Academic Dismissal, followed by an approved appeal and placement on an Academic Probation) and does not meet the SAP standards and and/or the Academic Plan goals again, the student receives a Final Academic Dismissal. This Dismissal can be appealed, but the reasons for the appeal must be materially and significantly different than the original appeal. Students should be under no assumption that an additional appeal (i.e., an appeal for the Final Dismissal) will be approved just because they received a prior approval. If a student does not appeal, or if their appeal is denied, the student required to withdraw for a period no less than 365 calendar days.

Title IV federal student aid recipients cannot appeal two times in a row even if the mitigating circumstance that resulted in the academic dismissal is different than the one indicated in the first approved appeal. Two times in a row is defined as submitting an appeal for a semester immediately following an appealed semester whether submitted, approved, or denied. After the second dismissal, if the student wishes to re-enroll, for the same program or a different program, the student must sit out one year, after which the student will be eligible to re-appeal and if approved resume study under Academic Probation.

The appeal process is the same, and if approved, Academic Probation requirements apply. In other words, the student must meet the standards of SAP by complying with the Academic Plan, and successfully meet the SAP requirement by the end of the probation period. (See the “Academic Probation” section for further detail.) If the second re-entry appeal is denied, no additional appeals may be allowed and the student is permanently dismissed from the university.

No consideration of a dismissal appeal will be given until all financial holds have been removed. The SAP Appeal Committee will not review an appeal if the financial holds have not been removed prior to the deadline.

5.22.6.4.1 Procedure for Appealing a Final Academic Dismissal

A student being dismissed for not meeting SAP requirements for a second and final time can appeal the Academic Dismissal if they have mitigating circumstances that contributed to the dismissal that are materially different than their prior dismissal. The following is a list of conditions that may be considered as mitigating circumstances, which have negatively impacted academic progress:

- Student illness or injury that led to hospitalization or a documented serious illness or injury of the student (including mental health issues)
- Death of an immediate family member (a parent, spouse, sibling or child)
- Illness of an immediate family member where the student is the primary caretaker or the family member is the primary financial support
- Work-related major changes during the period (e.g., Military deployment)
- Natural disaster
- Other circumstances that resulted in undue hardship to the student

The appeal must be submitted to the school dean within 10 business days from the notification, in writing, and must include the following documents:

1. Letter of appeal, explaining the mitigating circumstances that resulted in the second and final academic dismissal, and an explanation on how the circumstance have been remedied or changed to ensure that they will be able to meet SAP requirements. The reason for the appeal must be different than the original appeal.
2. The original letter of appeal from the Initial Dismissal and the Academic Plan that was approved.
3. Supporting documentation of the mitigating circumstances, and its remediation or change.
4. An academic plan approved by academic advisor: Academic Probation for further information on academic plans.

5.22.7 SAP Dismissal and Re-entry

Withdrawal and Application for Re-entry

Students who have withdrawn from the university in good standing may apply to be re-admitted to the same program from which they withdrew by following the regular admission process defined above, with the addition of a clearly defined Completion Plan. Refer to the admission requirement section for more detailed re-admission requirements.

Students who were on an academic warning, or academic probation at the time of their voluntarily withdrawal, will be placed back on those statuses and the same requirements will apply, upon successful re-admission. Students who were on academic probation will be conditionally accepted with the understanding that the student will submit a revised academic plan, approved by their academic advisor, to the Registrar's Office to complete enrollment.

Termination Due to Academic Dismissal

Students must successfully complete the regular admission process first to receive conditional acceptance. After which the student must successfully appeal the Academic Dismissal to be enrolled back in class. Refer to Procedure for Appealing Academic Dismissal for information on how to appeal.

Termination Due to Non-Academic Reasons

Students who have had their status as a student involuntarily terminated due to non-academic reasons must apply to be re-admitted through the admission process. A written petition may be requested during the re-admission process. All students who have had their student status terminated for any reason must clear all outstanding financial balances with the Accounting Office prior to applying for re-admission into the university.

F-1 Visa Reinstatement

Students who have failed to maintain their F-1 visa status for any reason must apply for reinstatement of their F-1 status with the U.S. Citizenship and Immigration Services (USCIS) before they can enroll at the university. FXUA will evaluate the circumstances in which the student lost the visa status and only those who were terminated for reasons beyond the student's control will be considered for reinstatement. Students who have been out-of-status for more than five months are not eligible to apply for reinstatement within the United States. Student must leave the U.S. and reapply for a new I-20 in order to resume full time attendance.

Students who have their visa status terminated will need to clear all financial obligations with the Accounting Office before formally beginning the reinstatement process. Students who have their visa status terminated while studying will not be able to continue their studies during the semester in which their status was terminated. Students will instead may apply for

reinstatement and continue their studies during the semester following the termination. Applying for reinstatement does not guarantee the terminated status will be reversed. This decision is made solely by USCIS.

5.22.8 Special Letter Grades and SAP evaluation

Incomplete Grade (“I”): For the purpose of SAP evaluation, a grade of “I” is included in the calculation of the cGPA as a failing grade and counts as credit hours attempted for calculating the completion rate. Courses that remain as an “I” at the end of 14 calendar days after the final grade submission date will automatically become an “F” grade. If the student’s SAP is not met while receiving an “I” grade, SAP will be re-evaluated after the “I” grade changes to an actual letter grade.

Repeat Course (“R”): The original grade, credit hours, and subsequent repetitions must be calculated as credits attempted in the completion rate and MTF for the purpose of SAP evaluation. When a course is repeated, the lower grade will be excluded in the cumulative GPA calculation and the higher grade will be included in the cumulative GPA calculation.

Non-Punitive Grades: “AU”, “TC”, “W”, “NR” grades are considered as Non-Punitive Grades.

Audited Course (“AU”): Audited courses do not count as credits attempted for the purpose of determining satisfactory academic progress and have no effect on the student’s cGPA and Semester GPA computation.

Transfer Credits (“TC”): Where applicable, when a student receives any transfer credit from other institutions, these credits would be noted with a grade of “TC” (Transfer Credits). Transfer credits (TC) would be included in the calculation of the maximum allowable credits and completion rate requirements as credits attempted and credits earned for SAP calculation. Since these courses will not carry grades, they will have no effect on GPA calculations. The student’s new normal program length will be shortened to reflect the transfer courses and the Maximum Time Frame will be recalculated.

Withdrawal (“W”) – Withdraw without penalty: A student who wishes to change their schedule by dropping a course may do so only during the add/drop period by submitting a Course Add/Drop/Withdrawal Form. Students may withdraw only after obtaining the school dean’s or academic advisor’s signature on the Course Add/Drop/Withdrawal Form. Forms must be received within the following timeframes to be considered withdrawal without penalty. Any withdrawal after that will result in failing grade.

Course Length	Eligible Timeframe for “W”
15 Weeks	Week 2 to end of Week 10
8 Weeks	Week 2 to end of Week 5
7 Weeks	Week 2 to end of Week 4

A grade of “W” (indicating official withdrawal) will be recorded on the student’s transcript. “W” grades are not calculated in the cGPA; however, they will be considered credit hours attempted if the student has incurred a financial obligation for the course. “W” grades affect the required minimum completion rate. Please refer to the Withdrawals (“W”) section in the academic catalog for further information.

Not Reported (“NR”): An “NR” grade means that a grade has not yet been reported by an instructor at the time of grade processing. “NR” grades are not calculated in the cGPA; however, they will be considered credit hours attempted for academic satisfaction progress calculation. At the time “NR” changes to the letter grade, the student’s SAP will be re-evaluated.

Thesis Grades: Given the unique nature of work required to complete the thesis, students will be awarded the grade of Pass (“PA”), Unsatisfactory Progress (“UP”), or Satisfactory Progress (“SP”), as determined by the mentor/committee chair.

- **Pass (“PA”):** A grade of “PA” requires final official approval of the thesis as determined by the committee chair and indicates successful completion of the course. The “PA” grade is not calculated in the cGPA; however, it is considered credit hours attempted.
- **Satisfactory (“SP”):** An “S” grade reflects satisfactory work towards a thesis course. Students who have made progress toward the completion of their thesis requirements, but still have work to complete at the end of the semester, may receive a Satisfactory grade (“S”) for the course, indicating that they have made satisfactory progress, but have not yet completed all requirements for the thesis. This would include but is not limited to: a substantial approved demonstration of having actively worked toward completion of the thesis (e.g., the collection of at least some data) or the completion of a defense with major revisions required. Students receiving an “S” grade do not receive credit for the course, and must work to complete the thesis in the following semester. The “S” grade is not calculated in the cGPA; however, it is considered credit hours attempted.

- **Unsatisfactory Progress (“UP”):** Unsatisfactory Progress (“U”) may include but is not limited to: not following a schedule that was agreed upon with the chair or other committee members, neglect of progress toward or completion of the thesis, failure to address comments or concerns in a timely manner, late submission of work that does not allow enough time for committee members to review, etc. The “U” grade is not calculated in the cGPA; however, it is considered credit hours attempted.

5.22.9 Remedial Courses and SAP evaluation

Remedial and/or Program Prerequisite Courses: Remedial and/or program prerequisite courses needed to meet certain conditions of admission to the program do not apply towards any degree requirements. Therefore, those courses do not affect cGPA, Completion Rate and Maximum Time Frame calculation.

Extended-Enrollment: Fairfax University of America does not offer extended enrollment.

5.22.10 Changing or Adding Programs or Specializations and SAP Evaluation

Change of Program or Specialization: When a student changes their program, the grades earned in the first program will be recorded as earned if the courses are applicable to the new program and will affect the student’s new program cGPA, Completion Rate and MTF calculation.

Additional Programs or Specializations: When a student graduates from a program and enrolls in another program, or specialization the grades used in the cGPA of the previous curriculum, if applicable to the new curriculum, will be recorded as grades earned, and will be applied to the student’s new curriculum cGPA, Completion Rate and MTF calculation.

5.23 Changing Programs and/or Specializations

Occasionally, students wish to change from one program to another, or from one specialization to another after they have already been admitted. Students are required to meet all pre-requisites and program admission requirements for any program that they are changing to. In some cases, students may choose not to change a program or concentration because transfer of courses from one program to another, or from one specialization to another is not guaranteed. Students should refer to the relevant admissions requirements and program structure to see whether a change in program/specialization is possible.

All program or specialization changes are subject to review and approval by the Program Chair of the existing program or specialization and the intended new program or specialization. If the Program Chair is the same in both cases, they are permitted to approve/deny both portions of the request.

No more than one program change per semester is permitted. No more than two requests for program changes are allowed. All changes to programs or concentrations will be effective at the start of a term. All changes of program or specialization must be submitted no later than 3 days before the end of that semester’s Add/Drop period. In instances in which a student makes a change during a semester, the effective date of the change will occur at the start of the following semester.

Students who change programs must adopt the academic catalog, and meet all requirements therein, in effect at the time that the student begins their new program or specialization. This will also require executing a new enrollment agreement with an admissions officer. Upon approval and completion of the new enrollment agreement, the university will automatically update the catalog year when processing the change.

To change a program or specialization, a student must:

1. Discuss the possibility of changing programs/specializations with their current Program Chair and/or their intended Program Chair to discuss any questions or ideas that they might have about changing programs or specializations.
2. To change the program or specialization, the student must seek acknowledgment of their intention to change from their current Program Chair by initiating the Change of Program or Specialization Form.
3. The student will then meet with the Program Chair of their intended program or specialization to seek the change. The Program Chair of the student’s new intended program or specialization will review the admissions requirements to discuss any possible additional requirements that may be needed, as well as discuss the possibility of curricular overlaps that may/may not exist.
4. The student will then meet with an admissions officer who will review whether the student has satisfied all admissions requirements. Only upon satisfying all current admissions requirements for the semester in which the change will be effectuated, a new enrollment agreement will be completed with the Office of Admissions indicating the new program or specialization. By signing the enrollment agreement, the student acknowledges that they will be required to follow all program/institutional requirements as outlined in the academic catalog at the time that they start their new program or specialization, as well as pay any associated fees.

5. The Change of Program or Specialization Form and the new enrollment agreement can then be submitted to the Office of the Registrar for processing. The Registrar will review the student for any Satisfactory Academic Progress issues. If no issues are found, the student's status will be verified and processed.
6. Once fully approved the student can then meet with their new Program Chair for initial advising and course registration.

5.24 Leave of Absence (LOA)

From time-to-time, students may seek authorization for a leave of absence (LOA) from the university to temporarily interrupt a program of study. An LOA allows a student to suspend their enrollment for a brief period of time rather than withdrawing from the program and reapplying. In the case of prolonged illness or accident, death in the family, or other special circumstances that make attendance impossible or impractical, an LOA may be granted to the student if requested in writing by the student.

Instructions

1. A student seeking an LOA must consult with their advisor, and complete and submit a *Leave of Absence Form* to Registrar's Office. The request must be signed and dated with the reason for LOA.
2. Upon receiving the LOA request and form, the university will determine if there is a reasonable expectation that the student will return to the university and resume their studies. The university will grant the request or deny it, and inform the student by email.
3. The LOA cannot exceed 180 days in any 365-day period.
4. The student must report to Registrar's Office upon returning from the approved LOA on/or prior to the expected return date stated on the LOA form.
5. If a student does not resume attendance at the university on/or before the end of an approved LOA, the student will be considered withdrawn from the institution. The withdrawal date is the last day of attendance for refund purposes. The date of determination is the last day of the approved LOA.

NOTE: F-1 visa students must contact the International Student Advisor for consultation prior to requesting for a LOA to ensure compliance with federal immigration regulations [8 C.F.R. §214.2(f)(6)(iii)(B)].

5.25 Internship & Practicum Policy

FXUA offers opportunities for students to conduct practical, hands-on training where it is relevant and related to the program of study through internship or practicum opportunities. Such opportunities are offered as part of a course of study within applicable programs/majors, and supervised by a qualified instructor. Internships are not to be used to provide labor or as a replacement for a permanent employee.

Depending upon field-specific criteria, programs generally refer to these hands-on opportunities as an internship or a practicum. Because some professions refer to an in-field experience as a "practicum" (generally in education programs primarily focused on teaching), while others use "internship" (generally for programs in which the internship would be considered direct work experience), the determination of what to call an in-field experience is dependent upon the curriculum as determined by the faculty. While there may be curricular differences between these two terms as defined by the Schools, FXUA views these as the same for administrative purposes.

There are two types of internship (or practicum) experiences where curriculum wise relevant:

- **Traditional Internship Courses:** These courses are specifically designed as internship courses. Students enrolled in a traditional internship course complete all or most of their required time on-site in an internship facility. Some, but not all, internship courses require additional time in a lecture or seminar as defined by the course and School in which the internship is taken. Traditional internship courses are generally three (3) or more credits.
- **Internship Qualified Courses:** These courses offer students an opportunity to apply course content that they learn in traditional lecture courses, while also partaking in additional outside work related to the course content. Such opportunities are marked as "internship qualified" in the course description. No special marker indicates that the course included an internship on the transcript for these internship-qualified experiences.

Since academic credit is awarded for internships, students must be enrolled in a traditional internship course, or an internship qualified course in order to qualify for course credit. Students not enrolled in an internship course while participating in a practical experience are unable to receive credit for an internship. Approval to conduct an internship must be received prior to the start of the semester in which the student wishes to conduct an internship opportunity.

The period of the internship must correspond with the dates of a semester; time conducted before or after the semester start/end dates do not qualify to count toward the internship credit. Internship opportunities must be completed within the

normal length of a single semester/term. While students are not permitted to conduct a single internship over multiple semesters, where applicable, student may be able to conduct multiple internships over their program if such courses are allowable by the program of study.

No experiential credit is awarded retroactively for an internship; prior work experience or work conducted during a course, but not preapproved, would not be eligible for credit for an internship. If the internship or practicum is a required part of the program of study, the student may not be considered as a graduate or issued a graduation credential until the internship or practicum, and/or the work product produced as part of the internship/practicum has been satisfactorily completed.

Unless required in a program's curriculum, there are no guarantees that all interested students will be able to participate in internships, as these opportunities are based on a student's academic credentials, their eligibility, any potential internship interview, and/or site availability.

While on an internship or practicum experience, and while receiving compensation for services provided by students as part of their educational program, student interns must be clearly identified as such when performing services related to their training.

NOTE: Not all programs offer internship opportunities. Refer to individual programs for details on whether internship opportunities are available

5.25.1 Breakdown of Internship Hours

For the purposes of calculating time required on internships (both traditional and internship qualified courses), the Federal regulations for calculating credit hours and time (§600.2 of the Department of Education Federal Code) are used. Following these regulations, hours for each traditional internship course or internship-qualified courses are defined as follows: lecture courses comprise one credit for each 15 hours of face-to-face, one credit of for each 30 hours of laboratory, and one credit for each 45 hours of practicum/internship. Using these regulations, some examples are provided below.

All traditional internship courses and internship-qualified courses provide a breakdown of the hours, course learning outcomes, weekly schedule, and all other course requirements as part of the course syllabus.

5.25.2 Traditional Internship Workload

Most traditional internship courses use a breakdown of workload equivalent to completion of three (3) credits on-site at the internship location. This includes the traditional contact hours of time on the internship/practicum site (as calculated below as contact time), as well as outside work requirements, which may include student reflections, internship reports, or other similar representations of the wider learning experience.

An example of the in-class breakdown of the workload requirement is provided below:

WORKLOAD

3.0 credits: 135 hours of practical experience

Occasionally, dependent upon the course/program content, some internship/practicum courses may also apply in-class time categorized as "seminar/lab time" in which students are required to attend seminar sessions as a component of the course content on-campus in addition to the off-site internship time. Such in-class seminars are related to the internship experience as a means of allowing students to discuss their experiences with other students/the professor in a semi-structured manner with a faculty member. An example of the breakdown of the in-class workload requirement for an internship combining on-campus and internship hours is below:

WORKLOAD

0.5 credit: 15 hours of seminar/lab instruction

2.5 credits: 115 hours of practical experience

Other workloads may be defined, dependent upon curricular content, on the syllabus and in the course description of the academic catalog. The workloads specified above are provided as a sample only.

Although rare, some programs, for curricular reasons, may require more credits for an internship/practicum experience. In order to determine the total number of hours required for internships, multiply each credit by 45 hours. For example, a six (6) credit internship would require 270 hours. These hours are reflected in the syllabus and in the academic catalog in the course descriptions.

5.25.3 Internship-Qualified Courses

Students taking internship-qualified courses complete the normal coursework and hours required for a traditional lecture course. These special courses allow students to apply what they learn from class in academically appropriate internship opportunities. Because internship qualified courses are taken in additional to traditional lecture time, students must be engaged in work directly related to the content of the lecture course. Students may be required to participate in all course required lectures, in addition to the internship work associated with the course. Although students may be engaged in hours

related to internship time outside of the traditional hours of the class, students are still expected to complete all required work for the course. Internship time does not substitute for coursework.

Students approved for an internship in qualified courses must work with their instructors to define learning outcomes appropriate to both the course and the internship opportunity. The instructor will also determine a capstone or term project that would demonstrate achievement these learning outcomes prior to the start of the course.

5.25.4 Eligibility for Internship and Practicum Opportunities

In order to be eligible to complete an internship, a student must:

1. Be enrolled in a program that includes a traditional internship course or an internship qualified course;
2. Meet all required course pre-requisites prior to the start of the term in which the student intends to conduct the internship;
3. Register for a course (either a traditional internship or an internship qualified course) prior to the first day of the semester;
4. Be in good standing at the time of registration;
5. Demonstrate the ability to secure an internship site before the first day of the semester; and
6. Complete all required paperwork and commitments prior to the first day of the semester in which they wish to do an internship.

NOTE: Additional requirements may apply to students studying on an F-1 visa. Such students must refer to the “curricular practical training (CPT)” portion of the catalog for details on eligibility for F-1 students. International students must complete the Curricular Practical Training (CPT) authorization process in order to participate in the internship program and be registered in an “Internship Qualified” course. For more information on CPT, see the Regulations for International Students section or contact the Career Center.

5.25.5 Awarding of Course Credit

In order for students to be awarded credit for an internship opportunity, they must meet all of the following:

1. Completion of all required internship coursework;
2. Attending all required meetings with the course instructor; and
3. Completion of the minimum number of hours as documented on the timesheet.

While the field experience courses require significant time on-site at an institution related to the appropriate program, the on-site supervisors do not contribute to the grade for the course. The grade for the course is assigned by the course-instructor. Achievement of the learning outcomes is observed through the submission of work to the course instructor, based upon work conducted during the internship course.

5.25.6 Establishing Internship Sites

The School Dean must approve and establish an internship agreement with any and all sites not already approved by the School. This approval must be secured prior to the conducting hours/work at the internship site. The internship agreement establishes the scope of the internship and the relationship between the student, FXUA, and the site.

5.25.7 Finding Internship or Practicum Sites

The Career Center assists students with the academic internship search and application processes. Students have access to past internship employers and other job search resources through the Career Center.

5.26 Language of Instruction

FXUA proudly maintains an international focus as one of its core values, which is evident in the curriculum and among the wider learning community membership. In order to facilitate communication and instruction in a manner that would be conducive to all community members, English is used as the official medium of instruction. Community members should strive to communicate in English wherever possible.

5.27 Learning Management System

All courses have a course resource page through the learning management system (LMS), Canvas. Courses can be accessed at <http://canvas.fxua.edu>. The LMS is a place where faculty will provide resources to students for their classes as well as accept electronically submitted homework. Therefore, students are expected to log in and use the LMS to access their course resource pages. Students can access their current semester’s course(s) under “My Courses”. On the course’s resource page, students can access resources, submit assignments, participate in discussion forums, etc.

Students will have access to their previous course pages as long as they are actively enrolled in courses.

5.28 Learning Beyond the Classroom

FXUA embraces a learning model that allows for continued learning beyond just in-class contact time through use of our learning management system (LMS). The LMS allows for facilitated growth opportunities used to supplement the traditional in-class experience. Unless otherwise specified, all courses are fully conducted in their specified modality/format to include the completion of 15 lecture; 30 lab; or 45 practicum/externship hours per credit. Outside or supplemental work through the LMS would be in addition to these hours. All courses utilize the LMS for tasks like assignment submission and other out-of-class activities aimed at engagement beyond the classroom. These additional learning opportunities can include guest lectures, discussion forums, or other similar means of interacting with the course outside of the traditional lecture time. The use of LMS also ensures sufficient interaction between student and faculty and among students. All such work/activities are conducted through the LMS in addition to the traditional contact time in class.

5.29 Identity Verification, Privacy, and Access

FXUA has established and will periodically evaluate its process to ensure that a student who has enrolled in courses/programs is the same person who participates in and accesses any virtual coursework through the learning management system, library, or other such resources. When a student first begins their studies, they will be required to demonstrate that they are the person identified who applied for and were accepted to the program. This is done by verifying the identity of the individual using a government issued identification.

To authenticate student identification in web-based tools or services used by the university, FXUA

- Uses a unique and secure login and pass code to verify the identity of students. This username and password are unique to the student and, following the university's policies, is not to be shared with anyone other than the student. When students sign their enrollment agreement, they are agreeing to the university's policies and procedures, one of which is defined in the IT Security Policies.
- Uses a secure web form to reset their user passwords. When LMS username and/or password is forgotten, users will be directed to an online form where they enter their university email address to receive a new password to regain access to the LMS. Account password will not be sent to the user by using any other means. In case a student is also having trouble accessing to the university- provided email account, student will be required to reset the email account password either in person on campus by providing photo ID, or scheduling a virtual meeting with someone from IT via video conferencing in which the student would be required to present a photo ID to reset email password. During this session, students will be asked at least two personal and/or demographic questions such as date of birth, Social Security Number, birth city, current address in file to verify identification. There are no additional fees associated solely with the verification of your identity.
- Uses a secure email system and web-based systems. Staff and faculty communicate all user account related messages through the university-provided student email accounts. Students are expected to follow requirements for maintaining all of their accounts secure at all times.
- Adheres to industry standard information security practices and to federal and state regulations and legislation such as the Family Educational Rights and Privacy Act.

Students who may forget their username and password can reset their passwords. When a username and/or password is forgotten, users will be directed to an online form where they enter their university email address to receive a new password to regain access to their systems. Account password will not be sent to the user by using any other means. In case a student is also having trouble accessing to the university- provided email account, student will be required to reset the email account password either in person on campus by providing photo ID, or scheduling a virtual meeting with someone from IT via video conferencing in which the student would be required to present a photo ID to reset email password. During this session, students will be asked at least two personal and/or demographic questions such as date of birth, Social Security Number, birth city, current address in file to verify identification.

Students are not charged any additional fees associated solely with the verification of their identity.

When students sign their enrollment agreement, they agree to abide by the university's IT Security Policies when accessing course materials and the required information systems to engage in distance education coursework.

5.30 Thesis Guidelines

For programs requiring a thesis, a Thesis Guide is available from the academic advisor. The guide is designed assist graduate students at all stages of the thesis or project process. Students are advised to consult the guide as early into their program of study as possible, as it will help facilitate the process of submitting a thesis or project that conforms to

FXUA regulations. The thesis must be bound, catalogued, archived and made available to the university's academic community. Students must consult with their academic advisor for thesis courses.

5.31 Transfer Credit

When a student brings credits from other institutions, these credits will be noted with a grade of "TC" (Transfer Credits). Transfer credits ("TC") are included in the calculation of the maximum allowable credits and completion rate requirements as credits attempted and credits earned for SAP calculation. Since these courses will not carry grades, they will have no effect on GPA calculations. The student's new normal program length will be shortened to reflect the transfer courses and the Maximum Time Frame will be recalculated. Transfer credits may impact the student's ability to maintain full time course load. International students should refer to the course load policy available in the catalog.

A transfer student must complete at least 50% of the credit hours required by their program of study at FXUA. For example, a transfer student in FXUA's graduate degree program would have to complete at least 18 of the required 36 credit hours at FXUA. This means that prior to enrollment, a graduate degree student may transfer up to 18 semester graduate credits from other accredited institutions and apply them towards a graduate degree program at FXUA at the discretion of the institution. A graduate level certificate student may transfer up to 9 semester credit hours of graduate credit hours from other accredited institutions and apply them towards a graduate level certificate program. A minimum of a 3.00 grade point average ("B") out of 4.00 must have been earned on all graduate level transferable credit hours. An undergraduate degree student may transfer up to 60 semester credit hours from other accredited institutions and apply them to their program. A minimum of a 2.00 grade point average ("C") out of 4.00 must have been earned on all undergraduate level transferable credit hours.

Transferable credit is considered upon the request of the student at the time of initial registration. Graduate students who want to apply courses taken at another college/university toward their FXUA graduate degree must understand that the following criteria must be met in order to be considered for transfer of credit:

- a. Courses are from an accredited institution recognized by the US Department of Education, the Council on Higher Education Accreditation, or, for foreign institutions, the government or appropriately recognized organization accreditation;
- b. Courses are equivalent to FXUA courses;
- c. Courses consist of at least 3 credit hours;
- d. Course grades are B or higher;
- e. Courses do not duplicate;
- f. Course descriptions, syllabi or course catalogs are submitted along with the transfer of credit request;
- g. Any student looking to obtain transfer credit from an institution located outside of the United States will need to obtain a detailed course-by-course evaluation from an endorsed/approved member of National Association of Credential Evaluation Services (NACES) - www.naces.org; or a member of the Association of International Credentials Evaluators (AICE) – www.aice-eval.org ; and
- h. For joint/dual degree program mapping purposes, transfer credits will be evaluated and approved by program directors/chairs based on above criteria.
- i. The maximum number of transferable credits is 18 credits for the Master's degree programs and 9 credits for the graduate certificate programs.

Undergraduate students who want to apply courses taken at another college/university toward their FXUA undergraduate degree must understand that the following criteria must be met in order to transfer their credits:

- a. Courses are from an accredited institution recognized by the US Department of Education, the Council on Higher Education Accreditation, or, for foreign institutions, the government or appropriately recognized organization accreditation;
- b. Courses are equivalent to FXUA courses;
- c. Courses consist of at least 3 credit hours;
- d. Course grades are C or higher;
- e. Courses do not duplicate;
- e. Course descriptions, syllabi or course catalogs are submitted along with the transfer of credit request;
- f. Any student looking to obtain transfer credit from an institution located outside of the United States will need to obtain a detailed course-by-course evaluation from an endorsed/approved member of National Association of Credential Evaluation Services (NACES) - www.naces.org; or a member of the Association of International Credentials Evaluators (AICE) – www.aice-eval.org ; and

- h. For joint/dual degree program mapping purposes, transfer credits will be evaluated and approved by program directors/chairs based on above criteria.
- i. The maximum number of transferable credits is 60 credits for the Bachelor's degree programs.

FXUA does not offer or accept transfer credits for credits based on life experience, or prior work experience. FXUA may accept transfer credits for credits based on active professional certifications that are offered in our programs.

6 STUDENT RIGHTS PRIVILEGES, & RESPONSIBILITIES

Students enjoy certain rights but also have certain responsibilities. The submission of an application for admission to the university represents a voluntary decision on the student's part to participate in the programs offered by the institution pursuant to its policies, rules, and regulations. The university's approval of that application, in turn, represents the extension of a privilege to join FXUA and remain a part of the university so long as the student meets the required academic and social standards of the university.

FXUA is a learning community with specific expectations concerning the conduct of its students. The university strongly believes that students are adults who are expected to take personal responsibility for their own conduct. Acceptance into any of the university's programs implies that the student has the following rights and responsibilities:

1. To pursue their educational goals through the resources and the opportunities made available to him/her by the university.
2. To challenge any university ruling or other sanction by appealing to due process, except as hereinafter provided.
3. To inquire, express views, and assemble with others as long as the student does not interfere with the rights of others or the university's effective operation.
4. To receive a professional and non-biased review of their academic ability and performance.
5. To recognize the safety and protection of property and the continuity of the educational process.
6. To help the university maintain good relations with its neighbors and the surrounding community by, among other things, obeying all traffic regulations, refraining from causing any disturbance, and respecting private property.

6.1 Academic Freedom

Academic freedom relates to the unfettered ability for faculty to conduct professional research and teaching practices in their fields. While faculty are permitted to teach course content and research as it relates to their professional and educational background, they also serve to honor, respect, and cultivate spirit of creativity, inquiry, and respectful criticism in their interactions with students and colleagues. By doing so, the learning community is afforded the free flow of ideas that is a bedrock of the higher education institution.

Because faculty hold a special place in society, they are encouraged to always operate (on and off-campus) in respectful and dignified ways. In doing so, they should be clear to highlight when they are representing their own thoughts versus the thoughts of the institution that they work for.

6.2 Grounds for Warning, Suspension, or Dismissal

Any of the following may be considered as cause for probation, suspension, or dismissal:

1. Academic dishonesty of any kind
2. Failure to maintain satisfactory academic progress
3. Violation of institutional rules and regulations
4. Failure to meet financial obligations

6.3 Academic Integrity Policy and Procedures

6.3.1 Academic Integrity and Code of Academic Excellence

In the pursuit of academic excellence, it is the policy that all parties associated with Fairfax University of America (FXUA) conduct themselves with a high level of honesty and responsibility in regard to academic excellence. FXUA is committed to the establishment of and adherence to high academic and integrity standards in order to foster reputations that students, faculty, staff, and alumni can be proud of. These reputations directly correlate to the value of the degrees conferred by the institution and are viewed with utmost importance. This requires that students, faculty, and staff understand the importance of integrity and adhere to the highest standards while in class or on internships, at work, and in continuing education.

The university commits to preparing students to be academically and professionally prepared for the rigors of the world of work. In order to ensure that high-quality educational opportunities are offered and to ensure the rigors of academic excellence, FXUA requires that students adhere to the Code of Academic Excellence.

6.3.1.1 Academic Integrity

Formal oversight of academic integrity is monitored by the entire FXUA learning community, including the students, faculty, and staff of FXUA. Suspected violations of academic integrity shall be directed to the appropriate Program Director and/or, where necessary, to the Executive Dean for Academic Programs and Administration (hereafter "Executive Dean") in writing.

6.3.1.2 Code of Academic Excellence

The Code of Academic Excellence is a commitment by the entire learning community to adhere to, sustain, and build upon the reputation of the university by continually focusing on academic integrity and rigor. The following statement has been adopted by FXUA and applies to all members of the university learning community:

“All members of the Fairfax University of America learning community are expected to perform with integrity and respect for the high rigors of academic excellence espoused by FXUA. Academic integrity includes the maintenance of a learning environment where everyone is given an opportunity to succeed through their own efforts and violations to the Code of Academic Excellence are not tolerated by the learning community.”

6.3.2 Student Academic Misconduct

Violations to the Code of Academic Excellence by students can ultimately lead to the improper evaluation of assessment tasks leading to unjust attribution of grades or course status. Therefore, it is essential to monitor and evaluate any allegation of academic misconduct. While the Code of Academic Excellence applies to all members of the FXUA community, this section focuses on violations of academic integrity by students. Forms of violation can include, but are not limited to the following:

- Cheating and unauthorized use of materials: Cheating assumes taking advantage of people, materials, or other resources that are not your own and/or are not permitted. Unless otherwise instructed, students are expected to use their own ideas, work, and independent research for exams, projects, presentations, etc. The intentional or unintentional use of materials that are outside of the boundaries provided by the instructor or assignments is considered cheating.
- Improper collaboration: Permission to collaborate on homework, assignments, projects, exams, etc. must be authorized by an instructor. When not explicitly granted permission for collaboration, students should assume that they are not permitted to collaborate. In the absence of authorization for collaboration, it is assumed that all submitted work is the result of the student's own understanding and academic research. If submitted work is identical or overwhelmingly similar to another student's work, particularly where individual variation would be expected, the instructor has reasonable suspicion to assume that misconduct has occurred.
- Submission of material for multiple courses: Submission of work to a course (or even for publication) assumes that this material is new and/or full disclosure is made if the work has already been used/printed. This includes submission of assignments for multiple courses or journals. Submission of work for a class should be original work specifically for that course.
- Fabrication, forgery, purchase, alteration, or unlawful use of documents for academic advantage: Any form of lying, forgery, falsification, or unlawful use of data or other information is in direct violation of the Code of Academic Excellence. This can include, but is not limited to, lying to an instructor or administrator; misusing copyrighted information; purchasing, stealing, or misusing documents; or fabricating or falsifying results in order to achieve undue academic advantage.
- Conspiring/attempting/intimidating others to commit academic misconduct: Any student who aids in another's misconduct or attempts to intimidate another student to commit misconduct would be considered to be in violation of the Code of Academic Excellence. This would include, but is not limited to, (1) providing whole or partial work to another student who did not participate in and/or do the work, with a reasonable assumption that the information would be used in a manner consistent with misconduct; (2) attempting to cheat before the misconduct is discovered even if no cheating ultimately occurs; or (3) intimidating others, including threats and/or physical intimidation in order to take or misuse materials from another student.
- Representing the work of others as one's own work: Using the work of others and representing it as one's own work, regardless of whether or not the individual whose original work was used knows of the use, is not permitted. Work submitted is assumed to be the work of the submitter (or submitters, in the case of approved group work).
- Unauthorized access to the work of others: Hacking into accounts or stealing work from another in order to achieve an undue academic advantage is considered to be a violation of the Code of Academic Excellence as well as a cybercrime. This includes unauthorized access to a computer, email account, portal, or other form of storage by an individual with the intent of stealing or copying another's work. Violations can lead to civil or criminal penalties.
- Interference with the work of others: Intentionally harming, deleting, or altering the work of others to gain an undue advantage are acts that are considered to be inappropriate. These sorts of actions undermine the work of others and create an environment where the work of others is not valued. It is expected that scholars and professionals respect the work of others and do not attempt to harm or destroy this work.
- Plagiarism: Plagiarism includes, but is not limited to, the intentional or unintentional use of the ideas of others without properly attributing them to the original owner/thinker. This even includes personally reusing one's own ideas without properly citing them.

Each alleged violation of the Code of Academic Excellence will be evaluated and reviewed by members of the FXUA learning community taking into consideration such factors as the student's prior academic history. Therefore, the list above is not intended to be exhaustive and is merely meant to serve as a sample of potential areas for violation.

As one method of identifying overlap between documents, FXUA requires that assignments be submitted through TurnItIn's plagiarism detection service. Students can also use TurnItIn as a tool for monitoring their own academic integrity and should consider proactively checking all assignments and discussion postings prior to uploading them to the official submission locations. In some courses, instructors may require students to submit an assignment more than once (e.g., if students receive feedback on a draft before resubmitting a revised version). Only final submissions will be submitted to the TurnItIn database; however, draft submissions will be checked against existing information in the database to help both students and faculty members identify potential problems.

6.3.2.1 Reporting and Resolving Student Academic Misconduct

FXUA is committed to the immediate resolution of allegations of misconduct. Wherever possible, if academic misconduct can be stopped prior to the occurrence of a violation, members of the learning community are encouraged to help each other to uphold the university's ideals of integrity and hold each other accountable. When necessary, students, instructors, administrators and staff members, or other external parties may report misconduct. In doing so, it is crucial to understand both the scope of program oversight regarding allegations of misconduct and the adjudication process for allegations of misconduct.

6.3.2.2 Scope of School/Program Oversight

Each School within the university has an appointed designee ("Program Designee") who oversees and manages the adjudication process for allegations of student misconduct. In cases where violations of the Code of Academic Excellence are suspected, the student, staff or faculty member shall notify the Program Designee of the School in which the allegation has taken place. This Designee will either be the Program Director of the School or someone on the Program Director's staff. In the rare instance where the Program Director has a conflict of interest, a Program Director from another School will be made the de facto Designee for the proceedings as selected by the Executive Dean.

6.3.2.3 Adjudication of Allegations

In the event that an instructor or other member of the FXUA learning community suspects academic dishonesty, he or she will follow the procedures outlined below in order to encourage a fair and equitable solution for any and all violations to the Code of Academic Excellence. Instances are cumulative and are recorded in the student's permanent file.

Before taking any other steps, the individual who has identified an academic integrity violation must immediately contact the Program Designee (PD) of the School in which the violation has occurred to ascertain whether the student has shown previous academic integrity violations. The PD will check the Reports Portal (Admission tab > Student Docs) and look for documents labeled REG-Academic-Misconduct in order to determine how many prior violations have occurred. In most cases, the next step will be to follow the procedures outlined below for the resolution of a first, second, third, or fourth instance.

As the School's designated voice on academic integrity, however, if the PD considers a first, second, or third instance to constitute an egregious offense, the PD may recommend that the matter be sent to an Institutional Grievance Panel, which will consist, at a minimum, of the Program Designee, the Program Director (if different from the Designee), one or more other Program Directors, one or more faculty members, the Executive Dean, a designee from the Office of the President, and (optionally) a representative from the Academic Integrity Committee. In consultation with the PD, the Executive Dean will determine the exact membership of this Panel and invite members to participate. As described in greater detail below, the Panel will decide whether the remediation plan normally associated with that instance is sufficient to address the serious nature of the violation or whether additional measures might be necessary. This is intended not only as a potential means of escalation, but also as a way of seeking multiple perspectives and ensuring a fair response to an especially serious academic integrity issue.

If a student commits multiple similar violations of the academic integrity policy around the same time, before having a chance to complete and learn from the current remediation plan, the PD may consider allowing the violations to count as part of the same instance. For example, if a new student were to paraphrase insufficiently in papers for two different classes in the same week, both could fall under a single remediation plan with the same consequence (e.g., failing both assignments with the option to redo them). Together, they could count as the student's first allegation of misconduct, and the same remediation tools and resources could be used to address both simultaneously. However, if a student were to plagiarize in one class and cheat on a test in another class, those different types of violations would count as separate instances of misconduct and call for different remediation plans. Program Designees are welcome to consult with the Academic Integrity Committee for guidance on how to deal with multiple concurrent violations.

It is important to note that academic integrity violations may sometimes be discovered after some time has passed. In such cases, consequences may need to be implemented retroactively. For example, a student might retroactively be given a zero on a previously graded assignment, which could mean failing and needing to retake the course, or a department's previous approval of a thesis might need to be retracted, which could mean revocation of the degree. These examples are not exhaustive. Instances such as these will be handled on a case-by-case basis. To the greatest extent possible, adjudication will follow the usual process outlined below for allegations that are made soon after suspected academic integrity violations have occurred.

FIRST INSTANCE: Resolution for the First Allegation of Misconduct:

The instructor alleging misconduct must gather proof of the potential violation (e.g., a TurnItIn report, a side-by-side comparison of the student's work against a classmate's work or something found on the internet, a written complaint by another student, or other evidence according to the nature of the violation), then inform the Program Designee. The PD will check the Reports Portal to determine the total number of instances of academic integrity violations on file in the student's record and will share that information with the instructor. If this is the first documented instance, then the following procedures will apply: The instructor has the discretion to decide whether the student should be given a grade of zero (0) on the assignment with no option to redo the work, or whether the student should have the option of resubmitting a revised version of the assignment that adheres to FXUA's Code of Academic Excellence in order to earn a reduced portion of the grade. In deciding what proportion of the grade can be earned on the resubmission, if any, the instructor is encouraged to consider both the severity of the violation and fairness to other students who completed the work with integrity from the beginning. For instance, if a student has inadvertently missed a citation or insufficiently paraphrased due to a lack of understanding, that might call for allowing a substantial proportion of the grade to be earned on the resubmission, whereas if a student has intentionally copied another person's work, a more severe penalty such as an automatic zero on the assignment would be in order. The instructor is welcome to consult with the Program Designee for guidance.

- a. The instructor must inform the student in writing of the violation and host a meeting with the student to ensure that the student understands the academic integrity policy, the problem with the violation, and ways of avoiding violations of the policy in the future. As part of this meeting, the instructor will have the student sign an Academic Integrity Remediation Plan (First Instance) form, which the instructor will also sign. If the student is not willing to sign the remediation plan, the instructor should make a note to that effect on the form and inform the student that the documents will nonetheless be maintained in the student's records. As relevant, the student will be strongly encouraged to visit FXUA's Writing, Research, and Media Center (WRMC) for additional guidance and feedback on avoiding academic misconduct. The instructor may also add further requirements to the Remediation Plan to ensure that it is tailored to the needs of the student.
- b. The instructor must submit the signed Academic Integrity Remediation Plan (First Instance) and all supporting documentation providing evidence of the violation (e.g., TurnItIn report, side-by-side comparison, student complaint, or other evidence) to the Program Designee.
- c. The PD must send all of the documentation associated with the academic integrity violation to the Registrar (registrar@fxua.edu) so that copies can be maintained in the student's permanent record at FXUA. The PD will also CC the instructor and the Office of Institutional Effectiveness (oiie@fxua.edu) to inform the university's assessment efforts.
- d. The PD must make notes in CAMS to document the content of all meetings and communication with the student regarding the academic integrity violation and remediation plan. The PD is also encouraged to email the student's other professors to let them know that the student may need additional guidance with regard to academic integrity.
- e. If the student has been encouraged to visit the WRMC, the PD will email the WRMC (wrmc@fxua.edu) to notify them of the upcoming appointment request so that they can ensure sufficient staffing is on hand.
- f. Following the student's meeting with a WRMC Coach, the WRMC will email documentation of the visit to the PD, the instructor, and the Registrar (registrar@fxua.edu) to be maintained in the student's file.

SECOND INSTANCE: Resolution for Second Allegation of Misconduct

The instructor alleging misconduct must gather proof of the alleged misconduct (i.e., a TurnItIn report, a side-by-side comparison of the student's work against a classmate's work or something found on the internet, a written complaint by another student, or other evidence according to the nature of the violation), then inform the Program Designee. The PD will check the Reports Portal, then inform the instructor of the total number of instances of academic integrity violations on file in the student's record. If this is the second documented instance, then the following procedures will apply: The instructor will award a zero, with no option to redo the assignment.

- a. The Program Designee will schedule a meeting with the student to discuss the allegation. In this meeting, the PD will confirm that the student will receive a zero for the assignment with no option to resubmit the work, remind the student of the Code of Academic Excellence and Academic Integrity Policy, discuss the consequences of repeated violations (including what would happen if a third and fourth instance were to occur), and again have the student sign an Academic Integrity Remediation Plan (Second Instance) form,

which the Program Designee will also sign. If the student is not willing to sign the remediation plan, the PD should make a note to that effect on the form and inform the student that the documents will nonetheless be maintained in the student's records. This second remediation plan will contain additional requirements to ensure that the student fully understands what academic misconduct is and how to avoid it. This may include another meeting with FXUA's Writing, Research, and Media Center for further guidance and feedback. The PD may add requirements to the Remediation Plan to ensure that it is tailored to the needs of the student.

- b. The PD assigns the student to retake the FXUA Academic Integrity Training on Canvas and notifies the Learning Resource Manager who assigns the course to the student's Canvas account.
- c. The PD must submit a copy of the signed Academic Integrity Remediation Plan (Second Instance) and all supporting documentation providing evidence of the violation (e.g., TurnItIn report, side-by-side comparison, student complaint, or other evidence) to the Registrar (registrar@fxua.edu) so that copies can be maintained in the student's permanent record at FXUA. The PD will also CC the instructor and the Office of Institutional Effectiveness (oie@fxua.edu) to inform the university's assessment efforts.
- d. The PD must make notes in CAMS to document the content of all meetings and communication with the student regarding the academic integrity violation and remediation plan. The PD is also encouraged to email the student's other professors to let them know that the student may need additional guidance with regard to academic integrity.
- e. If the student has been encouraged to visit the WRMC, the PD will email the WRMC (wrmc@fxua.edu) to notify them of the upcoming appointment request so that they can ensure sufficient staffing is on hand.
- f. Following the student's meeting with a WRMC Coach, the WRMC will email documentation of the visit to the PD, the instructor, and the Registrar (registrar@fxua.edu) to be maintained in the student's file.

THIRD INSTANCE: Resolution for Third Allegation of Misconduct:

The instructor alleging misconduct must gather proof of the alleged misconduct (i.e., a TurnItIn report, a side-by-side comparison of the student's work against a classmate's work or something found on the internet, a written complaint by another student, or other evidence according to the nature of the violation), then inform the Program Designee. The PD will check the Reports Portal, then inform the instructor of the total number of instances of academic integrity violations on file in the student's record. If this is the third documented instance, then the following procedures will apply: The Program Designee will schedule a meeting with the student to discuss the allegation. In this meeting, the PD will confirm that the student will receive a zero for the assignment with no option to resubmit the work, remind the student of the Code of Academic Excellence and Academic Integrity Policy, discuss the consequences of repeated violations (including what else could happen as a result of this third instance and a potential fourth instance), and again have the student sign an Academic Integrity Remediation Plan (Third Instance) form, which the Program Director will also sign. If the student is not willing to sign the remediation plan, the PD should make a note to that effect on the form and inform the student that the documents will nonetheless be maintained in the student's records. The PD will further inform the student that this matter will be handled by a School Grievance Panel, which will consist, at minimum, of the Program Designee, the Program Director (if different from the Designee), one or more faculty members, and the Executive Dean. The meeting of the School Grievance Panel should occur as soon as possible following the meeting with the student. Prior to that meeting, the student will be given the opportunity to explain the situation and make a case to the School Grievance Panel in writing.

- a. During the School Grievance Panel meeting, the Program Designee will present documentation of all allegations of academic misconduct (the first, second, and current instances). The Panel will then discuss the violation and possible consequences of the violation. Consequences can include but are not limited to:
 - i. Failure of the course, internship, or externship with the option to repeat it, or
 - ii. Suspension from the university for a minimum of one semester.
- b. A formal meeting will be arranged between the Program Director and the student in which the School Grievance Panel's verdict will be presented to the student in the form of an official letter from the School. If the student is not willing to attend the meeting, the letter will be sent via email. A copy of this letter will also be provided to the Executive Dean and to the Registrar's Office, where it will be added to the student's permanent record. Appeals to decisions can be made to an Institutional Grievance Panel.
- c. The Program Designee must submit a copy of the signed Academic Integrity Remediation Plan (Third Instance) and all supporting documentation providing evidence of the violation (e.g., TurnItIn report, side-by-side comparison, student complaint, or other evidence) to the Registrar (registrar@fxua.edu) so that copies can be maintained in the student's permanent record at FXUA. The PD will also CC the instructor and the Office of Institutional Effectiveness (oie@fxua.edu) to inform the university's assessment efforts.
- d. The PD assigns the student to retake the FXUA Academic Integrity Training on Canvas and notifies the Learning Resource Manager who assigns the course to the student's Canvas account.

- e. The PD must make notes in CAMS to document the content of all meetings and communication with the student regarding the academic integrity violation and remediation plan. The PD is also encouraged to email the student's other professors to let them know that the student may need additional guidance with regard to academic integrity.

FOURTH INSTANCE: Resolution for the Fourth Allegation of Misconduct:

The instructor alleging misconduct must gather proof of the alleged misconduct (i.e., a TurnItIn report, a side-by-side comparison of the student's work against a classmate's work or something found on the internet, a written complaint by another student, or other evidence according to the nature of the violation), then inform the Program Designee. The PD will check the Reports Portal, then inform the instructor of the total number of instances of academic integrity violations on file in the student's record. If this is the fourth documented instance, then the following procedures will apply:

- a. The Program Designee will schedule a meeting with the student to discuss the allegation. In this meeting, the PD will confirm that the student will receive a zero for the assignment with no option to resubmit the work, remind the student of the Code of Academic Excellence and Academic Integrity Policy, discuss the consequences of repeated violations (including a discussion about what could happen as a result of this fourth instance), and again have the student sign an Academic Integrity Remediation Plan (Fourth Instance) form, which the Executive Dean will also sign. If the student is not willing to sign the policy or remediation plan, the PD should make a note to that effect on the form and inform the student that the documents will nonetheless be maintained in the student's records. The PD will further inform the student that this matter will be handled by an Institutional Grievance Panel, which will consist, at a minimum, of the Program Designee, the Program Director (if different from the Designee), one or more other Program Directors, one or more faculty members, the Executive Dean, and a designee from the Office of the President. In consultation with the PD, the Executive Dean will determine the exact membership of this Panel and invite members to participate. If additional perspectives would be of use, the Panel is welcome to request that the Academic Integrity Committee send a representative as well. The meeting of the Institutional Grievance Panel should occur as soon as possible following the meeting with the student. Prior to that meeting, the student will be given the opportunity to explain the situation and make a case to the Institutional Grievance Panel in writing.
- b. During the Institutional Grievance Panel meeting, the Program Designee will present documentation of all allegations of misconduct (the first, second, third, and current instances). The Panel will then discuss the violation and possible consequences of the violation. Possible consequences can include:
 - i. Failure of the course, internship, or externship with no option to repeat it,
 - ii. Suspension from the university for a minimum of one semester, or
 - iii. Permanent expulsion from the university.
- c. The student will be notified of the Institutional Grievance Panel's verdict in writing by an official letter from the Executive Dean. A copy of this letter will also be provided to the Program Director and to the Registrar's Office, where it will be added to the student's permanent record. Appeals to decisions can only be made to the Institutional Grievance Panel.
- d. The Program Designee must submit a copy of the signed Academic Integrity Remediation Plan (Fourth Instance) and all supporting documentation providing evidence of the violation (e.g., TurnItIn report, side-by-side comparison, student complaint, or other evidence) to the Registrar (registrar@fxua.edu) so that copies can be maintained in the student's permanent record at FXUA. The PD will also CC the instructor and the Office of Institutional Effectiveness (oi@fxua.edu) to inform the university's assessment efforts.

EGREGIOUS VIOLATION: Resolution of Allegation of an Egregious Instance of Misconduct

Violations of academic integrity can range in severity from, for example, an unintentional lack of citation or inadvertently insufficient paraphrasing to a purposeful and blatant attempt to cheat. In some cases, the severity of the violation might seem to require more punitive measures than the consequences outlined for the instance at hand. (As just one example, if a student's first academic integrity violation was to bully another student into cheating, that might call for a stronger response than the awarding of a zero grade with the option of redoing the assignment for credit, the consequence outlined for a first instance.) In such cases, the instructor and/or Program Designee can recommend that the violation be escalated to count as an egregious instance and request the formation of an Institutional Grievance Panel to help determine the consequences, which may exceed those normally associated with a first, second, or third instance. As needed, Program Designees are encouraged to consult with other Program Directors, as well as possibly to seek guidance from the university's Academic Integrity Committee, to decide whether to pursue this option.

The instructor alleging misconduct must gather proof of the alleged misconduct (i.e., a TurnItIn report, a side-by-side comparison of the student's work against a classmate's work or something found on the internet, a written complaint by another student, or other evidence according to the nature of the violation), then inform the Program

Designee. If the Program Designee considers the alleged violation to the Code of Academic Excellence to be an egregious instance of misconduct, then the following procedures will apply:

- a. The Program Designee will schedule a meeting with the student to discuss the allegation. In this meeting, the PD will confirm that the student will receive a zero for the assignment with no option to resubmit the work, remind the student of the Code of Academic Excellence and Academic Integrity Policy, and discuss the specific violation with the student, including why it was designated as an egregious violation and what the consequences of an egregious violation might be. The PD will have the student sign a copy of the Academic Integrity Policy and inform the student that this matter will be handled by an Institutional Grievance Panel, which will consist, at a minimum, of the Program Designee, the Program Director (if different from the Designee), one or more other Program Directors, one or more faculty members, the Executive Dean, and a designee from the Office of the President. In consultation with the PD, the Executive Dean will determine the exact membership of this Panel and invite members to participate. If additional perspectives would be of use, the Panel is welcome to request that the Academic Integrity Committee send a representative as well. The meeting of the Institutional Grievance Panel should occur as soon as possible following the meeting with the student. Prior to that meeting, the student will be given the opportunity to explain the situation and make a case to the Institutional Grievance Panel in writing.
- b. During the Institutional Grievance Panel meeting, the Program Designee will present documentation of all allegations of misconduct, including previous allegations, if any. The Panel will then discuss the violation and possible consequences of the violation. Possible consequences can include:
 - i. Redesignation of the violation as instance 1, 2, 3, or 4 (if so, follow procedures as above),
 - ii. Failure of the course, internship, or externship with the option to repeat it,
 - iii. Failure of the course, internship, or externship with no option to repeat it,
 - iv. Suspension from the university for a minimum of one semester, or
 - v. Permanent expulsion from the university.
- c. If the Panel chooses to redesignate the violation following option (i) above, the student will be notified in writing following the procedures outlined for instances 1-4 above. If the Panel deems that the allegation is egregious and chooses any of the options corresponding to (ii) through (v) above, the student will be notified of the verdict in writing by an official letter from the Executive Dean. A copy of this letter will also be provided to the Program Director and to the Registrar's Office, where it will be added to the student's permanent record. Appeals to decisions can only be made to the Institutional Grievance Panel.
- d. The Program Designee must submit a copy of the signed Academic Integrity Remediation Plan (as relevant) and all supporting documentation providing evidence of the violation (e.g., TurnItIn report, side-by-side comparison, student complaint, or other evidence) to the Registrar (registrar@fxua.edu) so that copies can be maintained in the student's permanent record at FXUA. The PD will also CC the instructor and the Office of Institutional Effectiveness (oiie@fxua.edu) to inform the university's assessment efforts.
- e. The PD must make notes in CAMS to document the content of all meetings and communication with the student regarding the academic integrity violation and remediation plan. The PD is also encouraged to email the student's other professors to let them know that the student may need additional guidance with regard to academic integrity.

The university does not excuse any violation of its policies on the basis that the student was not aware of these policies and their subsequent penalties and sanctions.

6.3.3 Faculty Oversight

In addition to serving as mentors and role models, faculty are the primary arbiters and protectors of FXUA's academic integrity, and as such, they are held accountable not only for adhering to FXUA's Code of Academic Excellence, but also for monitoring their students' academic integrity. Faculty who suspect students of violations of academic integrity are required to enforce FXUA's policy. Because FXUA takes a learning-oriented approach to academic integrity for our students, we do so for our faculty as well, as represented by the remediation plan described below. However, faculty who fail to enforce FXUA's policy despite education and/or remediation may be sanctioned, removed from their courses, or permanently blocked from teaching at the institution.

6.3.3.1 Resolving Inadequate Faculty Monitoring of Academic Integrity

Faculty are recommended to use TurnItIn plagiarism detection software for all written assignments submitted electronically and should be aware that administrators are tasked with monitoring the courses in their department. During such monitoring, any faculty member who is found not to have addressed instances of student academic integrity violations in an appropriate way will be put on a remediation plan. Since all faculty review the academic integrity policy during the onboarding process, and because faculty are required to acknowledge FXUA's Academic Integrity Policy, anyone assigned to teach a course should already be capable of monitoring and detecting violations of the Code of Academic Excellence.

FIRST INSTANCE: Resolution for the First Instance of Inadequate Monitoring or Enforcement

If an academic integrity violation is found to have gone insufficiently addressed in a faculty member's course for the first time, with reasonable expectations that the instructor should have recognized the violation and enforced the policy (e.g., the violation is clearly identifiable, sufficient time has passed since the submission, the violation was not detected or addressed during grading), the following remediation actions will occur:

- a. The faculty member will be informed in writing that such a violation has been found.
- b. The faculty member will re-read FXUA's Academic Integrity Policy and will sign another acknowledgment of having read and understood the policy.
- c. After re-reading the policy, the faculty member will be required to meet with his/her Program Director about the insufficiently addressed violation. The Program Director will provide concrete and specific guidance regarding how the student's academic integrity violation should have been addressed, suggest strategies for identifying and addressing this and other academic integrity problems, answer questions from the faculty member, and point the faculty member toward additional resources as needed.
- d. The faculty member, under the supervision of the Program Director or another designee, will be required to follow through with the procedures for holding the student accountable for the academic integrity violation, as specified in FXUA's Academic Catalog, as soon as possible. This will include preparing the student's remediation plan and submitting the necessary paperwork.
- e. The faculty member will be placed on a non-negotiable faculty remediation plan, which will involve the completion of additional training on academic integrity and the writing of a personalized plan for identifying and addressing academic integrity issues in the future (around 300 words or 1 page). The faculty member will sign the remediation plan document, provide documentation of the additional training, and submit the personalized plan to his/her Program Director within 5 business days of the meeting.
- f. The faculty member's course(s) will be placed on heightened monitoring for the remainder of the semester. In the case of an instance occurring at the end of the semester, courses in the following semester may be monitored as well.
- g. The Program Director will send all documentation related to the faculty member's violation and remediation plan to the Human Resources Department (hrsupport@fxua.edu), where it will be maintained as part of the faculty member's employment records.

SECOND INSTANCE: Resolution for the Second Instance of Inadequate Monitoring or Enforcement

If an academic integrity violation is found to have gone insufficiently addressed in a faculty member's course for a second time, with reasonable expectations that the instructor should have recognized the violation and enforced the policy (e.g., the violation is clearly identifiable, sufficient time has passed since the submission, the violation was not detected or addressed during grading), the following remediation actions will occur:

- a. The faculty member will be informed in writing that such a violation has been found.
- b. The faculty member will re-read FXUA's Academic Integrity Policy and will sign another acknowledgement of having read and understood the policy.
- c. After re-reading the policy, the faculty member will be required to meet with his/her Program Director and the Executive Dean to discuss the repeated unaddressed violation. The Program Director will again provide concrete and specific guidance regarding how the student's academic integrity violation should have been addressed, suggest strategies for identifying and addressing this and other academic integrity problems, answer questions from the faculty member, and point the faculty member toward additional resources as needed.
- d. The faculty member, under the supervision of the Program Director or another designee, will be required to follow through with the procedures for holding the student accountable for the academic integrity violation, as specified in FXUA's Academic Catalog, as soon as possible. This will include preparing the student's remediation plan and submitting the necessary paperwork.
- e. The Program Director will make a recommendation regarding the faculty member's ability to continue teaching at FXUA to the Academic Integrity Committee and Executive Dean. If the Committee and Executive Dean agree with the initial recommendation, the Program Director's decision will stand. If not, then the President of the university or a designee from the Office of the President will make a determination.
- f. If permitted to return to teach at FXUA, the faculty member will be placed on a non-negotiable remediation plan, to include additional training, continued heightened monitoring, and submission of a new personalized

plan for identifying and addressing academic integrity issues in the future. The faculty member's course(s) will also be placed on heightened monitoring for a minimum of four semesters.

- g. The Program Director will send all documentation related to the faculty member's violation and remediation plan to the Human Resources Department (hrsupport@fxua.edu), where it will be maintained as part of the faculty member's employment records.

6.4 Student Honor Code

Students at the university are bound by the University's Honor Code in their academic activities. As such, students promise...

"...that all of the assignments I submit in all of my courses will represent my own work.

Whenever I make use of resources to inspire, inform, or support my ideas, I will summarize, paraphrase, and/or quote those sources appropriately, citing them in APA style.

I will not submit the same work in more than one course unless I have received explicit and specific written permission from the professor to build on related work I have previously completed.

Further, I will help to ensure fairness for all students by avoiding improper assistance or collaboration (including, but not limited to, providing or obtaining answers to assignments or tests, whether in person or online).

I understand that it is better to submit incomplete work than to submit an assignment that contains plagiarism or another form of cheating, and I understand that I am responsible not only for following FXUA's Code of Academic Excellence, but also for seeking guidance if I am ever unsure whether my actions will reflect the standards of academic integrity espoused by the university.

All students who enroll at the university are bound by this honor code.

6.5 Expectations of Scholarship & Academic Work

In recognizing that Fairfax University of America is a multicultural learning community made up of people from different backgrounds and previous educational experiences, it is important that all community members share a common understanding of the expectations of scholarship and academic work that takes place in and around courses and programs within the institution. As such, FXUA establishes expectations for scholarship & academic work.

FXUA expects that students hold the utmost standards related to academic integrity and academic excellence. Students are expected to adhere to the Code of Academic Excellence in all of their work. This includes an emphasis on the communication skills (both oral and in writing) that would be expected in courses and beyond our learning community). Consequences for violating the Code of Academic Excellence are defined in FXUA's Academic Integrity policy. As such, the university has adopted high expectations of academic rigor as a means of ensuring the success of our students in class and in their eventual careers.

6.5.1 Academic Professionalism

Meaningful and substantive work is defined as demonstrating preparation, reflection, and critical analysis of course content, learning resources, and/or in interactions with others. It also represents meeting the minimum requirements for academic work as outlined in the course syllabus.

Grades for written work will be determined by the quality of their content, formatting, and compliance with grammatical and genre conventions of academic/professional English. If a submitted assignment does not meet the academic and professional writing standards of work at the level of instruction, it may not be accepted.

Superior academic work demonstrates critical thinking and reflection on the part of the student and shows a depth of understanding and/or mastery of the required materials and concepts. It also demonstrates presentation quality that is genre appropriate clearly conveying one's ideas using grammatical language, logical organization, precision and accuracy, and exhibiting meticulous proofreading. Furthermore, superior academic work presents one's own ideas, while appropriately incorporating literature and resources in support of their ideas.

6.5.2 Student Engagement and Substantive Student-to-Student Participation

Higher education institutions have traditionally been safe places where members of the learning community share and discuss ideas openly. In fostering this kind of environment, students are expected to actively engage with their peers in a variety of contexts related to the classroom and generally on campus. All students are expected to adhere to respectful debate/discussion with one another at all times on and off campus.

Substantive participation is demonstrated through integration of active learning principles that engage and further learning. This can include any interactions in courses that are intended to be live/synchronous (in-class meetings, virtual discussions, phone/streaming voice services, etc.) or those interactions that are asynchronous in nature (i.e., discussion board postings, blogs, wikis, etc.). These interactions are academically meaningful, contribute to or expand student learning, and are done in a way that is timely and efficient.

The teaching model of FXUA emphasizes active learning and collaboration which engages students in a substantive manner challenging them to incorporate all of these areas when learning. Faculty must engage all learners by providing a variety of active learning activities. Active learning activities provide students with multiple perspectives and appeal to diverse learning styles. Active participation is necessary to ensure that these active learning opportunities remain focused on the course content and to provide feedback to guide and shape the development of competence.

Students are expected to be given an opportunity for student-to-student interaction. FXUA students are given the opportunity to discuss and debate, and learn and grow as professional colleagues and peer learners.

Any project or activity related should be substantive and reflective of each individual's work. Students are expected to contribute meaningfully and in a substantive way in all learning activities. Although this applies to all work, projects, or activities some special cases are highlighted below to provide examples:

- **Group Work:** In recognizing that some professions place special emphasis on working in groups or collaborating closely with other, some courses might require group work. If a course allows or requires group work, all students must contribute in an equitable manner. Students are expected to report on their colleagues' contributions and are expected to report if someone in the group does not perform their work as required.
- **Virtual Classroom Discussions:** Some courses require submission of/participation in virtual classroom discussions. As such, students must contribute to discussions in a manner that reflect thoughtful, substantive contributions. If a peer response is required for a discussion posting, students are expected to make "substantive" postings/responses to your peers. Substantive responses are ones that demonstrate that you have read, reflected, and critically analyzed what someone else has said. Non-substantive responses are those that represent just single words or simple phrase response like "yes" or "good job". A substantive response includes questions for further thought or that would otherwise make your peers/instructor think about what you have posted. A substantive response could include something like "Could you tell me more about XXXX?" or "I found what you said about YYYY interesting, but have you thought about....?" Students who do not meet these requirements will be given zeros for their discussion board assignment.
- **Residential Classroom Discussions:** In a residential classroom, students are expected to contribute in a way that reflects thoughtful, substantive contributions. All students must contribute in a meaningful and active way in residential classroom discussions. Substantive participation includes participating in a way that reflects a thorough understanding of the materials, following the requirements of the discussion, and/or following any specific guidelines from the instructor

This list is a non-exhaustive and is intended to reflect some common means of interactions likely to be encountered peer-to-peer.

6.5.3 Student and Faculty Engagement

All interactions between students and faculty should be appropriate for a professional environment. Because of the unique nature of the faculty to student relationship, faculty are encouraged to maintain high professional and ethical standards with respect to their interactions with students. This includes monitoring and speaking up about any real or perceived conflict of interest that might exist.

6.5.4 Regular and Substantive Faculty-to-Student Interactions

In addition to being good teaching practice, institutions participating in federal financial aid (Title IV) are required to offer courses that "support regular and substantive interaction between the students and the instructor, synchronously or asynchronously" (Higher Education Opportunity Act, Pub.L. 110-315, 122 Stat. 3078, codified as amended at 34 C.F.R. §600.2). The following sections explain how FXUA interprets and defines faculty-to-student interaction, and what it means by regular and substantive.

6.5.4.1 Expectations of Faculty Interactions and Responsiveness

Responsiveness means that faculty provide follow-up and clarification to students when challenges or questions arise. Common situations calling for responsiveness include questions from students, comments that reveal a struggle to understand the course content, and inappropriate actions or messages that call for intervention.

Being responsive does not mean providing one student with an advantage over the rest of the class. Rather, it means clarifying and communicating effectively with all students enrolled in the class. Regardless of the modality, faculty have the responsibility to teach, coach, guide, inspire, and be available to their students regularly. Faculty define course content, assign deadlines for the courses, and foster regular communication between students. In doing so, they facilitate and define the timelines for all course activities including, but not limited to, course assignments, synchronous learning activities, asynchronous activities, and out-of-class activities. Thus, faculty are required to define and follow their specified sequencing and timelines for the courses both in and out of class.

6.5.4.2 Regular Presence

Adults learn most effectively when they feel supported and in an atmosphere of mutual respect, collaboration, openness, and trust (Simonson, Smaldino, Albright, & Zvacek, 2009, pp. 48–49). FXUA faculty are expected to establish, foster, and ensure a continuing environment where students feel that they can contribute in a meaningful way. This is essential to ensuring that students and faculty are able to actively and meaningfully participate in enriching discussions and learning activities. Such responsiveness is particularly necessary where there is more limited face-to-face interaction. This includes meaningful and detailed feedback on student work, responding to questions/discussion board postings timely and meaningfully, facilitating discussions among students, and providing meaningful learning opportunities.

Faculty are expected to demonstrate presence regardless of the modality of instruction. This presence demonstrates that they are engaged in substantive interactions that further learning. By providing students accurate and helpful responses to inquiries, and by reaching out and being available to students frequently, faculty allow learners to demonstrate their mastery of learning objectives.

6.5.4.3 Meaningful and Academic

Interactions are expected to support or enhance the learning experience, and these interactions must be academic in nature. Faculty also ensure that substantive and meaningful interaction is provided in each course.

6.5.4.4 Faculty Office Hours

Faculty define office hours on the course syllabus that they are available to students outside of class time. Faculty are available for academic or course advising outside of a course's regularly scheduled class hours throughout the semester.

6.5.4.5 Appropriateness and Qualifications of Faculty

All courses are facilitated by qualified individuals who meet at least the minimum requirements based upon any accreditation, state, or federal requirements. These individuals are subject matter experts who have the ability to engage in meaningful interactions.

6.5.5 Academic Writing Style

FXUA subscribes to the American Psychological Association's (APA) formatting requirements across all programs and disciplines at the university. The American Psychological Association (APA) has a publication manual that outlines specific formats and styles to use when submitting a manuscript for publication to APA. The Publication Manual of the American Psychological Association (commonly referred to as the APA manual) is the source for all things related to formatting and style according to the American Psychological Association. APA is commonly used in the social sciences as a means of standardizing communication and formatting.

The APA style guide defines standards for writing and documenting, and provides consistency for format and style. The APA manual gives guidelines for many aspects of writing and researching, including some of the following:

- Documenting sources
- Ethically research
- Write properly
- Presentation of ideas

6.5.6 Assignment Submission Guidelines:

All written assignments should be typed and utilize APA 6th Edition guidelines for citations and formatting. All assignments must minimally include the following:

- A title page with the following information:
 - Title of assignment
 - Student first and last name
 - Email
 - Program of study
 - Course number and name
 - Professor name
 - Submission date (month/day/year)
- Running head
- Page numbers
- References (as applicable)

6.5.6.1 On-time Submission of Work

Students must submit all assignments by the due date unless prior arrangements are made with the instructor. If a student submits their work after the due date without the instructor's approval, a minimum of 5% of the grade will be deducted for each week the assignment is late. Any exceptions to the late work policy are at the instructor's discretion on a case-by-case basis. Students may present to the instructor for consideration documented evidence of an emergency that prevented prior communication.

6.5.6.2 Submissions of Electronic Work

All assignments must be submitted electronically via the learning management system (LMS). Only on rare exceptions would a physical submission be the most educationally appropriate submission format. If so, faculty must consult with their department chair and/or school head prior to finalizing their course syllabus for special exemptions.

6.5.6.3 Plagiarism Detection Resources

Academic integrity is essential in the learning process, and in order to provide a measure of compliance with the academic integrity policy, students are expected to demonstrate high moral and ethical standards in regard to their work. As such, faculty are recommended to use TurnItIn as a learning tool for all written assignments submitted electronically. TurnItIn should be used and viewed as a tool for personal monitoring of one's own academic integrity. Students should be proactive with their use of TurnItIn and consider checking all assignments and discussion postings prior to submitting them to the official submission locations.

In some courses, instructors may require students to submit an assignment more than once (i.e., students receive feedback on a draft and then resubmit a revised version). For assignments that require resubmission, the draft document will generally not be submitted to the TurnItIn database; however, they will be checked against existing information in the database. Only final submissions will be submitted to the database.

6.5.7 Use of Campus Educational Resources

Students who struggle with course content should contact their instructor for additional support. This could include meeting with a faculty member in person, via electronic meetings, and/or via email. Faculty want students to be successful, and students should take advantage of the support offered by the faculty.

It is the expectation of the faculty that students who need additional support beyond the course content take advantage of the full range of free educational support services. FXUA has a variety of service departments that aim to support students to be successful. These include, but are not limited to, the Library and the WRMC.

6.6 Non-Academic Misconduct

By enrolling in the university, the student recognizes that the following types of behavior are prohibited and that being found guilty of engaging in them can serve as grounds for certain sanctions, including expulsion or the involvement of the local police department:

- **Illegal activities:** Violation of any federal, state, and local laws and any published or decreed university policies will be reported to the proper authorities.
- **Copyright infringement:** Most printed materials, photographs, motion pictures, sound recordings, and computer software are protected by copyright. Copyrighted works may not be reproduced, distributed, performed, or adapted by students without the copyright owner's permission. For more information, please see the Copyright & Fair Use Policies for Software & Other Materials section in this Catalog.
- **Computer misuse:** Some software products are protected by copyright laws. Students may not copy the institution's software without permission of the copyright holder. Additionally, students may not place personal

software on the institution's computers or damage or destroy either software or computers. For more information, please see the Copyright & Fair Use Policies for Software & Other Materials section in this Catalog.

- **Drug use:** The manufacture, sale, dispensation, possession, or use of any controlled substances or illegal drug paraphernalia on university premises or at university sponsored events is considered an illegal activity and is prohibited on all university property. For more information, please see the Drug and Alcohol Policy.
- **Alcohol consumption:** The use, possession, or sale of any alcoholic beverage, regardless of its potency or lack thereof, is prohibited on all university property. For more information, please see the Drug and Alcohol Policy.
- **Firearms possession:** The use, possession, or sale of firearms or other weapons or any dangerous explosives or explosive elements or component parts on university property is strictly prohibited. For more information, please see the Weapons Policy.
- **Physical and psychological abuse:** Any form of physical and/or psychological abuse, threat, or harassment of another person or fighting on university property will result in sanctions. If the abuse is judged severe enough, the local police department may be consulted.
- **Property damage:** Littering, defacing, destroying, stealing, or damaging university property (or attempting to do so), initiation thereof, or causing such damage to be initiated is prohibited. Any false report, warning or threat of fire, explosion, or other emergency under the University's jurisdiction is also prohibited.
- **Gambling:** Gambling or holding a raffle or lottery at the university without proper approval is forbidden.
- **Obscene language or conduct:** Use of profanity and disorderly or obscene conduct is strictly prohibited.

Students are expected to familiarize themselves with the university's policies on the following activities: unauthorized entry or presence in any university building or facility; solicitation and sales; smoking; sexual harassment & misconduct; physical or psychological assault/abuse of others; and unauthorized or disorderly assemblies that hamper the effective functioning of the university, its students, staff, and visitors, and its daily routine operations.

The university does not excuse any violation of its policies on the basis that the student was not aware of these policies and their subsequent penalties and sanctions. The university reserves the right to expel any student for illegal activity and/or for any action outlined above.

- **Sexual Violence:** A "physical sexual act perpetrated against a person's will or against a person incapable of giving consent."
- **Disruptive Classroom Behavior:** In general, classroom management is the responsibility of the instructor. The learning environment of the entire class should not be jeopardized for the sake of a single student or group of students. Inappropriate classroom behavior may include, but is not limited to:
 1. Disruption of the classroom atmosphere;
 2. Engaging in non-class activities, for instance, talking to another student, talking on a cell phone, or working on an assignment for another class;
 3. Use of profanity in classroom discussion; or
 4. Use of abusive or disrespectful language toward the instructor or a student in the class, or about other individuals or groups.

Instructors have the right to dismiss a student temporarily from class when the student's behavior distracts or disrupts the other students' learning.

6.6.1 Documentation of Non-Academic Misconduct

While all prohibited behaviors should be refrained from by all members of the learning community, some prohibited behaviors represent more egregious actions than others. Such egregious activities represent significant departures from the values and philosophy of the university and require formal and more permanent actions that highlight this violation. These egregious violations require the formation of an Institutional Grievance Panel, unless governed by a pre-established body under another section of the Academic Catalog. The Office of Institutional Effectiveness will communicate to the student regarding the results of the Panel and will inform the student that documentation will be made on the transcript.

6.6.2 Non-Academic Misconduct Requiring Documentation

When the university formally deems an action to be of an egregious nature, specific notation is made on the transcript highlighting the misconduct. The notation would include the following statement, "[Suspended, Dismissed, or Withdrew while under investigation] for a violation of [insert name of institution's code, rules, or set of standards]."

The following forms of non-academic misconduct that require documentation on the transcript.

6.6.2.1 Acts of Sexual Violence

Section § 23.1-900 of Virginia Code requires that notation of suspension, permanent dismissal, or withdrawal from the institution while under investigation because of an act of sexual violence to be documented on the transcript.

6.6.3 Removal of Notations of Non-Academic Misconduct

Notations of non-academic misconduct can be removed under the following circumstances:

- **Completion of any formal non-academic conduct probation:** A student who may be placed on a formal non-academic probation, and successfully completes those requirements pursuant to the parameters of the probation and has been deemed to be in good standing.
- **Completion of a formal suspension:** A student completes a formal suspension and has completed all conditions of that suspension and has been deemed to be in good standing.
- **Absolution of the offense:** If a student who has been accused of non-academic misconduct is found to have been absolved of the misconduct or to have subsequently been found to not have committed the.

6.7 Civil Rights and Sexual Harassment

FXUA does not, and will not tolerate sexual harassment of students, faculty, and/or staff. This policy is part of the university's effort to maintain a learning and working environment free from sexual harassment, exploitation, or intimidation. Violating this policy will subject individuals to disciplinary actions, up to and including dismissal for employees and students. Sexual harassment is a form of sex discrimination that is illegal under Title VII of the Civil Rights Act of 1964 for employees and under Title IX of the Education Amendments of 1972 for students. In keeping with the guidelines provided by the US Equal Employment Opportunity Commission on sexual harassment in employment, FXUA defines *sexual harassment* as unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature directed at an individual, or action taken in retaliation for reporting such behavior, regardless of where such conduct may occur. Sexual harassment is deemed to have occurred when:

1. Submission to the conduct is either explicitly or implicitly a term or condition of an individual's employment or academic performance;
 2. Submission to or rejection of such conduct by an individual is used as the basis for employment decisions, including, but not limited to, promotion, transfer, selection for training or performance evaluation, or used as the basis for academic evaluation;
 3. The conduct has the purpose or effect of unreasonably interfering with an affected employee's work performance or an affected student's academic performance or participation in educational pursuits; or
 4. The conduct has the purpose or effect of creating an intimidating, hostile, or offensive work or study environment.
- Sexual harassment is a serious offense. Consequently, any faculty or staff member who engages in such conduct or encourages such behavior by others shall be subject to disciplinary action that may include dismissal. A student who engages or assists in such conduct shall be subject to disciplinary measures, including reprimands, suspensions, or termination to remedy violations of this policy. Students accused of sexual harassment will have the right to a fair due process hearing.

6.8 Title IX Compliance

In compliance with the Title IX 20 U.S.C. § 1681(a), no person shall, on the basis of sex, be excluded from participation in, be denied benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance. Furthermore, sexual harassment and violence are strictly prohibited at Fairfax University of America.

Any victims or third parties should report all incidents of sex discrimination, sexual harassment, or sexual violence to the Title IX Coordinators, at the below contact information:

Title IX & Clery Act Compliance Coordinator

Name: Amy Buras
Title: Learning Resource Center Manager
Office Address: 4401 Village Drive, Fairfax, VA 22030
Telephone: (703) 591-7042 Ext. 314
Email: aburas@fxua.edu

Deputy Title IX Coordinator

Name: George Rado
Title: Accreditation and Regulatory Compliance Coordinator
Office Address: 4401 Village Drive, Fairfax, VA 22030
Telephone: (703) 865-8784
Email: grado@fxua.edu

Deputy Title IX Coordinator

Name: NS Hasan

Title: Executive Dean for Academic Programs/Administration

Office Address: 4401 Village Drive, Fairfax, VA 22030

Telephone: (703) 865-6420

Email: nshasan@fxua.edu

<mailto:nshasan@gmail.com> <mailto:grado@fxua.edu>

A general email has been set up to assist with reporting any potential Title IX violations: titleix@fxua.edu.

In accordance with federal law, all victims and third parties have the option of reporting incidents by email, phone, mail, or in person to the Title IX Coordinator. All victims have the right to report to police, the university will facilitate that process if desired by the victim. Victims also have the right not to report to police.

All incidents of sex discrimination, sexual harassment, or sexual violence will be investigated promptly in order to remedy any hostile educational environment created by such behaviors. Investigations may include the assistance of police, which may delay the response of Fairfax University of America to accommodate a police investigation. If the case requires police investigation, Fairfax University of America will delay their response to the case a maximum of 10 days in order to give appropriate time for police to gather evidence. If Fairfax University of America must delay its response, all parties will be informed of the delay and given an approximate timeline for when the response will resume. Institutional investigations will take no more than 60 days, except in the instance of a complex case, which will be addressed within a reasonable period of time given the circumstances.

Employees and third-party reports are protected, along with reporting victims from any adverse consequence, harassment, intimidation, or discrimination that is causally related to reporting sex discrimination under Title IX.

The university provides its annual security reports here: <https://www.fxua.edu/our-university/about-fxua/institutional-effectiveness/safety-planning/>

6.9 Americans with Disabilities (ADA) Policy

Fairfax University of America is a diverse community that provides equal opportunity in employment, activities, and its academic programs. The University does not discriminate on the basis of race, color, religion, gender, ethnic or national origin, disability, age, marital status, veteran status, membership in uniformed services, gender identity, or sexual orientation in the administration of any of its education policies, admission policies, scholarship and loan programs, and other school-administered policies and programs, or in its employment related policies and practices. Fairfax University of America is firmly committed to adhere to all federal and state equal opportunity and civil rights laws, including but not limited to Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, and the Americans with Disabilities Act (ADA) of 1990, and their implementing regulations. For more information, please see the Title IX Compliance section.

In accordance with Title III of the Americans with Disabilities Act, Section 506, Fairfax University of America is committed to ensuring that all of its facilities and programs are accessible to all persons. Students or prospective students who believe that they may qualify for course adaptations or accommodations in accordance with ADA, Section 506, are responsible for contacting the Office of Student Experience for an accommodation approval letter.

Documentation about the particular diagnosis must be provided by a qualified health professional (such as a physician, surgeon, psychiatrist, licensed clinical or educational psychologist, or certified learning disability specialist), and must be currently relevant (less than 3 years old). The assessment of reasonable accommodation is the decision of the university and will be provided to you in a letter of accommodation for the student's instructor each term no later than the second class session.

Office of Student Experience contact information:

Email: studentexperience@fxua.edu

Phone: (703) 591-7042

Location: 4401 Village Dr, Fairfax, VA 22030

6.10 Sexual Misconduct Policy and Notice of Non-Discrimination

Fairfax University of America does not discriminate on the basis of sex in its education programs or activities. Prohibited Conduct under the Sexual Misconduct Policy constitutes sex discrimination prohibited by Title IX of the Education Amendments of 1972 (Title IX), sections of the Violence Against Women Reauthorization Act (VAWA), Title VII of the Civil

Rights Act of 1964 (Title VII), the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (Clery Act), and the Virginia Human Rights Act.

Title IX prohibits sex discrimination in all aspects of university activities and programs. This means that students are entitled to an environment that is free from sex discrimination. Both men and women can be victims of sex discrimination, and sex discrimination can occur between members of the same or opposite sex.

Individuals who have been found to have violated this policy will face disciplinary action, up to and including expulsion. It is the responsibility of every member of the community to create and foster an environment free from sex discrimination. As such, all members of the community are encouraged to take reasonable actions to stop or prevent an act of sex discrimination. Anyone who takes such actions will receive the support of FXUA.

Fairfax University of America (FXUA or the University) is committed to maintaining a safe educational and work environment in which no member of the community is, on the basis of sex, gender, sexual orientation, or gender identity, excluded from participation in, denied the benefits of, or subjected to discrimination in any program or activity.

The Sexual Misconduct Policy applies to any form of sexual or gender-based discrimination, which includes, but is not limited to, sexual assault, domestic violence, dating violence, stalking, and harassment.

FXUA provides ongoing prevention, awareness, and training programs for employees and students in an effort to:

- To eliminate, prevent, and address sex discrimination and its effects;
- Encourage reporting;
- Make available timely services for those affected by Prohibited Conduct; and
- To provide the prompt and equitable investigation and resolution of Prohibited Conduct cases.

Any question regarding the interpretation and application of this policy shall be referred to the Title IX Coordinator. The Title IX Coordinator may designate a Title IX Deputy Coordinator to serve as the Title IX Coordinator for any procedures outlined in this policy. For more information, please see the Sexual Misconduct Policy available at <https://www.fxua.edu/our-university/about-fxua/institutional-effectiveness/title-ix-at-fxua/sexual-misconduct-policy/>.

6.11 Drug and Alcohol Policy

FXUA is committed to providing an environment free of alcohol and drug abuse in compliance with the Drug-Free Schools and Communities Act and the Higher Education Act of 1965.

Fairfax University of America does not condone the illegal or otherwise irresponsible use of alcohol and other drugs. It is the responsibility of every member of the community to know the risks associated with substance use and abuse. This responsibility obligates students and employees to know all relevant FXUA policies, and federal, state, and local laws and to conduct themselves in accordance with those laws and policies. To ensure the availability of this information, the University publishes the following information regarding FXUA policies and sanctions; laws and penalties associated with substance use and abuse; health and behavioral risks of drug use; and resources for treatment and educational programming. The dissemination of this information is in support of the Drug-Free Schools and Communities Act and the Clery Act.

6.11.1 Alcohol Policy

FXUA hopes the Alcohol Policy will encourage students and employees to make responsible decisions regarding the consumption of alcoholic beverages. As such, FXUA is a dry campus and expressly prohibits the sale, consumption, or use of alcoholic beverages on any FXUA property.

All members of the community are expected to know and act in accordance with Virginia laws concerning the purchase, possession, consumption, sale, and storage of alcoholic beverages. However, ignorance of the law is not a viable defense. Thus, the community is reminded of the following:

- Any sale of an alcoholic beverage requires an ABC license.
- Alcoholic beverages are not to be given or sold to persons who are under the legal drinking age, which is 21 years of age.
- Alcoholic beverages are not to be given to persons who are intoxicated.
- State law prohibits drinking in unlicensed public places; public intoxication; possession of an alcoholic beverage by someone under the legal drinking age; falsely representing one's age for the purpose of procuring alcohol; and purchasing an alcoholic beverage for a person who is under the legal drinking age.
- Violations of state alcohol laws are criminal misdemeanors punishable by fines up to \$2,500, imprisonment up to 12 months, and suspension of a driver's license.
- The use of alcoholic beverages as a prize in a contest, drawing, lottery, etc., is prohibited.
- The use of alcoholic games (e.g., quarters, drink-offs, beer-pong, etc.) is prohibited.
- FXUA recognizes the value of group-sponsored social events that take place off-campus. FXUA acknowledges that some of these group-sponsored events that take place off-campus may be at establishments that serve alcohol.

FXUA does not prohibit the consumption of alcohol at these events. However, groups or individual group members may be held accountable for the underage possession or consumption of alcohol, and unsafe or irresponsible behavior that occurs during a group-sponsored event.

Unsafe behavior includes, but is not limited to, consuming alcohol through beer bongs, participating or facilitating drinking games, or consuming an excessive quantity of alcohol in a short amount of time. Irresponsible behavior includes, but is not limited to, the use or attempted use of fraudulent identification to obtain alcohol or making alcohol available to underage persons.

- FXUA funds may not be used to purchase or obtain alcohol.
- Members of the FXUA community, and their invited guests, who reside in property leased by FXUA and who are lawfully permitted to purchase, possess, and consume alcohol, may do so in the residence. Any member of the University community who violates state alcohol laws is subject to disciplinary action. Whether or not criminal charges are brought, all students are subject to disciplinary action for any violation of state alcohol laws that occurs:
 - On university-owned, controlled, or leased property;
 - At university sponsored functions; or
 - Under other circumstances involving a direct and substantial connection to the University.

Any student found to have engaged in such conduct is subject to the entire range of sanctions, including suspension and expulsion.

Students and recognized student organizations are always expected to conduct themselves in accordance with the laws of the Commonwealth of Virginia and to assume full responsibility for their activities and events.

6.11.2 Drug Policy

The unauthorized manufacture, sale, distribution, and possession of “controlled substances” (illegal drugs), including marijuana, cocaine, heroin, and LSD, are prohibited by both state and federal law and are punishable by severe penalties. FXUA does not tolerate or condone such conduct.

Any member of the University community who violates state or federal drug laws is subject to disciplinary action. Whether or not criminal charges are brought, all students are subject to disciplinary action for any violation of state or federal laws that occurs:

- On university-owned, controlled, or leased property;
- At university sponsored functions; or
- Under other circumstances involving a direct and substantial connection to the University.

Any student found to have engaged in such conduct is subject to the entire range of sanctions, including suspension and expulsion. Students and employees who are found to be in violation of state or federal drug laws may be referred to the appropriate authorities for criminal prosecution.

6.11.3 Health and Behavioral Risks

The negative physical and mental effects of the use of alcohol and other drugs are well documented. Use of these drugs may cause blackouts, poisoning, and overdose; physical and psychological dependence; damage to vital organs such as the brain, heart, and liver; inability to learn and remember information; and psychological problems including depression, psychosis, and severe anxiety. Other risks include impaired judgment and coordination, which can lead to DUI/DWI arrests; hazing; falls, drowning, and other injuries; contracting sexually transmitted diseases including AIDS; and unwanted or unplanned sexual experiences and pregnancy.

The substance abuse of family members and friends may also be of concern to students and employees. Patterns of risk-taking behavior and dependency not only interfere in the lives of the abuser but can also have a negative impact on the affected students' academic work, emotional well-being, and adjustment to college life.

Students struggling with an addiction can contact the Student Experience department for referrals to outside counseling and support services: studentexperience@fxua.edu.

Substance Abuse and Mental Health Services' Treatment Referral Routing Service provides referrals to local treatment facilities, support groups, and community-based organizations. Callers can also order free publications and other information. It is a confidential, free, 24/7/365 information service: 1-800-662-4357

- Online treatment locators: <https://findtreatment.samhsa.gov/>
- Helpline website: <https://www.samhsa.gov/find-help/national-helpline>
- Organization website: <https://www.samhsa.gov/>

6.11.4 Federal and Commonwealth of Virginia Penalties

Federal and Virginia law penalizes the unlawful manufacturing, distribution, use, and possession of controlled substances, including prescription drugs. Synthetic designer drugs such as “bath salts,” “plant food,” and “carpet cleaner” contain mixtures of many different chemicals, including those that resemble cocaine, methamphetamine, and MDMA or “ecstasy.” Federal law makes the distribution of “analogue” substances marketed for human consumption illegal if those substances are chemically similar to a scheduled illegal drug and have the same pharmacological effect on a user.

Federal law sets penalties for first offenses ranging from less than one year to life imprisonment and/or fines up to \$10 million. Penalties may include forfeiture of property, including vehicles used to possess, transport, or conceal a controlled substance, and the denial of professional licenses or federal benefits, such as student loans. The punishment for the possession and/or distribution of a controlled substance analogue is up to twenty years in prison and a fine of up to \$1 million.

Convictions under Virginia law may be misdemeanor or felony crimes with sanctions ranging from probation to life imprisonment and/or fines of up to \$1 million. Virginia law specifically prohibits the sale, gift, distribution, and possession of synthetic cannabinoids, which carry penalties as a Class 6 felony.

Federal law holds that any person, who distributes, possesses with intent to distribute, or manufactures a controlled substance in, or within one thousand feet of an educational facility is subject to a doubling of the applicable maximum punishments and fines. A similar Virginia law carries sanctions of between one to five years imprisonment and up to a \$100,000 fine for similar violations.

6.11.5 Limited Amnesty

Fairfax University of America encourages the reporting of all potential violations of Prohibited Conduct under the Sexual Misconduct Policy. FXUA does not condone underage alcohol consumption or the use of illegal drugs. However, because it is of the utmost importance for FXUA to protect the well-being of its students and employees, FXUA may extend limited amnesty from disciplinary action for the illegal consumption of alcohol or illegal drug use by victims, witnesses, and those reporting incidents or assisting victims of Prohibited Conduct. These individuals must have acted in good faith, and any such violation must not have placed the health or safety of any other person(s) at risk.

The Title IX Coordinator and the President, or their designees, will determine if amnesty will be applied and to what extent. Alcohol and drug amnesty is intended to encourage students and employees to seek assistance for themselves and others by reducing the fear of facing FXUA’s Students Rights & Responsibilities Policy/Employee Handbook Policies for such conduct. It is an attempt to remove barriers that may prevent an individual from reporting, seeking medical assistance, or other assistance.

6.12 Non-Smoking Policy

Smoking is not permitted within facilities owned or leased by FXUA or in university-owned vehicles. Smoking is not permitted within 50 feet of any university facility.

6.13 Weapons Policy

The use, possession, or sale of firearms, other weapons, or any dangerous explosives or explosive elements or component parts on university property is strictly prohibited. Weapons are defined as, but not limited to:

1. Any gun, bow, crossbow, or other weapon designed or intended to propel a missile or projectile of any kind, including any pistol, revolver, rifle, musket, long gun, or other weapon designed or intended to propel a missile of any kind by action of an explosion of any combustible material; or any object similar in appearance whether capable of being fired or not, in such a manner as to induce fear in the mind of a reasonable person;
2. Any stun weapon, including any device that emits a momentary or pulsed output, which is electrical, audible, optical, or electromagnetic in nature and is designed to temporarily incapacitate a person;
3. Any knife, including but not limited to any dirk, bowie knife, switchblade knife, ballistic knife, machete, sword, saber, or razor, except a pocket knife having a folding metal blade less than three inches;
4. Any slingshot, spring stick, metal knucks, or blackjack;
5. Any flailing instrument consisting of one or more rigid parts connected in such a manner as to allow them to swing freely, which may be known as a nun chahka, nun chuck, nunchaku, shuriken, or fighting chain;
6. Any disc, of any configuration, having at least two points or pointed blades which is designed to be thrown or propelled and which may be known as a throwing star or oriental dart;
7. Any frame, receiver, muffler, silencer, missile, projectile, or ammunition designed for use with a dangerous weapon, including any cartridge, pellet, ball, missile, or projectile adapted for use in a firearm;
8. Any explosive substance or explosive device, if such substance or device is intended to be used as a weapon that causes but is not limited to bodily harm of another person; any person who constructs, uses, places, sends, or causes

to be sent any hoax explosive device so as to intentionally cause another person to believe that such device is a bomb or explosive;

9. Any tear gas, mustard gas, phosgene gas, or other noxious or nauseating gases or mixtures of chemicals designed to, and capable of, producing vile or injurious or nauseating odors or gases, if such gas or chemical is intended to be used as a weapon to cause bodily injury to another person(s).

No student, faculty, staff, visitor, or affiliate shall carry, possess, maintain, or conceal weapons on any property owned or controlled by Fairfax University of America. This includes concealed handgun carry permits. Any on-campus security officers have been contracted by the university and are permitted to carry weapons on property owned by Fairfax University of America.

6.14 Copyright & Fair Use Policies

FXUA, its students, faculty, and employees must comply with the provisions of the United States Copyright Act (Title 17 of the United States Code). Copyright is the right of the creator of a work of authorship to control the use of that work by others. Copyrighted work may not be reproduced distributed, performed, or adapted by others without the copyright owner's permission. Unauthorized distribution of copyrighted material, including unauthorized peer-to-peer file sharing, may subject them to civil and criminal liabilities. Works protected by copyright include, but are not limited to literary, musical, and pictorial works; sound recordings, motion pictures, and other audiovisual works; and computer software.

FXUA employees shall use computer software only in accordance with the terms of the Computer Software Policy and the licensing agreement for the software. The University does not condone or support the use of any unauthorized copies of software. All software used by University employees to perform their responsibilities shall be purchased through appropriate procedures.

Copyright infringement is the act of exercising, without permission or legal authority, one or more of the exclusive rights granted to the copyright owner under section 106 of the Copyright Act (Title 17 of the United States Code). These rights include the right to reproduce or distribute a copyrighted work. In the file-sharing context, downloading or uploading substantial parts of a copyrighted work without authority constitutes an infringement. Penalties for copyright infringement include civil and criminal penalties. In general, anyone found liable for civil copyright infringement may be ordered to pay either actual damages or "statutory" damages affixed at not less than \$750 and not more than \$30,000 per work infringed. For "willful" infringement, a court may award up to \$150,000 per work infringed. A court can, in its discretion, also assess costs and attorneys' fees. For details, see Title 17, United States Code, Sections 504, 505. Willful copyright infringement can also result in criminal penalties, including imprisonment of up to five years and fines of up to \$250,000 per offense. For more information, please see the website of the U.S. Copyright Office at <http://www.copyright.gov/>, especially their FAQ's at www.copyright.gov/help/faq.

There are some exceptions in United States copyright law, such as the fair use doctrine. The fair use doctrine allows limited use of copyrighted material without the permission of the copyright owner for several purposes, including teaching and scholarship. It is the responsibility of each student, faculty, and staff to inform oneself about what is and what is not permissible use of copyrighted material. Copyright and fair use guidelines for students, faculty, and staff can be found on the Library website and are posted in the Library as well as on all photocopy machines at the university. For additional assistance with copyright and fair use issues, please consult the Librarians.

Violations of the copyright and fair use policies will be dealt with in the same manner as violations of other university policies and may result in disciplinary review. In such a review, the full range of disciplinary sanctions is available, including the loss of computer use privileges, dismissal from the University, and legal action.

6.15 Educational Records

In compliance with Public Law 93-380, "The Family Educational Rights and Privacy Act" (FERPA), Section 438 of the General Education Provision Act, FXUA has adopted policies and procedures that permit students the opportunity to view their educational records upon request. Educational records are those records, files, documents, and other materials that contain information directly related to a student.

6.15.1 Definition of Student Records

A student file (electronic file in the university's file server for the students who initiated a program in Spring 2012 or physical file for the students who enrolled prior to Spring 2012) is maintained by the Registrar's and Admissions Offices, which includes the following student information:

- Enrollment Agreement Form at the time of initial enrollment for each program, which includes the enrollment contract and other information relating to the payment for educational services
- Passport copy or ID card that indicates the student's name

- Permanent (home) and/or local addresses
- Admission-related documents, as well as an acceptance letter issued by the university
- Copy of diploma/certificate
- Copy of transcript which shows the graduation date and the degree/certificate obtained at FXUA
- Record of warning, probation, dismissal, or termination, if applicable

These additional records are kept in a student file when applicable:

- Copy of I-20 for F-1 visa students
- Copy of non-immigrant visa for foreign students
- Veterans Administration records for veterans

FXUA has the right to keep all documents that a student submits to the university.

6.15.2 Academic Record Retention Policy

All student academic records, including transcripts, are required to be maintained by the Registrar's Office. The student files are kept for a specific duration as follows:

- Minimum 10 years following a student's graduation from FXUA
- Minimum 10 years following a student's withdrawal from FXUA (including those who transferred out, those terminated by SEVIS, and unauthorized withdrawal cases)

The following records are kept in electronic format in the university database permanently in accordance with the guidelines published by the State Council for Higher Education of Virginia (SCHEV).

- Transcripts showing the name of the student, the program title, the semesters enrolled, and grades and credit hours
- Grades
- Enrollment Dates
- Course descriptions

In addition to the regulations defined by the Commonwealth of Virginia, FXUA maintains the following academic records:

- **Course Syllabi:** While students are responsible for maintaining their own syllabi, the educational units/departments also maintain course syllabi for the current academic year. Students may be able to contact their previous instructors for older versions of the syllabus.
- **Submitted Coursework:** While students are expected to maintain a copy of their own submitted work, assignments that are submitted into the learning management system will be maintained electronically for at least the current academic year.
- **Theses or Dissertations:** Permanently maintained by the university in the Library.

All admission-related documents and records for applicants who do not enroll in the university are maintained by the Admissions Office electronically in the student file server for the period of time mentioned below:

- 5 years following the applied semester or session
- 5 years following the denial of a student's visa request and a completed refund, if applicable
- Incomplete application files will be kept for 2 years

6.16 Federal Education Rights and Privacy Act (FERPA)

The Family Educational Rights and Privacy Act (FERPA) is also known as the "*Buckley Amendment*." FERPA is a federal law enacted in 1974, which enables certain rights of students with respect to their education records. Specifically, it enables students the right to:

1. The right to inspect and review their education records within 45 days of the request
2. The right to request an amendment of education records if the student believes they are inaccurate
3. The right to require FXUA to obtain written consent to disclose personally identifiable information from the student's education records unless an exception applies
4. The right to file a complaint concerning alleged FERPA violations with the Family Policy Compliance Office within the U.S. Department of Education:

U.S. Department of Education
400 Maryland Avenue, SW
Washington, D.C. 20202

6.16.1 Disclosing Educational Records

In general, FXUA does not disclose non-directory information to third parties unless the student has provided consent, the release is to the parent of a dependent student, as required by §23.1-1303.B5 of the Code of Virginia, or the disclosure meets a qualified exception under FERPA.

One such exception is when disclosure is made to **an FXUA School Official with a Legitimate Educational Interest**. FXUA *School Officials* as individuals who engage in the instructional, supervisory, advisory, administrative, governance, public safety, research, and support functions of the University. In addition to any other person or entity conducting institutional services or doing work on behalf of the University. They need not necessarily be paid employees of the University. School officials include (but are not limited to):

- Faculty
- Staff
- Contractors/Consultants
- Volunteers
- Board Members
- Trustees
- Administrators
- Academic partners
- Student workers
- Students functioning in an official University capacity

FXUA defines a Legitimate Educational Interest as the need of a school official to access a student's education records in the course of performing his or her duties for the University.

Students may give written consent to release their protected educational records to a third party by completing a Consent to Release Student Information Form and submitting it to the Registrar's Office. Student can rescind their consent at any time, which will prevent the release of that information from that point going forward.

The institution will not permit access to or release of confidential information from a student's records to any individual or agency without the written consent of the student, except for the following situations:

1. Information may be provided to organizations conducting studies for educational and governmental agencies.
2. Information may be provided to US government agencies as listed in Public Law 93-380 who request information for specific purposes.
3. Information may be provided at the request of any accrediting agencies.
4. Information may be provided to appropriate legal authorities in connection with an emergency.
5. Information may be provided for the purposes of awarding financial aid.
6. Information may be provided in response to legal court orders.

6.16.2 Directory Information:

FERPA authorizes the release of Directory Information without a student's consent. FXUA has defined its Directory Information in accordance with what is allowable under FERPA, and it includes:

- Student Name
- Major Field of Study
- Dates of Attendance/Date of Graduation ("Enrollment Dates")
- Enrollment Status
- Class Level
- Previous Institutions
- Degrees and Awards Received
- Photographs
- Participation in Officially Recognized Activities

6.16.2.1 Limited Directory Information:

Limited directory should only be used for verification purposes, such as to confirm a student's identity over the phone, and in conjunction with a legitimate educational interest.

- Student ID Number
- Date of Birth

FXUA assumes that students who do not request to withhold disclosure of their directory information consent to the release of this information.

6.16.2.2 Withholding Disclosure of Student Information

Currently enrolled students may withhold disclosure of their student information by completing a Prevent Disclosure of Student Information Form and submitting it to the Registrar's Office. Former students may not place a new request for nondisclosure on their education records, however, they may request its removal.

Confidential Hold: Prevents disclosure of all student information. Students who elect this hold must conduct all university business in person with a photo ID or via their official FXUA email address. No student information will be released over the phone. The student's name will not appear in any commencement program.

Confidential status does not convey a right to be anonymous in the classroom or to impede routine classroom communication and interactions. Students with confidential status expect to be identified in the class by name and to have their FXUA email address used for class purposes.

6.16.3 Request to Inspect an Educational Record:

Eligible students are afforded the right to inspect all education records maintained by the University. The following procedures should be followed to allow a student to inspect their record.

- (1) Students must provide a written request indicating what type of education records they want to inspect.
- (2) Students should submit the written request to the Registrar's Office. The Registrar will oversee the inspection process.
- (3) Students will be able to review the requested education records within 45 days of submitting their request.
- (4) The Registrar will contact the student to arrange a day and time for the inspection to take place and supervise the inspection.
- (5) The student will be able to make notes during the inspection but is not permitted to remove any records or documents at the time of the inspection.
- (6) Following the inspection, both Registrar and student will sign a copy of the request to note the date, time, and location the inspection took place. A copy should be retained by the Registrar's Office.

6.16.3.1 Exclusions to FERPA Requests:

The following records are not available for inspection:

- (1) Parents Financial Records
- (2) Records containing information on other students
- (3) Records connected to a denied application
- (4) Confidential letters and/or recommendations to which access has already been waived
- (5) Any other records FERPA excludes from the definition of an educational record

6.16.3.2 Request to Amend an Education Record:

After inspecting their education record, a student may believe a portion of that record contains information that is inaccurate or misleading. Students may request to have that education record amended. The following procedures should be followed to allow a student to request their educational record to be amended:

- (1) Students must provide a written request and indicate what record they are requesting to be amended and why they believe the record is inaccurate or misleading. A separate request must be made for each amendment requested.
- (2) Students must submit the request to the Registrar's Office.
- (3) The review and the decision will take place within 30 days, and the student will be informed in writing no later than the 30th day of the decision.
- (4) If the Registrar has concluded that no amendment will occur, the student may then request a hearing or place a document in the record which explains why they believe the educational record to be wrong or misleading. Requests should be directed to the Registrar's Office.
- (5) If the student requests a hearing, the student will be informed in writing of the date and time of the hearing.

Contact the Registrar's Office at registrar@fxua.edu if you have additional questions.

6.17 Undue Hardship Appeal

While the policies and procedures described in this catalog attempt to provide clear guidance on how to fulfill the requirements of the university, there are instances in which extraordinary circumstances might create a situation that is at odds with the intended spirit of a policy, or in which an undue hardship might make it counterproductive or impossible to follow the normal course of action. In such a situation, an undue hardship appeal may be submitted in writing to the Office of Institutional Effectiveness. In many cases, the written appeal will be used as documentation for the eventual review by the committee as an official record on behalf of the appellant. The appeal must include an explicit acknowledgment that the

policy was not or would not be followed, a detailed explanation of the extraordinary circumstances that led or would lead to the policy not being followed, a well-justified rationale for making an exception under these circumstances, a clear proposal for resolving the problem(s), and a timeline and comprehensive description of actions that will be taken to remedy the situation.

Prior to accepting the hardship appeal, the OIE will review the written appeal and determine if a reasonable relief could be granted and/or whether all other reasonable means have been exhausted prior to requesting the appeal. Appeals to policies that would inequitably or unreasonably affect other students/staff/faculty (past, current, or future), that would provide an undue benefit or advantage over others in an unreasonable manner, that might be viewed as purely situational or providing a temporary change in policy that would not be reasonably offered to others under similar circumstances, or that could lead to questions of the integrity of actions or other institutional artifacts (for example, transcripts, validity of degrees awarded, etc.) would be unlikely to proceed to a panel (a non-exhaustive list of examples might include willful disregard for policies and procedures, neglect or carelessness, appeals that might not live up to the intended spirit of the policy, changes in requirements to graduate, modifying grades simply so a student can graduate, etc.). If reasonable relief is not accepted under the Undue Hardship Appeal process, individuals can escalate their request to the Institutional Grievance Panel. All prior information, including the OIE's justification for the denial of the Undue Hardship Appeal, will be provided to the Institutional Grievance Panel and entered into the official record. The OIE will inform the appellant of the result of the decision and any next steps the appeal might take.

If the OIE deems that reasonable relief should be considered, following the Institutional Grievance Panel policy, the Office of Institutional Effectiveness will form a Panel to consider the matter. Once the Panel has rendered a decision, the submitter will receive an official communication of that decision from the university. There should be no assumption that undue hardship appeals will be approved; however, in light of the university's mission and values, which include promoting personal growth in addition to academic and professional success, submitters can rest assured that undue hardship appeals will be given due consideration.

A variety of factors will be taken into account, including equity for others in similar situations (past, present, or potential future), previous decisions rendered at the university, the intent of the policy's existing provisions, the impact that a deviation in the policy may have on future situations for other similarly positioned students, and the resources and abilities of the university/individuals to fulfill the request in a reasonable manner, among others.

6.18 Institutional Grievance Panel

From time to time, the institution may need to form an ad hoc Institutional Grievance Panel. This Panel is generally formed by the Office of Institutional Effectiveness (OIE) unless otherwise noted by a predefined institutional policy. In instances in which a policy already defines the procedures for formation of a grievance panel or committee, that policy is to be followed.

The OIE serves as an independent office that seeks to understand an issue from all sides, and then provide remediation to the Office of the President, who is the ultimate authority on resolving major issues that arise at the institutional level. To form the Panel, the OIE will choose individuals from diverse units and backgrounds to serve on the Panel. This is intended not only as a potential means of escalation, but also as a way of seeking multiple perspectives and ensuring a fair response to especially serious issues.

Individuals who are not satisfied with the decisions of predefined grievance panels or committees at a lower level (e.g., within a School) can appeal to the OIE for the formation of a higher-level Institutional Grievance Panel. The appeal must contain a justification including, as relevant, a detailed description of any previous decisions rendered on the grievance, especially noting any specific information that was intentionally or unintentionally omitted from the original review and/or additional information that has come to light since the time of the decision from the lower level.

Upon receipt of this written appeal, the Office of Institutional Effectiveness will review the justification and determine whether to form an Institutional Grievance Panel. If so, the Institutional Grievance Panel will conduct a full review, including the new information, and the Head of the Panel will communicate its decision to the appellant. If not (e.g., if the lower-level decision seems unlikely to have been decided differently in light of the new information), the OIE will communicate this back to the individual who submitted the justification. Once the Panel has rendered a decision, the submitter will receive an official communication of that decision from the university. A variety of factors will be taken into account by the Panel, including the student's existing academic conduct on record, equity for others in similar situations, previous decisions rendered at the university, the intent of any policy's existing provisions, and the resources and abilities of the university/individuals to fulfill the request in a reasonable manner, among others.

An Institutional Grievance Panel is generally used as a last resort once all other attempts at a resolution have been exhausted, as defined in the Formal Complaint Procedures. The Panel is intended to be the last step before someone goes beyond the institution to seek a resolution to a complaint, grievance, or serious concern. By submitting a request for review to the Institutional Grievance Panel, you will make a good faith effort to adhere to the decision(s) rendered by the Panel unless there are examples of egregious actions or gross misconduct on behalf of the Panel. In such cases, individuals are encouraged to appeal directly to the Office of the President or extend beyond the university if there are any concerns about impartiality.

6.19 Formal Complaint Procedure

Fairfax University of America is committed to providing a positive educational experience for its students. Faculty and staff attempt to create, in all areas, an atmosphere that is conducive to learning. For this reason, the university has established a procedure to address any school-related problems, concerns, or complaints to ensure that student concerns on academic and non-academic matters are constantly monitored, addressed, and resolved to improve the quality of services.

The life cycle of a complaint is made up of varying stages, wherein the first stage encourages resolutions to address and resolve the issue directly with the source/sources of the issue. The goal is to provide a clear and reasoned process that ensures that matters can be resolved as quickly as possible. If matters are unresolved with the individual(s) involved in the issue, it should be escalated to someone who oversees the individual(s).

Certain complaints will receive immediate attention by the Office of Institutional Effectiveness, and a formal investigation will be launched based on the urgency and sensitive nature of a given complaint. This would include, but is not limited to, issues of harassment or sexual misconduct, issues that demand immediate attention given the nature of the concern, or other activities and actions that are defined by policies already in existence at the university. In such instances, individuals should go directly to stage 3.

- Stage 1: Issue Resolution Process:** University staff and faculty maintain an open-door policy, and students, staff, or faculty may express concerns to any administrator; however, in order to resolve the issue in an expeditious manner, they should be dealt with directly to the individual(s) who are directly involved. If the issue involves a department (as opposed to an individual), it should be brought to an appropriate person in that department for timely resolution. It is advisable that all complaints be documented in writing (for example, via an email or other reproducible format).

If the issue is unresolved with the individual(s) directly involved in the original situation, the issue should be raised to someone immediately above the original individual(s) (for example, a supervisor) in the department. As an example, if a student has a concern about something related to their course, they should consult their instructor directly. If the student is not satisfied with the result, they are permitted to discuss the issue with their Program Chair. If the problem is not resolved at that level, the student should contact the Executive Dean.

- Stage 2: Referral to Appropriate Executive:** If a complaint cannot be resolved at the departmental level, the complaint will be escalated to the next highest level. If the complaint is academic in nature, it would be escalated from the faculty to the dean, and eventually the Executive Dean. A complete list of possible escalation is below:

Department Receiving Complaint	Executive Level Escalation
Academic Affairs	Executive Dean of Academic Programs and Administration
Accounting	Chief Financial Officer
Admissions	Chief Student Experience Officer
Alumni Relations	Chief Student Experience Officer
Business & Property Management	Chief Administrative Officer
Career Services	Chief Student Experience Officer
Financial Aid	Chief Financial Officer
Human Resources	Chief Administrative Officer
Information Technology	Chief Administrative Officer
Inquiry & Communications	Chief Student Experience Officer
Institutional Effectiveness	Director, Institutional Effectiveness
International Student Services	Executive Dean of Academic Programs and Administration
Library	Executive Dean of Academic Programs and Administration
Marketing	Chief Student Experience Officer

Media & Public Relations	Chief Student Experience Officer
Quality Assurance & Compliance	Director, Institutional Effectiveness
Registrar	Executive Dean of Academic Programs and Administration
Student Experience	Chief Student Experience Officer
Writing, Media & Research Center	Executive Dean of Academic Programs and Administration

- **Stage 3: Resolution with the Office of Institutional Effectiveness:** Students have various options to file complaints and suggestions for academic and non-academic matters to the Office of Institutional Effectiveness. For expeditious investigations to be conducted, it is preferable that all complaints/issues be submitted in a manner that allows investigators to know who submitted the complaint/issue. The Office will actively work to maintain the confidentiality of any individual involved in and/or submitting a complaint. If, however, the complainant wishes to remain anonymous, this is also possible. By remaining anonymous, the submitter should understand that such submissions could result in a more limited resolution, and follow-up on the resolution would be unlikely given the nature of anonymous submissions.

There are several options to choose from in order to file a complaint or suggestion.

1. Online Submission: Individuals can submit their request via email to oiie@fxua.edu.
2. Anonymous Online Submission: Individuals can submit their request via the online submission form: <https://www.fxua.edu/our-university/about-fxua/institutional-effectiveness/suggestion-form/>. Unless the submitter provides their name, email, phone number, or other identifiers, the submission will be anonymous.
3. Anonymous on Campus Submission: Suggestion boxes are placed throughout campus and are checked periodically. Individuals can place formal written submissions in one of the boxes.
4. In-Person Submissions: Individuals can visit the Office of Institutional Effectiveness throughout the week to meet with an individual to discuss their issue.

The Office of Institutional Effectiveness staff investigates the complaint, interviews the involved parties, find any related resources, and provides the resolution. The complaint/issue is logged, and resolutions are devised and discussed with relevant departments.

- **Stage 4: Referral to Office of the President:** If the complaint or grievance may not be resolved at any of the previous stages, a referral may be made directly to the Office of the President for resolution. The President and their support staff take the time to listen, hear any grievances, receive any previous written reports or evidence on the background of the issue from the Office of Institutional Effectiveness, and attempt to render a fair and agreeable resolution that is in the best interest of the university and the involved parties.
- **Stage 5: Institutional Grievance Panel:** At any time throughout the complaint process, at the written request of the individual, the Institutional Grievance Panel policy can be requested. As is noted in the policy, an Institutional Grievance Panel is generally used as a last resort and should not be the first attempt at resolving the issue unless under very dire circumstances.
- **Stage 6: Referral to an Outside Organization:** If after following the above-stated procedure, the individual feels that their concerns have not been resolved, they may address these concerns in writing to the following organizations:

State Council for Higher Education for Virginia (SCHEV)
James Monroe Building,
101 N. 14th Street,
Richmond, VA 23219

FXUA ensures that a student will not be subjected to unfair action as a result of initiating a complaint proceeding.

7 ACADEMIC PROGRAMS

7.1 Delivery Method

The university offers all programs in a hybrid synchronous format: some courses are taught on campus (in-residence), while other courses are taught online in real-time. In-residence courses are taught by faculty in person in the classroom, while online courses are live-streamed by faculty remotely. The delivery method of each course (in-residence or online) is determined by the university.

The university uses Canvas as its Learning Management System for both in-residence and online courses.

7.2 Academic Program Listing

FXUA currently offers programs of study across the graduate and undergraduate levels. A breakdown of each program and information related to each is displayed in the table below:

	Program Name	Code	CIP Code [^]	Total Credit Hours	Program Length*	Credential Awarded
1	BS in Business Administration	BSBA	52.0201	120	48 Months	Bachelor's Degree
2	BS in Computer Science	BSCS	11.0701	120	48 Months	Bachelor's Degree
3	Master of Business Administration	MBA	52.0201	36	24 Months	Master's Degree
4	MS in Artificial Intelligence and Machine Learning	MSAIML	11.0102	36	24 Months	Master's Degree
5	MS in Data Analytics	MSDA	11.0701	36	24 Months	Master's Degree
6	MS in Networking and Cybersecurity	MSNCS	11.0701	36	24 Months	Master's Degree
7	MS in Project Management	MSPM	52.0211	36	24 Months	Master's Degree

*Assumes full-time course load

[^]Classification of Instructional Program (CIP) codes provide a cohesive way of classifying programs based upon fields of study. For information on CIP codes, see: <https://nces.ed.gov/ipeds/cipcode>

7.3 Undergraduate Degree Programs

FXUA currently offers undergraduate degree programs in the following areas:

1. Bachelor of Science in Business Administration (BSBA)
2. Bachelor of Science in Computer Science (BSCS)

7.3.1 Undergraduate Degree Program Requirements

An undergraduate baccalaureate degree can be earned by completing the program minimum course requirements of 120 credit hours. All courses, including the General Education Department (GenEd) courses, are three (3) credit hour courses unless otherwise noted. To qualify for a bachelor's degree, students must meet all credit requirements as described below:

1. Students enrolled in any undergraduate degree program must maintain a Cumulative Grade Point Average (cGPA) of at least 2.0 (C) out of 4.0, and a minimum grade of at least 0.7 (D-) out of 4.0, in all courses to remain in good standing and to graduate.
2. The maximum number of credit hours permitted for the completion of any undergraduate degree program is 180 semester credits.
3. The institution places a limit of no more than 50% (60 semester credit hours) of college credits earned at other accredited institutions can be applied to an FXUA degree when transfer credit is accepted.
4. No degree credit is earned by a student for any grade below 0.7 (D-) out of 4.0, received in an undergraduate-level course. However, any grades lower than 0.7 (D-) out of 4.0, will be calculated in the cGPA.
5. The student must have completed a minimum of 120 semester credit hours. The required distribution of these credit hours is shown under the detailed description of each undergraduate degree program.

7.4 Graduate Degree Programs

FXUA currently offers graduate degree programs and graduate certificate programs from the School of Business, and the School of Computer Information Systems:

1. Master of Business Administration (MBA)
2. Master of Science in Artificial Intelligence and Machine Learning (MSAIML)
3. Master of Science in Data Analytics (MSDA)
4. Master of Science in Networking and Cybersecurity (MSNCS)

5. Master of Science in Project Management (MSPM)

7.4.1 Graduate Degree Program Requirements

Graduate degrees are earned by completing a minimum of 36-39 credit hours, or a minimum of 18 credit hours for certificate programs, beyond the prerequisite courses and typically 3 credit hours per course unless otherwise noted. To qualify for a graduate degree, students must meet the requirements below.

1. Students enrolled in the graduate degree program must maintain a Cumulative Grade Point Average (cGPA) of at least 3.0 (B), out of 4.0, and a minimum grade of at least 2.0 (C), out of 4.0, in all courses to qualify for the degree, to remain in good standing, and to graduate.
2. The Maximum Time Frame (MTF) permitted for the completion of any graduate degree program is 54 semester credit hours for 36 credit hour programs, and 58.5 semester credit hours for 39 credit hour programs. The Maximum Time Frame (MTF) permitted for the completion of any graduate certificate program is 27 semester credit hours for 18 credit hour programs.
3. Only graduate level courses may be applied toward the degree. The institution places a limit of no more than 50% (18 semester credit hours) of college credits earned at other accredited institutions can be applied to an FXUA degree when transfer credit is accepted.
4. No degree credit is earned by a graduate student for any grade below 2.0 (C), out of 4.0, received in a graduate level course. However, any grades lower than 2.0 (C), out of 4.0, will be calculated in the cGPA.
5. Credit earned with undergraduate level courses taken as required prerequisite courses by the graduate student will not be counted towards the total credit requirement for degree completion.

7.5 Common Academic Terminology

Some common terms are used across programs. The following provide some definitions and standardized terms used at the university.

7.5.1 Education Levels

7.5.1.1 Graduate Education

Graduate education includes coursework beyond the bachelor's degree.

FXUA's graduate degree programs provide a high level of professional education beyond the bachelor's degree. They cover a broad range of subjects, thereby qualifying students for diverse career opportunities. For the admission requirements and a list of materials required for admission, refer to the admission requirements for graduate degrees in the Academic Catalog.

7.5.1.1.1 Master's Degrees

A postsecondary degree awarded upon success completion of coursework beyond the bachelor's degree typically equivalent to two-years of full-time collegiate study. Master's degrees can be awarded in the arts (a Master of Arts) or a sciences (Master of Science), as well as within professionally oriented areas (such as a Master of Business Administration, Master of Public Administration, among others). Master's degrees at FXUA generally have between 30-39 credits.

7.5.1.1.2 Graduate Certificate

A graduate certificate, also known as a post-baccalaureate certificate, is coursework taken beyond the bachelor's degree. Generally, graduate certificate programs constitute a minimum of 18 credits taken within a single discipline area.

7.5.1.1.3 Pre-Master's Degrees

Students who have earned their Bachelor's degree with less than 120 undergraduate credit hours can be given conditional admission to select programs, provided they enroll in and successfully complete the remaining credit hours needed to equal 120, by selecting from appropriate undergraduate courses offered at FXUA.

Students must consult their academic advisor before choosing classes. Successful completion of the equivalent of 120 credit hours, will allow students to complete the undergraduate credit requirement and enter the program. While in the "pre-master's" program, the student is designated as such and is considered to be studying at the undergraduate level.

7.5.1.2 Undergraduate Education

Undergraduate education general constitutes coursework done at the postsecondary level (i.e., beyond high school or the equivalent), but less than the graduate level.

7.5.1.2.1 Bachelor's Degrees

A postsecondary degree awarded upon successful completion of baccalaureate programs of study generally consisting of four years of full-time collegiate study. Bachelor's degrees can be awarded in the arts (a Bachelor of Arts) or a sciences (Bachelor of Science) in a given discipline. Bachelor's degrees at FXUA generally constitute a minimum of 120 credit hours.

FXUA's undergraduate degree programs provide a high level of professional education. They cover a broad range of subjects, thereby qualifying students for more diverse job opportunities. For the admission requirements and a list of materials required for admission to the undergraduate degree programs, please refer to the Admission section of the Academic Catalog.

7.5.1.2.2 General Education

General education (GenEd) is comprised of courses at the undergraduate level aimed at helping students to be well-rounded. The General Education program at FXUA consists of coursework from six divisions including Communications, the Arts and Humanities, Social Sciences and Cross Cultural Studies, Mathematical Sciences, Natural Sciences, and Languages. General education courses are distinct from areas of concentration or areas of specialization within the student's chosen field of study.

7.5.2 Course Code Designations and Levels

Course codes within the university range from 0001 to 999 as follows:

- XXXX 0001-0099: Non-degree courses
- XXXX 100-499: Undergraduate level courses, classified by academic subject (alternatively division or area) and level of difficulty.
 - 100-400: General Education Courses*
 - 100-299: Lower Division Courses
 - 300-499: Upper Division Courses
- XXXX 500-999: Graduate level courses, classified by academic subject (alternatively division or area) and level of difficulty.

NOTE: General Education courses may contain course numbers up to 400. While General Education courses are intended to be introductory courses, the number differs from the lower/upper division designations when courses are intended to be progressive in nature.

7.5.3 Area of Concentration

An Area of Concentration is considered to be the "major" for the student. The Area of Concentration is a focused area of study for students aimed at developing mastery of content in the field of study/discipline. Students gain depth and breadth in the content area through the Area of Concentration.

7.5.4 Area of Specialization

An Area of Specialization includes coursework aimed at developing specialized knowledge in a subfield within the discipline. The Area of Specialization provides students with expertise in the discipline in-depth. FXUA defines an area of specialization as requiring a minimum of 18 credit hours at the undergraduate level, and 12 credits at the graduate level.

7.5.5 Master's Thesis

A master's thesis is a culminating, personalized, and distinguishing mark on a Graduate Degree from the university. The thesis is a well-planned, rigorously researched, and professionally written piece of scholarly work that constitutes an original contribution to the discipline and represents a significant step in a student's independent scholarship. Throughout the process, students work closely with a mentor who provides guidance and helps to ensure that students are on-track for completion of their thesis, but also that the product will meet the expectations and standards of research in the field and will be of publishable quality.

While not all programs require a thesis for completion of the degree, those students in programs that do require a thesis must submit a fully developed thesis prior to the conferral of the degree. The burden of responsibility is on the student to complete all requirements of the thesis, including those pertaining to the formatting, caliber of the content, procedures, and deadlines, as outlined in the Thesis Guidelines.

7.5.6 Professional Internships

Depending upon field-specific criteria, programs generally refer to these hands-on opportunities as an internship or a practicum. Because some professions refer to an in-field experience as a "practicum" (generally in education programs

primarily focused on teaching), while others use “internship” (generally for programs in which the internship would be considered direct work experience), the determination of what to call an in-field experience is dependent upon the curriculum as determined by the faculty. While there may be curricular differences between these two terms as defined by the Schools, FXUA views these as the same for administrative purposes.

7.5.7 Microcredentials

At FXUA, microcredentials can fall along multiple possible options including:

- Standalone, non-credit mini-courses (including synchronous online instruction, asynchronous/self-paced courses, or in-person or hybrid models)
- Embedded within an existing course (for which student may be awarded course credit for completion of the MC, including a grade for completion)
- Completion of a certification exam at a recognized professional provider/organization

7.5.8 Transformative Learning and Leadership in Practice (TLLP)

FXUA’s values of character, community, development, stewardship, and peace are at the heart of the curriculum. These values are especially represented in FXUA’s General Education and bachelor’s program content in the Transformative Learning and Leadership in Practice (TLLP) Courses. These courses offer students a formative experience where learners expand their ability to be a positive changemaker in the world.

8 GENERAL EDUCATION

8.1 General Education Mission

The mission of General Education at Fairfax University of America is to prepare students to obtain the necessary skill set to be well prepared for their academic programs; shape their worldview as an individual; foster engagement and motivated creativity; and to simply be able to contribute to the society as an accomplished human being.

8.1.1 General Education

FXUA recognizes the importance of general education as an integral part of a well-rounded baccalaureate degree. General Education is intended to provide an educational foundation of skills and content that will help students to meet educational and institutional learning outcomes and be successful in their academic pursuits as well as beyond graduation, as well as providing a solid foundation for students to serve as leaders and positive social changemakers desperately needed in the world today.

8.1.2 General Education Requirements

In the interest of providing an enriched academic classroom experience for undergraduate students, FXUA has set forth the following regulations on the completion of the General Education component of the bachelor's degree programs.

General Education courses comprise a total of 42 credit hours of any bachelor's degree at Fairfax University of America. General Education provides a clear foundation for all the courses that a student will take throughout the academic program of study and beyond. In the interest of promoting an environment that engenders the intellectual curiosity, critical thinking, and creativity required of well-rounded students, FXUA requires that all students complete the majority of their general education requirement by the time they reach the completion of 76 semester credit hours of study.

8.2 General Education Divisional Outcomes

Arts and Humanities Division

1. Define and express an appreciation of the essential elements of the arts as they relate to societal and cultural values.
2. Express sensitivity and tolerance of cultural differences.
3. Understand differing worldviews in order to be literate in concepts that are behind one's behavior, traditions, daily preferences, and values.

Communications Division

1. Express oneself clearly both orally and in writing in a respectful and academic manner.
2. Develop critical and reflective reading and inquiry skills to synthesize, analyze, and evaluate.
3. Conduct research and organize material effectively.

Mathematical Sciences Division

1. Apply problem solving skills and pattern intelligence skills.
2. Develop analytical reasoning to solve problems.

Natural Sciences Division

1. Apply problem-solving skills and utilize the scientific method.
2. Recognize natural systems and processes in relation to the surrounding world.

Social Sciences and Cross-Cultural Studies Division

1. Interpret human behavior and develop skills to successfully interact with individuals at all levels of society.
2. Critically analyze the organization of society and the role of individuals and groups in the larger society.
3. Demonstrate a basic knowledge of ethical norms to exercise independent judgment and ethical decision-making.

Transformative Learning and Leadership in Practice Division

1. Apply FXUA's values of character, community, development, stewardship, and peace in all aspects of daily life.
2. Critically analyze one's identity and worldview through self-observation and assessment.
3. Demonstrate practices of lifelong learning and conscious being in real-life applications.
4. Define worldviews and values, as well as demonstrate practices, aligned with being a global citizen.
5. Develop one's capabilities for self-fulfillment and social performance throughout career and life.

8.2.1 General Education Requirements

The General Education requirements include the completion of 42 credits (14 courses). Undergraduate students are required to meet the General Education Department requirements consisting of courses across the following divisions: Arts and Humanities (9 credits), Communications (6 credits), Mathematical Sciences (3 credits), Natural Sciences (6 credits), Social Sciences and Cross-Cultural Studies (9 credits), and Transformative Learning and Leadership in Practice (9 credits).

Students can choose among courses within a Division unless otherwise noted by their academic program of study or School. Students should choose courses in consultation with their academic advisor, who will provide suggestions for courses most relevant to the student's academic discipline.

Area	Number of Courses	Credits
Arts and Humanities	3	9
Communications	2	6
Mathematical Sciences	1	3
Natural Sciences	2	6
Social Sciences and Cross-Cultural Studies	3	9

8.2.2 Distribution of Courses

Arts and Humanities Division (3 Courses - 9 Credit Hours)

Code	Course Title	Microcredentials	Prerequisites	Credits
HUMN 101	Introduction to the Arts and Humanities	N/A	None	3
HUMN 105*	Principles of Learning	PR	None	3
HUMN 125*	Foundations of Adult Development	PR, GC, DMPS	None	3
PHIL 102	Philosophy, Living, and Being	N/A	None	3
RLGN 111	World Religions	N/A	None	3

Communications Division (2 Courses - 6 Credit Hours)

Code	Course Title	Microcredentials	Prerequisites	Credits
COMM 111	Oral Communication	N/A	None	3
ENGL 120	Academic Writing	N/A	None	3

Mathematical Sciences Division (1 Course - 3 Credit Hours)

Code	Course Title	Microcredentials	Prerequisites	Credits
MATH 160	Precalculus	N/A	None	3
MATH 165	Calculus I	N/A	None	3

Natural Sciences Division (2 Courses - 6 Credit Hours)

Code	Course Title	Microcredentials	Prerequisites	Credits
------	--------------	------------------	---------------	---------

BIOL 102	Introduction to Biology	N/A	None	3
CHEM 101	General Chemistry	N/A	None	3
GEOL 101	Introduction to Geology	N/A	None	3
PHYS 102	Introduction to Physics	N/A	None	3

Social Sciences and Cross-Cultural Studies Division (3 Courses - 9 Credit Hours)

Code	Course Title	Microcredentials	Prerequisites	Credits
GOVT 121	World Governments	N/A	None	3
GOVT 130	American Society and Politics	N/A	None	3
GEOG 101	World Geography	N/A	None	3
HIST 101	World History	N/A	None	3
INCS 300*	Principles of Global Citizenship	GC	None	3
INCS 325*	Practices of Global Citizenship	GC, SP	None	3
SOCI 101	Sociology	N/A	None	3
PSYC 101	Psychology	N/A	None	3

Transformative Learning and Leadership in Practice Division (3 Courses - 9 Credits)

Code	Course Title	Microcredentials	Prerequisites	Credits
HUMN 150	Practices of Learning	DMPS	None	3
HUMN 200	Discovering a Life of Self-Fulfillment	PR	None	3
TLLP 400	Models of Thinking	DMPS	None	3

*Indicates a required course. This course continues the "Learning to Learn, Learning to Be" approach taken in our Transformative Learning and Leadership in Practice (TLLP) curriculum.

9 SCHOOL OF BUSINESS

9.1 School of Business Mission Statement

The mission of the School of Business is to provide a diverse body of students with the ability to succeed in a global business environment. Through our faculty, the School of Business is committed to helping students to respect, value, and appreciate the wealth of diversity common to the international business community.

9.2 School of Business Learning Outcomes

To achieve the mission of the School, all graduates are expected to achieve the following learning outcomes:

1. Integrate knowledge of business concepts, functions and methodologies to achieve successful business decisions.
2. Recognize and incorporate cultural diversity and promote collaborative enterprise in business decisions.
3. Apply managerial decision making through utilization of best practices in business.
4. Determine the role of leadership in high performing organizations and business entities.

9.3 Bachelor of Science in Business Administration

9.3.1 BSBA Program Mission

In support of the university's mission, the Bachelor of Science in Business Administration (BSBA) program prepares qualified students for leadership positions in the global marketplace. Future leaders will need to balance the goals of economic success with the constraints of greater social and environmental responsibility. Students learn to integrate changing human and information resources with continually developing technology, while nurturing the entrepreneurial spirit that has always been one of the key characteristics to successful businesses.

9.3.2 BSBA Program Outcomes

The Business Administration degree has four specializations: (a) Business Analytics, (b) Social Innovation and Sustainable Business, and (c) Organizational Development and Human Resources, and (d) Business Optimization.

Specifically, BSBA graduates will be able to:

1. Demonstrate effective leadership skills in order to make a positive social impact.
2. Describe the major concepts of the global economy, finance, and accounting and their implications for business decision-making.
3. Analyze business issues using data-driven, evidence-based approaches to solve complex problems.
4. Demonstrate effective communication skills to communicate and disseminate information across diverse sets of stakeholders.
5. Demonstrate ethical business practices in ambiguous or unfamiliar circumstances.

Business Analytics Outcomes

- 6A. Use business analytics to develop models using complex data sets.
- 7A. Implement business analytics results to find solutions to complex business problems.

Social Innovation and Sustainable Business Outcomes

- 6B. Develop sustainable models for organizations that leverage the ethical, organizational, and communal needs.
- 7B. Implement innovative strategies for helping organizations to thrive in uncertain environments.

Organizational Development and Human Resources Outcomes

- 6C. analyze principles of management, organizational behavior, operations management, strategy and policy, international management and entrepreneurship.
- 7C. Implement innovative organizational development strategies to help organizations to transform and sustain their long-term development.

Business Optimization Outcomes

- 6D. Develop and implement plans for organizations to redefine and strategize for lean operations, asset maximizations, quality control, cost minimization, and building institutional efficiencies.
- 7D. Leverage organizational behavior to manage change and limit risks.

9.3.3 Career Paths for Graduates

Students graduating from the BSBA program should be prepared to provide leadership a variety of business settings. The BSBA Program develops the foundation for continuing education and growth in all fields of business and administration. Graduates of the BSBA Program can anticipate jobs in the following types of careers at the entry-level, experienced, and management levels:

- Small Business Owner
 - Management Consultant/Analyst
 - Business Development Officer
 - Business Manager
 - Business Analyst
 - Data Analyst
 - Risk Analyst
 - Market Analyst
 - Human Resource Manager
 - Sustainable Development Officer
 - Financial Officer
 - Financial Advisor
 - Marketing Coordinators
 - Operations Manager
 - Assistant Project Manager

9.3.4 Program Structure

Area	Number of Courses	Credits
General Education Department Courses	14	42
Fundamental Courses	21	60
Specialization	6	18
Total	41	120

9.3.5 Graduation Requirements

Each student is required to submit a project in their final year of study, which includes a portfolio of work that they have completed throughout their time. Students are required to provide a portfolio including the following elements: Part I: Career Preparation, Part II: Senior Project, and Part III: Demonstration of professionally recognized abilities via certifications and microcredentials.

9.3.5.1 Career Preparation

Students are required to submit a resume/CV, lists of professional references, and a professional development plan.

9.3.5.2 Senior Consulting Project

Students complete a project that represents significant work related to the degree and specialization. The exact project is determined in concert with the professor for the course

9.3.5.3 Demonstration of Professional Recognized Abilities

- **Certifications:** Certifications are designed to objectively validate a professional's specialized competency in targeted areas related to the degree. Certifications can be obtained through education or hands-on experience, in addition to an assessment of a specific set of knowledge skills. Students will be able to obtain a number of well-known industrial certificates that help them compete in the job market. The program structure provides suggested periods in which students could sit for an exam, which generally corresponds to the completion of a course or courses related to the content area covered on the certification examination.
- **Microcredentials:** Micro-credentialing is a way to demonstrate that a person has skills or knowledge of a particular domain of information and/or knowledge. This can be achieved from online education, classroom education, or a hybrid model of both. Throughout the program, students can earn credentials by following a prescribed path or by additional coursework beyond their degree.

9.3.6 Associated Microcredentials

The following microcredentials are offered as part of the program:

- Business Development (BD)
- Business Leadership (BL)
- Change and Business Leadership (C&BL)

- Data Visualization with Tableau (DVT)
- Ethical Leadership
- Globalization, Economic Growth, and Sustainability (GE&S)
- Lean Six Sigma (LSS)
- Marketing and Sales Foundations (M&S Foundations)
- Market Positioning and Sales (MP&S)
- Sustainable Business Change Agent (SBCA)
- Value Chain Management (VCM)

9.3.7 Internship Opportunities

Students are eligible to take optional externship courses after successfully completing 90 credits. This enables our students to gain hands-on experience to supplement their classroom learning.

9.3.8 Bachelor of Science in Business Administration Required Courses

Fundamental Courses (21 courses – 60 Credit Hours)

Code	Course Title	Microcredentials		Prerequisite	Credits
		MC	Certification		
ACCT 101	Principles of Accounting	N/A	N/A	None	3

^Can be taken for graduate course credit.

NOTE: Students who wish to take a course that is offered by another specialization may petition to do so to their advisor by providing justification for the relevance of the addition as part of their professional trajectory, their intended consulting project, and/or personal interest. A maximum of 2 courses from other areas can be applied to a specialization.

9.4 Master of Business Administration

In support of the university's mission, the Master of Business Administration (MBA) program prepares qualified students for creative leadership and applied research positions in private and public organizations in the global marketplace. Future leaders and researchers will need to balance the goals of economic success with the constraints of greater social and environmental sustainability and globalization. Graduates learn to integrate core business fundamentals with changing human and information resources and innovative technology while nurturing the entrepreneurial mindset that has always been one of the key characteristics of successful businesses.

9.4.1 MBA Program Outcomes

The Master of Business Administration degree has five specializations: (a) Business Analytics, (b) Social Innovation and Sustainable Business, (c) Organizational Development (d) Human Resources Management, and (e) Business Optimization.

Specifically, MBA graduates will be able to:

1. Demonstrate effective leadership and collaboration skills for making decisions and accomplishing goals that contribute to positive social changes.
2. Synthesize and analyze empirical data and integrate it with business knowledge and skills to recommend credible and innovative solutions to organizations' problems.
3. Research and evaluate social, environmental, economic, and international factors and trends to develop effective and sustainable organizational policies and strategies.
4. Demonstrate effective communication skills to communicate and disseminate information across diverse stakeholders.
5. Demonstrate ethical business practices in ambiguous or unfamiliar circumstances.

A. Business Analytics Outcomes

6A. Identify and explain complex business problems in terms of technologically savvy analytical models.

7A. Utilize big data (both qualitative and quantitative) to analyze business problems and recommend financially and socially feasible decisions to managers.

B. Social Innovation and Sustainable Business Outcomes

6B. Understand the role of market and marketing strategies and how they can be harnessed for innovating sustainable business.

7B. Advise corporates, government, and non-government organizations to innovate environmentally friendly business strategies and implement them in ethically responsible management practices.

C. Organizational Development Outcomes

6C. Identify and analyze organizations' behavioral and operational situations that need intervention.

7C. Implement innovative organizational development strategies and methodologies to help solve organizational situations and transform them in a long-term development trajectory.

D. Human Resource Management Outcomes

6D. Analyze the operational and financial effectiveness of the human resources of business organizations.

7D. Plan and implement a human resource strategy that brings effective recruitment, professional development, employee compensation, and benefits to the business organizations.

E. Business Optimization Outcomes

6E. Identify and analyze efficiency and productivity gaps existing among products and services, processes, and resources in business organizations.

7E. Develop and implement plans for organizations to redefine and strategize for lean operations, asset maximizations, quality control, cost minimization, and building institutional capability.

9.4.2 Career Paths for Graduates

Graduates from the MBA program should be able to provide leadership and applied research capacity in a variety of business settings. The MBA Program develops specialized knowledge for continuing education and growth in all fields of business and administration. Graduates of the Master of Business Administration can anticipate the following types of professional careers at the management, director, and executive levels:

Business Analytics Specialization

- Management analyst
- Marketing research analysts and marketing specialists
- Financial analysts
- Human resource Analysts
- Business intelligence analysts
- Business and risk analysts
- Investment analysts/directors
- Marketing managers

Social Innovation and Sustainable Business Optimization Specialization

- Sustainability process managers
- Environmental economists
- Corporate social responsibility managers/ directors
- Innovation and sustainability managers

Organizational Development Specialization

- Change management specialists.
- Organization effectiveness managers
- Training and development specialist

Human Resource Management Specialization

- Human resource Analysts
- Human resources specialists
- Talent development managers
- Compensations and benefits managers
- Labor relations specialists/ managers
- Human resource research analysts

Business Optimization Specialization

- Business intelligence analysts
- Business and Risk analysts
- Product development managers
- Business development specialist
- Business process optimization analysts/ consultant
- Business operations managers
- Performance optimization directors
- Customer optimization specialists
- Supply Chain analysts

9.4.3 Program Structure

All MBA program students take four (4) core courses and (8) specialization courses.

Area	Number of Courses	Credits
Core Courses	4	12
Specialization*	8	24
Total	12	36

**One of the specialization courses is a required capstone course.*

9.4.4 Graduation Requirements

Each student is required to submit a *completion portfolio* in their final year of study, which includes evidence of works they have completed throughout their time. Students are required to provide a portfolio including the following elements: Part I: Career Preparation, Part II: Capstone Project, and Part III: Demonstration of professionally recognized abilities via certifications and micro-credentials.

9.4.4.1 Career Preparation

In completion of the master's program, students are required to submit a resume/CV, list of professional references, professional development plan, professionally recognized certifications, and micro-credentials.

9.4.4.2 Capstone Project

Students complete a capstone project that represents significant work related to the degree and specialization. The exact project is determined in consultation with the professor for the course. All capstone projects have to be within the degree student learning outcome.

- Learn the concepts of Object Programming Languages
- Analyze current and future trends and evolutions in computer science like Operating Systems and Computer Architecture.
- Become familiar with computer science theory and algorithms in the modeling and design of
- computer-based systems

9.4.4.3 Demonstration of Professional Recognized Abilities

- Certifications: Certifications are designed to educate and objectively validate a professional's specialized competency in the targeted areas of Business Analytics. Certifications can be obtained through education or hands-on experience, in addition to an assessment of a specific set of knowledge skills. Students will be able to obtain a few well-known industrial certificates that help them compete in the job market.
- Microcredentials: Microcredentialing is a way to demonstrate that a person has skills or knowledge of a domain of information. This can be achieved from online education, classroom education, or a hybrid model of both.

9.4.4.4 Associated Microcredentials

The following microcredentials are offered as part of the program:

- Marketing Analytics: Marketing Measurement Strategy (MA: MMS)
- Market Analytics: Price and Promotion Analytics (MA: P&PA)
- Marketing Analytics: Competitive Analysis and Market Segmentation (MA:CA&MS)
- Marketing Analytics: Product, Distribution and Sales (MA: PD&S)
- Data Visualization with Tableau (DVT)
- Global Challenge in Business: Sustainable Innovation for Sustainable Business (GCB: SISB)
- Global Challenge in Business: Sustainable Business Enterprise (GCB: SBE)
- Global Challenge in Business: Global Strategy (GCB: GS)
- Globalization, Economic Growth, and Stability (GE&S)
- Value Chain Management: Managerial Accounting (VCM: MA)

- Value Chain Management: Operation Management (VCM: OM)
- Lean Six Sigma (LSS)
- Change and Business Leadership (C&BL)
- Business Leadership (BL)
- Ethical Leadership (EL)
- Business Development (BD)
- HR for People Managers: Preparing to Manage People (HRPM: PMP)
- HR for People Managers: Recruiting, Hiring and Onboarding (HRPM: RHO)
- HR for People Managers: Managing Employee Performance and Compensation (HRPM: MEPC)
- HR for People Managers: Capstone (HRPM: CAP)

Associated Certifications

The following certifications can be earned by graduates of the program through the certifying organizations offering them. Among the certifications that students can meet the minimum requirements for include:

- Certification Competency Business Analyst (CCBA)
- Certified Business Analysis Professional (CBAP)
- Entrepreneurship and small business certification (ESBC)
- Sustainable Business Certification (SBC)
- Certification Green Business (CGB)
- Change Management Certification (CMC)
- Society for Human Resources management Certified Professional (SHRM-CP)
- Business Process Optimization Certification (BPOC)

9.4.5 Program Prerequisites Courses

Students who do not have previous coursework related to the foundational knowledge required for the program must fulfill up to three (3) additional courses or nine (9) credits across the following. This would increase the total number of credits that the student would take in addition to the 36 credits.

Code	Course Title	Prerequisites	Credits
BUSS 280**	Introduction to Statistics	None	3
BUSS 290**	Introduction to Business Analytics	BUSS 280	3
BUSS 300**	Organization Theory & HR Management	None	3

** CPT Qualified Course

9.4.6 Masters of Business Administration Degree Requirements

Core Courses (4 Courses– 12 Credits)

Code	Course Title	Microcredentials		Prerequisites	Credits
		MC	Certifications

				specialization courses	
--	--	--	--	------------------------	--

** CPT Qualified Course

Organization Development Specialization (8 Courses–24 Credits)

Organizational development specialization is designed to train students with behavioral science knowledge and skills that help organizations develop strategic changes that impact organizations' effectiveness and competitiveness. This specialization will train students to become effective leaders and researchers in bringing dynamic organizational changes, mediating conflicts, leading diverse teams, training, and maintaining productive and innovative human resources capabilities.

Code	Course Title	Microcredentials		Prerequisites	Credits
		MC	Certifications		
BUSS 506**	Leadership in Organizations	C&BL	N/A	None	3
BUSS 521**	Human Behavior and Learning in Organizations	EL	N/A	None	3
BUSS 522**	Organizational Change	C&BL	N/A	None	3
BUSS 535**	Management and Ethical Leadership	BL;EL	CMC	None	3
BUSS 532**	Organizational Performance Measure	BL	N/A	None	3
BUSS 542**	Strategic Change	BL	CMC	None	3
BUSS 549	Contemporary Issues in Organizational Development	EL	N/A	None	3
BUSS 547**	Legal and Regulatory Environment of Business	BL;EL	CMC	BUSS 220	3
BUSS 624**	Global leadership	N/A	N/A	None	3
BUSS 626**	Globalization and Organizational Development	N/A	N/A	None	3
BUSS 632**	International and Multicultural Issues in Organizations	N/A	CMC	None	3
BUSS 635**	Internship in Organization Development	N/A	N/A	None	3
BUSS 640**	Capstone in Organization Development	N/A	N/A	Completion of 4 specialization courses	3

** CPT Qualified Course

Human Resource Management Specialization (8 Courses–24 Credits)

Human resource management specialization is designed to train students in the management of people within the organization to achieve competitive business operations and lead effective human resource policies and strategies. This specialization will also enable graduates to undertake sound and credible applied research related to human resource management issues.

Code	Course Title	Microcredentials		Prerequisites	Credits
		MC	Certifications		
BUSS 535**	Management and Ethical Leadership	HRPM:RHO;HRP M:CAP	N/A	None	3
BUSS 537**	Talent Acquisition and Development	HRPM:MEPC;HR PM:CAP	SHRM-CP	None	3
BUSS 541**	Principles and Practice of Human Resources	HRPM:PMP	SHRM - CP	None	3
BUSS 543**	Finance for HR Professionals	HRPM:MEPC	N/A	None	3

BUSS 544**	Human Resource in Global Economy	HRPM:CAP	N/A	None	3
BUSS 546**	Organizational Lifecycles and HR Applications	HRPM: MEPC	N/A	None	3

BUSS 552**	HR Change Management	HRPM:RHO	N/A	None	3
BUSS 600**	Consulting and HR Application	HRM:CAP	SHRM- CP	None	3
BUSS 641**	Capstone in HR Management	N/A	N/A	Completion of 4 specialization courses	3
BUSS 649**	Organizational Leadership, Team Effectiveness and Communications	N/A	N/A	None	3
BUSS 652**	Strategic Human Capital Development	HRPM: MEPC	SHRM-CP	None	3
BUSS 653**	Internship in HR Management	N/A	N/A	None	3
BUSS 656**	Workplace Ethics	N/A	N/A	None	3
BUSS 670**	Theory and Practice of Diversity, Equity & Inclusiveness	N/A	N/A	None	3

Business Optimization Specialization (8 Courses–24 Credits)

Business Optimization specialization is designed to train students with the knowledge and skills to optimize business performance in product development, project management, cost minimization, output productivity, lean operations, product outsourcing, strategic procurement, product distribution, and overall supply chain management. This specialization will train students in various applied research methods of analyzing the existing business processes, developing models for process optimization, and aligning business functions with organizations' resource constraints.

Code	Course Title	Microcredentials		Prerequisites	Credits
		MC	Certifications		
BUSS 510**	Contracts, Procurement & Supply Chain Management	VCM:MA	N/A	None	3
BUSS 515**	Risk Management in Project Management	N/A	BPOC	None	3
BUSS 527**	Emergent Roles of Project Management in Business	N/A	N/A	None	3
BUSS 580**	Operations Management and Analysis	VCM:OM;LSS	BPOC	None	3
BUSS 581**	Supply Chain and Logistic Management	VCM:MA	N/A	None	3

BUSS 584**	Administration of Service Operations	VCM:OM	BPOC	None	3
BUSS 685**	Optimality of Project Financing	LSS	N/A	None	3
BUSS 686**	Managing Multinational Operations	N/A	N/A	None	3
BUSS 687**	Emerging Challenges in Business Optimization and Technologies	N/A	N/A	None	3
BUSS 688**	Resource Optimizations Techniques	N/A	N/A	None	3
BUSS 689**	Internship in Business Optimization	N/A	N/A	None	3
BUSS 690**	Capstone in Business Optimization	N/A	N/A	Completion of 4 specialization courses	3

9.5 Master of Science in Project Management

The Master of Science in Project Management (MSPM) degree is designed to provide mastery of both technical and operational competencies for professionals with diverse backgrounds seeking leadership positions as a project manager.

9.5.1 MSPM Program Outcomes

Graduates will be able to:

1. Explain the elements of project initiation, project implementation, and termination.
2. Apply cost accounting concepts to project management according to its contractual parameters.
3. Function as a leader in the formulation of the project management plan, implementation, and validation of outcomes.
4. Strategize on problem-solving reflective of the triple constraints of scope, time, and schedule.
5. Distinguish between projects and the ongoing nature of operations.
6. Recognize and understand cultural diversity and acceptance of others.
7. Apply technological skills, tools, and techniques to guide overall project execution.
8. Apply effective oral and written communication skills.
9. Demonstrate a high level of ethics and professional behavior in all matters of project contract negotiation.

The MSPM degree program is earned by completing the program course requirements of 30 semester credit hours and 6 semester credit hours of thesis beyond the program prerequisite courses.

9.5.2 Career Paths for Graduates

Students graduating from the MSPM program should be prepared to provide leadership in a variety of business settings. The MSPM program develops the foundation for continuing education and leadership in all fields of business and administration. Graduates of the MS

PM Program can anticipate jobs in the following types of careers at the management, director, and executive levels:

- Construction Manager
- Cost Estimator
- General and Operations Manager
- Industrial Production Manager
- Management Consultant
- Organizational Change Manager
- Procurement Manager
- Project Developer
- Project Quality Manager
- Project Specialist
- Project Team Lead
- Project Manager

9.5.3 Program Prerequisites

If applicants do not have previous business background and project management experience, and their bachelor's degrees are not related to business and management, they are required to take the following MSPM program prerequisite courses:

Code	Course Title	Prerequisite	Credits
ECON 101	Principles of Microeconomics	None	3
STAT 200	Introduction to Statistics	None	3

These program prerequisites can be taken at the same time. In rare circumstances, students also have the option to test out of these courses or provide other evidence of content knowledge through certifications, successful completion of similar courses, or training certificates.

9.5.4 Program Structure

MS in Project Management requires 36 academic credit hours and consists of three areas of study that develop necessary knowledge and skills to become a Project Manager. If desired, an MS in Project Management graduate can take an additional course aimed at successful preparation for obtaining the Project Management Professional (PMP) certification.

Area	Number of Courses	Credits
------	-------------------	---------

Required Courses	4	12
Specialization Courses	6	18
Thesis courses	2	6
Total	12	36

Required Courses (4 courses, 12 credits)

The required courses provide students with the skills and knowledge that all project managers need including accounting, finance, organizational behavior, marketing, and leadership. Every student must complete the following four (4) courses:

Code	Course Title	Prerequisite	Credits
**MBA 511	Managerial Accounting and Finance	<i>ACCT 201, BUSS 303</i>	3
**MBA 512	Project & Cost Management	<i>STAT 200</i>	3
**MBA 513	Organizational Behavior	<i>None</i>	3
**MBA 514	Marketing Management	<i>None</i>	3

** CPT Qualified Course

Specialization Courses (6 courses, 18 credits)

These courses offer students the familiarity and skills in managing projects, evaluating risks, handling contractual and procurement activities, and analyzing advanced projects management practices. Every student must complete the following six (6) courses:

Code	Course Title	Prerequisite	Credits
**PMP 605	Project Management Systems	<i>None</i>	3
**PMP 610	Quality Project Management Practices	<i>None</i>	3
**PMP 615	Risk Project Management	<i>None</i>	3
**PMP 620	Contract and Procurement Management	<i>None</i>	3
**PMP 623	Leading Projects Across Cultural, Corporate, and Global Boundaries	<i>None</i>	3
**PMP 625	Advanced Project Management Practices	<i>PMP 605</i>	3

** CPT Qualified Course

Thesis Course (2 courses, 6 credits)

The project management concept is commonly integrated across many disciplines. As a project manager, it is important to have a working understanding of various industries. Through the thesis process, students will have an opportunity to demonstrate their ability to integrate people, processes, and technology for the purpose of understanding an organization's mission and vision, as well as actualizing their understanding through imperial research.

Code	Course Title	Prerequisite	Credits
**PMP 698	Master Thesis I	<i>5 Core Courses & Dean's Approval</i>	3
**PMP 699	Master Thesis II	<i>PMP 698</i>	3

** CPT Qualified Course

OPTIONAL: PMP Exam Preparation (3 credits)

To obtain in-depth professional preparation for passing the Project Management Professional (PMP) exam, students may consider taking an additional course. Students who elect to take this optional course can count the course toward their required courses.

Code	Course Title	Prerequisite	Credits
PMP 650	PMP Exam Preparation	<i>PMP 605, 610, 615</i>	3

10 SCHOOL OF COMPUTER INFORMATION SYSTEMS

10.1 School of Computer Information Systems Mission Statement

The mission of the School of Computer Information Systems is to empower graduates to serve as leading practitioners in the field of computing in a global marketplace and to enable them to realize their full potential through academic excellence. We provide quality education in the computing discipline from diverse faculty who are experts in the fields of computer science, information systems, software engineering and information technology.

10.2 School of Computer Information Systems Learning Outcomes

1. Apply various critical thinking and programming skills tailored to professional objectives
2. Recognize and utilize a variety of tools for technical and operational aspects of IT project management
3. Maintain and understand knowledge of current and future trends in computer technology
4. Effectively communicate and collaborate with a variety of invested individuals
5. Facilitate practices and procedures with social, ethical and legal understandings of technologies

10.3 Bachelor of Science in Computer Science

10.3.1 BSCS Program Mission

In support of the university's mission, the Bachelor of Science in Computer Science (BSCS) program emphasizes the design and use of computer technology to develop information-processing systems. The program provides students with a broad range of computer knowledge and practical skills required in most business and industry areas today. The curriculum for the BSCS degree is designed to give a student a state-of-the-art education in both the theory and practice of Computer Science. Upper-level courses involve students in team projects that emphasize industrial applications and best practices.

10.3.2 BSCS Program Outcomes

Three specializations are associated with this degree: (a) Artificial Intelligence (AI) and Machine Learning (ML), (b) Networking and Cybersecurity, and (c) Data Science (DS).

Specifically, the BSCS program graduates will be able to:

1. Demonstrate effective leadership skills in order to make a positive social impact.
2. Learn the concepts of Object Programming Languages like Python, C#, or Java.
3. Analyze current and future trends and evolutions in computer science like Operating Systems and Computer Architecture.
4. Develop an appreciation of social, ethical, and legal aspects of technologies and their applications in the Computer Science field.
5. Become familiar with computer science theory and algorithms in the modeling and design of computer-based systems.

Artificial Intelligence (AI) and Machine Learning (ML) Specialization Outcomes

- 6A. Understand Artificial Intelligence techniques, algorithms, knowledge base building and heuristic search.
- 7A. Demonstrate Artificial Intelligence applications.

Networking and Cybersecurity Specialization Outcomes

- 6B. Understand cybersecurity protocols and techniques to secure and protect sensitive information and financial assets following the NIST Standards.
- 7B. Implement and maintain robust information security systems and networks from cyberattack.

Data Science Specialization Outcomes

- 6C. Apply data science principles and methods to solve real-world problems.
- 7C. Demonstrate and execute statistical analysis of data.

10.3.3 Career Paths for Graduates

The BSCS program educates and trains students to create and implement solutions for information systems-based needs and problems in research, commercial, financial, governmental, or organizations. The approach of this degree program is to integrate theoretical and practical aspects of computer science and technology. The program provides a blend of theory and applications, preparing students for a variety of Computer Science careers in industry, government, and academia,

developing the foundation for continuing education and growth in the field of Computer Science. Specific career paths include positions at the entry, experienced professional and management levels such as:

- Digital Forensics Analyst
- Cybersecurity Analyst
- Cybersecurity Engineer
- Network System Administrator
- AI Engineer
- Machine Learning Engineer
- Machine Learning Data Developer
- AI Interaction Designer
- Computer Systems Analyst
- Software Developer
- Database Developer
- Database Administrator
- Computer Programmer
- Web Developer
- QA Tester

10.3.4 Program Structure

Area	Number of Courses	Credits
General Education Department Courses	14	42
Fundamental Courses	21	60
Specialization	6	18
Total	41	120

10.3.5 Graduation Requirements

Each student is required to submit a project in their final year of study, includes a portfolio of work they have completed throughout their time. Students are required to provide a portfolio including the following elements: Part I: Career Preparation, Part II: Senior Project, and Part III: Demonstration of professionally recognized abilities via certifications and micro-credentials.

10.3.5.1 Career Preparation

Students are required to submit a resume/CV, lists of professional references, and a professional development plan.

10.3.5.2 Senior Project

Students complete a project representing significant work related to the degree and specialization. The exact project is determined in concert with the professor for the course.

10.3.5.3 Demonstration of Professionally Recognized Abilities

- Certifications: Certifications are designed to objectively validate a professional's specialized competency in targeted areas related to the degree. Certifications can be obtained through education or hands-on experience, in addition to an assessment of a specific set of knowledge skills. Students will be able to obtain a number of well-known industrial certificates that help them compete in the job market. The program structure provides suggested periods in which students could sit for an exam, which generally corresponds to the completion of a course or courses related to the content area covered on the certification examination.
- Microcredentials: Micro-credentialing is a way to demonstrate that a person has skills or knowledge of a particular domain of information and/or knowledge. This can be achieved from online education, classroom education, or a hybrid model of both. Throughout the program, students can earn credentials by following a prescribed path or by taking additional coursework beyond their degree.

10.3.6 Associated Microcredentials

The following microcredentials are offered as part of the program:

- Essentials of Programming (EoP)
- Advanced Programming (AP)
- Essentials of Computer Networks (ECN)
- Advanced Computer Networks (ACN)
- Essentials of Cybersecurity (ECS)

- Advanced Cybersecurity (ACS)
- Essentials of Artificial Intelligence and Machine Learning (EAI)
- Advanced Artificial Intelligence and Machine Learning (AAI)
- Essentials of Data Science (EDS)
- Advanced Data Science (ADS)
- Essentials of System Design (ESD)
- Advanced System Design (ASD)
- Essentials of Software Application Development (ESAD)
- Advanced Software Application Development (ASDE)
- Essentials of Computer Ethics (ECE)

10.3.7 Internship Opportunities

Students are eligible to take optional externship courses after successfully completing 90 credits. This enables our students to gain hands-on experience to supplement their classroom learning.

10.3.8 Bachelor of Science in Computer Science Required Courses

Fundamental Courses (21 courses – 60 Credit Hours)

Code	Course Title	Microcredentials		Prerequisite	Credits
		MC	Certifications		
COMP 109**	Computer Algorithm and Programming Logic Using Python	EoP	N/A	None	3
COMP 121	Object Oriented Programming	EoP	<i>Certified Associate in Python Programming</i>	COMP 109	3
COMP 130	Ethical, Social, and Legal Aspects of Computing	ECE	N/A	None	3
COMP 157	Seminar I	N/A	N/A	None	1
COMP 231	Discrete Mathematical Methods for Computing	N/A	N/A	None	3
COMP 250**	Computer Architecture	ESD	N/A	COMP 109	3
COMP 260**	Introduction to Operating Systems	ESD	N/A	None	3
COMP 270**	Essentials of Networking	ECN	N/A	None	3
COMP 280	Comp TIA A+ and Test Preparation	ESD	A+	None	3
COMP 329**	Data Structures and Algorithm Analysis	EoP	N/A	None	3
COMP 345	Introduction to Computer Security	ECS	N/A	None	3
COMP 350**	Database Concepts	ESAD	N/A	None	3
COMP 361**	Introduction to Data Science	EDS	N/A	None	3
COMP 375*	Human Computer Interaction	ESAD	N/A	COMP 250	3
COMP 380	Wireless and Mobile Security	ECS & ECN	N/A	None	3
COMP 390	Seminar II	N/A	N/A	COMP157	1
COMP 450	Research and Analytic Skills	EoP	N/A	None	3
COMP 499	Senior Project and Seminar	AAI	N/A	COMP 390	4
TLLP 250	Designing Your Life & Career	CAR, SP	N/A	None	3
TLLP 275	Practices of Social Impact	CAR, SP	N/A	None	3
TLLP 425	Practices of Career Planning and Leadership	CAR	N/A	None	3

AI and ML Specialization: (6 Courses – 18 Credit Hours)

Code	Course Title	Microcredentials	Prerequisite	Credits
------	--------------	------------------	--------------	---------

		MC	Certification		
COMP 340	Computer Graphics	ESD	N/A	None	3
COMP 376	Artificial Intelligence Principles	EAI	N/A	None	3
COMP 377*	Machine Learning Principles	EAI	N/A	None	3
COMP 378	Decision-Making and Robotics Principles	N/A	N/A	None	3
COMP 379*	Human-AI Interaction	EAI	N/A	None	3
COMP 393	Internship in AI	ESD	N/A	Minimum of 90 credits	3
COMP 394	Internship in Machine Learning	ADS	N/A	Minimum of 90 credits	3
COMP 413/513^	Robotics Design and Programming	ASD	N/A	COMP 378	3
COMP 414	Big Data Analytics	EAI & AP	N/A	None	3
COMP 415	Natural Language Processing	N/A	N/A	None	3
COMP 416	Computer Vision and Image Processing	ADS	N/A	None	3
COMP 417/517^	Special Topics in AI	ESAD	N/A	Minimum of 90 credits	3
COMP 418/518^	Special Topics in ML	ESAD	N/A	Minimum of 90 credits	3
COMP 420	Creativity in Machine Learning	AAI	N/A	COMP 329	3
COMP 421/521^	Smart Devices Design and Applications	AAI	N/A	COMP 329	3
COMP 422/522^	Data Mining	AAI	N/A	COMP 329	3
COMP 480	AWS Test Preparation for Cloud Practitioner Certificate	EAI & ESD	AWS	None	3
COMP 483	IBM AI Engineering Professional Test Preparation	ADS	IBM AI	None	3

*Indicates required course.

**Indicates internship qualified

^Can be taken for graduate course credit.

NOTE: Students who wish to take a course that is offered in another specialization may petition to do so to their advisor by providing justification for the relevance of the addition as part of their professional trajectory, their intended project, and/or personal interest. A maximum of 2 courses from other areas can be applied to a specialization.

Networking and Cybersecurity Specialization: (6 Courses – 18 Credit Hours)

Code	Course Title	Microcredentials		Prerequisite	Credits
		MC	Certification		
COMP 360	Switching and Routing Protocols	ECN	N/A	None	3
COMP 365*	Cybersecurity and Information Assurance	ECS	N/A	None	3
COMP 370*	Essentials Digital Forensics	ECS	N/A	None	3
COMP 391	Internship in Networking	ECN	N/A	Minimum of 90 credits	3
COMP 392	Internship in Cybersecurity	ECS	N/A	Minimum of 90 credits	3
COMP 410/510^	Intrusion Detection and Prevention Systems	ACN & ACS	N/A	None	3
COMP 411/511^	Cloud Security	ACS	N/A	None	3
COMP 412/512^	Special Topics in Networking	ACN	N/A	None	3
COMP 419/519^	Special Topics in Cybersecurity	ACS	N/A	None	3
COMP 430	Ethical Hacking	ECS & ECE	CEH	None	3
COMP 431	Cryptography and Ciphering	ACS	N/A	None	3

COMP 429	Operating Systems Security	ESD & ACS	N/A	COMP 260	3
COMP 433/533^	IoT and Smart Cities Security	ACS	N/A	None	3
COMP 434/534^	Information Risk Management	ACS	N/A	None	3
COMP 436	Cybersecurity Governance and Compliance	N/A	N/A	None	3
COMP 486	Comp TIA Network+ and Test Preparation	ACN	Network+	COMP 270	3
COMP 487	Comp TIA Security+ and Test Preparation	ACS	Security+	COMP 345	3

*Indicates required course.

10.4 Master of Science in Artificial Intelligence and Machine Learning

In support of the university's mission, the Master of Science in Artificial Intelligence and Machine Learning (MSAIML) is designed to appeal to a broad range of individuals. The program balances theory with practice, offering an extensive set of traditional and state-of-the-art courses, and provides the necessary flexibility to accommodate students with various backgrounds, including computer professionals who want to expand their understanding of AI & ML, as well as individuals whose undergraduate degrees are not in Computer Science but wish to broaden their knowledge in AI & ML.

10.4.1 Artificial Intelligence and Machine Learning Program Outcomes

AI and ML program aims to equip students with a deep understanding, knowledge, and skills that enable them to identify and solve problems in AI and ML areas using analytical and critical thinking skills. As AI and ML program provides our graduates with today's required practical skills, they will be leaders and contributors in industry, business, and academic fields. The program outcomes are:

1. Apply AI and ML algorithms to draw inferences, design smart applications to solve real-world problems, and to automate the development of AI systems and components.

2. Model human behaviors to develop Human-AI systems and evaluate their performance.
3. Improve overall integrated system performance to influence human performance and learning.
4. Apply social, ethical, and legal principles of technologies and their applications in the AI and ML field.
5. Communicate effectively individually or in cross-functional teams.

10.4.2 Career Paths for Artificial Intelligence and Machine Learning Program

The AI and ML program prepares graduates for productive long-term careers as leaders in industry, government, and academiadevelops the foundation for continuing education and growth in the field of AI and ML. AI and ML graduates will become key contributors to Computer Science research and applied Computer Science and can further their education by entering a doctoral degree program. Graduates of the AI and ML program can anticipate the following types of computer science careers at the management, director, and executive levels:

- AI Specialist
- Applied Artificial Intelligence and Machine Learning-Scientist
- AWS Machine Learning Engineer
- Robotic Process Automation Programmer
- Artificial Intelligence Engineer
- Robotics Programmer
- Machine Learning Engineer
- Instructor at a college or university teaching AI and ML in addition to Computer Science courses

10.4.3 Artificial Intelligence and Machine Learning Program Structure

The Master of Science in AI and ML requires completion of 36 credits. Students will take 12 credits of core courses, 6 credits for career application, and 18 credits in AI and ML content area.

Area	Number of Courses	Credits
Core Courses	4	12
Career Application Courses	2	6
Specialization Courses	6	18
Total	12	36

10.4.4 Graduation Requirements

Students are required to provide a portfolio including the following elements: Part I: Career Preparation, Part II: Project, and Part III: Demonstration of professionally recognized abilities via certifications and microcredentials.

10.4.4.1 Career Preparation

Students are required to submit a resume/CV, list of professional references, and a professional development plan.

10.4.4.2 Career Application Project

Students complete a project that represents significant work related to the degree and specialization. The exact project is determined in concert with the professor for the course.

10.4.4.3 Demonstration of Professional Recognized Abilities

- Certifications: Certifications are designed to educate and objectively validate a professional's specialized competency in the targeted areas of AI & ML. Certifications can be obtained through education or hands-on experience, in addition to an assessment of a specific set of knowledge skills. Students will be able to obtain a number of well-known industrial certificates that will help them compete in the job market.
- Microcredentials: Microcredentialing is a way to demonstrate that a person has skills or knowledge of a particular domain of information. This can be achieved from online education, classroom education, or a hybrid model of both.

10.4.5 Associated Microcredentials

The following microcredentials are offered as part of the program:

- Artificial Intelligence/Machine Learning Engineer: (ALMLE)

- AI Specialist (AISP)
- AWS Machine Learning Engineer (AWSMLE)
- Robotic Process Automation Programmer (RPAP)

10.4.6 Artificial Intelligence and Machine Learning Program Prerequisites

All new AI and ML program students need specific basic skills to prepare them for success in the AI and ML Program. The AI and ML degree provides a broad understanding of the theory and technology of this field. Students who do not have the required background need to take some or all of the prerequisites before taking the core Courses. Thus, to be successful, students must have a background in the following courses.

Program Prerequisites

Code	Course Title	Microcredentials	Prerequisite	Credits
COMP 109	Computer Algorithm and Programming Logic Using Python	N/A	None	3
COMP 260	Introduction to Operating Systems	N/A	None	3
COMP 270	Essentials of Networking	N/A	None	3
COMP 329	Data Structures and Algorithm Analysis	N/A	None	3
COMP 350	Database Concepts	N/A	None	3

10.4.7 Master of Science in Artificial Intelligence and Machine Learning Degree Requirements

Core Courses (4 Core Courses- 12 Credits)

These courses provide a breadth of foundational knowledge to implement computer interfaces, software design, communication between systems, and how to manage IT systems. These are all crucial elements for IT professionals to apply these building blocks to any given system or project.

Code	Course Title	Microcredentials	Prerequisite	Credits
COMP 501*	Advanced Operating Systems	N/A	COMP 260	3
COMP 502*	Design and Analysis of Algorithms	N/A	COMP 329	3
COMP 503*	Networking and Telecommunications	N/A	COMP 270	3
COMP 504*	Database Management Systems	N/A	COMP 350	3

*Internship qualified

Application Courses (2 Application Courses- 6 Credits)

These courses offer an opportunity for students to apply what they have learned throughout the program through a practical project or a master's thesis. While the practical project provides for the application of knowledge acquired throughout the program and would represent work that could demonstrate career-readiness to potential employers, the thesis would generally serve to demonstrate a student's research potential and could be used to demonstrate readiness for doctoral work. Students will demonstrate basic research knowledge and abilities, which will be used toward completion of either the project or thesis.

Code	Course Title	Microcredentials	Prerequisite	Credits
COMP 505*	Research Methods	N/A	None	3
Choose One				
COMP 681*	AI and ML Capstone Project	N/A	COMP 505	3
COMP 698*	Master Thesis	N/A	COMP 505	3

*Internship qualified

Artificial Intelligence and Machine Learning Courses (Any 6 Courses– 18 Credit Hours)

These advanced courses cover the depth of topics related to AI and ML and allow students to develop their knowledge based upon their intended professional trajectories.

Code	Course Title	Microcredentials	Prerequisite	Credits
COMP 513*	Robotics Design and Programming	ALMLE/ RPAP	COMP 329	3
COMP 514*	Neural Networks	N/A	None	3

COMP 515*	Pattern Recognition	AISP/ RPAP	None	3
COMP 516*	Deep Learning	ALMLE/ AISP	None	3
COMP 517*	Special Topics in AI	N/A	None	3
COMP 518*	Special Topics in ML	AWSMLE	None	3
COMP 521*	Smart Devices Design and applications	AISP/ RPAP	None	3
COMP 522*	Data Mining	AWSMLE	COMP 504	3
COMP 593	Internship I in AI and Machine Learning	N/A	Completion of core courses and 50% of the program courses	3
COMP 610*	Cognitive Computing	ALMLE/ AWSMLE	None	3
COMP 611*	Data Warehousing	DWE	COMP 504	3
COMP 613*	Game Design	RPAP	COMP 502	3
COMP 614*	Speech Recognition	AISP/ RPAP	None	3
COMP 617*	AWS Certified Machine Learning	AWS Certificate/ AWSMLE	None	3
COMP 618*	Google Machine Learning	Google Certificate	None	3
COMP 693*	Internship II in AI and Machine Learning	N/A	COMP 593	3

*Internship qualified

NOTE: Students who wish to take a course that is offered in another program may petition to do so to their advisor by providing justification for the relevance of the addition as part of their professional trajectory, their intended consulting project, and/or personal interest. A maximum of 2 courses can be applied from another program.

10.5 Master of Science in Data Analytics

In support of the university's mission, the Master of Science in Data Analytics (MSDA) is designed to appeal to a broad range of individuals. The program balances theory with practice, offering an extensive set of traditional and state-of-the-art courses, and provides the necessary flexibility to accommodate students with various backgrounds, including computer professionals who want to expand their understanding of Data Analytics, as well as individuals whose undergraduate degrees are not in Computer Science but wish to broaden their knowledge in Data Analytics.

10.5.1 Data Analytics Program Outcomes

FXUA's Data Analytics program equips the students with knowledge, deep understanding, and critical thinking skills that enable them to identify and solve problems in the Data Analytics field. As the Data Analytics program provides our graduates with today's required practical skills, they will be leaders and contributors in industry, business, and academic fields. The program outcomes are:

1. Design software applying modeling and data analysis techniques to solve real-world problems using cutting-edge techniques, communicate findings, and effectively present results using data visualization techniques.
2. Demonstrate knowledge of statistical algorithms in data analysis for improved design decision-making.
3. Apply social, ethical, and legal principles of technologies and their applications in the data analytics field.
4. Communicate effectively individually or in cross-functional teams.

10.5.2 Career Paths for Data Analytics Program

Graduate students in the Data Analytics program are prepared to provide leadership in this field. The Data Analytics program prepares students for productive long-term careers in industry, government, and academia; and develops the foundation for continuing education and growth in this field. Data Analytics graduates will become key contributors to Computer Science research and applied Computer Science and can further pursue their education by joining a doctoral degree program. Graduates of the Data Analytics program can anticipate the following types of computer science professional careers at the management, director, and executive levels:

- Big-data architect
- Principal Data Scientist

- Data Warehouse Engineer
- Management analyst
- Data scientist
- Data engineer
- Research analyst - data science division
- Instructor at a college or university teaching Data Analytics in addition to Computer Science courses.

10.5.3 Data Analytics Program Structure

The Master's degree in Data Analytics requires completion of 36 credits. Students will take 12 credits of core courses: 6 credits of career applications and 18 credits in Data Analytics content area.

Area	Number of Courses	Credits
Core Courses	4	12
Career Application Courses	2	6
Specialization Courses	6	18
Total	12	36

10.5.4 Graduation Requirements

Students are required to provide a portfolio, including the following elements: Part I: Career Preparation, Part II: Project, and Part III: Demonstration of professionally recognized abilities via certifications and micro-credentials.

10.5.5 Career Preparation

Students are required to submit a resume/CV, list of professional references, and a professional development plan.

10.5.6 Career Application Project

Students complete a project representing significant work related to the degree and specialization. The exact project is determined in concert with the professor for the course.

10.5.7 Demonstration of Professional Recognized Abilities

- **Certifications:** Certifications are designed to educate and objectively validate a professional's specialized competency in the targeted areas of AI & ML. Certifications can be obtained through education or hands-on experience, in addition to an assessment of a specific set of knowledge skills. Students will be able to obtain a number of well-known industrial certificates that helps them compete in the job market.
- **Microcredentials:** Microcredentialing is a way to demonstrate that a person has skills or knowledge of a particular domain of information. This can be achieved from online education, classroom education, or a hybrid model of both.

10.5.8 Associated Microcredentials

The following microcredentials are offered as part of the program:

- Data Analyst (DA)
- Principal Data Scientist (PDS)
- Big Data Architect (BDA)
- Big Data Analyst (BDA)
- Data Warehouse Engineer (DWE)
- Business Analysis Engineer (BAE)

10.5.9 Data Analytics Program Prerequisites

All new Data Analytics program students need certain basic skills to prepare them for success in the Data Analytics Program. The Data Analytics degree provides a broad understanding of computer science theory and technology. Students who do not have the required background need to take some or all of the prerequisites before taking the core Courses. Thus, to be successful, students must have a background in the following courses.

Program Prerequisites

Code	Course Title	Microcredentials	Prerequisite	Credits
COMP 109	Computer Algorithm and Programming Logic Using Python	N/A	None	3

COMP 260	Introduction to Operating Systems	N/A	None	3
COMP 270	Essentials of Networking	N/A	None	3
COMP 329	Data Structures and Algorithm Analysis	N/A	None	3
COMP 350	Database Concepts	N/A	None	3

10.5.10 Master of Science in Data Analytics Degree Requirements

Core Courses (4 core course- 12 Credits)

These courses provide a breadth of foundational knowledge to implement computer interfaces, software design, communication between systems, and how to manage IT systems. These are all crucial elements for IT professionals to apply these building blocks to any given system or project.

Code	Course Title	Microcredentials	Prerequisite	Credits
COMP 501*	Advanced Operating Systems	N/A	COMP 260	3
COMP 502*	Design and Analysis of Algorithms	N/A	COMP 329	3
COMP 503*	Networking and Telecommunications	N/A	COMP 270	3
COMP 504*	Database Management Systems	N/A	COMP 350	3

*Internship qualified

Application Courses (2 Application Courses- 6 Credits)

These courses offer an opportunity for students to apply what they have learned throughout the program through a practical project or a master's thesis. While the practical project provides for the application of knowledge acquired throughout the program and would represent work that could demonstrate career-readiness to potential employers, the thesis would generally serve to demonstrate a student's research potential and could be used to demonstrate readiness for doctoral work. Students will demonstrate basic research knowledge and abilities, which will be used toward completion of either the project or thesis.

Code	Course Title	Microcredentials	Prerequisite	Credits

Choose One of the Following				
COMP 682*	Data Analytics Capstone Project	N/A	COMP 505	3
COMP 698*	Master Thesis	N/A	COMP 505	3

*Internship qualified

Data Analytics Course (Any 6 Courses – 18 Credit Hours)

These advanced courses cover the depth of topics related to Data Analytics and allow students to develop their knowledge based on their intended professional trajectories.

Code	Course Title	Microcredentials	Prerequisite	Credits
COMP 523*	Big Data Principles	DA/BDA	COMP 504	3
COMP 524*	Metadata Applications in Complex Big Data Problems	PDS/BDA/BAE	COMP 504	3
COMP 525*	Role of Analytics in Decision-making	DA/PDS/BAE	None	3
COMP 528*	Data Analytics Foundation	DA/BDA	None	3
COMP 529*	Information Fusion	BDA	None	3
COMP 531*	Algorithms for Data Analytics	BDA	COMP 329	3
COMP 542*	Numerical Analysis	N/A	None	3
COMP 543*	Data-Intensive Distributed Computing	N/A	None	3
COMP 544*	Special Topics in Data Science	N/A	None	3
COMP 596	Internship I in Data Analysis	N/A	Completion of core courses and 50% of the program courses	3
COMP 626*	Web Analytics	DWE	None	3

COMP 627*	Descriptive and Predictive Analytical Tools	DWE	COMP 528	3
COMP 628*	Special Topics in Data Analytics	N/A	None	3
COMP 629*	Privacy and Security in Big Data	BDA	None	3
COMP 630*	Text Analytics	PDS	COMP 504	3
COMP 631*	Cloudera Certified Associate (CCA) Data Analyst	Cloudera Certification/BAE	None	3
COMP 632*	Microsoft Certified Azure Data Scientist Associate	Microsoft Azure Certification/PDS	None	3
COMP 696	Internship II in Data Analysis	N/A	COMP 596	3

*Internship qualified

NOTE: Students who wish to take a course that is offered in another program may petition to do so to their advisor by providing justification for the relevance of the addition as part of their professional trajectory, their intended consulting project, and/or personal interest. A maximum of 2 courses can be applied from another program.

10.6 Master of Science in Networking and Cybersecurity

In support of the university's mission, the Master of Science in Network and Cybersecurity (MSNSC) is designed to appeal to a broad range of individuals. The program balances theory with practice, offering an extensive set of traditional and state-of-the-art courses, and providing the necessary flexibility to accommodate students with various backgrounds, including computer professionals who want to expand their understanding of Network and Cybersecurity, as well as individuals whose undergraduate degrees are not in Computer Science but wish to broaden their knowledge in security.

10.6.1 Networking and Cybersecurity Program Outcomes

FXUA's Networking and Cybersecurity program equips the students with the knowledge and deep understanding of network infrastructure, security hazards, mitigation plans, and critical thinking skills that enable them to identify and solve problems in the Networking and Cybersecurity field. Our Networking and Cybersecurity program provides our graduates with today's required practical skills, they will be leaders and contributors in the industry, business, and academia fields. The program outcomes are:

1. Demonstrate practical implementation of privacy, security, forensics, and copyright issues in professional and social environments.
2. Design, analyze, manage, and evaluate the performance of different network architectural models.
3. Identify, develop, and implement effective and efficient defense mechanisms to secure organizational networks and information resources to support organizational goals.
4. Apply social, ethical, and legal principles of technologies and their applications in the Network and Cybersecurity field.
5. Communicate effectively individually or in cross-functional teams.

10.6.2 Career Paths for Networking and Cybersecurity Program

Graduate students in Networking and Cybersecurity program are prepared to provide leadership in this field. The Networking and Cybersecurity program prepares students for productive long-term careers in industry, government, and academia; and develops the foundation for continuing education and growth in this field. Networking and Cybersecurity graduates will become key contributors to Computer Science research and applied Computer Science and can further pursue their education by joining a doctoral degree program. Graduates of the Networking and Cybersecurity program can anticipate the following types of computer science professional careers at the management, director, and executive levels:

- Chief Information Security Officer.
- IT Security Consultant
- Security Architect
- Senior Network Engineer
- Digital Forensic Analyst
- Instructor at a college or university teaching Networking and Cybersecurity in addition to Computer Science courses.

10.6.3 1. Networking and Cybersecurity Program Structure

The Master's in Network and Cybersecurity degree requires completion of 36 credits. Students will take 12 credits of core courses: 6 credits of career application and 18 credits in Networking and Cybersecurity content area.

Area	Number of Courses	Credits
Core Courses	4	12
Career Application Courses	2	6
Specialization Courses	6	18
Total	12	36

10.6.4 Graduation Requirements

Students are required to provide a portfolio including the following elements: Part I: Career Preparation, Part II: Career Application Project, and Part III: Demonstration of professionally recognized abilities via certifications and microcredentials.

10.6.4.1 Career Preparation

Students are required to submit a resume/CV, a list of professional references, and a professional development plan.

10.6.4.2 Career Application Project

Students complete a project representing significant work related to the degree and specialization. The exact project is determined in concert with the professor for the course.

10.6.4.3 Demonstration of Professional Recognized Abilities

- **Certifications:** Certifications are designed to educate and objectively validate a professional's specialized competency in the targeted areas of AI & ML. Certifications can be obtained through education or hands-on experience, in addition to an assessment of a specific set of knowledge skills. Students will be able to obtain a number of well-known industrial certificates that will help them compete in the job market.
- **Microcredentials:** Microcredentialing is a way to demonstrate that a person has skills or knowledge of a particular domain of information. This can be achieved from online education, classroom education, or a hybrid model of both.

10.6.5 Associated Microcredentials

The following microcredentials are offered as part of the program:

- Chief Information Security Officer (CISO)
- IT Security Consultant: (ITSC)
- Senior Network Engineer: (SNWE)
- Digital Forensic Analyst: (DFA)

10.6.6 Networking and Cybersecurity Program Prerequisites

All new Networking and Cybersecurity program students need certain basic skills to prepare them for success in this field. The Networking and Cybersecurity degree provides a broad understanding of Networking and Cybersecurity technology. Students who do not have the required background need to take some or all the prerequisite courses before taking the core courses. Thus, to be successful, students must have a background in the following courses.

Program Prerequisites

Code	Course Title	Microcredentials	Prerequisite	Credits
COMP 109	Computer Algorithm and Programming Logic Using Python	N/A	None	3
COMP 260	Introduction to Operating Systems	N/A	None	3
COMP 270	Essentials of Networking	N/A	None	3
COMP 329	Data Structures and Algorithm Analysis	N/A	None	3
COMP 350	Database Concepts	N/A	None	3

10.6.7 Master of Science in Networking and Cybersecurity Degree Requirements

Core Courses (4 core course- 12 Credits)

These courses provide a breadth of foundational knowledge to implement computer interfaces, software design, communication between systems, and how to manage IT systems. These are all crucial elements for IT professionals to apply these building blocks to any given system or project.

Code	Course Title	Microcredentials	Prerequisite	Credits
COMP 501*	Advanced Operating Systems	N/A	COMP 260	3
COMP 502*	Design and Analysis of Algorithms	N/A	COMP 329	3
COMP 503*	Networking and Telecommunications	N/A	COMP 270	3
COMP 504*	Database Management Systems	N/A	COMP 350	3

*Internship qualified

Application Courses (2 Application Courses- 6 Credits)

NOTE: Students who wish to take a course that is offered in another program may petition to do so to their advisor by providing justification for the relevance of the addition as part of their professional trajectory, their intended consulting project, and/or personal interest. A maximum of 2 courses can be applied from another program.

COURSE DESCRIPTIONS

Course credits are shown in parenthesis, e.g., (3 credits), following the course title. Credits are based on class contact (lecture) hours unless otherwise stated. Lecture courses comprise 1 credit for every 15 hours of face-to-face, 1 credit for every 30 hours of laboratory, and 1 credit for every 45 hours of practicum/internship. All courses are lecture courses unless otherwise indicated.

ACCT 101: Principles of Accounting (3)

Prerequisite: None

This course is an introduction to accounting concepts and procedures for an organization. The emphasis is on the accounting cycle as well as the recording, summarizing, and interpretation of accounting information.

ACCT 305: Accounting Information Systems (3)

Prerequisite: ACCT 101 Principles of Financial Accounting

This course focuses on the design and analysis of automated accounting systems for businesses. It includes the examination of payroll, receivables and payables, charts of accounts, and accounting reports, as well as internal control and security issues.

BIOL 102: Introduction to Biology (3)

Prerequisite: None

This course will provide you with fundamental knowledge of the core concepts of biology and their applications to everyday life. Biology, the science of life, concentrates on the structure, function, distribution, interactions, patterns, and energy of living organisms. The core concepts discussed in this course are organized into three core areas: cells, genetics, and animal structure. We approach this course by (1) engaging students by relating biology content to their lives and the greater society; (2) helping students understand the process of science by teaching critical thinking skills that can be used in everyday life; and (3) demonstrating how biology's broader themes – such as nutrition and digestion, and the relationship of structure to function – serve to unify the entire subject.

BUSS 110: Introduction to Business (3)

Prerequisite: None

This course is an introduction to the functions of business and management strategies in the areas of marketing, human resources, finance, and technology. Real-world cases are discussed to highlight the business practices of organizations that students can relate to. Course activities involve students in writing, investigating, problem-solving, demonstrating, and reporting. The emphasis is on the basic principles and practices of businesses. This course is interactive and includes hands-on activities and group discussions.

BUSS 120: Principles of Management (3)

Prerequisite: None

This course helps students examine the theory, techniques, and applications of management systems. Planning, organizing, leading, and controlling are issues addressed. Topics include environmental influences, organization design and structure, motivation, total quality management, ethics, production, and international Management.

BUSS 130: Principles of Marketing (3)

Prerequisite: None

This course helps students understand and appreciate the marketing concepts; how to identify, understand and satisfy the needs of customers and markets; identify the marketing mix components; explain the environmental factors which influence consumer and organizational decision-making processes; outline a marketing plan; and interpret marketing research data to forecast industry trends and meet customer demands.

BUSS 155: Seminar I (1)

Prerequisite: None

This course introduces personal skills, talents, abilities, study habits, research methodology, and other soft skills to help students succeed in their undergraduate studies. Students will also be assisted in reviewing the fundamental courses they have taken so far to determine which specialization they are deciding to choose in their degree program.

BUSS 200: Legal Aspect of Business (3)

Prerequisite: None

The legal system and business policies and practices are closely related. In order to succeed in business, it is essential to understand the application of the legal environment. This course is intended to introduce students to a broad range of legal

issues that impact business, including the sources of United States law and the key areas of law relevant to business. The course teaches students to think broadly about business and the rule of law.

BUSS 220: Business Ethics and Corporate Social Responsibility (3)

Prerequisite: None

This course helps students understand business philosophy, which stresses not engaging in activities that cause environmental pollution and / or exhausting finite world resources; the moral principles and standards that guide behavior in a business environment; focusing on wider social issues rather than merely focusing on the company's profit margins and exploring the ethical considerations that guide and inform business decisions and strategies. Students will also learn the concept of Corporate Social Responsibility (CSR) to understand and apply ethics from social, economic, and environmental perspectives.

BUSS 242: Principles of Finance (3)

Prerequisite: ECON 101 and ACCT 101

This course provides an introductory survey of the field of finance. This course examines the agents, instruments, and institutions that make up the financial system of the modern economy, such as bonds, the stock market, derivatives, and the money market. Additionally, common concepts and tools of financial analysis are introduced, including present discounted value, option value, and the efficient markets hypothesis. The recent application of psychology to financial markets (called behavioral finance) is also discussed. Students are equipped with the background and tools they need to make financial decisions with greater skill and confidence. We will learn how insights from academic finance can inform and improve students' individual investing decisions.

BUSS 280: Introduction to Statistics (3)

Prerequisite: None

BUSS 280 is an introductory course in statistics designed to provide students with the basic concepts of data analysis and statistical computing. Topics discussed include displaying and describing data, the normal curve, regression, probability, statistical inference, confidence intervals, and hypothesis tests with applications in the real world. The main objective is to provide students with pragmatic tools for assessing statistical claims and conducting statistical analyses.

BUSS 290: Introduction to Business Analytics (3)

Prerequisite: BUSS 280

In today's competitive world, quantitative analysis is an essential tool for business decision-making. The objective of this course is to introduce students to basic statistical and mathematical methods and models for solving business problems and making decisions. The course will provide students with hands-on skills in the application of various data analytical tools.

BUSS 300: Organizational Theory & HR Management (3)

Prerequisite: None

This course will introduce students to individual, group, and organizational issues that affect business organizations and, more importantly, focus on issues that influence job performance and organizational commitment. Topics such as motivation, organizational justice, individual differences, team dynamics, leadership, and organizational culture will be discussed.

BUSS 306: Communities of Practice (3)

Prerequisite: None

A Community of Practice (CoP) is a collection of individuals who share a deep passion and drive for a particular problem, topic, or concern to combine and further their collective knowledge to cultivate and foster their work. While CoPs are specifically not organizations, the need for businesses and organizations to further their internal learning and development is clearly a benefit to the organization. This course examines CoPs within organizational contexts as a means of helping the institution to become stronger as a learning organization. Students will develop a project over the semester analyzing the community/communities of practice within an organization with a focus on improving the organization's capacities.

BUSS 320: Introduction to Project Management (3)

Prerequisite: None

This course introduces the fundamental concepts and principles of project management practice from the standpoint of the manager, who must organize, plan, implement, and control non-routine activities to achieve schedule, budget, and performance objectives. Topics include project life cycles, project organization, project charters, work breakdown structures, responsibility matrixes, as well as basic planning, budgeting and scheduling systems. Planning and control methods such as PERT/CPM, Gantt charts, and the Earned Value management system are also covered.

BUSS 325: Project Management Systems (3)

Prerequisite: None

Students who enroll in this course must possess and demonstrate appreciable pre-knowledge of the fundamental concepts, and principles of project management. This course therefore proceeds with intermediate levels of work generally conducted in the practice of project management. Students will explore the strategic decision-making processes for the creation of a project charter or work order. All lectures, discussions, and student assignments shall be directed to reinforce how a project is actually conducted and applied to create the value proposition desired by organizational stakeholders.

BUSS 327: Leading Project Management Operations (3)

Prerequisite: None

Students who enroll in this course must possess and demonstrate appreciable pre-knowledge of the fundamental concepts and principles of project management. This course proceeds with intermediate levels of work generally conducted in the practice of project management. Students will explore the strategic decision-making processes for the creation of a project charter or work order. All lectures, discussions, and student assignments shall be directed to reinforce how a project is actually conducted and applied to create the value proposition desired by organizational stakeholders.

BUSS 328: Foundations of Data and Information Management (3)

Prerequisite: BUSS 290

The course provides students with foundations of key concepts for establishing a comprehensive data management system and strategy for a large organization, ensuring that its operational and financial needs are efficiently, effectively, and securely addressed. The course will emphasize real-case scenarios companies face when addressing global operational and analytical data challenges. This course will also address current trends in managing business structured data as organizations move to cloud-based computing services.

BUSS 329: Organizational Behavior (3)

Prerequisite: None

This course helps students understand and appreciate human behavior in organizational settings, interface between human behavior and organization, study the ways people act within groups, and apply them to make businesses operate more effectively. This course focuses on improving productivity, quality, and assisting managers in designing more positive organizations.

BUSS 333: Managing Behavior and Organizations (3)

Prerequisite: None

This course focuses on how people behave in organizations and groups and how managers use concepts and principles of organizational behavior for effective management. Topics include leadership, motivation, organizational culture, and roles within groups.

BUSS 338: Business Data Visualization (3)

Prerequisite: BUSS 290

In this course, students will be able to design and create data visualization by using available or their own data derived from primary or secondary sources. The learning process includes data collection, organizing, modeling, and creating various forms of data visualizations, graphics, and dashboards. Students will also learn, evaluate and demonstrate the effectiveness of visualization in business decisions. Students will also be challenged to think critically by reading current and past published papers and real business visualization works. Students will create their own data visualizations and presentations.

BUSS 342: Human Resource Management (3)

Prerequisite: None

This course examines various principles, best practices, and current challenges businesses are facing related to attracting, selecting, motivating, and keeping the most talented organizational members in today's competitive environment. The course focuses on human resource management strategy, organizational staffing, employee and labor relations, and organizational safety and security. Emphasizes current legal considerations and issues.

BUSS 349: Internship in Organizational Development (3)

Prerequisite: None

Credit Hour Breakdown: 135 hours of internship

This course helps students understand the key concepts of organizational development theories, such as organizational climate, organizational culture, and organizational strategies.

BUSS 351: Business Development (3)

Prerequisite: BUSS 110

This course helps students understand the ways and means of developing business. It encompasses understanding the economic reality, explaining current trends and issues in today's environment, and the starting point for entrepreneurial activities.

BUSS 362: Business Consulting (3)

Prerequisite: BUSS 110

This course is designed to provide an initial overview of the consulting profession with a subsequent emphasis on organization consulting issues. Efforts will be placed on developing proficiencies in a range of skills required to practice consulting. The course is relevant to those specifically interested in consulting careers and whose current or future jobs involve staff consulting or line management using consultants.

BUSS 364: Negotiation Essentials (3)

Prerequisite: None

This course creatively utilizes cases, role plays, and scenarios to help build skills and understanding of negotiations and organizational conflict. Students will work individually and in team negotiations, engaging in discussions and accessing resources to enhance their ability to navigate complex situations. Students will experience active learning through case analyses and readings, as well as experiencing real-world negotiations from a wide range of contexts. These scenarios range from simple two-party negotiations to complex multi-party negotiations and will support the development of skills, strategies, and tactics that are applicable in work environments as well as in all facets of life. Students will learn to communicate more effectively, recognize and develop alternatives, overcome barriers, and utilize existing strengths in each class.

BUSS 365: Entrepreneurial Ventures (3)

Prerequisite: None

In this course, students will learn practical concepts, entrepreneurial insights, and comprehensive resources that are essential both now and in the future. It also provides the background one needs to create, manage and analyze a business plan.

BUSS 366: Entrepreneurship and Innovation (3)

Prerequisite: None

This course helps students understand the practices and processes that are used to manage innovation effectively; understand innovation issues from the entrepreneur and manager's perspective; understand the management of innovation from a strategic perspective and the relationship between processes and structures for innovation in firms, the strategies for exploitation and the environment in which these must be designed e.g., competition, rate of technological change, sources of innovation.

BUSS 370: Business Change Management (3)

Prerequisite: None

This course offers an opportunity to discuss and apply principles, tools, and methods to successfully implement growth and sustainability for an organization. The objective of this course is to deliver appropriate knowledge on the process of change management. Topics discussed in this course will include strategies to design, implement, communicate and sustain change; techniques for mapping and assessing when and where change is needed in an organization; organizational development techniques; as well as barriers and enablers to fostering an environment conducive to change and innovation.

BUSS 371: Sustainable Business Innovation and Management (3)

Prerequisite: None

The purpose of this course is to provide students with practical information on the growing frontier of innovation and entrepreneurial activity at the nexus of business and natural systems. The term sustainable business refers to competitively advantageous strategies and practices that firms adopt to grow revenues, cut costs, improve market share, enhance brands, and redesign products and processes to reduce or eliminate adverse environmental and health impacts. Students will study the trends and science driving the growing demand for clean technology and lifecycle product designs. Students will look at the drivers of corporate innovation, strategic shifts, and new markets; learn skills to identify market opportunities; and understand the tools, concepts, and frameworks used by companies currently pursuing sustainable business opportunities.

BUSS 373: Change Management and Leadership (3)

Prerequisite: None

This course helps students gain practical, real-world understandings of several dimensions of leadership, such as the nature of new realities, how one can improve insights into them, and how one can identify and overcome resistance to change. As the world changes, our leadership styles and abilities must also adapt and change. In this course, we will examine the change environment and why organizations often fail at implementing change because understanding the pathologies of

change will provide the foundation that we will build upon to learn about the strategies and forces we need to understand to help us drive successful change.

BUSS 374: Entrepreneurial Marketing (3)

Prerequisite: None

In this course, students will be introduced to and trained in various entrepreneurial marketing concepts and applications that will increase the likelihood of successful business ventures.

BUSS 375: Corporate Entrepreneurship (3)

Prerequisite: None

In this course, students will learn how to develop and grow an organization by designing the culture, structure, strategies, and policies that encourage & support internal entrepreneurial ventures.

BUSS 376: Social Capital Innovations (3)

Prerequisite: None

This course helps students understand the theories of social capital, social structure, and societal transformation. It also sheds light on the impact of social capital on investment opportunities and growth.

BUSS 377: Strategic Management (3)

Prerequisite: None

The course focuses on the analyses, decisions, and actions an organization undertakes in order to gain and maintain a competitive advantage. The extensive use of case studies focuses students on diagnosing problems and opportunities, developing alternative courses of action, and implementing organizational leadership and strategic management.

BUSS 378: Asset Management and Organization (3)

Prerequisite: None

This course helps students understand principles and analytics of asset management. Students interested in a career in asset, portfolio, private wealth, endowment, or pension fund management will find this course very useful. A fundamental understanding of the issues in asset management will also be helpful in other areas of finance, such as investment banking, insurance, accounting, and personal finance.

BUSS 379: Learning Organizations (3)

Prerequisite: None

This course helps students understand learning organizations, its importance, and the emerging need for learning organizations.

BUSS 380: Environmental Ethics and Compliance (3)

Prerequisite: None

This course explores the legal and regulatory structure involving the protection of the environment. Successful completion of this course is a crucial element in achieving basic competency in environmental science, policy, and planning. By its nature, the environmental compliance field is based on jargon, specialized definitions, seemingly illogical structures, and rote memorization. Nevertheless, understanding the process by which to find, interpret, and apply regulations will provide you with valuable professional skills. In this course, students will go beyond mere factual recall of definitions and regulations. Students are expected to understand the requirements sufficiently to apply them to specific applicable-based circumstances.

BUSS 381: Environmental Politics and Policy (3)

Prerequisite: None

Environmental problems are now at the forefront of political discussions. This course examines the law, politics, and policy of global environmental issues, including energy, climate, biodiversity, food, and water. The course aims to provide a broad view of the key concepts, actors, and issues in global environmental politics. It demonstrates the complexities of both the nature of the problems and the solutions. The proliferation of global institutions and international actors and the absence of central enforcement mechanisms are hallmarks of addressing environmental problems. We consider the roles of government, the private sector, NGOs, the community and consumers and other actors in environmental governance. At the end of the program, students give an oral presentation and submit a medium-length paper communicating their research findings and analysis.

BUSS 383: Sustainable Energy Systems (3)

Prerequisite: None

This course examines the production and consumption of energy from a systems perspective. Sustainability is examined by studying global and regional environmental impacts, economics, energy efficiency, consumption patterns, and energy

policy. First, the physics of energy, and energy accounting methods are introduced. Next, the current energy system that encompasses resource extraction, conversion processes, and end-uses is covered. Responses to current challenges such as declining fossil fuels and climate change are then explored: unconventional fossil fuels, carbon sequestration, emerging technologies (e.g., renewable sources: biomass, wind, and photovoltaics; fuel cells), and end-use efficiency and conservation.

BUSS 385: Seminar in Technological Change and Productivity (3)

Prerequisite: None

This seminar course seeks to deepen the understanding of the impact of rapid technological change on sustainable development, especially the consequences for the central principle of the 2030 Agenda of “leaving no one behind” and the implications for the science, technology, and innovation community. It allows students the opportunity to look at the role of science, technology, and innovation (STI) policy vis-à-vis sustainability. It helps identify strategies, policies, and immediate actions to use science, technology, and innovation to empower people, especially those who are vulnerable, and ensure inclusiveness and equality.

BUSS 387: Policy Making in a Global Context (3)

Prerequisite: None

This course examines the enduring and changing nature of governance from both theoretical and practical perspectives. It employs classic texts and extensive case studies to demonstrate how policymakers seek to formulate and implement public policy effectively and legitimately in the face of domestic skepticism, evolving state structures, and a fast-shifting global context to serve the public good. How does the modern state try to fulfill the traditional functions of the state, and what are some of the challenges to its traditional roles? How can a state governance best work with and mobilize civil society, non-governmental organizations, and institutions of global governance? In short, what does it mean to govern well in the 21st century- and how does that translate into practical advice for policymakers.

BUSS 388: International Economics and Politics (3)

Prerequisite: None

This course introduces international economics and politics to understand how the world works politically and economically and aims to teach comprehensive international relations. The course explains the interactions between markets and politics, the influence of markets on politics, and the influence of policy on markets. It helps analyze contemporary issues from both political and economic points of view. By the end of the course, students should have a fundamental understanding of the major theoretical approaches and key conceptual and substantive issues. The course covers popular topics such as territorial disputes, democracy, economic growth, national security, the politics of trade, monetary relations, finance, economic development, and globalization in international economics and politics.

BUSS 390: Seminar II (1)

Prerequisite: BUSS 155

This course provides an opportunity for students to utilize their academic experience either through a research paper or a project with their main focus on continuing their graduate studies or applying their skills in real-world cases through employment. Students will present their research findings in a seminar.

BUSS 400: Business Decisions and Modeling (3)

Prerequisite: BUSS 350

In this course, students will learn how to evaluate data in context, develop decision models, interpret data trends, and receive an overview of decision support management techniques such as predictive modeling, risk assessment and optimization, and analytics algorithms, which will set the stage for more advanced study in subsequent courses.

BUSS 410: Contracts, Procurement, & Supply Chain Management Systems (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 510.

This course examines processes through which goods and services are acquired in the project management environment. Topics include contract and procurement strategies, legal issues, contract pricing alternatives, technical, management, and commercial requirements, RFP development, source selection, invitations to bid, bid evaluation, risk assessment, and contract negotiation and administration. By the end of the course, students will have a broad overview and understanding of the procurement cycle and how it relates to contracts, projects, and management.

BUSS 415: Risk Management in Project Management (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 514.

This course exposes students to a variety of ways to identify, analyze, and mitigate the full range of project risks. The course also explores the six risk management processes as outlined in the PMBOK Guide: Risk Management Planning, Risk

Identification, Qualitative Risk Analysis, Quantitative Risk Analysis, Risk Response Planning, and Risk Monitoring & Controlling. Using a practitioner approach, students learn risk management techniques by applying them to problems raised in case studies.

BUSS 418: Merger and Acquisitions (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 519.

The goal of this course is to familiarize students with the analytical and real-world tools necessary for effective evaluation and implementation of Merger and Acquisition (M&A) process and implementation.

BUSS 419: Venture Capital (3)

Prerequisite: BUSS 362

Special Course Notes: This course is offered as an over/under with BUSS 520.

This course helps students understand the entire venture capital cycle; that is to say; the financial and operational activities of venture capital; assessing opportunities; valuing ventures; negotiating and structuring investments; managing investments, and exiting. Students will gain skills, confidence, and strategies to maximize venture capitalists' investment return in emerging businesses and minimize potential financial risks.

BUSS 426: Engaging Consumers in a Digital World (3)

Prerequisite: BUSS 130

In this course, students will learn how businesses examine how organizations capitalize on social media and consumer-to-consumer interactions to support their marketing efforts. Students will gain the theoretical knowledge needed to create engaging content for platforms such as Facebook, Instagram, Twitter, and Snapchat, as well as the ability to identify influencers, deliver content to a targeted audience, and measure the success of the efforts.

BUSS 428: Internship in Project Management (3)

Prerequisite: None

Credit Hour Breakdown: 135 hours of internship

This course provides major field experience for the student candidate of project management education. As a practicum, the goal of this course is to provide an opportunity for the student to be exposed to project management work at the ground level. Presumably, the student comes to this course having thoroughly understood all pertinent information of the knowledge domain, the project management framework, processes, theories, techniques, etc., this course therefore allows the student to observe, participate in, and test out how a project work is initiated, planned, implemented, validated for quality and performance, and eventually closed.

BUSS 429: Contemporary Issues in Business Process Optimization (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 529.

This course helps students understand a process-oriented view of the flow of materials, information, products, and services through and across organizational functions. It also helps to enhance their knowledge of how to carefully analyze, document, and continuously assess the efficiency and effectiveness of business processes to minimize cost and maximize value creation.

BUSS 431: Leading Organizations with Positive Psychology (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 444.

In this course, students will learn the professional leadership qualities that deliver personal, interpersonal, and organizational success. They will also learn positive subjective experiences and traits in the workplace and positive organizations, and its application to improve the effectiveness and quality of life in organizations.

BUSS 432: Organizational Performance Measure (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 532.

This course focuses on the fundamentals of organization performance measurement. Students in this course will gain knowledge in how to select appropriate measures, implement a performance management system, and use performance measures in managing excellence in an organization. In addition, the course will highlight the need for leadership and management acumen to ensure success in achieving meaningful, significant, and lasting results.

BUSS 433: Emergent Roles of Project Management in Business (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 533.

This course helps students understand the method of using emergence to elicit local knowledge and integrating that knowledge to manage projects more effectively. It also helps students appreciate and value planning and implementation of a project interface management program.

BUSS 435: Management and Ethical Leadership (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 535.

The purpose of this course is for students to acquire knowledge about leadership to lead and follow more effectively and ethically. The course will also assist students with the journey of self-discovery, a journey that lasts a lifetime if you choose to lead. Students will learn new ideas about leadership, strengthen important leadership skills, and discover the hidden potential for leadership. Further, students will learn the value of good followership and its importance in the complicated interaction between leaders and followers. There are many more opportunities to be a follower than a leader, especially early in life. The course also explores how to recognize bad leaders and what to do or not to do as an exemplary follower. Students are encouraged to acquire greater sensitivity to the ethical dimensions of leadership. Learning to recognize the importance of questions of purpose and to understand leadership as a form of service to others is an important insight and a balance to one's personal ambitions.

BUSS 437: Talent Acquisition and Development (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 537.

In-depth exploration of employee skills, motivation, talent acquisition and development, with emphasis on organizational effectiveness. The course will also explore how the pace and volume of recent change can bring increased attention to the ways that human resource development (HRD) activities can be applied; globalization a growing base of theory, research, and practical experience to support HRD efforts.

BUSS 439: Managing in a Digital World (3)

Prerequisite: None

This course helps students understand the new digital economy; economic value of digital economy; manage to deliver in the digital world; quantitative reasoning; information technology and SMAC (social media, mobile, analytics and cloud computing) revolution. This course also helps students to apply the knowledge and run a business better in today's environment and transform the nature of business in the future.

BUSS 440: Business Intelligence and Predictive Analysis (3)

Prerequisite: None

This course provides students with key methods of predictive analytics and advanced BI concepts for business decision-making contexts. Using real business cases and data, the course illustrates the application and interpretation of these methods. The course will cover R Programming, trends in predictive analytics, and application programs that can be deployed within the business enterprise.

BUSS 445: Human Resource Analytics (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 545.

In this course, students will be introduced to the importance of analytics in HR. Students will learn and apply an analytic and process model using Excel and Power BI to drive the most important data methods and techniques for organizing, analyzing, and presenting for business decisions.

BUSS 447: Legal and Regulatory Environment of Business (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 547.

In this course, students will be introduced to the legal and regulatory environment of business, emphasizing why legal duties are placed on the business community, and how managers should appropriately respond to them. The course covers legal institutions, constitutional law, common law, and public law.

BUSS 448: Marketing Analytics (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 548.

In this course, students will study various tools for generating marketing insights from data in market segmentation, targeting and positioning, satisfaction management, customer lifetime analysis, and customer choice, as well as product and price decisions using conjoint analysis and search analytics. This is a hands-on course based on the Marketing Engineering

(Enginius) approach and Excel software that will be applied to actual business situations. Students will develop a market analytics project by collecting and analyzing primary or secondary data.

BUSS 449: Contemporary Issues in Organizational Development (3)

Prerequisite: Minimum of 90 credits

Special Course Notes: This course is offered as an over/under with BUSS 544.

This course will introduce students to new practices and issues emerging in organizational development (OD) and how those changes contribute to the effective practice of OD. Students will read and discuss various case studies to practically understand various contemporary OD business-related issues.

BUSS 450: Research and Analytical Skills (3)

Prerequisite: None

This course helps students understand and apply research and analytical skills in collecting, analyzing, and interpreting data in order to make sound business decisions. Students will gain insight relative to quantitative, qualitative, and mixed model research methods.

BUSS 451: Development and Globalization (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 550.

This course examines processes of globalization and development by highlighting various debates over the positive and negative impact of globalization on political, economic, and social development. Throughout the semester, we will grapple with a number of questions. First, who are the winners and losers of globalization? Who shapes the dominant values of and rationale for development and globalization? We will consider these 'who' questions in terms of individual, society, and country levels. Second, how do globalization and development affect each other? Does globalization promote development? If so, which countries are beneficiaries in what way? Not only will we explore the approaches to development and their outcomes, but we will also talk about how this has impacted the environment and global health. These discussions will be accompanied by comparative perspectives on the development experiences of countries in different regions of the world. In order to produce more comprehensive and compelling explanations, we will have to go up and down levels of aggregation in our readings, class discussion, and debates, from the local to the global and back again.

BUSS 453: Economics of Development (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 553.

This course covers macro and micro development models and issues. The course covers the larger array of development theories, models and the different aspects of economic development. The course explores topics related to inequality, development models, and the different dimensions related to economic development like institutions, trade, education, agriculture, and international aid. By doing so, the course indicates how development efforts bring adequate nutrition, health services, and education.

BUSS 457: International Perspectives in Substantiable Business (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 557.

Sustainability in international business is more than simply adopting sustainable practices--it has the potential to help companies gain a competitive advantage. With the growing globalization of social and economic activities worldwide, environmentalism has become a fundamental component of business practices. Many international companies now out-compete their business rivals by implementing robust environmental stewardship and corporate social responsibility programs, engaging stakeholders by making these efforts measurable and visible. This course examines the global business environment in the context of sustainability and explores the challenges and opportunities that the new movement toward sustainability offers multinational enterprises and the countries in which they do business.

BUSS 459: Internship in Sustainable Business (3)

Prerequisite: None

Credit Hour Breakdown: 135 hours of internship

This course provides students an opportunity to gain knowledge and skills from a planned work experience in the student's chosen career field. The course outcome is designed in cooperation with the student, the supervisor, and the internship office. Internship placements are directly related to the student's program of study and provide learning experiences not available in the classroom setting. Internships provide entry-level, career-related experience and workplace competencies that employers value when hiring new employees. Internships may also be used as an opportunity to explore career fields.

BUSS 461: Sustainable Business Metrics and Reporting (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 560.

The course will give students a comprehensive understanding of sustainability in organizations from an accounting perspective. It walks students through the steps of performing a sustainability assessment and aims to develop them into financial analysts. By the end of the course, students will be able to analyze, create, and audit sustainability reports.

BUSS 462: Product Design and Development (3)

Prerequisite: BUSS 130

Special Course Notes: This course is offered as an over/under with BUSS 562.

In this course, students will learn the theories, technologies, and practical applications of product design, development, and management for long-term success and survival in an intensively competitive global market.

BUSS 463: Contemporary Issues in Sustainable Business (3)

Prerequisite: Minimum of 90 credits

Special Course Notes: This course is offered as an over/under with BUSS 563.

This course introduces the students to current thinking and research on contemporary issues in business and provides an opportunity to develop a foundation for their future major by researching a contemporary business issue in a major business sector. Students will be expected to read, understand, and evaluate research and analysis on this issue and demonstrate an understanding of how research and analysis affect proposed solutions or responses to the issue.

BUSS 465: Social Media Marketing (3)

Prerequisite: BUSS 130

Special Course Notes: This course is offered as an over/under with BUSS 565.

In this course, students will be introduced and trained about the most effective techniques for identifying targeted marketing on social media platforms, with emphasis on creating customer bases that represent well-developed online market segments for a company.

BUSS 478: Business Risk Analysis and Optimization (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 578.

This course teaches students practical sustainable business consulting practices. Students will learn business practices geared towards improving the communities in which they operate. It will also expose them to consultancy work in different areas of business.

BUSS 479: Data Prediction and Business Optimization (3)

Prerequisite: None

This course provides students with analytical methods for predicting outcomes and future trends from existing data to help discover new relationships; to evaluate outcomes for business optimization (e.g., revenues, profits, market share, probability of making a sale, probability of losing a client, etc.) based on other historical data predictors (e.g., marketing expenditures, quality assurance investments, sales force size, etc.).

BUSS 485: International Strategy (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 585.

The course focuses on the analyses, decisions, and actions that an organization undertakes to gain and maintain a competitive advantage. The extensive use of case studies focuses students on the diagnosis of problems and opportunities as well as the development of alternative courses of action and implementing organizational leadership and strategic management.

BUSS 486: Dilemmas and Debates in Entrepreneurship (3)

Prerequisite: None

In this course, students will learn the concept of a dilemma: an argument presenting two or more equally conclusive alternatives and vigorous debate and ultimately solutions.

BUSS 487/587: Contemporary Issues in Applying Business Analytics (3)

Prerequisite: Minimum of 90 credits

Special Course Notes: This course is offered as an over/under with BUSS 587.

This course will introduce students to new changes, new practices, and issues emerging in Business Analytics (BA), as well as the way those changes contribute to the effective practice of BA. Students will read and discuss various case studies to practically understand contemporary BA issues.

BUSS 488: Internship in Business Analytics (3)

Prerequisite: None

Credit Hour Breakdown: 135 hours of internship

This course provides students with an opportunity to gain knowledge and skills from planned work experience in the Data Analytics specialization. In this course, students will be exposed to a real-life business problems and the application of theoretical and quantitative analytical skills to recommend solutions to decision-makers. The entire course outcome is designed in cooperation with the student, the professor, the program chair, and the university's career services department. Internships provide entry-level, career-related experience, as well as marketable skills and competencies that are highly demanded by future employers.

BUSS 490: Consulting Project and Seminar (4)

Prerequisite: None

This course provides students with a hands-on understanding and experience related to their degree. The objective is to let students access information that will help them complete a semester-wide individual project that produces practical skills and concepts used throughout their program. Students develop their projects under the direct supervision of the faculty advisor of the course. Students are required to attend as many meetings/seminars as needed as specified by the faculty advisor.

BUSS 499/599: Contemporary Issues in Entrepreneurship (3)

Prerequisite: Minimum of 90 credits

In this course, students will learn the theory of entrepreneurship and its practical implementation and contemporary issues in entrepreneurship.

BUSS 501: Descriptive Analysis and Data Visualization (3)

Prerequisite: None

Every day, there is a large amount of data produced. From this large volume of data, we can extract some interesting insights that would help decision-makers make some important decisions. This course covers topics including the genomics of massive data, statistical analysis, concepts, and methods.

BUSS 502: Business Decision and Predictive Analysis (3)

Prerequisite: None

This course is intended for business students with the goal of providing key methods of predictive analytics and advanced BI concepts, helping business decision-making using methods of predictive analytics, and demonstrating the application and interpretation of these methods. The course will use R/python Programming languages to understand the trends in predictive analytics that can be deployed within the business enterprise.

BUSS 503: Business Intelligence Tools and Techniques (3)

Prerequisite: None

This course provides a conceptual and practical overview of analytical tools, techniques, and practices used to support data-driven decision-making in an organization. It is designed to address real business analytical problems and equips learners with practical skills.

BUSS 504: Advanced Business Analytics (3)

Prerequisite: BUSS 503

T. The amount of data generated from different sources is becoming important to generate some meaningful insights. In this course, advanced level descriptive and predictive models are used to analyze business problems by simulating big data. Statistical analysis and visualizations methods are also applied to undertake supervised and unsupervised learning of the analytical models. The value derived from these advanced models will fundamentally unlock the hidden information gaps existing in the economic choices of consumers and firms.

BUSS 506: Leadership in Organization (3)

Prerequisite: None

This course examines leadership in organizations based on the research literature, where selected approaches to leadership are discussed and assessed on how they can be used to improve leadership in real situations.

BUSS 507: Leadership in Development (3)

Prerequisite: None

This course examines the leadership development process and the elements that comprise leadership development efforts. It includes focusing on the leader, follower, and the context in which they have been, are, and will be interacting.

BUSS 509: Social Entrepreneurs (3)

Prerequisite: None

This course enables learners to be innovative in managing commercial enterprises in a socially responsible manner. Today's social entrepreneurs and innovators are drowning in dos and don'ts about how to innovate. Today's business is challenged by many factors, more specifically when business is challenged by social, financial and sustainability issues. Skills gained from this course would help social entrepreneurs to use the latest methodologies, tools, tasks and tactics to achieve the right goals in changing the business status quo.

BUSS 510: Contracts, Procurement, & Supply Chain Management Systems (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 410.

This course examines processes through which goods and services are acquired in the project management environment. Topics include contract and procurement strategies, legal issues, contract pricing alternatives, technical, management, and commercial requirements, RFP development, source selection, invitations to bid, bid evaluation, risk assessment, and contract negotiation and administration. By the end of the course, students will have a broad overview and understanding of the procurement cycle and how it relates to contracts, projects, and management.

BUSS 513: Quantitative Analysis of Sustainable Development (3)

Prerequisite: None

This course is designed to provide a general overview of quantitative tools used to analyze sustainability. In addition, this course will explore tools such as risk assessment and other metrics to understand different business problems. Additionally, this course will delve into issues surrounding greenhouse gas quantification, discussing the core quantitative methods for measuring emissions while also touching on protocol and policy frameworks that enable the application and verification of these measurements.

BUSS 514: Risk Management in Project Management (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 415.

This course exposes students to a variety of ways to identify, analyze, and mitigate the full range of project risks. The course also explores the six risk management processes as outlined in the PMBOK Guide: Risk Management Planning, Risk Identification, Qualitative Risk Analysis, Quantitative Risk Analysis, Risk Response Planning, and Risk Monitoring & Controlling. Using a practitioner approach, students learn risk management techniques by applying them to problems raised in case studies.

BUSS 516: Sustainable Business and Financing (3)

Prerequisite: None

This course provides insight into the sustainability challenges and the accompanying link to finance different sustainability options. Traditional finance systems have failed to provide a prudent solution to problems related to sustainability financing. Because it primarily focuses on financial return and regards the financial sector as separate from the society of which it is part and the environment in which it is embedded. As a result, sustainable finance options need to be targeted, and a financial strategy that considers social and environmental returns in combination should join the market.

BUSS 517: Digital Social Innovations (3)

Prerequisite: None

This course intends to introduce learners to the strategies and processes of social innovation and social change. Learners will gain knowledge of strategies of change, including the innovative activities of social and political entrepreneurs, activists, organizations, and social movements. As part of this course, students will examine several individuals and groups who have catalyzed important positive social change through different organizational platforms –in the market, in government, within the nonprofit sector, and increasingly in the space between these three sectors. Throughout the course, students will examine social innovation through case studies, best practice analyses, and relevant readings.

BUSS 518: Merger and Acquisitions (3)

Prerequisite: None

This course is designed to help students understand the analysis and design of M&A deals. It covers best practices in the field of M&A and highlights how they can be applied.

BUSS 519: Venture Capital (3)

Prerequisite: None for new Graduate students; for Undergraduate students must have taken BUSS 362

Special Course Notes: This course is offered as an over/under with BUSS 419.

This course sheds light on students' understanding of the venture capital process, from raising funds and structuring investments to assessing exit pathways. Students who want to pursue a career in venture capital will find this course especially useful.

BUSS 521: Human Behavior and Learning in Organizations (3)

Prerequisite: None

The study of organizational behavior encompasses the behavior of individual organization members and groups within organizations; the myriad of organizational processes, dynamics, and conditions of the organization as a whole; and the ways in which all these factors interrelate. This course helps students develop conceptual, diagnostic, and personal skills for dealing with human interaction in complex organizations with diverse workforces. We will take a systems approach to the material, finding in systems theories the common framework that links organizational processes and dynamics at the individual, group, and organizational levels. We will compare behavioral theories and deal with a range of topics, including individual development and motivation, group and team development and dynamics, communication, leadership, conflict, power/politics, culture, diversity, creativity, ethics, decision-making, and organizational psyche.

BUSS 522: Organizational Change (3)

Prerequisite: None

This course explores theories and concepts which explain how to gain acceptance and buy-in for change management initiatives within organizations. If management and employees accept these changes, the impact will be beneficial and less disruptive to daily operations. Whether the change is as small as implementing a new financial system or as big as a plant move across the country, the implementation process necessitates planning and communication to ensure success.

BUSS 527: Emergent Roles of Project Management in Business (3)

Prerequisite: None

This course presents and sensitizes students to the changing dynamics in the practice of project management into the foreseeable future. It exposes students to a variety of ways to identify. The premise is that the practice of business – particularly project management will respond to changes in the marketplaces, which often are impacted by consumer and industry special needs, hence requiring different skills for project managers to deliver unique products and services in different modalities. Change management and appreciation of technology will play significant parts in this course. Using a practitioner approach, students will learn how new risks must be handled by the project management in h/her new assignments.

BUSS 529: Contemporary Issues in Business Process Optimization (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 429.

This course helps students understand the process-oriented view of the flow of materials, information, products, and services through and across organizational functions. It also helps to enhance their knowledge of how to carefully analyze, document and continuously assess the efficiency and effectiveness of business processes to minimize cost and maximize value creation.

BUSS 532: Organizational Performance Measure (3)

Prerequisite: None

This course introduces the student to key concepts and techniques to analyze, manage and improve organizational work and performance, with emphasis on the management of assets, resources, value creation, and funding, as well as the development of internal culture behavior and long-term sustainability. Students will understand how to create or develop strategic objectives and manage the implementation of programs and projects to attain outcomes, as well as supply chain processes for different industries and markets. Topics include Strategic management, Managerial Accounting Project Management, Risk, Marketing, and Quality management.

BUSS 535: Management and Ethical Leadership (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 435.

The purpose of this course is for students to acquire knowledge about leadership to lead and follow more effectively and ethically. The course will also assist students with their journey of self-discovery, a journey that lasts a lifetime if you choose to lead. Students will learn new ideas about leadership, strengthen leadership skills, and discover the hidden potential for leadership. Further, students will learn the value of good followership and its importance in the complicated interaction between leaders and followers. There are many more opportunities to be a follower than a leader, especially early in life. The course also explores how to recognize bad leaders and what to do, or not to do, as an exemplary follower. Students are encouraged to acquire greater sensitivity to the ethical dimensions of leadership. Learning to recognize the importance

of questions of purpose and to understand leadership as a form of service to others is an important insight and a balance to one's personal ambitions.

BUSS 537: Talent Acquisition and Development (3)

Prerequisite: None

This course provides an in-depth exploration of employee skills, motivation, talent acquisition and development, with emphasis on organizational effectiveness. In addition, the course explores the pace and volume of recent change and brings increased attention to the ways that human resource development (HRD) activities can be applied; globalization a growing base of theory, research, and practical experience to support HRD efforts.

BUSS 541: Principles and Practice of Human Resources (3)

Prerequisite: None

This course provides an in-depth exploration of the use of individuals to achieve organizational objectives; dealing with human resource matters face a multitude of challenges, ranging from a constantly changing workforce to ever-present government regulations, rights and responsibilities, a technological revolution, the world economy, global competition, that will lead to overall success of the organization.

BUSS 542: Strategic Change (3)

Prerequisite: None

Strategic Management is an integrative 'near-capstone' course that seeks to provide a comprehensive look at organizations. Although it will draw upon many of the business courses that you have been exposed to, it does go beyond merely tying together the various functional courses you have had. Using the fundamentals in various areas such as accounting, marketing, finance and management, operations, and management information systems, several contemporary theories and practices of organizations will be explored. Many notable topics such as environmental scanning, corporate response to environmental change and sustainability, strategic and ethical behavior, industry analysis, and globalization of businesses will be addressed.

BUSS 543: Finance for HR Professionals (3)

Prerequisite: None

This course helps HR students in acquiring a fundamental understanding of finance. Human Resource Professionals need to understand finance to collaborate and work well with company leadership and to persuade them to enact HR initiatives that increase employee productivity and drive organizational performance. Skills in finance are essential ones that help improve in promoting organizational goals and improve the bottom line. HR professionals will find this course very useful.

BUSS 545: Human Resource Analytics (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 449.

In this course, students will be introduced to the knowledge of why and how analytics are important in HR, as well as learn and apply an analytic and process model using Excel and Power BI to drive the most important data methods and techniques for organizing, analyzing, and presenting for business decisions. Students will be able to analyze real business human resource problems and submit recommendations helpful for decision-makers.

BUSS 549: Contemporary Issues in Organizational Development (3)

Prerequisite: None for new Graduate students; for Undergraduate students must have a minimum of 90 credits

Special Course Notes: This course is offered as an over/under with BUSS 449.

Contemporary Issues is devoted to studying the historical origins and development of domestic and foreign political and social problems confronting contemporary humanity. Possibilities include regional studies (ex. AIDS in Africa or the state-of-affairs in the Middle East), as well as issues of global concern such as North-South relations, environmental issues, the war on terror, world poverty, sustainable development, and global economic development. Specific topics to explore will be developed in conjunction with the students according to their interests and needs.

BUSS 544: Human Resource in Global Economy (3)

Prerequisite: None

This course sheds light on students' understanding of human resource management (HRM) more broadly across countries, cultures, institutions, and organizational types. This course helps students to explore and understand the key concepts and latest research behind the strategic management of people in organizations that operate in a global context.

BUSS 546: Organizational Lifecycles and HR Applications (3)

Prerequisite: None

This course provides an in-depth look at the traditional and present views of human resource management, as well as the challenges faced by human resource managers in the modern world while promoting employee engagement.

BUSS 547: Legal and Regulatory Environment of Business (3)

Prerequisite: BUSS 220

Special Course Notes: This course is offered as an over/under with BUSS 447.

The legal and regulatory environment of business, emphasizing why legal duties are placed on the business community and how managers should appropriately respond to them. The course covers legal institutions, constitutional law, common law, and public law.

BUSS 548: Marketing Analysis (3)

Prerequisite: None

In this course, students will study various tools for generating marketing insights from data in market segmentation, targeting and positioning, satisfaction management, customer lifetime analysis, customer choice, product and price decisions using conjoint analysis and search analytics. This is a hands-on course based on the Marketing Engineering (Enginius) approach and Excel software that will be applied to actual business situations. Students will develop a market analytics project by collecting and analyzing primary or secondary data. Students will be able to analyze real business marketing problems and submit recommendations helpful for decision-makers.

BUSS 551: Development and Globalization (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 441.

This course intends to provide a comprehensive overview of globalization and development. It examines processes of globalization and development through a comparative historical lens. The course gives particular attention to development processes in Asia, Africa, and Latin America. Questions about these processes will guide our inquiries towards globalization and development in these countries.

BUSS 552: HR Change Management (3)

Prerequisite: None

The course explores managing change in today's world with special emphasis on individual, team, and organizational levels. Students will engage in in-depth discussions on the issues that cause success or failures in change management and analyze ways to address resisters and promote active participants.

BUSS 553: Economic Development (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 453.

This course covers macro and micro development models and issues. The course will examine an array of development theories, models, and the different aspects of economic development. Course topics include inequality, development models, and the different dimensions related to economic development such as institutions, trade, education, agriculture, and international aid. By doing so, students will learn how development efforts bring adequate nutrition, health services, and education to communities.

BUSS 554: Human Resources Across Organizations (3)

Prerequisite: None

Students will develop an in-depth understanding of the evolution of human resources and how each of us can play a role in shaping its future. From leveraging policy to operationalizing culture to having fun with data, the course will focus on practical, actionable approaches to catalyze change – within the organization, career development, and the workplace at large.

BUSS 557: International Perspectives in Sustainable Business (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 557.

Sustainability in international business is more than simply adopting sustainable practices--it has the potential to help companies gain a competitive advantage. With the growing globalization of social and economic activities worldwide, environmentalism has become a fundamental component of business practices. Many international companies now out-compete their business rivals by implementing robust environmental stewardship and corporate social responsibility programs, engaging stakeholders, and making these efforts both measurable and visible. This course examines the global business environment in the context of sustainability and explores the challenges and opportunities that the new movement toward sustainability offers multinational enterprises and the countries in which they do business.

BUSS 558: Marketing Analytics (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 448.

In this course, students will study various tools for generating marketing insights from data in market segmentation, targeting and positioning, satisfaction management, customer lifetime analysis, and customer choice, as well as product and price decisions using conjoint analysis and search analytics. This is a hands-on course based on the Marketing Engineering (Enginius) approach and Excel software that will be applied to actual business situations. Students will develop a market analytics project by collecting and analyzing primary or secondary data.

BUSS 561: Sustainable Business Metrics and Reporting (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 461.

The course will give students a comprehensive understanding of sustainability in organizations from an accounting perspective. It walks students through the steps for doing a sustainability assessment and aims to develop them into financial analysts and enable them to understand sustainability reports and can create or audit them.

BUSS 562: Product Design and Development (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 462.

In this course, students will learn the theories, technologies, and practical applications of product design, development, and management for long-term success and survival in an intensively competitive global market.

BUSS 563: Contemporary Issues in Sustainable Business (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 463.

This course introduces the students to current thinking and research on contemporary issues in business and provides an opportunity to develop a foundation for their future major by researching a contemporary business issue in a major business sector. Students will be expected to read, understand, and evaluate research and analysis on this issue, and demonstrate an understanding of how research and analysis affect proposed solutions or responses to the issue.

BUSS 565: Social Media Marketing (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 465.

This course sheds light on students' understanding of the use of social media and social networks to market products and services, as well as ways to engage with existing customers and how to reach out to new customers. Students will also learn the different types of social media platforms.

BUSS 566: New Venture Management (3)

Prerequisite: None

This course sheds light on students' understanding of entrepreneurship that transform an idea into an effective and value-creating venture in the real world. In creating effective ventures, entrepreneurs not only bring together products/services and markets, but often also create the products and markets as part of the entrepreneurial process; that is, all ideas oriented towards the formation of a venture that creates value by bringing people and resources together. In this course, students will be exposed to a broad overview of key issues to consider in the entrepreneurial process.

BUSS 571: Introduction to New Ventures (3)

Prerequisite: None

Students in this course will learn concepts such as new venture creation; screening techniques that will address the new venture value proposition; models for new venture development which include consideration of the resourcing requirements, the competitive landscape, team development and future strategies will be covered in greater depth/

BUSS 572: Venture Initiation (3)

Prerequisite: None

Students in this course will learn the core concepts of entrepreneurship in an easy-to-follow, logical sequence. Topics covered included: Venture Initiation; Venture Management, and Venture Development. This course will enable students to understand & appreciate how new ventures are initiated and financed. They will also hone their knowledge in applying functional skills (marketing, finance, accounting, etc.).

BUSS 573: Cases in Feasibility Analysis (3)

Prerequisite: None

This course helps students develop the analytical, conceptual, and practical skills required to test the feasibility of a new business concept: identifying, evaluating, and determining whether to exploit an entrepreneurial opportunity. This course requires students to think critically about business concepts.

BUSS 578: Business Risk Analysis and Optimization (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 478.

In the competitive business world, using data to its best advantage becomes essential. In this course, students will learn how to utilize internal and external data to measure, analyze, and predict operational risks businesses are encountering besides financial, market, and credit risks. In this course, students develop their ability to identify macro and micro level risk and evaluate risk management programs, policies, and strategies. Students will be able to analyze real business optimization problems and submit recommendations helpful for decision-makers.

BUSS 580: Operations Management and Analysis (3)

Prerequisite: None

This course is designed to provide students with an introduction to the field of operations management. It provides a clear presentation of the concepts, tools, and applications of operations management.

BUSS 581: Supply Chain and Logistic Management (3)

Prerequisite: None

This course explores the full range of modular implementations – about eight in total, often considered by businesses intending for industry dominance through highly efficient superior resources and operational efficiencies. Topics include contract and procurement strategies, legal issues, contract pricing alternatives, technical, management, and commercial requirements, RFP development, source selection, invitations to bid, bid evaluation, risk assessment, and contract negotiation and administration.

BUSS 582: Quantitative Analysis for Decision Making (3)

Prerequisite: BUSS 280

This course sheds light on students' understanding of quantitative analysis for decision-making. Students will also be able to analyze and use quantitative information for sound business decisions. The various topics covered in this course, such as Multi-Criteria Decision Analysis & Data Mining, will enhance students' skills in this area.

BUSS 583: Project and Operation Management Seminar (3)

Prerequisite: None

This course guides students through fundamental project management concepts and behavioral skills needed to successfully launch, lead, and realize benefits from projects in profit and nonprofit organizations. Successful project managers skillfully manage their resources, schedules, risks, and scope to produce a desired outcome. Students will explore operational concepts and analytic methods that are useful in understanding the management of a firm's operations. Special emphasis will be placed on familiarizing the student with the problems and issues confronting operations managers and providing the student with language, concepts, insights, and tools to deal with these issues to gain a competitive advantage through operations.

BUSS 584: Administration of Service Operations (3)

Prerequisite: None

This course is designed to provide students with an introduction to the administration of service operations. It provides a clear presentation of the concepts, tools, and applications of the field of service operations.

BUSS 585: International Strategy (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 485.

This course sheds light on students' understanding of international business theory and practice from an international business perspective. This course also helps students understand practical tools and theoretical knowledge related to international trade and the exploration of practical issues faced by business managers in international business situations.

BUSS 587: Contemporary Issues in Applying Business Analytics (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with BUSS 487.

This course will introduce students to new practices and issues emerging in Business Analytics (BA) and how those changes contribute to the effective practice of BA. Students will read and discuss various case studies to practically understand various contemporary BA issues related to business.

BUSS 588: Ethical Dilemma of Business Analytics (3)

Prerequisite: None

In this course, concerns about the access of consumers' and institutions' private information without conscious knowledge and approval and the violation of the freedom of individuals because big data analytics is depriving them of making their own decisions will be discussed and analyzed. Moreover, infringement and theft of intellectual property rights that leads to denying people and institutions the right to their ideas and innovations will be debated. Government policies and regulations toward controlling such violations will be reviewed.

BUSS 599: Contemporary Issues in Entrepreneurship (3)

Prerequisite: Minimum of 90 credits

Special Course Notes: This course is offered as an over/under with BUSS 499.

In this course, students will learn the theory of entrepreneurship and its practical implementation and contemporary issues in entrepreneurship.

BUSS 600: Consulting and HR Application (3)

Prerequisite: None

This course sheds light on students' understanding of thinking beyond training (why training); identifying the root causes of performance gaps; selecting and implementing performance consulting strategies by considering both the internal work environment and the external organizational environment.

BUSS 601: Operational Analytics (3)

Prerequisite: None

This course focuses on the operations management challenges faced by [production and service companies of various industries through business cases and analytics exercises. Particular attention is given to incorporating data-driven decision-making into companies' complex processes and the challenges involved in coordinating different decision areas of production & service operations, forecasting, sales, supply chain, inventories, queueing techniques, quality assurance, project scheduling, and reliability/ maintainability across the firm.

BUSS 604: Internship in Business Analytics (3)

Prerequisite: None

Credit Hour Breakdown: 135 hours of internship

This course provides students with an opportunity to gain knowledge and skills from planned work experience in the Data analytics specialization. Students will be exposed to a real-life business problem and apply theoretical and quantitative analytical skills to recommend solutions to decision-makers. The entire course outcome is designed in cooperation with the student, the professor, the program chair, and the university's career services department. Internships provide entry-level, career-related experience, as well as marketable skills and competencies that are highly demanded by employers. At the end of the internship, students will be able to prepare a report about the experience and skills they gained during their stay in their externship.

BUSS 605: Capstone in Business Analytics (3)

Prerequisite: Completion of 4 specialization courses

This capstone course provides an opportunity for students in the Master of Business Analytics program to integrate and apply business analytics skills and knowledge they gained from previous courses to solve real business problems. The objective is to let students access information and large data that will help them complete a semester-wide individual project that produces a business analytics report. This is a self-directed course where the instructor's role is to provide advice, suggestions, and guidance on the project. Students are required to meet weekly to exchange information about the status of their project, to read and discuss on various research works and publications.

BUSS 621: Organization Learning (3)

Prerequisite: None

The Organizational Leadership course is designed to prepare you for employment as an innovative leader in an increasingly diverse technological and global society. This course develops practical workplace competencies that will enable you to meet current and future challenges. The coursework focuses on team building, ethical decision-making, enhanced communication skills, critical thinking, and people skills.

BUSS 624: Global Leadership (3)

Prerequisite: None

This course focuses on understanding leadership and followership in an international context, providing both a theoretical framework and practical skills for leading across cultural boundaries and addressing international challenges. We will enjoy a comprehensive examination of the psychological, social, and cultural factors that underlie expectations, preferences, and judged effectiveness of leadership practices and styles in organizations and work groups in the major cultural regions of the world. The course will focus on developing the development of the student's ability to think critically about the complexity of

the direct, indirect, and interactive impact of these factors on leading within multinational organizations that operate worldwide.

BUSS 626: Globalization and Organizational Development (3)

Prerequisite: None

This course deals with human behavior in a variety of organizations. Conceptual frameworks, case discussions, and skill-oriented activities are applied to each topic. Topics include communications, motivation, group dynamics, leadership, power, organizational design and development, and organizational culture. Class sessions and assignments are intended to help participants acquire the skills managers need to improve organizational relationships and performance.

BUSS 632: International and Multicultural Issues in Organizations (3)

Prerequisite: None

This course examines key frameworks for the complex dynamics of diversity and inclusion in organizations at the individual, group, and organizational levels and for improving how people with diverse identities and from different cultures can best function and lead together at work, in ways that are mutually beneficial. What competencies and interventions help foster inclusive and equitable practices in multicultural groups and organizational systems? This brief course uses an experiential and dialogic approach to explore these and related questions from the perspective of social science—particularly organizational psychology and diversity sciences—as well as applied practice.

BUSS 635: Internship in Organization Development (3)

Prerequisite: None

Credit Hour Breakdown: 135 hours of internship

This course exposes business students to real-life work experience. The instructor & students will collaborate to find internship opportunities that are available at area companies. The student will experience first-hand what challenges and opportunities companies have in getting their products and services to market. The internship will focus both on the specific challenges & opportunities faced by your assigned company, as well as its competitors in their respective spaces. Furthermore, the internship will give you the opportunity to build a network in your area, and to transfer some of your learnings and observations to your future endeavors.

BUSS 640: Capstone in Organization Development (3)

Prerequisite: Completion of 4 specialization courses

This course sheds light on students' understanding of human resource management (HRM) more broadly across countries, cultures, institutions, and organizational types. This course helps students to explore and understand the key concepts and latest research behind the strategic management of people in organizations that operate globally.

BUSS 641: Capstone in HR Management (3)

Prerequisite: Completion of 4 specialization courses

This course sheds light on students' understanding of human resource management (HRM) more broadly across countries, cultures, institutions, and organizational types. This course helps students to explore and understand the key concepts and latest research behind the strategic management of people in organizations that operate globally.

BUSS 649: Organizational Leadership, Team Effectiveness and Communications (3)

Prerequisite: None

These themes are strategic thinking, entrepreneurial thinking, and active management. Strategy, for instance, is explicitly concerned with the determinants of superior company performance. We treat performance using the notion of the triple bottom line—the idea that economic/financial performance allows individuals and organizations to perform positively in social and environmental ways as well.

BUSS 650: Employment and Labor Law (3)

Prerequisite: None

This course is designed to provide students with a basic understanding of both labor and employment law. The course will examine the roles and responsibilities of unions and employers, as well as specific employment issues – such as discrimination based on sex, age, or disability – relevant to employers and employees alike. A comprehensive study of collective bargaining, including the negotiation process and the scope of labor contracts to include the day-to-day administration of contracts, the major substantive issues in bargaining to include their implication for public policy; and the problem of dealing with labor conflict. Students will read court decisions, prepare written answers to questions about those decisions, and answer hypothetical questions both in writing and in open class discussions.

BUSS 652: Strategic Human Capital Development (3)

Prerequisite: None

In-depth exploration of how adopting a strategic view of HR, in large part, involves considering employees as human “assets” and developing appropriate policies and programs as investments in these assets to increase their value to the organization and the marketplace. The course examines strategic issues related to staffing, training, performance management, compensation, labor relations, employee separation, and managing a global workforce.

BUSS 653: Internship in HR Management (3)

Prerequisite: None

Credit Hour Breakdown: 135 hours of internship

This course is designed to expose business students to real life experience. Instructor & students will collaborate to get an opportunity for the students to work (internship) in an area company, and to experience first-hand what challenges companies are struggling with in getting their products and services to market and what opportunities they have in getting their products and services to market. The internship will both focus on the specific challenges & opportunities faced by your assigned company, and its competitors in their respective spaces. Furthermore, the internship will give you the opportunity to build a network in your area, and to transfer some of your learnings and observations to your future endeavors.

BUSS 656: Workplace Ethics (3)

Prerequisite: None

Explores the role of individual, business, and government activities related to ethically responsible commerce and socially beneficial business activity. Analyze the concepts of business ethics from a personal and organizational perspective. Assess the ethical issues facing business leaders.

BUSS 665: Strategic Planning for Sustainability (3)

Prerequisite: None

Issues related to strategic planning and management are central in sustainability studies. Business is concerned about making money, while sustainability issues concern protecting the planet. The traditional approaches used in measuring business performance took quite short time as compared to sustainability. Environmental stewardship and sustainability are seen very skeptically by some executives, and often they do not account for the cost considerations. This course is designed to create future business executives who are sensitive to matters related to sustainability.

BUSS 667: Technology Commercialization (3)

Prerequisite: None

This course is designed to give students a thorough understanding of the technology commercialization process, from invention to market entry. Students will learn about the invention, development, acquisition, management, and exploitation of intellectual property in all areas of technology.

BUSS 668: Entrepreneurship in Innovative Industries (3)

Prerequisite: None

Students in this course will learn the techniques of new venture creation in innovative industries. The course will also provide an overview of the breadth and makeup of the industry, the challenges that new entrants face, and opportunities for successful new venture creation. This course examines entrepreneurship in an industry that creates technical goods and services, as well as consumer products and services based on innovations.

BUSS 669: Entrepreneurship in eCommerce (3)

Prerequisite: None

Students in this course will learn the concept of E-Commerce & E-Business and will examine the difference between traditional & electronic business, the various functions of eCommerce, and the different types of ISP. This course also covers E-Commerce Applications & the role of technology in brand building of the product in E-Commerce.

BUSS 670: Theory and Practice of Diversity, Equity & Inclusiveness (3)

Prerequisite: None

In-depth study of the organizational emphasis on diversity and inclusion with special emphasis on recruitment and selection; promotional prospects; compliance with Title VII, and the benefits of having a diverse workforce.

BUSS 671: Corporate Entrepreneurship (3)

Prerequisite: None

Students in this course will gain knowledge relative to corporate entrepreneurship, that is, the practice of employing entrepreneurial skills and approaches within an organization. Students will also enhance their skills by learning what businesses should do to be more entrepreneurial; that is; to achieve and sustain a true competitive advantage in today's global business environment, companies must be faster, more creative, nimble, flexible and innovative. Also, hence resource availability may be limited or non-existent to support new innovations and initiatives, business need to be more entrepreneurial.

BUSS 672: Entrepreneurial Mindset (3)

Prerequisite: None

Students in this course will gain knowledge regarding the five entrepreneurial mindsets. They will also learn the way of thinking that enables one to overcome challenges, be decisive, and accept responsibility for his or her outcomes. This course also helps students learn skills that enable them to identify and make the most.

BUSS 673: Social Entrepreneurship (3)

Prerequisite: None

This course is designed for students who want to explore social enterprise start-ups, including those who are just curious about the field and want to learn more about entrepreneurship and explore career opportunities. Students will learn the requisite knowledge and skills to develop a business feasibility plan to start a new social venture, nonprofit, or commercial enterprise.

BUSS 675: Sustainable Energy Systems (3)

Prerequisite: None

This course examines the production and consumption of energy from a systems perspective. Sustainability is examined by studying global and regional environmental impacts, economics, energy efficiency, consumption patterns, and energy policy. First, the physics of energy and energy accounting methods are introduced. Next, the current energy system that encompasses resource extraction, conversion processes, and end-users is covered. Responses to current challenges such as declining fossil fuels and climate change are then explored: unconventional fossil fuels, carbon sequestration, emerging technologies (e.g., renewable sources: biomass, wind, and photovoltaics; fuel cells), end-use efficiency, and conservation.

BUSS 676: Internship in Entrepreneurship (3)

Prerequisite: None

Credit Hour Breakdown: 135 hours of internship

This course is designed to expose business students to real-life experience. Instructor & students will collaborate to get an opportunity for students to work (internship) in an area startup and to experience first-hand what challenges young companies are struggling with in getting their products and services to market. The internship will focus on the specific challenges & opportunities faced by your assigned company and its competitors in their respective spaces. Furthermore, the internship will give you the opportunity to build a network in your area, and to transfer some of your learnings and observations to your future endeavors.

BUSS 680: Internship in Sustainable Business (3)

Prerequisite: None

Credit Hour Breakdown: 135 hours of internship

This course intends to provide students with an opportunity to gain knowledge and skills from a planned work experience in the student's chosen career field. The entire course outcome is designed in cooperation with the student, the supervisor, and the internship office. Internship placements are directly related to the student's program of study and provide learning experiences not available in the classroom setting. Internships provide entry-level, career-related experience and workplace competencies that employers value when hiring new employees. Internships may also be used as an opportunity to explore career fields.

BUSS 685: Optimality of Project Financing (3)

Prerequisite: None

This course sheds light on students' understanding of the rationale for project financing, preparing the financial plan, assessing the risks, designing the financing mix, and raising funds. The course helps students understand how to apply analytical techniques step by step.

BUSS 686: Managing Multinational Operations (3)

Prerequisite: None

This course will focus on practical managerial challenges faced by multinational corporations, such as managing organizational complexity, international strategic communications, mergers and acquisitions, international human resource assignments, political risk, corporate diplomacy and government relationships, innovation in multinational corporations, technology, and cross-culture management, among others.

BUSS 687: Emerging Challenges in Business Optimization and Technologies (3)

Prerequisite: None

Globalization presents central opportunities and challenges for business growth. Whether a firm seeks new markets for its products, lower-cost production opportunities, or high-yield investment vehicles, many of the most attractive opportunities internationally lie in "emerging markets" in Asia, Latin America, Africa, and elsewhere. At the same time, these business environments present unique risks and challenges. Achieving competitive advantage in emerging markets depends on the firm's ability to manage the risks posed by weak legal systems, which limit the enforceability of contracts and property rights while amplifying the challenges of corruption, as well as managing through the macroeconomic, trade policy, and political regime shocks that regularly visit emerging market environments.

BUSS 688: Resource Optimizations Techniques (3)

Prerequisite: None

This course presents students with updated modalities in modern approaches to achieving maximum enterprise returns on investment. Efficient Asset allocation, among other organizational performance metrics, is useful but often insufficient to emergent dynamics from the marketplace. Effective organizations are known to emphasize building value for the organization through the mastering of resource allocation techniques which produce significant differences between cost abatement and profit margins.

BUSS 689: Internship in Business Optimization (3)

Prerequisite: None

Credit Hour Breakdown: 135 hours of internship

This course is a final major field experience validation for the student candidate of business management education. As a practicum, the goal of this course is to provide an opportunity for the graduating student to be exposed to organizational leadership shadow opportunities in which the students demonstrate not just all previous courses taken but also project management work at the ground, intermediate, and senior levels.

BUSS 690: Capstone in Business Optimization (3)

Prerequisite: Completion of 4 specialization courses

The student's Capstone in Business Optimization is designed to demonstrate your accumulated learning in Business Development in a single original project of your choice, subject to the instructor's approval and under the additional supervision of a faculty mentor. You will present a thesis of no less than 20 words and no more than 25 words. This will NOT include cover page, reference pages. You will be required to have at least 10 reference peer-reviewed scholarly sources. The completed thesis or project should bring together and culminate your cognitive and intellectual growth in business and the overall academic learning experience. As you consider your research project, you will also be engaging in culminating the learning from the Business Optimization program.

BUSS 691: Capstone in Entrepreneurship (3)

Prerequisite: Completion of 4 specialization courses

This course sheds light on students' understanding of business optimizations. The course covers many practical applications of optimization models and a systematic framework that illuminates the common structures found in many successful models with focused coverage on linear programming, nonlinear programming, integer programming, and heuristic programming.

BUSS 693: Social Capital Innovation and Investment (3)

Prerequisite: None

This course sheds light on students' understanding of social entrepreneurship & early social entrepreneurship; the funders & new philanthropy; technology as a force for good & the pull of prizes; activist assets & from entrepreneurship to enterprise and impact investing & international impact investing.

BUSS 695: Capstone in Sustainable Business (3)

Prerequisite: Completion of 4 specialization courses

This course intends to direct students to acquaint the practical sustainable business consulting practices. It will help to direct students how to business practices gear towards improving the communities in which they operate. It will also be exposed them how to design a given consultancy work in different areas of businesses.

CAR 600: Career Planning & Management (3)

Prerequisite: None

This course provides an in-depth exploration and assessment of career values, occupational interests, skills, personality style, work environment preferences, specialization, career exploration, and exposure to career and occupational information resources. Students learn and practice job search strategies and tools, including resumes and interviewing skills, decision-making, goal setting, action planning, and self-marketing techniques for effective career management.

CHEM 101: General Chemistry (3)

Prerequisite: None

This course introduces the fundamentals of chemistry, including atomic and molecular structure, thermo-chemical changes, and conservation of energy.

COMM 111: Oral Communication (3)

Prerequisite: None

The purpose of this course is to expand one's capacity to engage in effective oral communication – from dialogue between two individuals to presentations before groups of all sizes.

Oral communication refers to the speaking and listening skills needed to participate in discussions – to exchange thoughts, to inform and be informed through one another's assertions and assessments, to make offers, requests, and declarations, to explore options, and to make promises and commitments.

The first four weeks of this course explore the context of oral communication to include the effect of individual predispositions or worldviews on oral communication, our awareness, open-mindedness, and understanding of cultural diversity. We also explore the theory and structure of speech acts.

The remainder of this course is focused on developing the skills of oral communication in a variety of contexts, requiring the learner to adapt the communication to the commitments of the presentation. Students will focus on adapting communication styles and content to diverse speakers and audiences. This portion of the course emphasizes composing meaningful and coherent messages, conducting research, and developing effective presentation skills. Students will be required to deliver several oral presentations in front of the class during the semester.

COMM 600: Writing & Editing the News (Introduction to News Editorial Journalism) (3)

Prerequisite: None

Internship Qualified

This course is designed to teach students the craft of basic news writing and editing. Students will learn to recognize and acquire news information, cultivate sources, conduct effective interviews, and write balanced news and feature stories. Students will also learn how a newsroom functions and how news is evaluated for consideration and use in a given news cycle. Students enrolled in this course will acquire the basic knowledge necessary for practicing journalism and evaluating news through tested and ethically sound practices.

COMM 605: Media Ethics (3)

Prerequisite: None

Internship Qualified

This course will cover a wide variety of ethics issues ranging from fairness in the presentation of news (objectivity versus advocacy) to the problems associated with state-sponsored and managed media, to the murky world of maintaining secrecy to hide from the public potentially embarrassing information, on the one hand, and leaking information to the public to further political goals, on the other hand. The course will also examine the manipulation of photo imagery, censorship, and the invasions of privacy that are a part of routine business activities or intrusive government spying. The course will help students develop a deeper, yet clearer, understanding of the complexities involved in the often unethical media practices of governments, businesses, news, and other mass media practitioners.

COMM 610: News Editing (3)

Prerequisite: COMM 600

Internship Qualified

Before or after all credible journalism is the editor. This course will examine the wide-ranging role of the editor in journalism and the editing techniques that result in award-winning products. Among their many roles, editors set the editorial calendar for the year, determine content, dictate design, assign stories, provide guidance, critique and correct stories, select illustrations, and determine story placement. Students will become cognizant of the work editors do and learn what editors expect from their writers and how to deliver on those expectations.

COMM 620: Politics, Journalism, & Business (3)

Prerequisite: None

A principal subject of journalism is politics, but much of the writing about politics involves the triangular relationship between government, business, and journalists. This course will examine those relationships and demonstrate how businesses may use journalism to mediate their interest in shaping public and legislative opinion. It will also examine how government officials use the media to control public opinion and business activities. This course will offer students a clear and pragmatic

understanding of the relationship between journalists and government, allowing students to be better positioned to derive advantages in that relationship.

COMM 625: Media Relations (3)

Prerequisite: None

Internship Qualified

This course will provide an in-depth look at news media operations with a focus primarily on using news outlets to deliver, promote, and manage key business messages. Responding effectively to news media queries and crisis communications management will be principal content elements. All major mass communications media will be covered: print, radio, television, and the Internet, with an emphasis on proactivity. (If resources permit in a particular semester, the course will include a day of media training at a Washington, DC, communications facility.) In addition, students will learn how to respond to news media queries effectively, as well as plan, deliver, and manage media campaigns.

COMM 630: International Journalism (3) *Prerequisite: None*

This course will introduce the student to varying philosophical approaches, barriers, and ethical challenges to delivering news on a global basis. Emphasis will be placed on a regional approach to the news with a focus on Western and Eastern Europe; the Middle East; Northern and Sub-Saharan Africa; East, South, and Central Asia; Latin America; North America; and the U.K. There will also be some discussion of journalism education and international media controversies.

COMM 635: Mass Media & Society (3)

Prerequisite: None

Internship Qualified

The psychosocial effects of mass media are deep and varied. This course will introduce the student to the theories and structures underlying mass communications operations and how those operations affect and shape individual perceptions and social values. Additionally, the clash between traditional and emerging media changes how news is gathered, disseminated, and interpreted. The media's role in education, propaganda, and the formation of public opinion will be among other topics receiving emphasis in this course, which is designed in part to help students develop a better sense of how they may influence others through their participation in traditional and emerging mass and social media outlets.

COMM 641: Media Economics (3)

Prerequisite: None

This course will provide a comprehensive introduction to the economic context and the current financial practices of mass media companies. Students will learn the economic factors that influence the success or failure of contemporary media operations, as well as the management issues relating to new product development, the development of global markets, and the challenges of business consolidation. Differentiation will be made between the following industry categories: radio, broadcast TV, cable and satellite TV, motion pictures, music recording, newspapers, magazines, books, and Internet-based outlets.

COMM 643: US Press History (3)

Prerequisite: None

The history of the US press (and, by extension, mass media) is, in many ways, a history of US cultural and intellectual development. This course will examine that history and show how the press has changed and developed through varying economic, political, and technological eras. Emphasis will be placed on how news organizations have managed to survive through changing times and economic conditions, and how intellectual freedom changed with them, especially between the cyclical antipodes of war and peace.

COMM 645: The Development & Use of New Media Technology (3)

Prerequisite: None

The clash between traditional and emerging media continues to alter how information and entertainment purveyors reach their audiences and how audiences may become active participants in the mass communications process. The development of mass communications technology has led not only to different ways to communicate with and shape audiences, but also to different expectations by the audiences themselves. This course will introduce the student to the technologies that have formed and continue to form the basis for mass media operations, from the development of printing to the emergence and ever-expanding development of electronic media. The course will also focus on helping students to better protect their privacy and the interests of their business activities.

COMM 647: The Movies: Film & Video Criticism (3)

Prerequisite: None

Movies – produced with film, video, or hybrid techniques incorporating various types of animation – represent arguably the most influential contemporary medium, whether measured in terms of its influence on public opinion, politics, sociology, or sheer entertainment. This course will explore the history of the medium, the variety of its genres, and how films are made

and convey meaning through scripting, production, final editing, marketing, and distribution. (Caveat: This is not a hands-on course in scriptwriting or filmmaking.) The course will provide a comprehensive understanding of how movies are made, how to identify the intentions of moviemakers, and how to critically review and evaluate movies. As part of the course, students will learn how to write and publish movie reviews.

COMM 649: Small Group & Team Communications (3)

Prerequisite: None

Most work today is accomplished through teamwork. That is as true for mass media organizations as for other business organizations. One look on any given day at a major news organization like The Washington Post makes it abundantly clear that teams of writers and editors work daily to deliver individual stories. This course will focus on the small group dynamics, team building, and structure that make such work successful.

COMP 109: Computer Algorithm and Programming Logic Using Python (3)

Prerequisite: None

This course introduces core programming basics—including data types, control structures, algorithm development, and program design with functions—via the Python programming language. The course discusses the fundamental principles of Object-Oriented Programming, as well as in-depth data and information processing techniques. Students will problem-solve, explore real-world software development challenges, and create practical and contemporary applications using graphical user interfaces, graphics, and network communications.

COMP 121: Object Oriented Programming (3)

Prerequisite: COMP 109

This course concentrates on the concepts of object-oriented programming (OOP) paradigm. Concepts presented are exemplified using a selected object-oriented programming language. Topics include fundamental abstraction, modularity and encapsulation mechanisms in OOP, classes, inheritance, polymorphism, exception handling, concurrent programming, and data structures. Students complete a term project that utilizes object-oriented programming.

COMP 124: Information Technology (3)

Prerequisite: None

This course introduces approaches for using information technology and the role of the computer in modern organizations, discussing hardware and software, computer application development, data processing and database systems, and the impact of computer information systems on society. Emphasis is placed on integrating information technologies into the organization to meet organizational needs. Upon completion, students should be able to understand the different approaches to information technology and determine the correct approach to use in the organization.

COMP 127: Office Applications (3)

Prerequisite: None

This course provides an overview of personal computer applications. Students study widely used applications, including word-processing, spreadsheets, presentations, databases, and introductory elements of web development.

COMP 130: Ethical, Social, and Legal Aspects of Computing (3)

Prerequisite: None

This course first provides a review of computer systems, applications and the Internet; and thereafter discusses the impacts of technology on society and the responsibilities of technical professionals as the principal agents in developing and applying new technology. Various important and controversial issues will be discussed, such as computers and privacy, effects of communications technology on the democratic process, environmental problems, intellectual property, and technology and war. Several different ethics codes will be used as the basis for discussion of professional obligations.

COMP 135: Legal and Ethical Issues in Information System (3)

Prerequisite: None

This course explores legal and ethical issues in computer and network security. Students will discover what the laws are concerning computer and network security, including the legal boundaries for breaking into systems without authorization. The course will also cover the issues related to creating security policies for organizations, as well as the ethical responsibilities of protecting network and computer systems, and the ethical boundaries related to accessing other organizations systems.

COMP 157: Seminar I (1)

Prerequisite: None

This course introduces personal skills, talents and abilities, study habits, research methodology, and other soft skills to help students go through their undergraduate studies with more success.

COMP 172: Information Technology Services Management (3)

Prerequisite: None

This course explores legal and ethical issues in computer and network security. Students will discover what the laws are concerning computer and network security, including the legal boundaries for breaking into systems without authorization. The course will also cover the issues related to creating security policies for organizations, as well as the ethical responsibilities of protecting network and computer systems, and the ethical boundaries related to accessing other organizations systems

COMP 173: Strategic Partnerships (3)

Prerequisite: None

This course covers strategic partnerships concepts which are connected to the organization revenue and competitive advantage. Additional topics such as structure to partnerships will be covered including choosing partners, rolling out partnerships and managing strategic partnerships.

COMP 178: Information Assurance Management (3)

Prerequisite: None

The course provides an overview of several related topics in information security and assurance. The topics covered include: security architecture, security models, access control systems and methodology, applications and systems security, operation security, database security, cryptography, physical security, network and Internet security, business continuity planning, security management and law and ethics in information assurance.

COMP 231: Discrete Mathematical Methods for Computing (3)

Prerequisite: None

This course is intended to be a college-level introductory Discrete Mathematics course for either undergraduate or graduate students. The course focuses on the following seven key topics: Combinatorial Problems and Techniques, Sets, Relations and Functions, Coding Theory, Graphs, Matching, Counting Techniques, Recurrence Relations and Generating Functions.

COMP 240: Client/Server Management (3)

Prerequisite: None

The course covers the technology involved and management of Client Server architecture. The procedures, rules, and guidelines for handling technology such as LAN management and application development. Management structures and processes to manage client server environment will be discussed. Concurrent processing, program interface and algorithms in client server design will be covered. Other topics that will be discussed are: The UDP, TCP server, Windows Server administration, applications server, web servers and remote access technologies. Socket programming will be used in project. Students will be free to use either Java or Python for programming.

COMP 250: Computer Architecture and Digital Design (3)

Prerequisite: COMP 109

Design and analysis of the structure and function of modern computer systems. Topics studied include combinational and sequential logic, number systems and computer arithmetic, hardware design and organization of CPU, I/O systems and memory systems, instruction set, performance characterization and measurement. Tradeoff parameters such as performance (speed), hardware complexity (cost), memory footprint and power consumption are analyzed, current trends and developments in computer architecture and organization.

COMP 260: Introduction to Operating Systems (3)

Prerequisite: None

The course is an introduction to the fundamentals of operating systems. Topics include concurrent processes and synchronization mechanisms; processor scheduling; memory management, virtual memory; paging, file management; input/output management; deadlock management; interrupt structures, interrupt processing; device management; performance of operating systems; synchronization in a multi-programmed operating system and with virtual memory management. Formal principles are illustrated with examples and case studies of one or more contemporary operating systems.

COMP 270: Essentials of Networking (3)

Prerequisite: None

This course includes the fundamentals of network standards, concepts, topologies and terminologies of LANs, WANs, IP addressing, subnet masking and network design, and various protocols (TCP/IP, UDP). This course teaches concepts of the Open Systems Interconnection (OSI) Networking Reference Model, technologies used in wireless networking including Bluetooth, WiMAX, and RFID, network cabling, routing Protocols (static and dynamic) and network switch. Also, this course

teaches optical networking and VoIP, network security with encryption techniques as Public-Key Cryptography and Industrial Networks.

COMP 273: Information Technology Infrastructure Library (3)

Prerequisite: None

This course covers Information Technology Infrastructure Library ITIL which is widely adopted body of knowledge and best practices for successful IT Service Management. It covers concepts of ITIL which can be applied to an organization's activities.

COMP 280: Comp TIA A+ and Test Preparation (3)

Prerequisite: None

Topics covered in this course include the personal computer hardware and software troubleshooting techniques, the installation and configuration of operating systems.

COMP 281: Comp TIA Project+ (3)

Prerequisite: None

Topics covered in this course include practices of project management, project's life cycle, roles, and skills necessary to effectively initiate, plan, execute, monitor, control and close a project. Completion of this course will help to prepare students for the CompTIA Project+ Certification Exam

COMP 329: Data Structures and Algorithm Analysis (3)

Prerequisite: None

This course introduces the analysis of algorithms and the effects of data structures on them. Topics include algorithms selected from areas such as sorting, searching, shortest paths, greedy algorithms, backtracking, divide and conquer, and dynamic programming. Data structures include heaps and search, splay, and spanning trees. Analysis techniques include asymptotic worst case, expected time, amortized analysis, solution of recurrence relation and reductions between problems.

COMP 335: Cyber Law and Ethics (3)

Prerequisite: None

This course explores one of the most rapidly growing areas of law. Students will take an in-depth look at the social costs and moral problems that have arisen by the expanded use of the Internet and offers up-to-date legal and philosophical perspectives on the global scale for the business community. The course will feature current research, theoretical frameworks, and case studies, that will highlight the ethical and legal practices used in computing technologies, increase the effectiveness of computing students and professionals in applying ethical values and legal statutes, and provide insight on ethical and legal discussions of real-world applications.

COMP 340: Computer Graphics (3)

Prerequisite: None

This course covers the fundamentals of computer graphic design, including design principles, digital design structures, visual perception, hardware devices, and software. Students create and modify graphics and images using graphics design tools.

COMP 345: Introduction to Computer Security (3)

Prerequisite: None

The course is an introduction to computer security. Course topics include computer security incident response process; computer criminal evidence collection, analysis and handling, email investigation, malicious code investigation, network traffic analysis and router investigation, hacker tools analysis, and computer/network forensic report writing. The course identifies and examines information security threats, information security methods, and implementation approaches used in information technology industry.

COMP 350: Database Concepts (3)

Prerequisite: None

This course introduces the fundamental concepts for design and development of database systems. Topics include: review of relational data model and the relational manipulation languages SQL and QBE; integrity constraints; logical database design, dependency theory and normalization; query processing and optimization; transaction processing, concurrency control, recovery, and security issues in database systems; object-oriented and object-relational databases; distributed databases; emerging database applications.

COMP 360: Switching and Routing Protocols (3)

Prerequisite: None

This course introduces personal skills, talents and abilities, study habits, research methodology, and other soft skills to help students go through their undergraduate studies with more success.

COMP 361: Introduction to Data Science (3)

Prerequisite: None

This course provides an introduction to the data science and combines analytic, programming and business perspectives into easy to digest techniques and thought processes for solving real world data-centric problems.

COMP 362: Data Science Mathematical Foundations (3)

Prerequisite: None

This course introduces mathematical concepts related to the data science. The following topics will be covered the following topics such as probability, optimization, calculus, linear algebra: discrete mathematics and statistics. Applications of the theory to data science and machine learning will be developed.

COMP 363: Data Science Algorithmic Foundations (3)

Prerequisite: None

This course introduces the mathematical and algorithmic foundations of data science, including machine learning, high-dimensional geometry, and analysis of large networks. Topics include algorithms for machine learning, algorithms and analysis for clustering, probabilistic models for large networks.

COMP 364: Statistics Essential for Data Science (3)

Prerequisite: STAT 200

This course introduces the statistics fundamentals for data science. Topics include exploratory data analysis, constructing and interpreting linear and generalized linear models.

COMP 365: Cyber Security and Information Assurance (3)

Prerequisite: None

This course focuses on the managerial aspects of information security and assurance. Topics covered include access control models, information security governance, and information security program assessment and metrics. Coverage on the foundational and technical components of information security is included to reinforce key concepts. The course includes up-to-date information on changes in the field, such as national and international laws and international standards like the ISO 27000 series.

COMP 370: Essentials Digital Forensics (3)

Prerequisite: None

This course covers the concepts of digital forensics, including introduction, digital forensics process, cybercrime law, digital forensic readiness, computer forensics, mobile and embedded forensics, internet forensics, and challenges in digital forensics. I also discuss performing forensic analysis on different types of devices such as PCs, Macs, phones and other devices and the differences and main considerations of each one.

COMP 375: Human Computer Interaction (3)

Prerequisite: COMP 250

The course introduces the students to the fundamentals of human computer interaction (HCI). In considering HCI as an interface between the user and the computer, students will go through different fields of science like engineering, psychology, market needs, and industry. The course covers topics like; interaction design, conceptualizing interaction, cognitive design aspects, social interaction, emotional interaction, data gathering, data analysis, interpretation, and presentation, data at scale, design, prototyping, and construction, interaction design in practice, and interaction design evaluation.

COMP 376: Artificial Intelligence Principles (3)

Prerequisite: None

The course covers the concepts and applications of artificial intelligence. It discusses artificial intelligence as the theory and development of computer systems capable of performing activities or solving problems with little or no human involvement.

COMP 377: Machine Learning Principles (3)

Prerequisite: None

This course provides an introduction to machine learning and statistical pattern recognition. Topics covered include supervised learning: generative and discriminative learning, parametric and non-parametric learning, neural networks, and support vector machines; unsupervised learning: k-means clustering, kernel methods, dimensionality reduction; learning theory: bias and variance tradeoffs, and large margins; and adaptive control and reinforcement learning. The course also

discusses recent applications of machine learning such as speech recognition, text and web data processing, robotics, autonomous navigation, bioinformatics, and data mining.

COMP 378: Decision Making and Robotics Principles (3)

Prerequisite: None

The course will cover basic principles for robots with decision making aspects. The course will go over decision making algorithmic approaches and applications for robot perception, human trust in robot and decision-making when collaborating with robots, mobility, localization, rich interactive settings involving interactions with a dynamic environment, mapping, assistive technology, driverless vehicles, cooperative mobile robots, and robots manufacturing. Finally, the course will go over Robot Operating System (ROS).

COMP 379: Human-AI Interaction (3)

Prerequisite: None

The course forms transmission from the human computer interaction to design an interactive intelligent system by adding AI techniques and algorithms. The course will cover different applications and technologies implemented using AI like web search, mobile autocomplete, mobile photo organizer, and voice assistant. It will cover some human robot interaction like spatial, verbal, and nonverbal interaction. Finally, the course gives general guidelines to design a successful human IA interaction application with considering ethical and social aspects.

COMP 380: Wireless and Mobile Security (3)

Prerequisite: None

This course covers concepts of wireless and mobile security, including introduction to mobile and wireless networks, vulnerabilities of wireless networks, wi-fi security, Bluetooth security, WiMAX security, security in mobile networks, next generation of mobile networks.

COMP 390: Seminar II (1)

Prerequisite: COMP 157

This course provides an opportunity for students to utilize their academic experience either through a research paper or a project with their main focus on continuing their graduate studies or applying their skills in real world cases through an employment.

COMP 391: Internship in Networking (3)

Prerequisite: Minimum of 90 credits

Credit Hour Breakdown: 135 hours of internship

This course represents an opportunity for students receive academic credit through supervised practical training in networking and earn industry experience in an actual work environment. The internship course guides the learning contract established in the beginning of the term, on which students have to report at the end of term. Students are expected to work at least 135 hours per semester. Students are required to attend two meetings/seminars with their faculty advisor to determine learning objectives and assess how well learning objectives are being accomplished.

COMP 392: Internship in Cyber Security (3)

Prerequisite: Minimum of 90 credits

Credit Hour Breakdown: 135 hours of internship

This course represents an opportunity for students receive academic credit through supervised practical training in cybersecurity and earn industry experience in an actual work environment. The internship course guides the learning contract established in the beginning of the term, on which students have to report at the end of term. Students are expected to work at least 135 hours per semester. Students are required to attend two meetings/seminars with their faculty advisor to determine learning objectives and assess how well learning objectives are being accomplished.

COMP 393: Internship in AI (3)

Prerequisite: Minimum of 90 credits

Credit Hour Breakdown: 135 hours of internship

This course represents an opportunity for students receive academic credit through supervised practical training in AI and earn industry experience in an actual work environment. The internship course guides the learning contract established in the beginning of the term, on which students have to report at the end of term. Students are expected to work at least 135 hours per semester. Students are required to attend two meetings/seminars with their faculty advisor to determine learning objectives and assess how well learning objectives are being accomplished.

COMP 394: Internship in Machine Learning (3)

Prerequisite: Minimum of 90 credits

Credit Hour Breakdown: 135 hours of internship

This course represents an opportunity for students receive academic credit through supervised practical training in ML and earn industry experience in an actual work environment. The internship course guides the learning contract established in the beginning of the term, on which students have to report at the end of term. Students are expected to work at least 135 hours per semester. Students are required to attend two meetings/seminars with their faculty advisor to determine learning objectives and assess how well learning objectives are being accomplished.

COMP 396: Internship in Data Science (3)

Prerequisite: Minimum of 90 credits

Credit Hour Breakdown: 135 hours of internship

This course represents an opportunity for students receive academic credit through supervised practical training in data science and earn industry experience in an actual work environment. The internship course guides the learning contract established in the beginning of the term, on which students have to report at the end of term. Students are expected to work at least 135 hours per semester. Students are required to attend two meetings/seminars with their faculty advisor to determine learning objectives and assess how well learning objectives are being accomplished.

COMP 410: Intrusion Detection and Prevention Systems (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with COMP 510.

This course covers the concepts of intrusion detection and prevention from different aspects. The topics include network overview, infrastructure monitoring, IDS, proactive IPS, anomaly detection, web application firewalls, wireless IDS/IPS, physical intrusion detection, geospatial intrusion detection, return on investment, etc.

COMP 411: Cloud Security (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with COMP 511.

This course covers the concepts of cyber security in the realm of cloud computing. Topics include: cloud computing basics, cloud computing models, security and compliance in the cloud, foundations of integrity and trustability in the cloud, boundary control in the cloud, network security in the cloud, identity management in the cloud, virtual machines and their security.

COMP 412: Special Topics in Networking (3)

Prerequisite: Minimum of 90 credits

Special Course Notes: This course is offered as an over/under with COMP 512.

This course will cover topics of current interest, specifically emerging topics and technologies in computer networking selected by the faculty. Topics will be announced before each semester.

COMP 413: Robotics Design and Programming (3)

Prerequisite: COMP 378

Special Course Notes: This course is offered as an over/under with COMP 513.

The course will offer hands on robotics design using Python programming language. Students will dive deeply into the field of robotics and stimulate their interests throughout their participation of the entire engineering design process. This course will go over a quick introduction on robots, raspberry pi, design robot wheel, arms, sensors, and motors. Then the students will go over programming the robot vision, communication and gamepad.

COMP 414: Big Data Analytics (3)

Prerequisite: None

The course explores the roles, needs, challenges, principles, trends, platforms, analytic lifecycle/methods, and architectures/frameworks relevant to big data technology. Students will learn modern big data analytics tools/systems. Students will solve problems by using big data analytics tools/systems.

COMP 415: Natural Language Processing (3)

Prerequisite: None

The course introduces the techniques and tools necessary to build natural language processing systems/applications. It surveys the concepts and significance of the automatic manipulation of natural language by software. Students will explore the field, tools, and modern practice of natural language processing.

COMP 416: Computer Vision and Image Processing (3)

Prerequisite: None

The course covers the fundamental concepts and techniques of computer vision and image processing. Topics include formation of digital images, light propagation, color perception, optical systems, and analog-to-digital conversion of signals. It surveys the formation, properties, and enhancement of digital images.

COMP 417: Special Topics in AI (3)

Prerequisite: Minimum of 90 credits

Special Course Notes: This course is offered as an over/under with COMP 517.

This course will cover topics of current interest, specifically emerging topics and technologies in AI selected by the faculty. Topics will be announced before each semester.

COMP 418: Special Topics in ML (3)

Prerequisite: Minimum of 90 credits

Special Course Notes: This course is offered as an over/under with COMP 518.

This course will cover topics of current interest, specifically emerging topics and technologies in ML selected by the faculty. Topics will be announced before each semester.

COMP 419/519: Special Topics in Cybersecurity (3)

Prerequisite: Minimum of 90 credits

This course will cover topics of current interest, specifically emerging topics and technologies in Cybersecurity selected by the faculty. Topics will be announced before each semester.

COMP 420: Creativity in Machine Learning (3)

Prerequisite: COMP 329

This course introduces the use of machine learning algorithms and models to perform creative tasks. Topics covered include how machine learning can be leveraged for creative applications across industries. Different types of machine learning models will be explored, including Convolutional Neural Networks, and applied in creative tasks. The course also discusses potential use and misuse of innovative technologies.

COMP 421: Smart Devices Design and Applications (3)

Prerequisite: COMP 329

Special Course Notes: This course is offered as an over/under with COMP 521.

The course focuses on the technologies, examples, and application of smart devices. It covers device communication and interactions, connectivity of devices to cloud-based infrastructures, interoperability, distributed and edge computing, data collection, and methods to derive information and knowledge from connected devices and systems using artificial intelligence and machine learning. The course focuses also on smart cities and Internet of Things infrastructure. In addition to the application that students will still study, they will go through case studies of smart cities in the United States and around the globe like UK, South Korea, and Brazil.

COMP 422: Data Mining (3)

Prerequisite: COMP 329

Special Course Notes: This course is offered as an over/under with COMP 522.

The course covers the data, data types, preparation, visualization of data, patterns that can be mined, technologies that can be used and major issues in data mining. It also covers mining technologies like frequent pattern mining, association rules, Classification models, model efficiency, classification accuracy, cluster analysis and methods, clustering and analyzing different type of data, Outlier detection and analysis using cluster based and classification-based techniques, cluster, classification and pattern mining of streaming data and specialized mining methods for text data.

COMP 430: Ethical Hacking (3)

Prerequisite: None

The course introduces the fundamentals of protecting information technology resources from cyberattacks. It covers the tools and penetration testing methodologies used by the ethical hackers. Students will also learn to select and utilize tools to protect against security vulnerabilities.

COMP 431: Cryptography and Ciphering (3)

Prerequisite: None

The course will cover basic topics in Cryptography by dividing it into two parts, that is, secret key cryptography and Public key cryptography. The course contents include elements of cryptography and cryptanalysis, the classical Cryptosystems, Enigma, DES and AES algorithms and their modes of operations, MACs and Hash functions, RSA and ElGamal public key Cryptosystems, Hash Functions, Security protocols, PGP and Kerberos, X509 protocol, Zero Knowledge Techniques, Digital Cash and Electronic Voting.

COMP 429: Operating Systems Security (3)

Prerequisite: COMP 260

Special Course Notes: This course is offered as an over/under with COMP 532.

This course covers security concepts related to the operating systems. The course describes security threats in the Operating System scope and then focuses on Windows operating system and discusses the security topics in conjunction with Windows OS. The course looks at security measures for Windows, protection against malware, audit tools and group policies. And it also looks at ways to harden the Windows Operating System.

COMP 433: IoT and Smart Cities Security (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with COMP 533.

The course will feature the Interconnected IoT devices and their security, Smart City security architecture and security challenges. Privacy and Application security feature of Smart City will be covered. The course also covers challenges faced when integration technologies in Smart City applications including Big Data cybersecurity and Smart homes. Securing Free public Wi-Fi and Privacy preservation of E-Government, Smart Transport system, fraud detection and privacy concerns of augmentation of personal lifestyle of Smart Cities.

COMP 434: Information Risk Management (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with COMP 534.

The course covers Seven domains of IT infrastructure, identification of Hardware, software and personal assets, identification of threats, vulnerabilities and exploits to the assets, Analyzing Risk mitigation and security controls, Risk assessment approaches, challenges and best practices, Risk assessment methodologies, Regulations and laws, standards, guidelines, policies, Planning Risk mitigation, Business impact analysis and disaster recovery plans.

COMP 436: Cyber Security Governance and Compliance (3)

Prerequisite: COMP 432

The course surveys the frameworks, models, and mechanisms relevant to the cybersecurity governance and compliance. Students will explore the frameworks and models that can be deployed to be in compliance with business related regulations as well as to withstand different forms of cyberattacks.

COMP 440: R Programming for Data Science (3)

Prerequisite: COMP 121

During this course, students will develop basic skills for obtaining, cleaning, transforming, and visualizing real-world datasets using the R programming language and the RStudio integrated development environment. Statistical methods for analyzing, interpreting, and predicting dataset trends are then introduced and approached from a computational point of view using randomization and simulation. Additional topics may be covered, such as an introduction to advanced or special topics like cross-validation.

COMP 441: Statistical and Computational Foundations of Machine Learning (3)

Prerequisite: STAT 200

This course introduces the statistics and computational foundations of machine learning. Topics covered include probability (random variables, modeling with continuous and discrete distributions), linear algebra (inner product spaces, linear operators), and multivariate differential calculus (partial derivatives, matrix differentials) as applicable to the machine learning. Topics covered include computational complexity, analysis of algorithms, proof techniques, optimization, dynamic programming, recursion, and data structures. Students will apply the mathematical and computation concepts by writing programs.

COMP 442: Numerical Analysis (3)

Prerequisite: COMP 231

Special Course Notes: This course is offered as an over/under with COMP 542.

This course provides a range of numerical solutions for problems in natural sciences, social sciences, engineering, and business. The topics are included but not limited to linear systems of equations, matrix topic and properties, nonlinear equations, polynomials, and more. At the advanced level, topics would be approximation methods, differential equations, extrapolation methods, and error propagation.

COMP 443: Data-Intensive Distributed Computing (3)

Prerequisite: COMP 250

Special Course Notes: This course is offered as an over/under with COMP 543.

The course has two parts namely the theory and hands on. The theory will cover the topics like: Distributed system architecture, File system, processing, Transaction management, communications, Concurrency control, reliability, recovery, replication and security in the context of distributed data storage and processing. The hands-on part of the course will cover

distributed processing using Hadoop and MapReduce. Students are required to demonstrate that they can install, configure and use Hadoop at the end of the class.

COMP 444: Special Topics in Data Science (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with COMP 545.

The course will cover the concepts of assumptions, characteristics and role of scientific research and analytic skills needed for design, data sampling and analysis of experimental results. The course also covers internal and external research validation skills, control techniques. Qualitative and quantitative research methods, random and nonrandom sampling techniques, Descriptive and inferential statistical skills, trend analysis, linear modeling techniques and analysis of convergence, research report presentation.

COMP 445: Introduction to AI for Business (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with COMP 545.

In this course students will learn artificial Intelligence and machine learning techniques, methods, and software to design and develop systems to solve business problems like analytics to make decisions. Deep learning and Cognitive computing will be discussed along with the impact of robotics applications in industry and its effect on jobs with some legal implications. New generation of expert systems will be covers. IoT technologies as an enabler to analytics will be covered.

COMP 449: Financial Analysis for Technology Manager (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with COMP 549.

The course covers the financial tools managers use to address the questions such as the financial condition of the company or organization, the company's or organization's long-term investment, how to raise money for the investment, how the company or organization meets daily financial requirements. Topics include accounting statements, types of costs, profit, financial markets, investment decision tools, net present value, free cash flows, project financing, risk management, cost of capital, long-term and short-term financing, and equity financing for entrepreneurs. Discussion also covers mergers and acquisition activities, governance and ethics. Business cases from contemporary companies or organizations and readings relevant to technology management are used to illustrate the application of financial concepts.

COMP 450: Research and Analytic Skills (3)

Prerequisite: None

This course introduces personal skills, talents and abilities, study habits, research methodology, and other soft skills to help students go through their undergraduate studies with more success.

COMP 455: Information Technologies for Mobile Commerce (3)

Prerequisite: None

The course covers the financial tools managers use to address the questions such as the financial condition of the company or organization, the company's or organization's long-term investment, how to raise money for the investment, how the company or organization meets daily financial requirements. Topics include accounting statements, types of costs, profit, financial markets, investment decision tools, net present value, free cash flows, project financing, risk management, cost of capital, long-term and short-term financing, and equity financing for entrepreneurs. Discussion also covers mergers and acquisition activities, governance and ethics. Business cases from contemporary companies or organizations and readings relevant to technology management are used to illustrate the application of financial concepts.

COMP 460: Web Application Development for Business (3)

Prerequisite: None

The course covers how to develop completed browser-based business application., how to use common web tools to develop business applications. The following topics are covered such as HTML, common web technologies. This course also covers how developers can use technology to develop and deploy business applications that user's access via the Web.

COMP 463: Systems Analysis and Design for Business (3)

Prerequisite: None

This course provides an overview of the systems development life cycle when designing a business project. It introduces tools and methods for the analysis and design of information systems and the management and organizational skills needed for their implementation. Information analysis in entity-relationship modeling and process modeling in data flow diagrams will be covered as the key skills in structured system analysis and design.

COMP 465: Contemporary Issues in IT Management (3)

Prerequisite: Minimum of 90 credits completed

The course covers contemporary issues in information technology management. The following topics are covered, management issues in network, service, helpdesk, application, development and other phases of the information technology project life cycle.

COMP 480: AWS Test Preparation for Cloud Practitioner Certificate (3)

Prerequisite: None

Topics covered in this course include AWS cloud, the basic global infrastructure, architectural principles, basic security and compliance aspects of the AWS platform and the shared security model, basic/core characteristics of deploying and operating in the AWS cloud. Completion of this course will help prepare students for the AWS Cloud Practitioner certification exam.

COMP 483: IBM AI Engineering Professional Test Preparation (3)

Prerequisite: None

Topics covered in this course include machine learning, deep learning, neural networks, ML algorithms, machine learning algorithms and pipelines, supervised and unsupervised machine learning models. Completion of this course will help prepare students for the IBM AI Engineering Professional Test.

COMP 486: Comp TIA Network+ and Test Preparation (3)

Prerequisite: COMP 270

Topics covered in this course include networking architectures, cabling, Ethernet, network installations, TCP/IP and its applications, remote technology, wireless networking, network monitoring and troubleshooting. Completion of this course will help prepare students for the CompTIA Network+ certification exam.

COMP 487: Comp TIA Security+ and Test Preparation (3)

Prerequisite: COMP 345

This course provides students with the knowledge and skills to assess & evaluate the security of an IT infrastructure or environment and to recommend & implement the appropriate security solutions. Students will gain the awareness of security related laws/policies/regulations, including principles of governance, risk, and compliance. Student will learn to identify, analyze, and respond to security events and incidents. Completion of this course will prepare students to sit for the CompTIA Security+ certification exam.

COMP 484: Microsoft Certified Azure Data Scientist Associate (3)

Prerequisite: COMP 432

Topics covered in this course include. how to implement and run machine learning workloads using Azure Machine Learning Service, run data experiments, manage, train and deploy models, managing and optimizing models. Completion of this course will help prepare students for the Data Science Solution on Azure certification exam.

COMP 485: SAS Certified Data Scientist (3)

Prerequisite: None

The course will cover SAS programming steps like data preparation, use of SAS procedures and data analytics. The course will have a detailed discussion of data analytics process, Data visualization, Normal distribution, descriptive and inferential statistics, the variance, linear regression, logistic regression, Predictive Models, Preparing input for model and performance evaluations.

COMP 499: Senior Project and Seminar (4)

Prerequisite: COMP 390

This course provides a hands-on experience to undergraduate students as related to their area of interest within the scope of the program. The objective is to give students insights and access to information that will help them complete a project in this course. Students in this seminar course are expected to work under the direct supervision of the faculty advisor of the course. Students are required to attend as many meetings/seminars as needed and specified by the faculty advisor and be able to determine how well the learning objectives of the course are accomplished.

COMP 501: Advanced Operating Systems (3)

Prerequisite: COMP 260

This course provides an in-depth coverage of modern operating systems, including architectures, file systems, memory models, uniprocessor scheduling, and multiprocessor scheduling. It surveys the contribution of virtualization technology to the development of virtual machines. It also provides an overview on the embedded, cloud, and IoT operating systems.

COMP 502: Design and Analysis of Algorithms (3)

Prerequisite: COMP 329

This course provides an in-depth coverage of modern operating systems, including architectures, file systems, memory models, uniprocessor scheduling, and multiprocessor scheduling. It surveys the contribution of virtualization technology to the development of virtual machines. It also provides an overview on the embedded, cloud, and IoT operating systems.

COMP 503: Networking and Telecommunications (3)

Prerequisite: COMP 270

This course includes a comprehensive overview of the interaction and relationship between telecommunications and data processing. It covers telecommunications fundamentals, as well as the important relationships among coding, error detection and error correction, and noise. Topics as switching, timing, topological structures, routing algorithms, and teleprocessing are discussed. Other topics covered include protocols, network monitoring and security, and system validation.

COMP 504: Database Management Systems (3)

Prerequisite: COMP 350

The course covers fundamentals of logical database design. Different database models and their implementation. Relational algebra and relational calculus. Design theory of relational databases, keys, functional dependencies and normalization. Storage mechanisms. Structured query language and use of semantics for query optimization. DDL, constraints, views and triggers. Transaction processing and concurrency controls. Recovery from failures. Assertions and database.

COMP 505: Research Methods (3)

Prerequisite: None

Course covers major considerations and tasks involved in conducting scientific research, particularly in the area of information technology. It also covers research concepts, methods, evaluation, and applications of research in the information technology field. The course will also guide the students through the process of writing a research paper including the following aspects such as choosing a research problem, identifying sources, hypothesis, variables to be examined, assumptions. Students are expected to submit a proposal if they choose the Thesis COMP 698 option or a project concept paper if they choose a capstone project option COMP 680, COMP 681, or COMP 682 based on their program.

COMP 510: Intrusion Detection and Prevention Systems (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with COMP 410.

This course covers the concepts of intrusion detection and prevention from different aspects. The topics include network overview, infrastructure monitoring, IDS, proactive IPS, anomaly detection, web application firewalls, wireless IDS/IPS, physical intrusion detection, geospatial intrusion detection, return on investment, etc.

COMP 511: Cloud Security (3)

Prerequisite: None for new Graduate students; for Undergraduate students must have a minimum of 90 credits

Special Course Notes: This course is offered as an over/under with COMP 411.

This course covers the concepts of cyber security in the realm of cloud computing. Topics include: cloud computing basics, cloud computing models, security and compliance in the cloud, foundations of integrity and trustability in the cloud, boundary control in the cloud, network security in the cloud, identity management in the cloud, virtual machines and their security.

COMP 512: Special Topics in Networking (3)

Prerequisite: COMP 503 for new Graduate students; for Undergraduate students must have a minimum of 90 credits

This course will cover topics of current interest, specifically emerging topics and technologies in computer networking selected by the faculty. Topics will be announced before each semester.

COMP 513: Robotics Design and Programming (3)

Prerequisite: COMP 329 for new Graduate students; for Undergraduate students must have taken COMP 378

The course will offer hands on robotics design using Python programming language. Students will dive deeply into the field of robotics and stimulate their interests throughout their participation of the entire engineering design process. This course will go over a quick introduction on robots, raspberry pi, design robot wheel, arms, sensors, and motors. Then the students will go over programming the robot vision, communication and gamepad.

COMP 514: Neural Networks (3)

Prerequisite: None

This course surveys the intuition behind neural networks, the significance of neural networks, and best practices of neural network applications. Topics include models of a neuron, neural network architecture, perceptron algorithms, regularization

theory, principles of self-organization, self-organizing maps, learning models, intricacies of the learning process, dynamic programming, and neuro-dynamics. Students will learn the best practices and applications of neural networks.

COMP 515: Pattern Recognition (3)

Prerequisite: None

This course examines the techniques used in extracting hidden patterns and trends from the data of different categories. Students will learn the classification of objects into classes using patterns. The topics discussed in this course are: Classifiers based on Bayes decision theory and linear, nonlinear, Context dependent classifiers, Markov models, supervised and semi supervised learning, Clustering techniques and categories of clustering algorithms that includes sequential, hierarchical and based on group theory.

COMP 516: Deep Learning (3)

Prerequisite: None

This course overviews the deep learning technology and relevant subjects including theory, architectures, limits, impact, benefits, and applications. Students will learn the fundamentals of the deep learning, evaluate and select the deep learning applications based on the given requirements, and apply the best practice of the deep learning in solving business problems.

COMP 517: Special Topics in AI (3)

Prerequisite: None for new Graduate students; for Undergraduate students must have a minimum of 90 credits

Special Course Notes: This course is offered as an over/under with COMP 417.

This course will cover topics of current interest, specifically emerging topics and technologies in AI selected by the faculty. Topics will be announced before each semester.

COMP 518: Special Topics in ML (3)

Prerequisite: None for new Graduate students; for Undergraduate students must have a minimum of 90 credits

Special Course Notes: This course is offered as an over/under with COMP 418.

This course will cover topics of current interest, specifically emerging topics and technologies in ML selected by the faculty. Topics will be announced before each semester.

COMP 519: Special Topics in Cybersecurity (3)

Prerequisite: COMP 503

This course will cover topics of current interest, specifically emerging topics and technologies in Cybersecurity selected by the faculty. Topics will be announced before each semester.

COMP 520: Digital Forensics (3)

Prerequisite: None

The course surveys the fundamentals of computer forensics and the techniques used in identifying, collecting, preserving and analyzing digital evidence. Introduces the contemporary crime and the related legal issues and laws. Covers the steps and activities required in handling computer forensics, including the physical environment, hardware, software, and data.

COMP 521: Smart Devices Design and Applications (3)

Prerequisite: COMP 329

Special Course Notes: This course is offered as an over/under with COMP 421.

The course focuses on the technologies, examples, and application of smart devices. It covers device communication and interactions, connectivity of devices to cloud-based infrastructures, interoperability, distributed and edge computing, data collection, and methods to derive information and knowledge from connected devices and systems using artificial intelligence and machine learning. The course focuses also on smart cities and Internet of Things infrastructure. In addition to the application that students will study, they will go through case studies of smart cities in the United States and around the globe like UK, South Korea, and Brazil.

COMP 522: Data Mining (3)

Prerequisite: COMP 329

Special Course Notes: This course is offered as an over/under with COMP 422.

The course covers the data, data types, preparation, visualization of data, patterns that can be mined, technologies that can be used and major issues in data mining. It also covers mining technologies like frequent pattern mining, association rules, Classification models, model efficiency, classification accuracy, cluster analysis and methods, clustering and analyzing different type of data, Outlier detection and analysis using cluster based and classification-based techniques, cluster, classification and pattern mining of streaming data and specialized mining methods for text data.

COMP 523: Big Data Principles (3)

Prerequisite: COMP 504

The course covers the concepts, models, layers, and applications of the big data. Students will learn to recognize different data elements, identify frequent data operations for various types of data, design big data infrastructure plans, and apply techniques to handle the big data related problems.

COMP 524: Metadata Applications in Complex Big Data Problems (3)

Prerequisite: COMP 504

Course explores technical and analytical issues, solutions and gaps in processing large volumes of data by leveraging metadata and provides extensive understanding for theory and methods of creating and using metadata.

COMP 525: Role of Analytics in Decision-making (3)

Prerequisite: None

Course covers data analytics and its role in business decisions. This course will cover why data is important and how it has evolved. The following concepts will also be covered such as big data, a framework for conducting Data Analysis and what tools and techniques are commonly used.

COMP 527: Distributed Operating Systems (3)

Prerequisite: COMP 501

This course surveys the architecture, models, storage system, and applications of the distributed operating systems. Topics include system models, internetworking, web services, inter-process communication, remote invocation, indirect communication, name services, distributed file systems, and security issues.

COMP 528: Data Analytics Foundation (3)

Prerequisite: None

Course covers data analytics and business intelligence algorithms. Introduces algorithms for data mining and machine learning. Discusses data modeling skills required for processing and interpreting data for classification, clustering, prediction and other.

COMP 529: Information Fusion (3)

Prerequisite: None

Course provides an overview of the fundamental concepts, frameworks and applications in the field of information fusion. It discusses the design, development, implementation, integration, and validation of information fusion for real-world applications.

COMP 531: Algorithms for Data Analytics (3)

Prerequisite: COMP 329

Course covers data analytics and business intelligence algorithms. Introduces algorithms for data mining and machine learning. Discusses data modeling skills required for processing and interpreting data for classification, clustering, prediction and other.

COMP 532: Operating Systems Security (3)

Prerequisite: COMP 260

Special Course Notes: This course is offered as an over/under with COMP 429.

This course covers security concepts related to the operating systems. The course describes security threats in the Operating System scope and then focuses on Windows operating system and discusses the security topics in conjunction with Windows OS. The course looks at security measures for Windows, protection against malware, audit tools and group policies. And it also looks at ways to harden the Windows Operating System.

COMP 533: IoT and Smart Cities Security (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with COMP 433.

The course will feature the Interconnected IoT devices and their security, Smart City security architecture and security challenges. Privacy and Application security feature of Smart City will be covered. The course also covers challenges faced when integration technologies in Smart City applications including Big Data cybersecurity and Smart homes. Securing Free public Wi-Fi and Privacy preservation of E-Government, Smart Transport system, fraud detection and privacy concerns of augmentation of personal lifestyle of Smart Cities.

COMP 534: Information Risk Management (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with COMP 434.

The course covers Seven domains of IT infrastructure, identification of Hardware, software and personal assets, identification of threats, vulnerabilities and exploits to the assets, Analyzing Risk mitigation and security controls, Risk assessment approaches, challenges and best practices, Risk assessment methodologies, Regulations and laws, standards, guidelines, policies, Planning Risk mitigation, Business impact analysis and disaster recovery plans.

COMP 542: Numerical Analysis (3)

Prerequisite: COMP 231

Special Course Notes: This course is offered as an over/under with COMP 442.

This course provides a range of numerical solutions for problems in natural sciences, social sciences, engineering, and business. The topics are included but not limited to linear systems of equations, matrix topic and properties, nonlinear equations, polynomials, and more. At the advanced level, topics would be approximation methods, differential equations, extrapolation methods, and error propagation.

COMP 543: Data-Intensive Distributed Computing (3)

Prerequisite: COMP 250

Special Course Notes: This course is offered as an over/under with COMP 443.

The course has two parts namely the theory and hands on. The theory will cover the topics like: Distributed system architecture, File system, processing, Transaction management, communications, Concurrency control, reliability, recovery, replication and security in the context of distributed data storage and processing. The hands-on part of the course will cover distributed processing using Hadoop and MapReduce. Students are required to demonstrate that they can install, configure and use Hadoop at the end of the class.

COMP 544: Special Topics in Data Science (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with COMP 444.

The course will cover the concepts of assumptions, characteristics and role of scientific research and analytic skills needed for design, data sampling and analysis of experimental results. The course also covers internal and external research validation skills, control techniques. Qualitative and quantitative research methods, random and nonrandom sampling techniques, Descriptive and inferential statistical skills, trend analysis, linear modeling techniques and analysis of convergence, research report presentation.

COMP 545: Introduction to AI for Business (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with COMP 445.

In this course students will learn artificial Intelligence and machine learning techniques, methods, and software to design and develop systems to solve business problems like analytics to make decisions. Deep learning and Cognitive computing will be discussed along with the impact of robotics applications in industry and its effect on jobs with some legal implications. New generation of expert systems will be covers. IoT technologies as an enabler to analytics will be covered.

COMP 549: Financial Analysis for Technology Manager (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with COMP 449.

The course covers the financial tools managers use to address the questions such as the financial condition of the company or organization, the company's or organization's long-term investment, how to raise money for the investment, how the company or organization meets daily financial requirements. Topics include accounting statements, types of costs, profit, financial markets, investment decision tools, net present value, free cash flows, project financing, risk management, cost of capital, long-term and short-term financing, and equity financing for entrepreneurs. Discussion also covers mergers and acquisition activities, governance and ethics. Business cases from contemporary companies or organizations and readings relevant to technology management are used to illustrate the application of financial concepts.

COMP 555: Information Technologies for Mobile Commerce (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with COMP 455.

The course covers the financial tools managers use to address the questions such as the financial condition of the company or organization, the company's or organization's long-term investment, how to raise money for the investment, how the company or organization meets daily financial requirements. Topics include accounting statements, types of costs, profit, financial markets, investment decision tools, net present value, free cash flows, project financing, risk management, cost of capital, long-term and short-term financing, and equity financing for entrepreneurs. Discussion also covers mergers and acquisition activities, governance and ethics. Business cases from contemporary companies or organizations and readings relevant to technology management are used to illustrate the application of financial concepts.

COMP 560: Web Application Development for Business (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with COMP 460.

The course covers how to develop completed browser-based business application., how to use common web tools to develop business applications. The following topics are covered such as HTML, common web technologies. This course also covers how developers can use technology to develop and deploy business applications that user's access via the Web.

COMP 563: Systems Analysis and Design for Business (3)

Prerequisite: None

Special Course Notes: This course is offered as an over/under with COMP 463.

This course provides an overview of the systems development life cycle when designing a business project. It introduces tools and methods for the analysis and design of information systems and the management and organizational skills needed for their implementation. Information analysis in entity-relationship modeling and process modeling in data flow diagrams will be covered as the key skills in structured system analysis and design.

COMP 565: Contemporary Issues in IT Management (3)

Prerequisite: Minimum of 90 credits completed

Special Course Notes: This course is offered as an over/under with COMP 465.

The course covers contemporary issues in information technology management. The following topics are covered, management issues in network, service, helpdesk, application, development and other phases of the information technology project life cycle.

COMP 591: Internship I in Networking and Cybersecurity (3)

Prerequisite: Completion of core courses and 50% of the program courses

Credit Hour Breakdown: 135 hours of internship

This course offers hands-on experience to students enrolled in the Master of networking and cybersecurity degree in a domain close to their main career path intentions. Students are encouraged to pursue projects that would allow them to apply engineering design concepts gained in the classroom, going through all stages of system development, from analysis and design to implementation and testing. These three (3) credits hour project internship is for students who are expected to work a minimum of 135 hours during the semester. Students are required to attend two meetings/seminars with their faculty advisor to determine learning objectives and assess how well learning objectives are being accomplished.

COMP 593: Internship I in AI and Machine Learning (3)

Prerequisite: Completion of core courses and 50% of the program courses

Credit Hour Breakdown: 135 hours of internship

This course offers hands-on experience to students enrolled in the Master of networking and cybersecurity degree in a domain close to their main career path intentions. Students are encouraged to pursue projects that would allow them to apply engineering design concepts gained in the classroom, going through all stages of system development, from analysis and design to implementation and testing. These three (3) credits hour project internship is for students who are expected to work a minimum of 135 hours during the semester. Students are required to attend two meetings/seminars with their faculty advisor to determine learning objectives and assess how well learning objectives are being accomplished.

COMP 596: Internship I in Data Analysis (3)

Prerequisite: Completion of core courses and 50% of the program courses

Credit Hour Breakdown: 135 hours of internship

This course offers hands-on experience to students enrolled in the Master of networking and cybersecurity degree in a domain close to their main career path intentions. Students are encouraged to pursue projects that would allow them to apply engineering design concepts gained in the classroom, going through all stages of system development, from analysis and design to implementation and testing. These three (3) credits hour project internship is for students who are expected to work a minimum of 135 hours during the semester. Students are required to attend two meetings/seminars with their faculty advisor to determine learning objectives and assess how well learning objectives are being accomplished.

COMP 610: Cognitive Computing (3)

Prerequisite: None

Course covers principles, techniques and models for developing cognitive computing and artificial intelligence-based systems. Covers how to prepare and formulate data collection, sampling, preprocessing for such systems. Introducing the technical and managerial issues in developing and using applications based on cognitive computing and Artificial Intelligence Applications techniques.

COMP 611: Data Warehousing (3)

Prerequisite: COMP 540

This course examines the technical skills required to design, implement, and maintain a data warehouse. It covers basic data warehousing concepts, dimensional modeling and its benefits over ER model, data warehousing system design and implementation, gathering data from primary data sources, transforming data, cleaning and loading data (ETL) into a data marts. Integrating data marts into data warehouse. Students learn how to create a cube using OLAP and analyze cube data using client applications, the typical data warehouse components and architecture.

COMP 613: Game Design (3)

Prerequisite: COMP 502

This course covers an overview of game design and theory. Topics include the roles of game designers, game structures and elements as well as game development stages and methods. Students learn about designing, prototyping, developing, and playtesting games.

COMP 614: Speech Recognition (3)

Prerequisite: None

Course introduces essential algorithms used in speech recognition and discuss and demonstrate how to uses them as a basis to explore general text and speech and machine learning algorithms relevant to a variety of other areas in computer science. The course will make use of several software libraries and will study recent research and publications in this area.

COMP 617: AWS Certified Machine Learning (3)

Prerequisite: None

This course surveys the objectives of AWS Certified Machine Learning exam. It prepares students with the knowledge and skills needed to design, implement, deploy, and maintain machine learning solutions. Topics include AWS built-in machine learning algorithms, AWS machine learning services, exploratory data analysis using AWS machine learning tools, automatic model turning as well as data engineering with AWS S3, kinesis, and DynamoDB.

COMP 618: Google Machine Learning (3)

Prerequisite: None

This course surveys the design and development of machine models to solve business problems utilizing Google Cloud platform. Topics include design of machine learning models, machine learning algorithms, developing machine learning models, monitoring machine learning solutions, and optimizing machine learning solutions. Google machine learning knowledge and skills that students will gain include all aspects of machine learning model architecture, data preparation/processing/pipeline, metric interpretation, infrastructure management, and data engineering.

COMP 620: Wireless Network Security (3)

Prerequisite: COMP 503

The course surveys the weaknesses, architecture, components, protocols, standards, and policies of the wireless network security. Topics include the scope of the wireless network, the security policies and laws relevant to the wireless networks, the evaluation and selection of tools or systems to harden the wireless network security, and the emergency management.

COMP 621: Data Security and Data Protection (3)

Prerequisite: None

This course examines defense-in-depth strategies for securing database which are constantly under threat especially from SQL injection and other forms of attacks. It also covers mechanisms for securing data at rest and in transit. The topics covered in this course include: current protocols for the secure exchange of data; the Data Encryption Standard and the Advanced Encryption Standard and secure mechanisms for communication; the Public Key Infrastructure (PKI) and the use of digital signatures and certificates for protecting and validating data; firewalls, VPN, IDS/IPS, PKI, patch management, authentication and password security, application security, granular access control, securing database-to database communications, encryption, privacy, fault tolerance, protection of personal identifiable information (PII), regulations and compliance (SOX, HIPAA, GLBA, etc.), logging, auditing and auditing architectures. Strategies for the physical protection of information assets are also studied.

COMP 622: Principles of GIS (3)

Prerequisite: None

The course surveys the principles, data input, data models, data measurements, and applications of the geographic information system (GIS). It covers the data capturing, data storing, and data presentation via the geographic information system to support the better understanding of the spatial patterns and relationships.

COMP 623: Cisco Certified Network Professional (CCNP) (3)

Prerequisite: None

This course covers the objectives of the latest Cisco Certified Network Professional (CCNP) Enterprise core exam. It focuses on Implementing and Operating Cisco Enterprise Network Core Technologies (ENCOR). It prepares students with the knowledge of the enterprise infrastructure, including IPv4 architecture, IPv6 architecture, virtualization, infrastructure, network assurance, security, and automation as well as sit for the CCNP Enterprise core exam.

COMP 625: Certified Information Systems Security Professional (CISSP) (3)

Prerequisite: None

This course covers the objectives of Certified Information Systems Security Professional (CISSP) exam and prepares students with the knowledge and skills to sit for CISSP exam. Key topics include security architecture, security operations, asset security, identify & access management, risk management, security assessment & testing, network security, and software development security.

COMP 626: Web Analytics (3)

Prerequisite: None

This course examines web structures and extracting information from web using automated and wrapper induction. It will also cover collaborative filtering, web document indexing, content management using clustering and classification techniques, social network analysis, page ranking and HITS algorithms, sentiment analysis that includes document, sentence and aspect level sentiment analysis and opinion mining.

COMP 627: Descriptive and Predictive Analytical Tools (3)

Prerequisite: COMP 528

This course covers the survey of descriptive and predictive analytics with a detailed discussion of software tools that are used for visual analytics and predictive analysis. Course will examine the features of Visual tools like Tableau, IBM Cognos, Qlik Sense and Microsoft Power BI. Some of best available tools for predictive analysis will also be covered. Students will use Tableau and Python for hands-on exercises for visual and predictive analysis.

COMP 628: Special Topics in Data Analytics (3)

Prerequisite: None

This course will cover topics of current interest, specifically emerging topics and technologies in data analysis selected by the faculty. Topics will be announced before each semester.

COMP 629: Privacy and Security in Big Data (3)

Prerequisite: None

The course overviews the privacy and security in the big data environment, surveys the mechanisms to manage access controls to the big data systems, and discusses the big data relevant security policies. It prepares students with the knowledge and skills necessary to recognize threats, assess risks, evaluate vulnerabilities, and recommend the proper measures in order to improve and control the privacy and security in the big data system.

COMP 630: Text Analytics (3)

Prerequisite: COMP 504

This course examines text data access and retrieval method including the techniques of extracting and processing. The course will also cover NLP and information systems, Document ranking, common retrieval functions, applications of text data mining and analysis, text classification and clustering algorithms, word extraction and word clustering, topic analysis, opinion mining and sentiment analysis and use of text mining in Cybercrime. Capturing IM and IRC chats and cyberbullying detection.

COMP 631: Cloudera Certified Associate (CCA) Data Analyst (3)

Prerequisite: None

This prepares students with the knowledge and skills needed to create tables, alter tables, create views, improve query performance, prepare reports using query language commands, calculate aggregate statistics, create queries against multiple data sources, transform the output format of queries, and perform complex queries utilizing Cloudera Impala and Apache Hive. Students will be able to sit for the Cloudera Certified Associate Data Analyst (CCA159) certification exam.

COMP 632: Microsoft Certified Azure Data Scientist Associate (3)

Prerequisite: None

This course prepares students with the skills to undertake tasks, including setting up Azure Machine Learning workspace, running experiments & train models, optimizing & managing models, deploying & consuming models, planning & creating appropriate working environments for data science workloads on Azure. Students will be able to sit for Microsoft Azure Data Scientist certification exam.

COMP 680: Network and Cybersecurity Capstone Project (3)

Prerequisite: COMP 505

This course focuses on a technical project that emphasizes engineering design of capstone project in network and cybersecurity. It will be carried out by the master student under the supervision of a faculty member. Based on the project topic identified in COMP 505, students will complete the preliminary work. A progress report must be submitted at the end of the semester detailing the problem description, proposed solution approach, and a list of deliverables.

COMP 681: AI and ML Capstone Project (3)

Prerequisite: COMP 505

This course focuses on a technical project that emphasizes engineering design of capstone project in AI and Machine Learning. It will be carried out by the master student under the supervision of a faculty member. Based on the project topic identified in COMP 505, students will complete the preliminary work. A progress report must be submitted at the end of the semester detailing the problem description, proposed solution approach, and a list of deliverables.

COMP 682: Data Analytics Capstone Project (3)

Prerequisite: COMP 505

This course focuses on a technical project that emphasizes engineering design of capstone project in Data Analytics. It will be carried out by the master student under the supervision of a faculty member. Based on the project topic identified in COMP 505, students will complete the preliminary work. A progress report must be submitted at the end of the semester detailing the problem description, proposed solution approach, and a list of deliverables.

COMP 691: Internship II in Networking and Cybersecurity (3)

Prerequisite: COMP 591

Credit Hour Breakdown: 135 hours of internship

This course offers hands-on experience to students enrolled in the Master of networking and cybersecurity degree in a domain close to their main career path intentions. Students are encouraged to pursue projects that would allow them to apply engineering design concepts gained in the classroom, going through all stages of system development, from analysis and design to implementation and testing. These three (3) credits hour project internship is for students who are expected to work a minimum of 135 hours during the semester. Students are required to attend two meetings/seminars with their faculty advisor to determine learning objectives and assess how well learning objectives are being accomplished.

COMP 693: Internship II in AI and Machine Learning (3)

Prerequisite: COMP 593

Credit Hour Breakdown: 135 hours of internship

This course offers hands-on experience to students enrolled in the Master of networking and cybersecurity degree in a domain close to their main career path intentions. Students are encouraged to pursue projects that would allow them to apply engineering design concepts gained in the classroom, going through all stages of system development, from analysis and design to implementation and testing. These three (3) credits hour project internship is for students who are expected to work a minimum of 135 hours during the semester. Students are required to attend two meetings/seminars with their faculty advisor to determine learning objectives and assess how well learning objectives are being accomplished.

COMP 696: Internship II in Data Analysis (3)

Prerequisite: COMP 596

Credit Hour Breakdown: 135 hours of internship

This course offers hands-on experience to students enrolled in the Master of networking and cybersecurity degree in a domain close to their main career path intentions. Students are encouraged to pursue projects that would allow them to apply engineering design concepts gained in the classroom, going through all stages of system development, from analysis and design to implementation and testing. These three (3) credits hour project internship is for students who are expected to work a minimum of 135 hours during the semester. Students are required to attend two meetings/seminars with their faculty advisor to determine learning objectives and assess how well learning objectives are being accomplished.

COMP 698: Master Thesis (3)

Prerequisite: COMP 505

The thesis work is a continuation of the research proposal submitted in COMP 505. Students are encouraged to start their thesis work as early as possible. The thesis work can comprise the problem statement, literature review, research methodology, analysis and conclusion parts of the research established in COMP 505. In this Thesis, students complete the project and write the thesis.

ECON 101: Principles of Microeconomics (3)

Prerequisite: None

Microeconomics mainly studies the economic choices facing the individual entities, including consumers and business firms. This course covers the basic topics of economic tradeoffs, supply and demand model, concept of elasticity, consumer choice model, theories of cost and production, and the firm's behavior and performance under different market structures. The course also introduces the students to the problems of market failure and public choice, and the impacts of public policy on consumers and business firms.

ECON 102: Principles of Macroeconomics (3)

Prerequisite: None

Macroeconomics is primarily concerned with economic analysis and policy making at the national level. This course introduces the students to the basics of national income determination, measurements of inflation and unemployment rates, economic fluctuations, and economic growth. The course also covers the foundations of aggregate demand and aggregate supply, the basics of the classical and Keynesian models, the tools of fiscal and monetary policies, and an introduction to macroeconomic policy debates.

ECON 207: Intermediate Microeconomics (3)

Prerequisite: ECON 101 Principles of Microeconomics

Internship Qualified

In addition to an in-depth coverage of the core concepts covered in ECON 101, this course incorporates a number of intermediate microeconomic topics, including the general equilibrium model, game theory, and decision making under risk and uncertainty. The course applies algebra and extensive graphical analysis in presenting its main topics. It also involves problem solving to demonstrate real-world applications of the theoretical microeconomic concepts.

ECON 208: Intermediate Macroeconomics (3)

Prerequisite: ECON 102 Principles of Macroeconomics

Internship Qualified

This course goes beyond the basic concepts presented in ECON 102 and provides an in-depth coverage of the core macroeconomic topics within an analytical framework. Furthermore, it introduces the students to a number of modern macroeconomic topics; including credit market imperfections, new Keynesian economics, the monetarist counterrevolution, and international macroeconomics. The course applies algebra and extensive graphical analysis and involves problem solving to demonstrate the real-world applications of its theoretical concepts.

ENGL 120: Academic Writing (3)

Prerequisite: None

Academic Writing focuses on reviewing the fundamentals of standard written English for academic purposes. Students will practice writing common forms of academic documents and demonstrate the ability to successfully use APA formatting. This interactive class provides students with an opportunity to improve their academic writing skills necessary for success in college and beyond.

GEOG 101: World Geography (3)

Prerequisite: None

The purpose of this course is to develop your understanding of the physical, cultural, social, and economic conditions of world regions and how these conditions reflect and shape worldviews.

"The study of Geography is about more than just memorizing places on a map. It's about understanding the complexity of our world, appreciate the diversity of cultures that exist across continents and in the end, it's about using all that knowledge to help bridge divides and bring people together." - Barack Obama

The course will introduce you to global diversity with emphasis on regional and global interrelationships and interdependencies and exploration of opportunities for collaboration across regions and nations to improve the human condition and secure the planet for future generations. At the personal level, this course will guide each of us in becoming responsible global citizens through setting a good example, listening to others, and responding to others needs and having a sense of responsibility toward one another and the planet.

GEOL 101: Introduction to Geology (3)

Prerequisite: None

This course provides an introduction to the dynamics of the earth –volcanoes, earthquakes, plate tectonics, rivers and streams, groundwater, glaciers, waves, wind, and landslides –with an emphasis on the environment applications of these processes. This course also covers tools of the geologist, for example maps and aerial photographs.

GOVT 121: World Governments (3)

Prerequisite: None

Welcome to World Governments – a course opportunity to explore and discuss government systems around the globe, as well as build your own capacity to critically and thoughtfully examine the impact of government on those who are governed. This course provides you with conceptual and analytical tools that you can use to address and answer a wide range of questions about the social world. What is the purpose of government? How does government affect our quality of life and economic conditions? What about personal health and education? Does it encourage or shift social and cultural practices? What are the ethical and social obligations that it has to the people? Is it aligned with the ethics and sense of moral good of those governed?

This course has been designed to encourage your engagement in the fast-paced world we live in while drawing distinctions and comparisons between the way we govern and are governed around the world. The focus is on understanding and explaining political phenomena that take place within a nation's government system. Our approach is to explore the extent to which governments systems serve their citizens, as well as the system's global impact.

Throughout the course, you will focus on selected countries, and using the tools of analysis of political systems, will examine the evidence of impact across multiple factors and seek to reach conclusions about the extent to which citizens and global interests are being served. You will also consider government systems in terms of a theory of worldviews and explore options for building conditions that have the potential of increasing capacity for serving humanity and the planet.

This course is organized into four parts:

- In Part 1, you will explore the purpose, types, structure, and political processes of government systems in the world today, as well identify the core values and beliefs associated with each type. This portion of the course is primarily descriptive and qualitative. It provides a foundation for more in-depth exploration in subsequent weeks of study.
- Part 2 introduces dimensions of geopolitics and analysis of government systems and the primary tools used for that analysis. During this part of the course, you will begin to apply those tools to describe assigned nation-states.
- In Part 3, you will use a variety of available resources to help them assess the consequences of government systems for their citizens, other nations, and the world. Using the tools and domains of assessment introduced in the previous section, you will conduct an in-depth assessment, analysis, and comparison of selected governments in today's world.
- Part 4 introduces a theory of worldviews as applied to government systems and explores strategies for further developing each government's ability to serve their citizens, other nations, and the world. You will assess worldviews of selected countries and suggest strategies for advancing those worldviews.

GOVT 130: American Society and Politics (3)

Prerequisite: None

The class is designed to provide students with a core understanding of American politics and society and inspire their interest and possibly involvement in the American political system. It is comprised of three main modules. The first part of the course explores the historic, cultural and religious origins of the American state and focuses on the issues of American exceptionalism, national identity, religious roots and early political development. The second module centers on the key principles, institutions, and decision-making processes of the American political system, and evaluates the basis strengths and weaknesses of American modern governance. Finally, module three, examines some of the most current and prominent dilemmas in modern American life, including the politics of race, social security, health care and gender issues.

HIST 101: World History (3)

Prerequisite: None

World History is the only course offering students an overview of the entire history of humankind. The major emphasis is on the study of significant people, events, and issues from the earliest times to the present. Traditional historical points of reference in world history are identified as students analyze important events and issues in western civilization as well as in civilizations in other parts of the world.

HUMN 101: Introduction to the Arts and Humanities (3)

Prerequisite: None

This course is designed to provide a conceptual understanding and overview of the major disciplines of the humanities including music, theatre, cinema, visual arts, philosophy, and literature. This course will help students hone their critical thinking, interpretation, and discussion skills.

HUMN 105: Principles of Learning (3)

Prerequisite: None

The purpose of this course is to develop each student's capacity to learn in order to apply that capacity to *self-fulfillment* and *social performance* throughout life. Since life's conditions are always changing and requiring new knowledge and skills, we often find ourselves in the role of beginner. As a beginner, we can allow ourselves to live with wonder, to give ourselves permission to make mistakes, and learn from those mistakes. We can learn to trust those who can teach us as we advance from beginner through competence, proficiency, and expertise to eventual mastery in those areas of life to which we dedicate ourselves. Students will explore learning styles and learning design principles to support learning and the capacity to learn. Students will explore the language of being through speech acts and practices of presence. Students will become observers of their own speaking and listening, and through language and learning, students will understand and develop new worldviews and possibilities in life.

This course is a participatory seminar. We will discuss assigned readings, audiovisual materials, and discoveries gleaned from reflective exercises. Participants are expected to carefully review readings before class and contribute actively in seminar discussions.

HUMN 125: Foundations of Adult Development (3)

Prerequisite: None

We commonly speak of thinking patterns in one of two models. Some begin with the general or big picture and move to the specifics in an effort to find a solution to the challenge or opportunity each situation presents. Others use the pattern of moving from the specific to the general pattern by focusing on the details and aligning them so a big picture view can emerge. This course is designed to allow us to integrate both types of thinking into a holistic approach for developing our worldview. It introduces a cohesive and comprehensive system of thinking that provides a methodology for looking at the macro and micro issues simultaneously. The course introduces us to a practical and usable change technology that helps us align and connect all the variables, stakeholders, cultures, sub-cultures, and other interests of a complete system.

We begin by exploring the holistic model of worldviews based on the emergent cyclical theory of Clare Graves and conclude with an emphasis on the application of the model to real-world issues. Students will be able to incorporate these practices into the assessment and development of their particular worldview and take effective action in developing solutions at macro and micro levels across multiple domains of human concerns.

This course is a participatory seminar. We will discuss assigned readings and discoveries gleaned from reflective exercises. Participants are expected to carefully review readings before class and contribute actively in seminar discussions.

HUMN 150: Practices of Learning (3)

Prerequisite: None

The purpose of this course is to pursue the practices of learning and being. The content of this course includes concepts and practices of observation, awareness of cognitive bias, brainstorming, critical thinking, problem-solving, decision-making, and priority-setting. The central goal of this course is to empower students to think more clearly and analytically about what they believe and be more effective in social performance.

Human beings bring a wide range of cognitive biases to our worldview and these biases can lead us to reach invalid conclusions and make decisions that make subsequent action both ineffective and inefficient. This course begins with building capacity to observe with an emphasis on openness to a "world to word" way of being as opposed to projecting our beliefs onto the world or living a "word to world" approach.

Tools and processes for exploring possibilities through brainstorming, critical thinking, problem-solving, decision-making, and priority-setting are introduced and practiced in a variety of situations inside and outside the classroom. Throughout the semester, we will emphasize the application of course material to real-world issues. Students will be able to incorporate these practices into the assessment and development of their particular worldview.

This course is a participatory seminar. We will discuss assigned readings, audiovisual materials, and discoveries gleaned from reflective exercises. Participants are expected to carefully review readings before class and contribute actively in seminar discussions.

HUMN 200: Discovering a Life of Self-Fulfillment (3)

Prerequisite: None

Self-fulfillment is the combination of the hopes we have for our lives, as well as the plans we create to achieve them. When you know what fulfills you, you can make a conscious effort to design your life around it. This course is about discovery – exploring our lives for what we find fulfilling and meaningful, declaring our commitments, and developing plans and practices that move us forward in fulfilling our commitments and creating a meaningful life. We will focus on learning and practicing how to live a meaningful and fulfilling life, cultivate what is best within yourself, and apply principles of design thinking to enhance your experiences of life across all domains of action including work, family, community, personal development, and play.

This course is a participatory seminar. We will discuss assigned readings, audiovisual materials, and discoveries gleaned from reflective exercises. Participants are expected to carefully review readings before class and contribute actively in seminar discussions.

INCS 300: Principles of Global Citizenship (3)

Prerequisite: None

The purpose of this course is to broaden the student's worldview in the context of global citizenship. Being a global citizen requires an understanding and awareness of the context of that citizenship through an exploration of the conditions shaping our future from a global perspective. The first part of this course defines the meaning and practices of global citizenship. In subsequent weeks, students will explore the nature of globalization through lenses of power, interdependence, issues of sustainability, conflict at international and regional levels, and corporate responsibility. In later weeks of the course, possible actions for addressing global issues are introduced.

This course is a participatory seminar. We will discuss assigned readings, audiovisual materials, and discoveries gleaned from experiential exercises. Participants are expected to carefully review readings before class and contribute actively in seminar discussions.

INCS 325: Practices of Global Citizenship (3)

Prerequisite: None

The purpose of this course is to broaden the student's worldview and engender pro-social values and practices. Being a global citizen includes cultural awareness, embracing diversity, promoting social justice, and responsibilities to act. This course explores the concept of citizenship, what constitutes meaningful citizenship, and the global dimensions of citizenship. Students will explore worldviews and values aligned with being a global citizen. Furthermore, students will explore the commitments and practices of being a global citizen and the differences it can make.

This course is a participatory seminar. We will discuss assigned readings, audiovisual materials, and discoveries gleaned from experiential exercises. Participants are expected to carefully review readings before class and contribute actively in seminar discussions.

MATH 160: Precalculus (3)

Prerequisite: None

The primary purpose of this course is to build skills for describing the world quantitatively using mathematical reasoning and traditional algebraic tools, and to apply those skills in day-to-day living. This course introduces the essential concepts of Precalculus needed to be successful in math including polynomial, rational, exponential, logarithmic, and trigonometric functions.

The underlying teaching philosophy is that students who study mathematics should develop skills of active inquiry and independent thought that will be used to solve problems around the world. Providing a solid foundation for the study of calculus and advanced mathematics, the course will emphasize skills development and critical thinking. It will prepare you for courses in calculus and higher mathematics and for courses in technology where knowledge of Precalculus is a prerequisite.

Throughout the course, you will explore how algebra is used in social and physical sciences and the world around you, helping to shape your worldview, increasing your capacity for impact, and empowering you to succeed in college, your career, and your life. The assigned text, *Precalculus*, by Robert Blitzer provides engaging applications of mathematical concepts to our day-to-day living.

MATH 165: Calculus I (3)

Prerequisite: MATH 160

This course covers functions, limits, the derivative, maximum and minimum problems, the integral and transcendental functions.

MBA 511: Managerial Accounting and Finance (3)

Prerequisites: ACCT 201, BUSS 303

This course focuses on companies' sources and uses of financial resources as well as accounting management. Students will focus on capital/debt structure decision and capital budgeting techniques, with particular emphasis on the impact of long and short-term uses and sources of funds on the firm's value.

MBA 512: Project & Cost Management (3)

Prerequisite: STAT 200

This course focuses on the planning, organizing, and managing of resources to bring about the successful completion of specific project goals and objectives, especially within specific start and completion dates. In addition, students will learn how to adhere to classic project constraints of scope, quality, time and budget while learning the tools and techniques necessary to minimize the risk of failure in achieving the organization's goal and objectives.

MBA 513: Organizational Behavior (3)

Prerequisite: None

This course focuses on how people behave in organizations and groups. Topics include leadership, motivation, organizational culture, and roles within groups.

MBA 514: Marketing Management (3)

Prerequisite: None

This course examines the methods and strategies used by corporations and firms in developing marketing efforts, strategy and policies. It focuses on the practical application of marketing techniques and the management of company's marketing resources and activities to create an effective, cost-efficient marketing strategy to succeed and become profitable, in particular, within rapidly emerging forces of globalization. In addition, the course provides learning experience and cultivates operational skills and knowledge on designing and facilitating marketing campaigns within the business environment.

MBA 605: Auditing (3)

Prerequisite: None

Internship Qualified

This course provides students with the knowledge of a variety of auditing issues. It focuses on basic auditing concepts and principles including professional standards, planning an audit and auditing internal controls, evidence gathering, fraud, and sampling tools for audits, as well as a review of audit procedures and audit reports.

MBA 608: Financial Reporting and Decision Making (3)

Prerequisite: None

Internship Qualified

This course presents accounting reporting and decision-making tools used in various businesses. Students will understand basic to complex financial reporting and decision-making concepts and practices. Topics include the analysis of financial statements, ratio analysis, benchmarking, valuation concepts, risk, budgeting, investments, and taxes.

MBA 610: Taxation of Business Entities (3)

Prerequisite: None

Internship Qualified

This course provides students with the knowledge of a variety of tax issues. The course includes a basic introduction to taxation, tax issues with investments, and other business transactions. The course will also cover taxation of various types of corporations and individuals including gift and income taxes.

MBA 611: Business Ethics and Law (3)

Prerequisite: None

This course examines the legal and ethical basis of decision-making in business organizations. Topics include torts, contracts, liability, and the Uniform Commercial Code.

MBA 614: International Finance (3)

Prerequisite: MBA 511

Internship Qualified

This course concentrates on the following topics: (1) basics of international financial markets including derivatives; and (2) managerial perspectives on international finance. The course includes an analysis of different types of financial instruments, such as currencies, stocks, futures, options, international risk and diversification, and swaps.

The course covers the theoretical concepts of international financial markets and the study of valuations, acquisitions, and strategies using various techniques to analyze foreign investments.

MBA 620: Long-Term Financial Decisions (3)

Prerequisite: MBA 511

Internship Qualified

This course places an emphasis on the optimal acquisition and allocation of long-term sources of capital. Topics include working capital, capital budgeting evaluation models, cash flow analysis, diversification, portfolio approaches to capital budgeting, capital structure, cost of capital, lease-purchase decisions, abandonment, and mergers.

MBA 621: Trading and Risk Management (3)

Prerequisite: MBA 511

Internship Qualified

This course will cover the different financial markets and trading theories that different market participants use to profit from moves in the market. Unlike an investments course, this class will focus more on the economic and psychological factors that move secondary markets instead of advanced calculations based on efficient market theory.

MBA 654: Accounting Information Systems (3)

Prerequisite: None

Internship Qualified

This course focuses on the analysis and design of systems that facilitate the accounting process. The students will learn how to evaluate, develop, implement and apply accounting models, processes, and internal controls used in the accounting processes. The course introduces the use of simple to complex data flow diagrams for evaluation and decision-making.

PHIL 102: Philosophy, Living, and Being (3)

Prerequisite: None

This course introduces the study of philosophy through the history of philosophical thought and texts from ancient, modern, and contemporary thinkers. It also introduces a broad spectrum of philosophical problems and perspectives with an emphasis on the systematic questioning of basic assumptions about knowledge, meaning, reality, and values.

The primary concern of philosophy is the study of ideas central to the ways we think and live. The value, however, of many of our key concepts is often hidden from us. We take the ways we make sense of ourselves and the world for granted. We forget why truth matters or acting decently is a minimal requirement for treating others justly. This course also includes an opportunity for self-reflection and consideration of one's priorities in life.

Philosophy makes the invisible visible. It cultivates techniques that will help you to become clearer about what matters to you most and develops skills that are essential in the pursuit of every discipline.

"In life, nothing matters. Unless you let it. This simple fact means you possess the greatest power in the world, the power to create your actual life experience." - John Viscount, *Mind What Matters*.

PHYS 102: Introduction to Physics (3)

Prerequisite: None

This course will introduce you to the fundamental principles of physics and their application to everyday life. The fundamental principles discussed in this course include mechanics (motion, energy, simple machines, momentum, gravity), heat and thermodynamics, electricity and magnetism, optics, sound, and light. You will gain an understanding of the physics principles involved in your everyday environment. Our approach to this course engages students by relating physics content to their lives and the greater society helping students understand the process of science by teaching critical thinking skills that are used in everyday life.

Throughout the course, you will explore how physics is used in social and physical sciences and the world around you, helping to shape your worldview, increasing your capacity for impact, and empowering you to succeed in college, your career, and your life. The assigned text, *College Physics*, provides engaging applications of physics concepts to our day-to-day living.

PMP 605: Project Management Systems (3)

Prerequisite: None

Internship Qualified

This course emphasizes planning and introduces project management fundamentals and principles from the standpoint of the manager who must organize, plan, implement, and control non-routine activities to achieve schedule, budget and performance objectives. Topics include project life cycles, project organization, project charters, work breakdown structures, responsibility matrixes, as well as basic planning, budgeting and scheduling systems. Planning and control methods such as PERT/CPM, Gantt charts, earned value systems, project management software applications, and project audits are introduced.

PMP 610: Quality Project Management Practices (3)

Prerequisite: None

This course focuses on the quality function, its implementation, and cost as well as management in both the manufacturing and service industries. The course provides students with a set of quality concepts and tools and the knowledge required for their application in quality planning, quality improvement, and quality control.

PMP 615: Risk Project Management (3)

Prerequisite: None

This course exposes students to a variety of ways to identify, analyze, and mitigate the full range of project risks. The course also explores the six risk-management processes as outlined in the PMBOK® Guide: risk management planning, risk identification, qualitative risk analysis, quantitative risk analysis, risk-response planning, and risk monitoring and control. Using a practitioner approach, students learn risk-management techniques by applying them to problems raised in case studies.

PMP 620: Contract and Procurement Management (3)

Prerequisite: None

Internship Qualified

This course examines processes through which goods and services are acquired in the project management environment. Topics include contract and procurement strategies; legal issues; contract pricing alternatives; technical, management and commercial requirements; RFP development; source selection; invitations to bid; bid evaluation; risk assessment; and contract negotiation and administration. By the end of the course, students will have a broad overview and understanding of the procurement cycle and how it relates to contracts, projects and management.

PMP 623: Leading Projects Across Cultural, Corporate, and Global Boundaries (3)

Prerequisite: None

Internship Qualified

Emerging and evolving economies, world circumstances, and global competition require that project managers be able to lead and manage project in this challenging arena. Project Managers must operate within environments that contain diverse cultures and projects including multiple corporations crossing international boundaries. Sensitive issues surrounding multinational and multicultural environments will be addressed and discussed as factors that shape project outcomes.

PMP 625: Advanced Project Management Practices (3)

Prerequisite: PMP 605

Internship Qualified

This course examines current topics in the project management field and provides a comprehensive review of the Project Management Body of Knowledge (PMBOK® Guide). Topics may include global project management, leadership, virtual teams, and project information systems. In addition, the general overview of principles and practices of the Project Management Professional (PMP) certification exam, administered by the Project Management Institute (PMI) will be introduced.

PMP 650: PMP Exam Preparation (3)

Prerequisite: PMP 605, PMP 610, and PMP 615

The focus of this course is to familiarize students with both the CAPM (Certified Associate in Project Management) and PMP (Project Management Professional) exams, as administered by the Project Management Institute (PMI). The overall exam administration processes will be reviewed and each of the knowledge areas (Integration Management, Scope Management, Time Management, Cost Management, Quality Management, Risk Management, Human Resource Management, Communication Management and Procurement & Contract Management) as aligned with the process groups (Initiating, Planning, Executing, Controlling & Monitoring and Closing phases) will also be reviewed to help students understand both the application and implication concepts

tested in the exams. Additionally, students will participate in practice exam sessions for CAPM and PMP aimed at providing for self – assessment of exam readiness.

PMP 698: Master Thesis I (3)

Prerequisite: Completion of at least five Core courses and academic advisor's approval

The thesis work can comprise basic research or a practical project. Students are encouraged to start their thesis work as early as possible. For Thesis I, the student will be asked to work with a faculty advisor to choose a suitable master's thesis topic and prepare a thesis proposal. The master's thesis project will be conducted over a period of two semesters.

PMP 699: Master Thesis II (3)

Prerequisite: PMP 698

This course is a continuation of Master's Thesis I. The thesis work can comprise the analysis and conclusion part of the research established in Master's Thesis I. In Thesis II, students complete the project and write the thesis.

PSYC 102: Introduction to Psychology (3)

Prerequisite: None

The purpose of this course is to introduce you to the fundamental principles of psychology, methodologies, and evolution of psychology. This course will help you understand humans' thoughts, feelings, and actions – Why are people the way that they are? Why do they do the things that they do? What can psychological science tell me about the world around me? And how can I use it to enrich my life and make the world a better place?

We will pursue answers to these core questions as we explore the science of behavior and mental life – from biological foundations to social and cultural influences on behavior. Topics include human behavior, personality, growth and development, moral development, cognition, memory, perception and sensation, states of consciousness, thinking and intelligence, and cultural factors shaping our way of being.

RLGN 111: World Religions (3)

Prerequisite: None

The purpose of the World Religions course is to explore the meaning of religion for humankind and the potential for religious beliefs to serve humanity at all levels – the individual, family, community, national, and global level. Religion is a core factor impacting society in economics, law, science, the arts, and for understanding politics at local, national, and global levels.

Part 1 of this course provides an overview of the teachings, historical development, and way of life for the five major world religions – Hinduism, Buddhism, Judaism, Christianity, and Islam. Following the focus of the *Invitation to World Religions* text, this course seeks to address three primary questions for each of these major world religions:

1. What is ultimate reality?
2. How should we live in this world?
3. What is our ultimate purpose?

In Part 2 of this course, we begin to take a deeper look at the beliefs and practices of the five major world religions to further develop understanding of the connections between the external/outer values of religion and the spiritual/inner values. The commitment of this approach is to further develop tolerance, understanding, and valuing of diversity across religions.

Part 3 of this course explores how our religious beliefs can serve us at all levels of society and concludes with an inquiry about the possibilities of religion to address the challenges of humanity in the world today.

SOCI 101: Sociology (3)

Prerequisite: None

The purpose of this course is to develop your understanding of socialization, culture, public policy, global inequalities, social issues, and social problems and how they impact our various communities. This course will introduce you to the origins of sociology as a discipline, the major sociological theories, and sociological concepts to enhance your understanding of sociology as a discipline. It will also expand on current social issues and social problems in our communities and create a desire in you to develop a moral compass for becoming a responsible steward of our society.

The course concludes by further developing your capacity to promote constructive social change at the local, national, regional, and global levels. To achieve these outcomes, we have organized the course into three parts:

- Part 1 lays a foundation by developing our understanding of society itself – its features and their interrelationships. In particular, we focus on two major aspects of social systems – social structure and culture.
- Part 2 directs our attention to social problems such as crime, poverty, political corruption, inequality, racism, gender bias, and other social concerns. We explore how a social problem becomes defined and seek to identify the systematic causes or sources of social problems.
- Part 3 focuses on social change including social movements, population change, and globalization. We address questions such as: What can be done to intervene in a social system? How do we generate positive social change? How do I increase my capacity to support positive change of social systems?

TLLP 250: Designing Your Life & Career (3)

Prerequisite: None

The purpose of this course is to explore possibilities and build your capacities for career success – regardless of what you choose to do or the organizations you join. Over the next fifteen weeks, we will explore ideas, tools, and processes for designing a career where you can find purpose and meaning, and develop those capabilities that are critical for career success regardless of your work. As with the recommended (but not required) prerequisites, this course is built on the foundations of self-awareness and reflection as essential conditions for realizing your full potential in all domains of action and being. We urge you to focus on both conditions as you engage in each week's assigned activities.

This course is a participatory seminar. We will discuss assigned readings, audiovisual materials, and discoveries gleaned from experiential exercises. Participants are expected to carefully review readings before class and contribute actively in seminar discussions.

TLLP 275: Practices of Social Impact (3)

Prerequisite: None

The purpose of this course is to explore possibilities and build your capacity to have social impact through career activities – regardless of what you choose to do or the organizations you join. Over the next fifteen weeks, we will explore ideas, tools, and processes for creating social impact, help you find purpose and additional meaning for your career through social impact, and help develop those capabilities that make social impact possible. As with the recommended (but not required) prerequisites, this course is built on the foundations of self-awareness and reflection as essential conditions for realizing your full potential in all domains of action and being. We urge you to focus on both conditions as you engage in each week's assigned activities.

This course is a participatory seminar. We will discuss assigned readings, audiovisual materials, and discoveries gleaned from experiential exercises. Participants are expected to carefully review readings before class and contribute actively in seminar discussions.

TLLP 400: Models of Thinking (3)

Prerequisite: None

We spend a good part of our waking hours in the act of thinking, which could be described as private conversations with ourselves. Some are of value in leading us to effective action and well-being. Others become barriers to action and well-being. The purpose of this course is to introduce concepts, tools, and processes of thinking to help you take effective action and find your way forward without being overwhelmed by life's challenges. We will explore approaches to thinking developed by philosophers over many centuries and discuss lessons learned from everyday life in applying those approaches. This course will help you be more effective and efficient in finding solutions to the challenges and opportunities you encounter throughout life.

This course is a participatory seminar. We will discuss assigned readings, audiovisual materials, and discoveries gleaned from experiential exercises. Participants are expected to carefully review readings before class and contribute actively in seminar discussions.

TLLP 425: Practices of Career Planning and Leadership (3)

Prerequisite: None

The purpose of this course is to provide concepts, tools, and processes to help you engage in career planning throughout your lifetime and prepare you for being a leader regardless of your roles and career path. The focus is on generating career options, determining priorities, setting goals, developing plans, and taking action – always keeping in mind that we live in a dynamic, complex, and evolving world. This ever-changing context of our lives requires us to continue to learn and redesign throughout our lives in support of our evolving values, beliefs, worldviews, and commitments as reflected in this quote:

“A well-designed life is a life that is generative – it is constantly creative, productive, changing, evolving, and there is always the possibility of surprise.” – Bill Burnett and Dave Evans, *Designing Your Life*.

This course is a participatory seminar. We will discuss assigned readings, audiovisual materials, and discoveries gleaned from experiential exercises. Participants are expected to carefully review readings before class and contribute actively in seminar discussions.
